Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Early Childhood and Family Development

Eligible Missouri State undergraduate students may apply for admission to the Early Childhood and Family Development program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 10 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-early-childhood-and-family-development.htm) (<https://graduate.missouristate.edu/Catalog/prog-early-childhood-and-family-development.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Educational Technology

Eligible Missouri State undergraduate students may apply for admission to the Educational Technology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-educational-technology.htm) (<https://graduate.missouristate.edu/Catalog/prog-educational-technology.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Literacy

Eligible Missouri State undergraduate students may apply for admission to the Literacy program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-literacy.htm\)](https://graduate.missouristate.edu/Catalog/prog-literacy.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Undergraduate Catalog

Environmental STEM for Teachers Certificate

Environmental STEM for Teachers

This certificate provides a 9-hour undergraduate-level experience for educators, naturalists, conservationists, environment workers, or community members. Students will increase their awareness, knowledge, and appreciation of Missouri habitats and wildlife resources and learn fundamental science, technology, engineering and math (STEM) related concepts by experiencing ways to use inquiry-based instructional methods. Through Missouri Learning Standards-based activities from all content areas; students will be trained in basic field biology to foster the confidence necessary to lead elementary school-aged children in outdoor settings.

Admission requirements

To be admitted students must have a Missouri State University GPA of 2.75 or higher; and have completed one life science or physical science course (3-4 hours) from: AST, BIO, BMS, CHM, GLG, GRY, or PHY. BIO 100 is recommended.

Program requirements (12-13 hours)

1. One life science or physical science course (3-4 hours) from astronomy, biology, biomedical sciences, chemistry, geography, geology or physics. [BIO 100](#) is recommended.
2. Three courses from: [EEM 516\(3\)](#), [EEM 517\(3\)](#), [EEM 518\(3\)](#), [EEM 519\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Family and Consumer Sciences

Major(s)

Family and Consumer Sciences

Bachelor of Science in Education (Certifiable grades K-12)

Major requirements (50 hours):

Note: 10 hours may double count toward General Education requirements.

1. Specific General Education Requirements: [PSY 121\(3\)](#); [BIO 101\(3\)](#) and [111\(1\)](#), or [BIO 121\(4\)](#) or [BMS 110\(3\)](#) and [111\(1\)](#).
2. [CFD 155\(3\)](#), [160\(3\)](#), [163\(3\)](#), [250\(3\)](#), [361\(3\)](#); [FCS 110\(3\)](#), [120\(3\)](#), [301\(3\)](#), [335\(3\)](#), [373\(3\)](#), [472\(3\)](#), [507\(1\)](#); [HSP 210\(3\)](#), [218\(3\)](#), [321\(3\)](#).
3. Public Affairs Capstone Experience will be fulfilled by completion of [FCS 472\(3\)](#).

Professional Education requirements (36 hours):

Note: A grade of "C" or better in each course is required for state certification.

1. Teaching Methods and Supervised Teaching courses (19 hours): [FCS 493\(6\)](#), [494\(6\)](#), [507\(1\)](#), [512\(3\)](#), [515\(3\)](#).
2. Additional [Professional Education Required Core and Competencies](#) (17 hours).
3. This program also requires compliance with the [Teacher Education Program](#) requirements for eligibility to enroll in Professional Education courses; admission to and continuance in the Teacher Education Program; approval for supervised teaching; and recommendation for certification which includes following GPA requirements. All GPA requirements include both Missouri State and transfer grades.
 - a. at least a 2.75 GPA on all course work attempted at all colleges attended.
 - b. at least a 3.00 GPA in the certificate subject area (major field of study) which includes all courses listed under major requirements.
 - c. at least a 3.00 GPA in any additional certificate subject area.

- d. at least a 3.00 GPA in the professional education courses which includes all courses in number 1 and 2; and no grade lower than a "C" in all professional education courses.

University level requirements

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Health Education (certifiable grades 9-12, added endorsement only)

Students who complete the BSEd degree with a major in Family and Consumer Science may receive Missouri state certification in Health Education grades 9-12 by completing the following courses:

1. [BMS 307\(4\)](#) or [KIN 250\(3\)](#), [BMS 308\(4\)](#) or [KIN 252\(3\)](#), or equivalents; [CFD 163\(3\)](#); [DTN 130\(3\)](#) or [DTN 240\(3\)](#); [KIN 253\(2\)](#), [256\(2\)](#), [257\(2\)](#), [358\(3\)](#); [PSY 101\(3\)](#); [SWK 330\(3\)](#)
2. plus additional hours of electives in health-related courses, in consultation with their advisor, to bring total to 30 hours.
3. In order to meet Missouri state teacher certification requirements, student must have at least a 3.00 GPA in the certificate subject area.

Accelerated graduate program in Educational Technology

Eligible Missouri State undergraduate students may apply for admission to the Educational Technology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-educational-technology.htm) (<https://graduate.missouristate.edu/Catalog/prog-educational-technology.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Secondary Education/Family and Consumer Sciences

Eligible Missouri State undergraduate students may apply for admission to the Secondary Education/Family and Consumer Sciences program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-secondary-education-family-and-consumer-sciences-emphasis.htm) (<https://graduate.missouristate.edu/Catalog/prog-secondary-education-family-and-consumer-sciences-emphasis.htm>) for specific admission requirements.

Family and Juvenile Support Services Certificate

Family and Juvenile Support Services

This certificate is jointly offered by the Department of Sociology and Anthropology, Department of Childhood Education and Family Development, and Department of Criminology and Criminal Justice. It is designed to provide students with the specialized training for working with families in legal contexts especially in the area of delinquency. Students who complete this certificate will better understand the nature of modern families and adolescents and the issues they deal with related to juvenile delinquency.

This certificate is administered by the Department of Sociology and Anthropology.

Admission requirements

Completion of at least 60 hours and a GPA of 2.50 or higher.

Program requirements (12 hours)

1. One course on introduction to families from: [CFD 163\(3\)](#), [CFD 361\(3\)](#), [SOC 315\(3\)](#).
2. One course on youth/adolescent studies from: [CFD 505\(3\)](#), [CFD 557\(3\)](#), [PSY 441\(3\)](#).
3. One course on delinquency from: [CRM 330\(3\)](#), [SOC 332\(3\)](#).
4. One elective course from: [CFD 562\(3\)](#), [CRM 325\(3\)](#), [SOC 310\(3\)](#), [SWK 370\(3\)](#).
5. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of 2.50 or higher for all courses used to fulfill the certificate requirements.

Undergraduate Catalog

Counseling, Leadership, and Special Education Courses

Counseling (COU) courses

COU 700 Problems in Counseling

Individual investigation into a problem or problems of concern to the student and deemed of significance by the instructor. Written report required. May be repeated to 9 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

COU 701 Assessment and Testing for Counselors

A comprehensive study of instruments for measuring psychological traits, including group devices suitable for use in elementary and secondary schools, as well as individual instruments for use in both school and community agency settings. Basic statistical concepts and common terminology related to measurement are taught as a functional part of the course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 702 School Counseling Foundations and Ethics

Philosophy, organization, and practices of a counseling program in the elementary and secondary school. The school counselor's role as counselor, consultant, and coordinator, professional identity, and legal issues are included. Includes a significant focus on ethical standards and issues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 703 Professional Orientation and Ethical Practice in School and Mental Health Counseling

An introduction and overview of the history, philosophy, and function of the counselor in elementary schools, secondary schools, clinical mental health settings, and other community agency settings. Includes an examination of service population characteristics and treatment needs, intervention modalities and approaches, professional identity, and related topics with a significant focus on ethical standards and issues. School counselors' various roles as counselor, consultant, and coordinator, professional identity, and legal issues are also included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 704 Introduction to School Counseling

Prerequisite: admission to Counseling Program or permission.

An introduction and overview of the foundational aspects of school counseling with a focus on the development, implementation, and evaluation of a comprehensive school counseling program in elementary and secondary schools (K-12). Includes an exploration of the leadership role of school counselors within the school setting at the elementary and secondary level (K-12).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

COU 705 Orientation to Personal and Professional Development in Mental Health and School Counseling

This course is an experience in personal and group encountering and sensitivity. Its purpose is to assist students in discovering a more complete awareness, understanding, and acceptance of themselves and others as human

beings. Primary emphasis will be upon students exploring self, values, needs, and personal characteristics. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

COU 706 Introduction to TeleMental Health in Counseling

This course is designed to increase knowledge and skills of counselors regarding the ethics, research, and practice associated with telemental health. Students will learn presentation skills, HIPAA compliance, best practices, crisis planning, use of technology, orienting clients, settings, and care coordination.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

COU 707 Human Growth and Development

Study of child, adolescent and adult psychological development theories, normal adjustment processes, personality structure, and abnormal behavior.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 708 Play Therapy and Child Counseling Techniques

Prerequisite: admission to a Counseling program or certificate; and COU 702 or COU 703; and COU 705; and COU 710 and COU 711 or concurrently enrollment in COU 710 and COU 711; or departmental permission.

A consideration of counseling with elementary school-aged children. Emphasis is placed upon play therapy and the counseling process as it affects the educational, personal, familial, and social adjustment of children.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 709 Introduction to Mental Health Counseling

This is an introductory survey course which introduces counseling students to the fundamentals of mental health counseling. Topics covered include the organization of mental health structures in the public domain, including funding mechanisms, licensing issues and processes, pertinent professional organizations, and emerging trends and opportunities in the counseling field.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring, Summer

COU 710 Counseling and Helping Relationships

Prerequisite: admission to Counseling program or Student Affairs in Higher Education program; and concurrent enrollment in COU 711.

Two training components are integrated to provide an intensive pre-practicum experience. The didactic component introduces basic skills of effective interpersonal communication and counseling. Participation in corequisite laboratory (COU 711) provides supervised practice in the practical application of those skills in simulated counseling interviews.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

COU 711 Counseling and Helping Relationships Lab

Prerequisite: admission to Counseling program or Student Affairs in Higher Education program.

First enrollment must be concurrent with COU 710. Designed to accompany COU 710, this lab provides an opportunity for graduate students in counseling to practice basic counseling skills in role-played sessions with live observation, video-taped review and supervisory feedback. May be repeated to 3 hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	3	Upon demand

COU 714 Social-Cultural Diversity in Counseling

Prerequisite: admission to Counseling program or permission of instructor.

An introduction to counseling theories, interventions and issues in working with clients from diverse, minority and ethnic cultures. Values, beliefs and norms of various cultures, including the student's, will be examined as they pertain to the counseling process.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 716 Adolescent and Young Adult Counseling in School and Mental Health Settings

Prerequisite: admission to Counseling program.

An introduction to adolescent and young adult counseling theory designed to help students better prepare to work with adolescents and young adults in culturally diverse school and mental health counseling settings. Emphasis is placed on relevant developmental models and the ways in which life experiences that occur during adolescence can impact early adulthood.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring, Summer

COU 720 Substance Use and Addiction Issues in Counseling

Prerequisite: admission to Counseling program; and COU 708 or COU 751; and COU 710 and COU 711; or permission of the instructor.

This course provides an overview of the biological, psychological, social and spiritual dimensions of substance use and dependency. Addictive behaviors are presented as part of the continuum of mental and emotional behavior, and the course will include co-occurring diagnoses and their associated interventions for counseling professionals. This includes diagnosis, treatment planning and implications for diverse populations. An integrated combination of lecture, case study, and field activities will be used.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 724 Assessment and Diagnosis

Prerequisite: admission to Counseling program; and COU 710 and COU 711.

Study of and practice in conducting clinical interviews, appraising and assessing level of functioning and mental status, and developing diagnoses of psychoemotional disorders. Includes assessment of learning and functioning of children. An introduction to counseling theories, interventions and issues in working with clients from diverse, minority and ethnic cultures. Values, beliefs and norms of various cultures, including the student's, will be examined as they pertain to the counseling process.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 733 Couple and Family Counseling

Prerequisite: admission to Counseling program; and COU 710 and COU 711.

An introduction to the major theories of couple and family counseling and their associated interventions. An integrated combination of lecture, discussion, demonstration and role-lay lab sessions will be used.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

COU 751 Theories and Techniques of Counseling

Prerequisite: admission to Counseling program or departmental permission.

Examination of various theoretical approaches to counseling; significance of theories in counseling practice. Overview of interventions and techniques associated with each theory. Students make an intensive investigation of a problem to be selected in counseling theory and methods. Report of the investigation required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 752 Career Development

Prerequisite: admission to Counseling program.

A consideration of the various theories of career development and their implications in counseling for vocational career development and their implications in counseling for vocational adjustment. A study of the work ethic, the labor force, and the concept of career education. Designed to give students competence in collecting and using occupational and educational information in counseling related to career development and in developing career education programs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

COU 753 Analysis of Childhood Learning and Adjustment

Prerequisite: admission to Counseling program; and SPE 310 or SPE 340 or SPE 715; and COU 701.

Acquaints student with various assessment and diagnostic procedures in evaluation of learning and adjustment problems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 754 Counseling for Post-Secondary and Career Readiness K-12

Prerequisite: admission to Counseling program.

This course is designed to prepare school counselors to engage a diverse K-12 student population in early career awareness, planning, assessment, and making informed post-secondary choices crossing the spectrum of K-12, using the ASCA National Model and Missouri Comprehensive Counseling Program as a framework. Career development theories will be explored to encourage developmentally and culturally relevant application to K-12 student populations and includes a focus on work-life adjustment into advanced adult ages, including ethical implications.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Summer

COU 756 Group Counseling and Group Work

Prerequisite: admission to Counseling program.

Acquaints counselors with group counseling theories and techniques. Includes an experiential group component.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 757 Group Counseling Through Play

Prerequisite: COU 708; and admission to Counseling program or permission of instructor.

Introduction to group therapy methods and techniques appropriate to an elementary school or mental health setting. Emphasis is placed upon foundational group therapy skills in general for all ages, and on play therapy

modalities in particular, that are appropriate for elementary-age children. Groups in an elementary setting, utilizing Missouri Comprehensive Guidance and play therapy and applications to diverse populations, will be included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 765 Research and Program Evaluation Seminar in Counseling

Prerequisite: admission to Counseling program; and SFR 780 or COU 794.

The study, analysis, and discussion of special topics, including evaluation of counseling interventions, quantitative, qualitative, and mixed methods research, and practices in program evaluation and culminating in a substantial written report. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

COU 766 Psychopharmacology for Counselors

Seminar course designed to teach current and future counselors the fundamentals of psychopharmacological agents used in mental health. Students will learn the fundamentals of neuroanatomy and neurophysiology, and relevant aspects of neurochemistry. Once this foundation is formed, students will learn about the types of psychotropic medications commonly used for major mental health conditions, the nature of their actions, indications and contra-indications for use, common dosing guidelines, and side-effects and other related risks.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 768 Crisis Counseling and Disaster Mental Health Response

Prerequisite: admission to Counseling Program or permission.

An introduction to Crisis and Disaster, to the major theories and practices of crisis Intervention and Disaster Mental Health and the associated interventions throughout the Response and Recovery phases. An integrated combination of lecture, discussion, demonstration and role-play will be used.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

COU 777 Counseling Practicum

Prerequisite: admission to Counseling program or certificate program; and COU 710 and COU 714 and COU 751 each with grade of B or better; and COU 711; and departmental approval for practicum.

Supervised counseling experience involving work with clients from the community addressing a wide range of mental health and/or school counseling (elementary and/or secondary level) related presenting issues; observation, discussion, and evaluation of counseling sessions. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	6	Fall, Spring, Summer

COU 778 Mental Health Practicum

Prerequisite: admission to Counseling program or certificate program; and COU 777 with a grade of P.

Supervised clinical mental health counseling experience of clients from the community; observation, discussion, and evaluation of counseling sessions. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	6	Fall, Spring, Summer

COU 779 School Counseling Practicum

Prerequisite: admission to Counseling program or certificate program; and COU 777 with a grade of P.

Supervised clinical mental health counseling experience of clients from the community; observation, discussion, and evaluation of counseling sessions. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	6	Fall, Spring, Summer

COU 780 Secondary School Counseling Practicum

Prerequisite: admission to Counseling program; and COU 710 and COU 714 and COU 751 each with grade of B or better; and COU 711; and department approval for practicum.

Supervised counseling with secondary school aged students and their families; observation, discussion, and evaluation of the counseling process. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Fall, Spring

COU 781 Secondary School Counseling Internship

Prerequisite: admission to Counseling program; and COU 777 or COU 780 or COU 782 or COU 784; and either COU 778 or COU 779; and either ELE 302 or SEC 302; and department permission.

Supervised experience in secondary school counseling at an approved school site. Minimum of 300 hours on-site. Students will receive individual supervision on-site, and small-group supervision from the department. May be repeated up to 9 hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	10	Fall, Spring

COU 782 Elementary School Counseling Practicum

Prerequisite: admission to Counseling program; and COU 708 and COU 710 and COU 714 each with grade of B or better; and COU 711; and department approval for practicum.

Supervised counseling with elementary school-aged children and their parents; observation, discussion, and evaluation of counseling sessions. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Spring

COU 783 Elementary School Counseling Internship

Prerequisite: admission to Counseling program; and COU 777 or COU 780 or COU 782 or COU 784; and either COU 778 or COU 779; and either ELE 302 or SEC 302; and department permission.

Supervised experience in elementary school counseling at an approved school site. Minimum of 300 hours on-site. Students will receive individual onsite supervision, and small-group supervision from the department. May be repeated up to 9 hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	10	Fall, Spring

COU 784 Mental Health Counseling Practicum

Prerequisite: admission to Counseling program; and COU 710 and COU 714 and COU 751 each with grade of B or better; and COU 711; and department approval for practicum.

Supervised counseling experience of clients from the community; observation, discussion, and evaluation of counseling sessions. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Upon demand

COU 785 Mental Health Counseling Internship

Prerequisite: admission to Counseling program; and either COU 780 or COU 784; and department permission.

Supervised experiences (individual, family, group) in counseling at an approved community agency site. Minimum of 300 hours on-site. Students will receive individual supervision on-site, and small group supervision from the department. May be repeated to 9 hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 787 Advanced Play Therapy Practicum

Prerequisite: admission to Counseling program; and COU 702 or COU 703; and COU 705 and COU 708 and COU 710 and COU 711 and COU 782; or permission of instructor.

This course is designed to provide an advanced counseling experience with elementary-aged children from the community. It serves as an integrative component to extend and amplify play therapy counseling skills, theory, and techniques learned in previous practica. Emphasis is placed on scheduling clients, completing case notes, advocating for clients, weekly supervisor and evaluation of counseling sessions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

COU 788 Introduction to Supervision, Consultation and Leadership

Prerequisite: COU 710 and COU 711; and COU 780 or COU 782 or COU 784; and admission to Counseling EdS program or departmental permission.

This course is designed to address fundamental theoretical and applied aspects of clinical supervision, consultation, and leadership. Supervision addresses the theory and practice of clinical supervision in counseling and psychotherapy and provides a supervised, practical experience of doing counseling supervision in an applied setting. Consultation focuses on providing consultation services in schools and other systems. Since counselors and psychotherapists are often called upon within schools and agencies to provide leadership, the leadership component of this course surveys the literature on leadership styles, roles, and emerging trends.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

COU 789 Advanced Level: Play Therapy Supervisor

Prerequisite: admission to Counseling program; and COU 702 or COU 703; and COU 705 and COU 708 and COU 710 and COU 711 and COU 782; or permission of instructor.

This is a course with a practicum component on-site at the Center City Counseling Clinic. The purpose of the course is to provide supervisor training in the theory and practice of supervision with master's level play therapy students to include three core knowledge areas: supervision models, theories and techniques of clinical supervision of play therapy; legal and ethical issues related to supervision; and clinical issues related to supervision.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

COU 790 Counseling Workshop

Improves skills and knowledge of counselors in specific areas. Each workshop considers a single topic in depth. 30 hours of participation equal one semester hour.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

COU 794 Introduction to Research and Program Evaluation in Counseling

Prerequisite: admission to Counseling program.

Introduction to research methods in counseling, including quantitative and qualitative methods, action research, needs assessments, and program evaluation approaches, particularly in service-delivery and educational settings. An emphasis is placed on developing an understanding of foundational research methods that will allow students to be effective critical consumers of research in counseling, identify evidence-based practices, and prepare them to design and implement sound program evaluations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

COU 795 Topics in Counseling

Individual or group class designated to address specialized topics of interest to graduate students in counseling. May be repeated to 9 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

COU 799 Thesis

Independent research and study connected with preparation of thesis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

Educational Administration (EAD) courses

EAD 745 Curriculum for Elementary Principals

This course is designed as an intermediate level course for the study of education program development, administration and supervision in accordance with the goals and outcomes as outlined by ELCC, ISLLC, MoSPE, as well as the EAD Knowledge Base. The course provides a broad overview of the essential elements of educational programs including curriculum, instruction, materials, and program evaluation recommended by the various learned societies for educational administration.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 746 Curriculum for Secondary Principals

This course is designed as an intermediate level course for the study of education program development, administration and supervision in accordance with the goals and outcomes as outlined by ELCC, ISLLC, MoSPE, as well as the EAD Knowledge Base. The course provides a broad overview of the essential elements of educational programs including curriculum, instruction, materials, and program evaluation recommended by the various learned societies for educational administration.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 751 Foundations of Educational Leadership

An introductory course designed for the student considering a career in educational leadership. Explores the history, basic theories, and major areas of responsibility in school leadership. EAD 751 is the first course to be taken in an administration degree program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 752 The Secondary School Principal

An examination of the leadership responsibilities of the secondary school principal. Instructional leadership, decision-making, problem solving, effective schools correlates, the change process, school culture, diversity and school improvement concepts will be emphasized.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 753 The Elementary School Principal

An examination of the leadership responsibilities of the elementary school principal. Instructional leadership, decision-making, problem solving, effective schools correlates, the change process, school culture, diversity and school improvement concepts will be emphasized.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 754 State and National School Leadership

Role and responsibilities of the local, state and federal agencies in school administration.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

EAD 759 Leadership Capstone

Prerequisite: EAD 788 or SFR 780.

The culminating course in the Educational Administration masters degree programs. The course results in the completion of the student's research major project; preparation and presentation of the student's graduation portfolio; and completion of departmental assessments.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 768 K-12 Principalship

This course is an examination of the leadership responsibilities of the K-12 school principal for certification K-8 and 7-12. Instructional leadership, decision-making, problem solving, effective schools correlates, data analysis, accountability, the change process, school culture, diversity, and school improvement concepts will be emphasized.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

EAD 769 Curriculum Leadership for K-12 Principals

This course is designed for future K-12 principals for the study of K-12 education program development, administration and supervision in accordance with the goals and outcomes as outlined by the Professional Standards for Educational Leaders (PSEL), the Leadership Developmental System (LDS), the Missouri Leader Standards as well as the EAD Knowledge Base. The course provides a broad overview of the essential elements of K-12 educational programs including curriculum, instruction, materials, and program evaluation recommended by the various learned societies for educational administration.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

EAD 773 Internship for Secondary Principals-Onsite-Part I

Problem-based field experiences at the secondary level encompassing building level, district level, or other specialized administrative or supervisor positions to emphasize the intern's knowledge, skills, and sensitivity in working with diverse students. Students spend specified periods of time working with experienced administrative or supervisory personnel. May be repeated to a maximum of 10 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

EAD 774 Internship for Secondary Principals-Onsite-Part II

Prerequisite: EAD 773.

Problem-based field experiences at the secondary level encompassing building level, district level, or other specialized administrative or supervisor positions to emphasize the intern's knowledge, skills, and sensitivity in working with diverse students. Students spend specified periods of time working with experienced administrative or supervisory personnel. May be repeated to a maximum of 10 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

EAD 775 Internship Secondary Principals-Related Agencies

Problem-based field experiences with various external agencies that relate to the school administrator or supervisor (i.e. juvenile court, law enforcement, community support services, etc.)

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring, Summer

EAD 776 Internship for Elementary Principals-Onsite-Part I

Problem-based field experiences encompassing building level, district level, or other specialized administrative or supervisor positions to emphasize the intern's knowledge, skills and sensitivity in working with diverse students. Students spend specified periods of time working with experienced administrative or supervisory personnel. May be repeated to a maximum of 10 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

EAD 777 Internship for Elementary Principals-Onsite-Part II

Problem-based field experiences encompassing building level, district level, or other specialized administrative or supervisory positions to emphasize the intern's knowledge, skills and sensitivity in working with diverse students. Students spend specified periods of time working with experienced administrative or supervisory personnel. May be repeated to a maximum of 10 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

EAD 778 Internship for Elementary Principals-Related Agencies

Problem-based field experiences with various external agencies that relate to the school administrator or supervisor (i.e. juvenile court, law enforcement, community support services, etc.)

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

EAD 780 Administration of Instructional Programs

An analysis of instructional programs and the role of the school administrator in developing learner-centered school cultures and supporting research-based instruction.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 781 Organizational Management

Emphasis is on basic administrative skills including fiscal management and building utilization as well as the skills and processes needed to collaboratively develop and maintain strategic plans.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 784 Multicultural Issues Involving Human Relations and Collaborative Processes

Designed to develop skills in effective interpersonal skills, written and oral communication within a diverse cultural community.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 785 Legal and Ethical Contexts of Schooling

Explores the statutory and regulatory requirements as well as the ethical implications of policy initiatives inherent in the effective operation of a school.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 786 School Supervision and Performance Enhancement

Administrative functions related to human resource management and development as well as enhancing the performance of the instructional personnel. (i.e. recruitment, selection, retention, training, supervision, evaluation of staff.)

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 787 Administration of Special Programs

Designed to provide skills to establish, administer, and supervise special education services and other student programs. Programs in the area of special education, guidance, vocational education, early childhood as well as current state and federal programs affecting education are emphasized.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 788 Action Research in Educational Leadership

Introduction to the research designs and analysis techniques of action research. Student will engage in activities designed to examine current best practices in the school setting through a methodical, research-based orientation with the ultimate goal of assessing the effect of innovative practices on a variety of school variables.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 799 Thesis

Prerequisite: EAD 788 and SFR 780.

Independent research and study connected with preparation of thesis. May be repeated to a maximum of 6 hours credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

EAD 841 Advanced Issues in School Improvement

Designed as an advanced level course for the study of barriers to learning, strategies to reduce or eliminate those barriers, stakeholder involvement, advanced strategic planning techniques and program development, in accordance with the goals and outcomes of the I.S.L.L.C. standards and the EAD Knowledge Base. The major focus of this course is to provide the skills and knowledge appropriate to assisting the student in developing artifacts necessary for completion of his/her professional portfolio. This portfolio is needed for the renewal of the initial administrator certificate in the state of Missouri and other I.S.L.L.C. member states. The course provides an opportunity for students to identify significant barriers to learning within an educational setting, analyze the conditions of the educational setting and take specific steps to eliminate the barriers and support student success.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 842 Modern Trends in Educational Administration

Designed as an advanced level course for the study of the larger contexts of education. Students will study state, multi-state and national trends/issues, analyze their effect upon local school programming and student learning, identify appropriate outside agencies for initiating collaborative relationships as well as identify adaptive leadership behaviors to respond to various trends/issues. The major focus of this course is to provide the skills and knowledge appropriate to assisting the student in developing artifacts necessary for completion of his/her professional portfolio. This portfolio is needed for the renewal of the initial administrator certificate in the

state of Missouri and other LSLLC member states. These goals and outcomes are based upon ISLLC standards as well as the EAD Knowledge Base.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 843 School and Community Partnerships

Designed as an advanced level course for the study of establishing, nurturing and sustaining effective school-community partnership programs. Students will be exposed to content and will generate material that demonstrates the ability to develop partnerships with business, higher education and other community groups which supplements the learning environment and supports the overall mission of the school as outlined by goals and objectives of the ISLLC standards as well as the EAD Knowledge Base. The major focus of this course is to provide the skills and knowledge appropriate to assisting the student in developing artifacts necessary for completion of his/her professional portfolio. This portfolio is needed for the renewal of the initial administrator certificate in the state of Missouri and other LSLLC member states. The course provides a broad overview of the essential elements of educational partnership programs while working with social agencies and elementary grant writing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 844 Leadership in Professional Development

Designed as an advanced level course for the study of enhancing professional performance through effective staff development and performance enhancement efforts. Students will demonstrate the ability to collaborate professionally with staff to enhance performance and promote successful teaching and learning in accordance with the goals and outcomes as outlined by ISLLC standards as well as the EAD Knowledge BASE. The course provides a broad overview of advanced elements of supervision including national teaching standards, adult learning theory, effective staff development and use of data to inform professional development efforts. The major focus of this course is to provide the skills and knowledge appropriate to assisting the student in developing artifacts necessary for completion of his/her professional portfolio. This portfolio is needed for the renewal of the initial administrator certificate in the state of Missouri and other LSLLC member states.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 850 Politics of Education

Overview of the origins and the nature and impact of political forces surrounding and influencing schools. Students will study the increasingly complex political web of American education as well as research the continuing debate dealing with local control versus the expanding role of state and federal government. This course will help the student in educational administration analyze the various core constituencies of school politics, analyze the issues/demands made in the school community, and study the intervening variables associated with school issues as well as the decisions which must be made by school policy makers.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 858 School Personnel

This course will provide knowledge related to areas of personnel process such as: human resource planning, recruitment, selection, placement, induction, staff development, appraisal, compensation, negotiation, employment conditions, employee data, support staff, empowerment of staff, policies and procedures, and career paths.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 860 Field Study

Prerequisite: EAD 895.

This course involves the completion of field projects conducted in cooperation with a public school district or appropriate agency. Requires a formal investigation and survey of a recognized problem within a selected institution. The nature of the investigation may also be in-depth, independent research relevant to current practice in any facet of the educational process. The subject for investigation is selected by the student with approval of the advisory committee. An oral review of the project will be presented to a selected faculty committee. May be repeated but not to exceed a total of 6 hours. A maximum of 3 hours may be counted toward degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

EAD 861 Human Relations

Designed to upgrade educational leaders in human relations skills. Major focus will be on effective group processing and dynamics, understanding learning styles and cultural diversity issues, and facilitating skills for school improvement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 862 The Superintendency

Analysis and discussion relating to current problems of school management involving decision making, data processing, operations, research, work and wages, unions and management, and purchasing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 863 Curriculum Design and Evaluation

A course designed to investigate and analyze current and innovative instructional programs. Special emphasis is given to national reports on educational practices and the development of a model school of the future.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 864 Diversity and Community Relations

An examination of the various strategies involved in establishing effective internal and external communications. The responsibilities of boards of education, administrative officials, staff personnel, students, and the community will be emphasized.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 865 School Law

Constitutional statutory and case law that relates to all staff personnel, students, school district and other allied governmental units is investigated, analyzed and discussed. Special emphasis is given to the study of contracts, dismissals, tenure, retirement, pupil injuries, liability of school personnel, school district and board member's legal rights and responsibilities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 866 Public School Finance

A study of school budgeting procedures, revenue and expenditure accounting, problems related to local, state and federal financing of public school operations. The Missouri Uniform Accounting System for Public Schools is utilized in the development of a major school finance project.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 867 School Plant Planning and Maintenance

Designed to familiarize students with the development of master plans and educational specifications for a school facility. Attention is given to site and building evaluations, barrier-free facilities, bond issues, remodeling, energy conservation, contractor and architectural responsibilities, and equipping and maintaining school plants.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EAD 870 Specialized Topics in Educational Leadership

Designed to upgrade the school administrator or leader's knowledge and skills in specialized areas of current interest and need. Variable Content Course. May be repeated to a total of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

EAD 882 Superintendency Internship-Part 1

Problem-based field experiences at the superintendency level to emphasize the intern's knowledge, skills and sensitivity in working with diverse students, staff and community. Students spend specified periods of time working with experienced administrative personnel.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

EAD 883 Superintendency Internship-Part 2

Problem-based field experience at the superintendency level to emphasize the intern's knowledge, skills and sensitivity in working with diverse students, staff and community.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

EAD 884 Special Education Director Administration Internship-Part I

Designed as a certification course for the recommendation as a Special Education Director in accordance with the goals and outcomes as outlined by ISLLC, MoSPE, as well as the EAD Knowledge Base. The course provides the broad overview of the essential elements of an internship experience in the position of a Special Education Director including the daily operation, assessment, and evaluation of student achievement/placement in appropriate educational settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

EAD 885 Special Education Director Administration Internship-Part II

This is the second part of the Special Education Director of Administration internship which has been designed as a certification course for the recommendation as a Special Education Director in accordance with the goals and outcomes as outlined by ISLLC, MoSPE, as well as the EAD Knowledge Base. The course continues the broad overview of the essential elements of an internship experience in the position of a Special Education Director including the daily operation, assessment, and evaluation of student achievement/placement in appropriate educational settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

EAD 895 Research in Administrative Practice

The study of research in the field of educational administration. This course integrates research skills and professional administrative practices. Students interpret, evaluate and apply research skills enabling them to design a Field Study proposal which is required for the Specialist degree in Educational Administration.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

Educational Leadership (EDD) courses

EDD 901 Leadership Theory and Practice

Prerequisite: admission to the Doctorate in Educational Leadership program.

Advanced study of leadership theories, concepts, and inquiry as applies to educational organizations. The course will explore leadership theories, power and authority in organizations, leader effectiveness, and organizational reform. Emphasis will be placed on understanding leadership in organizations through application and extension of leadership theories in practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Upon demand

EDD 902 Quantitative Methods in Educational Research I

Prerequisite: admission to the Doctorate in Educational Leadership program.

This course focuses on types of regression analysis and includes the following topics: simple linear regression, multiple regression, and semi-partial correlation, regression with categorical variables, categorical and continuous variables within the same model, Multilevel analysis (Hierarchical linear modeling), and structural equations. The emphasis in this course is on conceptual and practical understanding, rather than on computation. Goals are for the students to: (a) understand the basic assumptions and models underlying regression analysis, (b) use a statistical analysis package to conduct regression analysis, (c) read and interpret the output from a statistical analysis package, and (d) use this output to write a results sections.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EDD 903 Leadership Inquiry II

Prerequisite: admission to the Doctorate in Educational Leadership program.

This course is part of the statewide collaborative doctoral program. This course will emphasize a wide range of instructional methodologies, cooperative activities, problem-based learning and practical application. The students will be able to design, conduct, and report research to address problems of practice using appropriate research methodologies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

EDD 904 Content and Context of Learning

Prerequisite: admission to the Doctorate in Educational Leadership program.

Students will develop the knowledge and skills for examining, designing, and implementing school and classroom conditions that support quality learning experiences for all students and personnel. This course theme is about learning, and those issues that enhance and detract from quality learning for all. Throughout the course, participants and instructors will model optimum learning conditions and strategies. Students will be asked to demonstrate a thorough understanding of those conditions and competencies through study, critique, development and implementation of authentic learning experiences for their colleagues. Resources to support the learning experiences will include audio-visual materials, readings, internet, and simulations. Authentic assessment will be used to determine each student's level of competence in the course content.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EDD 905 Leadership Inquiry III

Prerequisite: admission to the Doctorate in Educational Leadership program.

This one hour doctoral level seminar will focus on the development of literature reviews to address problems of practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

EDD 906 Educational Leadership Inquiry IV

Prerequisite: admission to the Doctorate in Educational Leadership program.

The purpose of this advanced seminar is to deepen understanding of research by requiring students to make decisions about certain aspects of their dissertation research, following the dissertation-in-practice format. Specifically, the course will clarify the problem of practice, purpose of the study, research questions, framework,

and study design. This course is also designed to provide scaffolding for the written comprehensive examination.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

EDD 907 Program Planning and Evaluation

Prerequisite: admission to the Doctorate in Educational Leadership program.

Explores the theory and practice of evaluation of educational programs including evaluation models, research methods and design strategies to measure program outcomes, especially student and school performance. In addition, skills in program planning will be developed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EDD 908 Qualitative Tools for Applied Research in Educational Leadership

Prerequisite: admission to the Doctorate in Educational Leadership program.

This course focuses on qualitative research theory, design and analysis. Students will learn how educational leaders can use qualitative research design to critically examine research questions in their practice. They will also learn to analyze educational issues and execute processes to effectively explore those issues using qualitative methods.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

Student Affairs in Higher Education (SAE) courses

SAE 721 Introduction to Student Affairs

An introductory course designed for the student pursuing a career in Student Affairs. This course explores the origin, history, philosophy, theory, and practice related to the Student Affairs profession.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SAE 723 Student Development Theory

Prerequisite: admission to the Student Affairs in Higher Education program.

Introduces the student to student development theories. A basic understanding allows the student to note application of these theories to practice. This will result in Student Affairs professional who can design approaches that work most effectively with students.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SAE 726 Higher Education in the United States

Prerequisite: admission to the Student Affairs in Higher Education program.

The historical development of American higher education will be presented. Political, social, economic, and intellectual issues will be examined from its inception to the present day for contemporary application. A focus will be on the matrix of trend, topics, and eras. An emphasis is placed on higher education in the post World War II era creating a solid background of higher education in the last 50 years.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SAE 727 Inclusive Campus Environment

This introductory course will examine the issues, concepts, and problems that contribute to the discourse on creating and sustaining inclusive campus environments at institutions of higher education (IHEs), especially at traditional majority white institutions (TWIs). Definitely, there is not a universal pathway toward creating and sustaining inclusive campus environments. The institution's mission, culture, and traditions play a major role in shaping the context of inclusive campus environments.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SAE 728 Individual and Group Support Skills

Prerequisite: admission to the Student Affairs in Higher Education Program.

The individual purpose of this course is to help emerging Student Affairs professionals strengthen and expand their capacity to help individual undergraduates and small groups of undergraduates remove barriers which impact student success as measured in degree attainment within institutions of higher education (IHEs).

Emerging professionals with sound personal foundations and boundary spanning skills are able to partner with individuals and small groups of students who may be different. The differences may include many dimensions of diversity, including factors such as race ethnicity, gender, differential ability, and sexual orientation. Student Affairs professionals will demonstrate competence in using helping skills (listening, paraphrasing, group facilitation, and problem solving) to work with individuals and small groups in the university environment. Thus, the class will provide students through lecture and experimental learning the opportunities to acquire and practice helping skills in a safe environment. The anticipated outcome of the class is that students will acquire an advanced capability in helping students and small groups remove barriers to their academic success/degree attainment. Thus, the class seeks to align the curricular and application practices with ACPA/NASPA Personal Foundation, Helping, and Equity, Diversity and Inclusion Competencies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SAE 729 Foundations of Research

Prerequisite: admission to the Student Affairs in Higher Education program.

Students will acquire and use research methods skills. These skills will be put to use in preparing a research proposal, reviewing empirically-based journal articles, formulating hypotheses, designing observational studies, and analyzing and interpreting data.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SAE 732 Leadership and Administration in Higher Education

Prerequisite: admission to Student Affairs in Higher Education program.

Students will be provided with the opportunity to develop a firm working concept of leadership theories and principles. Upon completion of the course, students should be able to identify and discuss the role of leadership in student affairs, and be able to apply those leadership principles to activities in their job.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SAE 735 Governance and Finance in Higher Education

Prerequisite: admission to the Student Affairs in Higher Education program.

Exposure of the student to theoretical and applied concepts of governance and finance structures in higher education. Emphasis will be on organizational structures, financial operations, terminology, successful administrative/management practices, and models prevalent in higher educational settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SAE 738 Legal and Ethical Issues in Student Affairs

Prerequisite: admission to the Student Affairs in Higher Education program.

Introduction to the basic and current legal and ethical concepts that face American colleges and universities today. Topics to be discussed include the basis from which higher education law is formed; current case, state, and regulatory laws; personnel issues; and risk management and liability issues for higher education.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SAE 747 Supervised Practice

Prerequisite: admission to the Student Affairs in Higher Education program.

Students will earn academic credit for completion of two practica working in Student Affairs departments. Knowledge accumulated in coursework will be applied to the work setting. Experiences are cooperatively planned and guided by university personnel. May be repeated one time for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SAE 748 Special Projects: Reflective Moments in Higher Education and Student Affairs

Prerequisite: admission to the Student Affairs in Higher Education program or the Perspectives about the American Higher Education System graduate certificate.

The primary objective of this course is to provide students who are full-time employees at either MSU or area institutions an alternative to the traditional 6-hour supervised practice requirement that most cohort students complete through SAE 747, Supervised Practice. Similar to SAE 747, Supervised Practice, students will complete two sections of the course (6 hours) distributed over two semesters. Under the direction of the instructor, students will complete an extensive seminar/degree paper that enhances the student's graduate program portfolio requirement. May be repeated one time to a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring, Summer

SAE 749 Student Outcomes

Prerequisite: admission to the Student Affairs in Higher Education program.

Fostering undergraduates' success inside and outside of the classroom is a byproduct of academic and student affairs collaboration. The aim of the course is to help new professionals understand the outcomes of student success.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SAE 755 Topical Seminar

Prerequisite: permission of SAE Program Director.

This seminar seeks to provide students a curricular structure to assimilate emerging professional development practices in higher education and student affairs. Course will not count toward SAE degree requirements.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Summer

SAE 766 Research Methods and Data Analysis

Prerequisite: admission to the Student Affairs in Higher Education program.

This course provides a review of the most commonly utilized research designs and methods and approaches to data analysis and reporting in Student Affairs. Students will learn how to utilize research studies in the academic and professional literature and how to prepare research proposals and conduct research within a college or university setting. Students completing the course should have an understanding of the factors which influence research quality, including reliability, validity and the use and misuse of statistics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

SAE 767 Assessment and Evaluation

Prerequisite: admission to the Student Affairs in Higher Education program.

This course provides a "hands-on" approach to assessment and evaluation of individual and program outcomes in Student Affairs, focusing on how to measure change in student knowledge, skills and behaviors and the effectiveness of programs in producing outcomes. The course will also address the relationship of assessment and evaluation to: strategic, division and program planning; benchmarking and program review; and the preparation of grant proposals.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SAE 771 Capstone Seminar

Prerequisite: admission to Student Affairs in Higher Education program.

This professional seminar is designed to promote the integration of the core curriculum and practitioner experiences of the master's program in student affairs administration, and to prepare students for the transition to a professional Student Affairs position following completion of the degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

Special Education (SPE) courses

SPE 300 Service Learning in Special Education

Prerequisite: 30 hours and concurrent registration in SPE 310 or SPE 340 or SPE 715.

This service component for an existing course incorporates community service with classroom instruction in Special Education to provide an integrated learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

SPE 306 Integrating the Arts for Students with Disabilities

Prerequisite: SPE 310 and SPE 320 and SPE 345 and SPE 346; concurrent enrollment with SPE 519 or SPE 521 or SPE 619 or SPE 621 required.

Focuses on integration of five primary art forms (i.e., literature, music, drama, movement, and art) into the content area curriculum. Emphasis will be upon the five primary art forms, how they relate to and enhance one another, and how they facilitate children's learning within the core subject areas. Activities, materials, and lessons in these areas will be developed with particular attention to developmentally appropriate methodology and appropriate modifications/ accommodations useful in making the arts accessible to students with disabilities. A series of five workshops will explore the theory, methodology, and activities for integrating the arts into the daily routine of the classroom. Field experiences are a part of the course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

SPE 310 Introduction to Special Education

Prerequisite: 30 hours and at least a 2.50 GPA.

Focuses on the special education process as mandated by state and federal guidelines. Legislation, litigation, and service options pertaining to diverse populations will be stressed including those with disabilities, culturally diverse, and gifted. Emphasis will be placed on current issues in the field of special education. Special Education majors will complete required first Transition Point in this course, including purchase of Taskstream and posting of initial Teacher Education Contract and Contact Information.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

SPE 320 Introduction to Teaching Cross Categorical Special Education

Prerequisite: SPE 310; and admission to Teacher Education Program.

Focuses on students served in cross categorical special education settings as well as low incidence populations. Emphasis will be placed on theoretical perspectives, etiology, characteristics, and historical aspects pertaining to individuals with mental retardation/intellectual disabilities, developmental disabilities, behavior disorders/emotional disturbance, and learning disabilities. Introduction to lesson planning and development of individual education plans will be included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 322 Introduction to Teaching Cross-Categorical Special Education-Practicum

Prerequisite: admission to Teacher Education Program; cleared background check; and concurrent enrollment in SPE 320.

This practicum will provide students with opportunities to complete an introductory field experience involving K-12 cross-categorical special education services for children and youth with mild/moderate disabilities (i.e., learning disabilities, intellectual disabilities; developmental disabilities, emotional/behavioral disorders, and physical and other health impairments. Students are required to complete a minimum of 15 hours on-site in a cross-categorical special education setting.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

SPE 340 Educational Alternative for Exceptional Students

Prerequisite: 30 hours and at least a 2.50 GPA.

Provides an overview of characteristics and identification criteria for individuals with disabilities and gifted. Legislation and process pertaining to special education will be addressed along with a focus on teaching individuals with diversity in the elementary, middle, and secondary educational setting. Cannot be substituted for SPE 310 core requirement in the Special Education major or minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

SPE 345 Educational Evaluation of Exceptional Students

Prerequisite: SPE 310; and concurrent enrollment in SPE 346; and admitted to Teacher Education Program.

Focuses on mastery of psychometric principles as well as diagnostic and prescriptive teaching from performance based data. Federal and state process guidelines pertaining to multidisciplinary evaluation will be addressed. Emphasis will be placed on assessment of diverse individuals including those with disabilities, cultural, ethnic, and language differences. Content will address norm-referenced and curriculum-based assessment procedures, including curriculum-based measurement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Fall, Spring

SPE 346 Educational Evaluation of Exceptional Students Lab

Prerequisite: SPE 310; and concurrent enrollment in SPE 345; and admitted to Teacher Education Program.

Students will apply course content presented in SPE 345 through field based and lab activities including administration and scoring of standardized assessment instruments, development of alternative assessments, data analysis, and report writing. Lab experiences will be designed to meet specific competencies in either Early Childhood Special Education or Special Education K-12.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall, Spring

SPE 450 Methods of Teaching Mathematics to Exceptional Individuals

Prerequisite: SPE 345 and SPE 346 and MTH 320 and admitted to Teacher Education Program.

The focus of the course will include accommodating individual differences and diversifying instruction in the area of mathematics. Students will develop performance based assessment procedures, conduct error analyses, and apply mathematics skills in program planning for the diverse learner. Cannot receive credit for both SPE 450 and SPE 717.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SPE 460 Curriculum Materials for Exceptional Students

Prerequisite: SPE 310 and admitted to Teacher Education Program.

This course examines curriculum materials for use with exceptional students in various remedial areas. Students will develop skills to analyze, select, utilize, and evaluate instructional guides and materials.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

SPE 480 Problems in Special Education

Prerequisite: permission of instructor.

The student in consultation with the advisor or teacher selects a topic in special education for in-depth study and/or special investigation. Number of class hours determined by semester hours of credit. May be repeated to a maximum of 5 hours. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

SPE 491 Practicum-Teaching Individuals with Behavior Disorders/Emotional Disturbance

Prerequisite: concurrent enrollment in SPE 581 or SPE 661; and admitted to Teacher Education Program.

Students will apply skills from introductory and specialized courses in settings with students with behavior disorders/emotional disturbance. Students will be involved in individual and small group instruction, review diagnostic data, develop and implement educational programs, as well as meet with the university supervisor and other practicum students to reflect on experiences.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Spring

SPE 492 Practicum-Teaching Individuals with Learning Disabilities

Prerequisite: concurrent enrollment in SPE 582 or SPE 662; and admitted to Teacher Education Program.

Students will apply skills from introductory and specialized courses in settings with students with learning disabilities. Students will be involved in individual small group instruction, develop and implement instructional lessons, and meet with the university supervisor and other practicum students to reflect on experiences.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall

SPE 493 Practicum-Teaching Individuals with Mental Retardation/Developmental Disabilities

Prerequisite: concurrent enrollment in SPE 583 or SPE 663; and admitted to Teacher Education Program.

Students will apply skills from introductory and specialized courses in settings with students with mental retardation and developmental disabilities. Students will be involved in individual and small group instruction, develop and implement educational programs, as well as meet with the university supervisor and other practicum students to reflect on experiences.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Spring, Summer

SPE 495 Supervised Teaching-Special Education

Prerequisite: SPE 497; and SPE 517 or SPE 617; and SPE 519 or SPE 619; and SPE 521 or SPE 621; and SPE 450; grade of C or better in all professional education courses; current pre-professional liability insurance; and approval for student teaching.

Student observes, teaches and participates in professional activities under the direction of the cooperating teacher and the University supervisor. In order to receive a grade in this course, the student's clinical logs and all competency-based assessment projects must be submitted and approved. Course will not count toward the major GPA. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
9			Fall, Spring

SPE 496 Seminar: Supervised Teaching-Special Education

Prerequisite: SPE 497 or SPE 520 and SPE 522; and concurrent enrollment in SPE 495.

Student observes, teaches, and participates in professional activities under the direction of the cooperating teacher and university supervisor or university instructor. Students administer all aspects of the instructional process, incorporating data-based decision making through conducting curriculum-based assessments as pre-/post-testing or on-going progress monitoring to support instruction of classroom content. Students will submit sample assessments, lesson objectives, lesson and unit plans, and summaries of impact of instruction upon learners in course projects. In order to receive a grade in this course, the student's student teaching performance-based assessments must be submitted and must meet instructor approval for certification submission. Course will not count toward the major GPA.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Fall, Spring

SPE 497 Practicum: K-12 Cross-Categorical Special Education

Prerequisite: admission to Teacher Education Program; and SPE 517 or SPE 617; and SPE 519 or SPE 619; and SPE 521 or SPE 621; and the following courses taken prior or concurrent: SPE 516 or SPE 618, and SPE 550 or SPE 650; and SPE 560 or SPE 660; and cleared background check.

Students will apply skills from introductory and specialized courses in cross-categorical special education settings with students diagnosed with mild/moderate disabilities such as learning disabilities, behavioral disorders, developmental disabilities (e.g., intellectual disabilities, autism, Asperger syndrome, cerebral palsy)

and orthopedic and health impairments (e.g., ADHD, epilepsy). Students will be involved in individual and small group instruction, review diagnostic data, develop and implement educational programs, as well as meet with the university supervisor and other practicum students to reflect on experiences. Competencies in development of lesson plans, development of Individual Education Programs (IEPs), development of transition plans, and development of parent/family communication procedures will be emphasized. Minimum of 120 field experience hours will be required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	0	8	Fall, Spring

SPE 499 Clinical Experiences in Teaching II

Prerequisite: EDC 199; and SPE 497 or SPE 520 and SPE 522; and concurrent enrollment in SPE 496; and grades of "C" or better in all professional education courses; and completion of Transition Points 1 and 2; and current pre-professional liability insurance; and program approval.

This course is designed to meet HB 1711 for student's experience as a Teacher's Aide or Assistant Rule (Rule 5 CSR 80-805.040), to that of conventional student teachers within the same program. It is also designed to support completion of additional clinical requirements within that program including: seminars and workshops, required meetings, school related activities appropriate to the assignment, demonstrated mastery of the MoSPE standards and completion and overall assessment of educator preparation requirements. This course is credited only on BSEd or appropriate masters-level certification programs. Can only receive credit for one of the following: AGE 499, AGT 499, ART 469, COM 493, ECE 499, ELE 499, ENG 434, FCS 498, HST 499, KIN 498, MCL 491, MID 499, MTH 496, MUS 499, SCI 499, SEC 499, SPE 499, THE 493.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Fall, Spring

SPE 502 Early Intervention for Young Children with Autism

Prerequisite: permission of department head.

This course constitutes the second and last segment of the Missouri Autism Institute for educators who are, or will be, working with young children birth to age six who experience symptoms of autism. May be taught concurrently with SPE 602. Cannot receive credit for both SPE 602 and SPE 502.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

SPE 504 In-District Autism Consultant Training

Prerequisite: current Missouri teaching certification.

Students will study advanced educational techniques of autism in general and educational methodologies specifically used with children with autism. Instruction will be provided in consultation and collaboration techniques. Students will demonstrate competence in educational report writing and in-service instruction. Personal professional development plans will be developed by each student, as well as a rating of personal competence. Students will be provided with resources for further study. May be taught concurrently with SPE 604. Cannot receive credit for both SPE 604 and SPE 504.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

SPE 505 Braille Reading and Writing I

Prerequisite: permission of instructor.

This online course has been designed to enable teachers of children and youth with visual impairments develop basic competencies in reading and writing literary Braille, prepare correctly formatted Braille material, and have an awareness and basic understanding of the Nemeth codes for math and science for students grades K-12. Students will employ the use of the Perkins Braille Writer, slate and stylus, Perky Duck, and Duxbury translation software to produce high quality Braille material. Successful completion of this course should be regarded as only one step in a series of courses leading to certification in teaching students with visual impairments. An approved certification process must be completed in order to acquire basic and necessary competencies for work with children and youth with visual impairments. Finally, the course has been designed to help teachers develop an appreciation for the Braille system and the application of this system to all aspects of life for individuals with visual impairments. Instructor and/or site based facilitators will provide monthly face to face instruction to students whenever possible. Students must complete SPE 505 and SPE 611 to achieve mastery of literary Braille code. Note: Midterm and final examinations will be proctored. May be taught concurrently with SPE 605. Cannot receive credit for both SPE 605 and SPE 505.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 506 Principles of Orientation and Mobility

Prerequisite: permission of instructor.

This course focuses on the history, philosophy, and ethics of orientation and mobility. Participants will also consider various consumer driven approaches in orientation and mobility. The course will give the teacher of the visually impaired the ability to perform and monitor basic techniques of orientation and mobility as used by students who are blind, visually impaired, or multi-handicapped. Students will be required to create a video record of their blindfold and other sensory experiences to illustrate their skill development. Note: Midterm and final examinations will be proctored. May be taught concurrently with SPE 606. Cannot receive credit for both SPE 606 and SPE 506.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

SPE 507 Services and Diversity in Blindness and Low Vision and Additional Disabilities

Prerequisite: permission of instructor.

An introduction to educational programs and services, and diversity issues for persons with blindness or low vision, deaf-blindness and multiple disabilities. This course will provide teachers, paraprofessionals, rehabilitation professionals, counselors, social workers, psychologists, etc. with a foundation in the issues of diversity for persons with blindness or low vision, historical perspectives, developmental characteristics, resources, and legislation related to blindness and low vision and multiple disabilities. An emphasis will be placed on the implications of blindness or low vision, deaf-blindness and multiple disabilities on the development of the individual and on resources that enhance functioning. May be taught concurrently with SPE 607. Cannot receive credit for both SPE 607 and SPE 507.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

SPE 508 Low Vision, Anatomy and Physiology of the Eye

Prerequisite: permission of instructor.

This course will introduce teachers, rehabilitation specialists and others to practical applications of low vision techniques. The students will use low vision simulators to perceive, integrate and react to different environmental stimuli. Sections of the course will involve clinical low vision examinations. Analysis and application of the fundamental principles and theory of sensory information acquisition by the visually impaired or blind as it applies to the classroom teacher will be stressed. Also, the course will address a full array of eye diseases and conditions and the educational implications. Note: Midterm and final examinations will be proctored. May be taught concurrently with SPE 608. Cannot receive credit for both SPE 608 and SPE 508.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 510 Physical and Health Needs of Students with Disabilities

Prerequisite: SPE 345 and SPE 346; and admitted to Teacher Education Program.

Focuses on the role of the special educator in management of health related issues such as monitoring medication and providing services to individuals with specialized self care needs and those with chronic illness. Emphasis will be placed on collaboration with related services staff and medical personnel as well as the integration of the student with health care needs into school and community settings. May be taught concurrently with SPE 613. Cannot receive credit for both SPE 613 and SPE 510.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 515 Foundations of Applied Behavior Analysis and Interventions for Teachers in Applied Settings

Prerequisite: admission to the Teacher Education Program.

Focuses on the foundational principles of applied behavior analysis. Emphasis will be placed on the development of positive behavior support plans that proactively assist students with challenging behavior in applied and/or school settings. May be taught concurrently with SPE 616. Cannot receive credit for both SPE 616 and SPE 515.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 516 Application of Applied Behavior Analysis and Interventions in Applied Settings

Prerequisite: SPE 515.

This course focuses on the application of principles of Applied Behavior Analysis within school-based settings. Students will complete functional assessments with children with ASD and develop and implement function- and reinforcement-based interventions. A minimum of 60 hours of field experience is required. May be taught concurrently with SPE 618. Cannot receive credit for both SPE 516 and SPE 618.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

SPE 517 Direct Instruction in Reading and Language Arts

Prerequisite: SPE 310 or SPE 340; and SPE 345 and SPE 346.

Empirically based instructional practices with emphasis on systematic development of reading and written language skills to support learners with special needs will be applied in a school setting. Students will also gain knowledge of varied theoretical perspectives and instructional approaches including validated behavioral and cognitive based methods that support diverse learners. The content of the course will include activities to support determination of present level of performance and placement in special and general education curricula per IDEA and other Federal mandates. May be taught concurrently with SPE 617. Cannot receive credit for both SPE 617 and SPE 517.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SPE 519 Methods I: Cognitive and Behavioral Teaching Approaches for Exceptional Learners

Prerequisite: SPE 310 and SPE 320 and SPE 345 and SPE 346 and SPE 515 or concurrent enrollment in SPE 515; and admitted to Teacher Education Program.

Focuses on the application of theoretical perspectives and research-based methods of teaching students with learning disabilities or emotional and behavior disturbances. Evaluation procedures appropriate to analysis of academic achievement, social behavior, monitoring achievement, and behavioral change will be emphasized along with educational programming that promotes increasing achievement levels, improved social development, and inclusion. This course will incorporate elements of career/vocational education and transition, plus accommodations and best practices for content-area instruction provided to diverse learners in the general education program. May be taught concurrently with SPE 619. Cannot receive credit for both SPE 619 and SPE 519.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 520 Practicum-Teaching Individuals with Learning and Behavioral Disorders

Prerequisite: concurrent enrollment in SPE 519 and admitted to Teacher Education Program.

Students will apply skills from introductory and specialized courses in settings with students with learning disabilities and behavioral disorders. Students will be involved in individual and small group instruction, review diagnostic data, develop and implement educational programs, as well as meet with the university supervisor and other practicum students to reflect on experiences. May be taught concurrently with SPE 620. Cannot receive credit for both SPE 620 and SPE 520.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Upon demand

SPE 521 Methods II: Functional Living Skills and Health Issues

Prerequisite: SPE 320 and SPE 322 and SPE 345 and SPE 346; and SPE 515 or SPE 616 or concurrent enrollment in SPE 515 or SPE 616; and admitted to Teacher Education Program.

Stresses application of theoretical perspectives and research-based methods for individuals with developmental disabilities (i.e., intellectual disabilities, autism, cerebral palsy) who may have associated orthopedic and health impairments (e.g., ADHD and epilepsy). Students will conduct an analysis of assessment data, apply data in the development of diagnostic conclusions and corresponding educational plans. Emphasis will be placed on evaluation, accommodations, and programming for integration in school, community, and vocational settings. May be taught concurrently with SPE 621. Cannot receive credit for both SPE 621 and SPE 521.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 522 Practicum-Instruction of Students with Developmental Disabilities and Other Health Impairments

Prerequisite: concurrent enrollment in SPE 521 and admitted to Teacher Education Program.

Students will apply skills from introductory and specialized courses in settings with students with developmental disabilities (e.g., mental retardation, autism, Asperger syndrome, cerebral palsy) and orthopedic and health impairments (e.g., ADHD, epilepsy). Students will be involved in individual and small group instruction, develop and implement educational programs, as well as meet with the university supervisor and other practicum students to reflect on experiences. May be taught concurrently with SPE 622. Cannot receive credit for both SPE 622 and SPE 522.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Upon demand

SPE 523 Curriculum and Methods in Early Childhood Special Education

Prerequisite: SPE 310; and admission to Teacher Education Program.

Focuses on major aspects in early childhood special education including legislation, litigation, and current issues in the field. Each area of development of young children with disabilities will be a part of the course with particular emphasis on adaptation of materials and curricula to meet the needs of these children. There will also be a focus on families and issues surrounding assessment and eligibility for special education programs. Reflection on current practices and services for young children with disabilities will be included. May be taught concurrently with SPE 623. Cannot receive credit for both SPE 623 and SPE 523.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 525 Introduction to Teaching and Assessing Students with Autism Spectrum Disorders

Prerequisite: admitted to Teacher Education Program; SPE 345 and SPE 346.

This course will support individuals across various disciplines who wish to gain knowledge of identification and programming for individuals on the Autism Spectrum. Conditions associated with ASD will be examined along with etiology, prevalence, and programming issues for this population of individuals. This course will also emphasize school based interventions that are validated by research. May be taught concurrently with SPE 625. Cannot receive credit for both SPE 625 and SPE 525.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 526 Applied Behavioral Analysis for Developmental Disabilities and Autism Spectrum Disorders

Prerequisite: SPE 515; and SPE 516 or PSY 508.

This course focuses on the application of principles of Applied Behavior Analysis within applied settings. Students will complete functional assessments, including functional analysis, with children with ASD and develop and implement function- and reinforcement-based interventions, with a focus on the variations of differential reinforcement. A minimum of 60 hours of field experience is required. May be taught concurrently with SPE 626. Cannot receive credit for both SPE 626 and SPE 526.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

SPE 527 Seminar in Developmental and Sensory Disabilities

Prerequisite: SPE 507 or SPE 525 or equivalent.

This course is designed to provide practitioners with the knowledge and skills to implement research based practices for individuals with developmental disabilities including autism spectrum disorders (ASD). The course will also address issues specific to sensory integration, visual impairments, and significant cognitive delays. Students will examine in depth, approaches and models validated to support present level of performance needs for individuals with a variety of developmental and sensory requirements. Students will complete lecture

hours where theoretical perspectives and the detailed components of various treatments are examined. In a corresponding field component, students will implement an applied project that will address the sensory, communication, learning, and social needs of a client who has been identified with multiple developmental delays. Measurement of outcomes specific to treatment plans will be a significant component of the applied activities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

SPE 540 International Experiences in K-12 Special Education - Education Abroad

Prerequisite: SPE 310 or SPE 340, or concurrent enrollment.

This course involves a field-based Education Abroad experience involving an investigation of special education practices in other cultures while living and studying in an international location. The course will involve a study of basic language and cultural norms of the international location prior to travel to the site. Students will gain a greater understanding of the language, culture, K-12 regular education, and K-12 special education practices in the international site, as compared to required K-12 special education practices in the United States. May be taught concurrently with SPE 640. Cannot receive credit for both SPE 540 and SPE 640. May be repeated to a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

SPE 550 Career/Vocational Education and Transition

Prerequisite: admitted to Teacher Education Program.

Legislation and process pertaining to transition services for individuals with disabilities will be emphasized. Students will explore vocational service delivery options and the role of the multidisciplinary team in the development and implementation of appropriate life skill programming across the age span. May be taught concurrently with SPE 650. Cannot receive credit for both SPE 650 and SPE 550.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SPE 556 Topical Issues in Special Education

Prerequisite: permission of instructor.

To develop understanding and skills in relevant areas of special education. Each offering concerns a single topic. Number of class hours determined by semester hours of credit. May be repeated to a maximum of 5 hours when topics change. Variable content course. May be taught concurrently with SPE 656. Cannot receive credit for both SPE 656 and SPE 556.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

SPE 560 Working with Families of Exceptional Individuals

Recommended Prerequisite: SPE 310. The relationship between families of children with special needs and various agencies is a central theme of this course. Techniques for working with a variety of families will be explored along with the impact of many ecological factors on families of students with disabilities. May be taught concurrently with SPE 660. Cannot receive credit for both SPE 660 and SPE 560.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SPE 579 Application of Technology in Special Education

Prerequisite: admission to Teacher Education Program; and SPE 320.

This course is designed to provide pre-service special education teachers with an introduction to the use of computer technology and a variety of assistive and augmentative technology in the instruction of children and adults with learning, behavior, sensory, motor and communication disabilities. Students will incorporate effective practices for the use of assistive and augmentative technology in assessment, selection of devices, and evaluation of assistive technologies for individuals with disabilities. Students acquire competencies related to the use of assistive devices and emerging technologies through online and field based demonstrations the implementation of effective practices in schools and other agencies which serve individuals with disabilities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 581 Methods of Teaching Individuals with Behavior Disorders/Emotional Disturbance

Prerequisite: concurrent enrollment in SPE 491 and admitted to Teacher Education Program.

This course will focus on application of theoretical perspectives and research-based methods of teaching students with emotional and behavior disturbances. Evaluation procedures appropriate to analysis of social

behavior and monitoring behavioral change will be emphasized along with educational programming that promotes social development and inclusion. May be taught concurrently with SPE 661. Cannot receive credit for both SPE 661 and SPE 581.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SPE 582 Methods of Teaching Individuals with Learning Disabilities

Prerequisite: SPE 345 and SPE 346 and concurrent enrollment in SPE 492 and admitted to Teacher Education Program.

Students will apply theoretical perspectives and research based methods in the development of diagnostic reports and educational plans for students with Learning Disabilities. Emphasis will be placed on the educator as a collaborator and advocate for provision of services in integrated settings; and on the educator as a specialist in evaluation, curricular accommodation, and modification. May be taught concurrently with SPE 662. Cannot receive credit for both SPE 662 and SPE 582.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 583 Methods of Teaching Individuals with Mental Retardation/Developmental Disabilities

Prerequisite: SPE 345 and SPE 346 and concurrent enrollment in SPE 493 and admitted to Teacher Education Program.

The course will stress application of theoretical perspectives and research-based methods for individuals with mental retardation and developmental disabilities. Students will conduct an analysis of assessment data, apply data in the development of diagnostic conclusions and corresponding educational plans. Emphasis will be placed on evaluation and programming for integration in school, community, and vocational settings. May be taught concurrently with SPE 663. Cannot receive credit for both SPE 663 and SPE 583.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring, Summer

SPE 584 Language Development of Exceptional Students

Prerequisite: SPE 345 and SPE 346 and admitted to Teacher Education Program.

Language development and intervention for exceptional individuals. Language assessment and curriculum development for individuals with disabilities, as well as for individuals who are culturally and ethnically diverse, will be addressed. May be taught concurrently with SPE 664. Cannot receive credit for both SPE 664 and SPE 584.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SPE 587 Introduction to the Education of Students with Behavior Disorders

Prerequisite: SPE 310 and admitted to Teacher Education Program.

Students will acquire knowledge of identification, classification, diagnostic, and educational planning procedures based on the predominant conceptual models. Required for certification as teacher of students with behavior disorders. May be taught concurrently with SPE 667. Cannot receive credit for both SPE 667 and SPE 587.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 590 Approaches in Mainstreaming Exceptional Students

Prerequisite: SPE 310 or SPE 340 and admitted to Teacher Education Program.

Application of methods for modifying instructional materials and curriculum to help special education and regular classroom teachers meet the demands of mainstreaming. May be taught concurrently with SPE 670. Cannot receive credit for both SPE 670 and SPE 590.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 591 Clinical Practicum in Special Education

Prerequisite: permission of instructor.

This course is open to professionals with teaching certification or students pursuing a minor requiring credit hours in addition to SPE 491, 492, or 493. Students will collect data, develop and implement individual educational programs, and submit an extensive written report. Assignments will be based on area of certification. In addition, this course is utilized for credit hours toward an Internship in Orientation and Mobility and Internship in Visual Impairment. See instructor for specific requirements. May be taught concurrently with SPE 671. Cannot receive credit for both SPE 671 and SPE 591.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SPE 602 Early Intervention for Young Children with Autism

Prerequisite: permission of instructor.

This course constitutes the second and last segment of the Missouri Autism Institute for educators who are, or will be, working with young children birth to age six who experience symptoms of autism. May be taught concurrently with SPE 502. Cannot receive credit for both SPE 502 and SPE 602.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

SPE 604 In-District Autism Consultant Training

Prerequisite: current Missouri teaching certification or permission of department head.

Students will study advanced educational techniques of autism in general and educational methodologies specifically used with children with autism. Instruction will be provided in consultation and collaboration techniques. Students will demonstrate competence in educational report writing and in-service instruction. Personal professional development plans will be developed by each student, as well as a rating of personal competence. Students will be provided with resources for further study. May be taught concurrently with SPE 504. Cannot receive credit for both SPE 504 and SPE 604.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

SPE 605 Braille Reading and Writing I

Prerequisite: permission of instructor.

This course has been designed to enable teachers of children and youth with visual impairments develop basic competencies in reading and writing literary Braille, prepare correctly formatted Braille material, and have an awareness and basic understanding of the Nemeth codes for math and science for students grades K-12. Students will employ the use of the Perkins Braille Writer, slate and stylus, Perky Duck, and Duxbury translation software to produce high quality Braille material. Successful completion of this course should be regarded as only one step in a series of courses leading to certification in teaching students with visual impairments. An approved certification process must be completed in order to acquire basic and necessary competencies for work with children and youth with visual impairments. Finally, the course has been designed to help teachers develop an appreciation for the Braille system and the application of this system to all aspects of life for

individuals with visual impairments. Instructor and/or site based facilitators will provide monthly face to face instruction to students whenever possible. Students must complete SPE 505 and SPE 611 to achieve mastery of literary Braille code. Note: Midterm and final examinations will be proctored. May be taught concurrently with SPE 505. Cannot receive credit for both SPE 505 and SPE 605.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 606 Principles of Orientation and Mobility

Prerequisite: permission of instructor.

This course focuses on the history, philosophy, and ethics of orientation and mobility. Participants will also consider various consumer driven approaches in orientation and mobility. The course will give the teacher of the visually impaired the ability to perform and monitor basic techniques of orientation and mobility as used by students who are blind, visually impaired, or multi-handicapped. Students will be required to create a video record of their blindfold and other sensory experiences to illustrate their skill development. Note: Midterm and final examinations will be proctored. May be taught concurrently with SPE 506. Cannot receive credit for both SPE 506 and SPE 606.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

SPE 607 Services and Diversity in Blindness and Low Vision and Additional Disabilities

Prerequisite: permission of instructor.

An introduction to educational programs and services, and diversity issues for persons with blindness or low vision, deaf-blindness and multiple disabilities. This course will provide teachers, paraprofessionals, rehabilitation professionals, counselors, social workers, psychologists, etc. with a foundation in the issues of diversity for persons with blindness and low vision, historical perspectives, developmental characteristics, resources, and legislation related to severe and multiple disabilities. An emphasis will be placed on the implications of blindness or low vision, deaf-blindness and multiple disabilities on the development of the individual and on resources that enhance functioning. May be taught concurrently with SPE 507. Cannot receive credit for both SPE 507 and SPE 607.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

SPE 608 Low Vision, Anatomy and Physiology of the Eye

Prerequisite: permission of instructor.

This course will introduce teachers, rehabilitation specialists and others to practical applications of low vision techniques. The students will use low vision simulators to perceive, integrate and react to different environmental stimuli. Sections of the course will involve clinical low vision examinations. Analysis and application of the fundamental principles and theory of sensory information acquisition by the visually impaired or blind as it applies to the classroom teacher will be stressed. Also, the course will address a full array of eye diseases and conditions and the educational implications. Note: Midterm and final examinations will be proctored. May be taught concurrently with SPE 508. Cannot receive credit for both SPE 508 and SPE 608.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 613 Physical and Health Needs of Students with Disabilities

Prerequisite: SPE 715.

Focuses on the role of the special educator in management of health related issues such as monitoring medication and providing services to individuals with specialized self care needs and those with chronic illness. Emphasis will be placed on collaboration with related services staff and medical personnel as well as the integration of the student with health care needs into school and community settings. May be taught concurrently with SPE 510. Cannot receive credit for both SPE 510 and SPE 613.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 616 Foundations of Applied Behavior Analysis and Interventions for Teachers in Applied Settings

Prerequisite: admission to the Special Education program or Early Childhood Special Education program.

Focuses on the foundational principles of applied behavior analysis. Emphasis will be placed on the development of positive behavior support plans that proactively assist students with challenging behavior in applied and/or school settings. May be taught concurrently with SPE 515. Cannot receive credit for both SPE 616 and SPE 515.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 617 Direct Instruction in Reading and Language Arts

Prerequisite: SPE 310 or SPE 715; and SPE 345 or SPE 782; and SPE 346 or SPE 792.

Empirically based instructional practices with emphasis on systematic development of reading and written language skills to support learners with special needs will be applied in a school setting. Students will also gain knowledge of varied theoretical perspectives and instructional approaches including validated behavioral and cognitive based methods that support diverse learners. The content of the course will include activities to support determination of present level of performance and placement in special and general education curricula per IDEA and other Federal mandates. May be taught concurrently with SPE 517. Cannot receive credit for both SPE 517 and SPE 617.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SPE 618 Application of Applied Behavior Analysis and Interventions in Applied Settings

Prerequisite: SPE 515 or SPE 616.

This course focuses on the application of principles of Applied Behavior Analysis within school-based settings. Students will complete functional assessments with children with ASD and develop and implement function- and reinforcement-based interventions. A minimum of 60 hours of field experience is required. May be taught concurrently with SPE 516. Cannot receive credit for both SPE 516 and SPE 618.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

SPE 619 Methods I: Cognitive and Behavioral Teaching Approaches for Exceptional Learners

Prerequisite: SPE 310 and SPE 320 or SPE 715; and SPE 345 or SPE 782; and SPE 346 or SPE 792; and SPE 515 or SPE 616 or concurrent enrollment; and admitted to MSED program in Special Education.

Focuses on the application of theoretical perspectives and research-based methods of teaching students with learning disabilities or emotional and behavior disturbances. Evaluation procedures appropriate to analysis of academic achievement, social behavior, monitoring achievement, and behavioral change will be emphasized along with educational programming that promotes increasing achievement levels, improved social development, and inclusion. This course will incorporate elements of career/vocational education and transition, plus accommodations and best practices for content-area instruction provided to diverse learners in the general education program. May be taught concurrently with SPE 519. Cannot receive credit for both SPE 519 and SPE 619.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 620 Practicum-Teaching Individuals with Learning and Behavioral Disorders

Prerequisite: concurrent enrollment in SPE 619; and Teacher Certification students must be admitted to Teacher Education Program.

Students will apply skills from introductory and specialized courses in settings with students with learning disabilities and behavioral disorders. Students will be involved in individual and small group instruction, review diagnostic data, develop and implement educational programs, as well as meet with the university supervisor and other practicum students to reflect on experiences. May be taught concurrently with SPE 520. Cannot receive credit for both SPE 520 and SPE 620.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Upon demand

SPE 621 Methods II: Functional Living Skills and Health Issues

Prerequisite: SPE 320 and SPE 322 or SPE 715; SPE 345 or SPE 782; and SPE 346 or SPE 792; and SPE 515 or SPE 616 or concurrent enrollment in SPE 515 or SPE 616; and admitted to MSED Special Education program.

Stresses application of theoretical perspectives and research-based methods for individuals with developmental disabilities (i.e., intellectual disabilities, autism, cerebral palsy) who may have associated orthopedic and health impairments (e.g., ADHD and epilepsy). Students will conduct an analysis of assessment data, apply data in the development of diagnostic conclusions and corresponding educational plans. Emphasis will be placed on evaluation, accommodations, and programming for integration in school, community, and vocational settings. May be taught concurrently with SPE 521. Cannot receive credit for both SPE 521 and SPE 621.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 622 Practicum-Instruction of Students with Developmental Disabilities and Other Health Impairments

Prerequisite: concurrent enrollment in SPE 621 and Teacher Certification students must be admitted to Teacher Education Program.

Students will apply skills from introductory and specialized courses in settings with students with developmental disabilities (e.g., mental retardation, autism, Asperger syndrome, cerebral palsy) and orthopedic and health impairments (e.g., ADHD, epilepsy). Students will be involved in individual and small group instruction, develop

and implement educational programs, as well as meet with the university supervisor and other practicum students to reflect on experiences. May be taught concurrently with SPE 522. Cannot receive credit for both SPE 522 and SPE 622.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Upon demand

SPE 623 Curriculum and Methods in Early Childhood Special Education

Prerequisite: SPE 310 or SPE 715; and admission to MEd in Special Education or Elementary Education or Early Childhood Special Education, or MS in Early Childhood and Family Development, or permission of department head.

Focuses on major aspects in early childhood special education including legislation, litigation, and current issues in the field. Each area of development of young children with disabilities will be a part of the course with particular emphasis on adaptation of materials and curricula to meet the needs of these children. There will also be a focus on families and issues surrounding assessment and eligibility for special education programs. Reflection on current practices and services for young children with disabilities will be included. May be taught concurrently with SPE 523. Cannot receive credit for both SPE 523 and SPE 623.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 625 Introduction to Teaching and Assessing Students with Autism Spectrum Disorders

Prerequisite: permission of instructor.

This course will support individuals across various disciplines who wish to gain knowledge of identification and programming for individuals on the Autism Spectrum. Conditions associated with ASD will be examined along with etiology, prevalence, and programming issues for this population of individuals. This course will also emphasize school based interventions that are validated by research. May be taught concurrently with SPE 525. Cannot receive credit for both SPE 525 and SPE 625.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 626 Applied Behavioral Analysis for Developmental Disabilities and Autism Spectrum Disorders

Prerequisite: SPE 515 or SPE 616; and SPE 516 or SPE 618.

This course focuses on the application of principles of Applied Behavior Analysis within applied settings. Students will complete functional assessments, including functional analysis, with children with ASD and develop and implement function- and reinforcement-based interventions, with a focus on the variations of differential reinforcement. A minimum of 60 hours of field experience is required. May be taught concurrently with SPE 526. Cannot receive credit for both SPE 526 and SPE 626.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

SPE 627 Research-Based Strategies for Individuals with ASD

Prerequisite: SPE 618 or SPE 625 or equivalent.

This course is designed to provide students with an overview of current research-based practices for individuals with ASD, including functional communication training, discrete trial training, pivotal response training, visual strategies, social-communication programming, and naturalistic and structured teaching methodologies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

SPE 640 International Experiences in K-12 Special Education - Education Abroad

Prerequisite: SPE 310 or SPE 340 or SPE 715, or concurrent enrollment.

This course involves a field-based Education Abroad experience involving an investigation of special education practices in other cultures while living and studying in an international location. The course will involve a study of basic language and cultural norms of the international location prior to travel to the site. Students will gain a greater understanding of the language, culture, K-12 regular education, and K-12 special education practices in the international site, as compared to required K-12 special education practices in the United States. May be taught concurrently with SPE 540. Cannot receive credit for both SPE 640 and SPE 540. May be repeated to a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

SPE 650 Career/Vocational Education and Transition

Prerequisite: Teacher Certification students must be admitted to Teacher Education Program.

Legislation and process pertaining to transition services for individuals with disabilities will be emphasized. Students will explore vocational service delivery options and the role of the multidisciplinary team in the development and implementation of appropriate life skill programming across the age span. May be taught concurrently with SPE 550. Cannot receive credit for both SPE 550 and SPE 650.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SPE 656 Topical Issues in Special Education

Prerequisite: permission of instructor.

To develop understanding and skills in relevant areas of special education. Each offering concerns a single topic. Number of class hours determined by semester hours of credit. May be repeated to a maximum of 5 hours when topics change. Variable Content Course. May be taught concurrently with SPE 556. Cannot receive credit for both SPE 556 and SPE 656.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

SPE 660 Working with Families of Exceptional Individuals

Recommended Prerequisite: SPE 715. The relationship between families of children with special needs and various agencies is a central theme of this course. Techniques for working with a variety of families will be explored along with the impact of many ecological factors on families of students with disabilities. May be taught concurrently with SPE 560. Cannot receive credit for both SPE 560 and SPE 660.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SPE 661 Methods of Teaching Individuals with Behavior Disorders/Emotional Disturbance

Prerequisite: concurrent enrollment in SPE 491; and Teacher Certification students must be admitted to Teacher Education Program.

This course will focus on application of theoretical perspectives and research-based methods of teaching students with emotional and behavior disturbances. Evaluation procedures appropriate to analysis of social behavior and monitoring behavioral change will be emphasized along with educational programming that promotes social development and inclusion. May be taught concurrently with SPE 581. Cannot receive credit for both SPE 581 and SPE 661.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SPE 662 Methods of Teaching Individuals with Learning Disabilities

Prerequisite: SPE 345 and SPE 346; and concurrent enrollment in SPE 492; and Teacher Certification students must be admitted to Teacher Education Program.

Students will apply theoretical perspectives and research based methods in the development of diagnostic reports and educational plans for students with Learning Disabilities. Emphasis will be placed on the educator as a collaborator and advocate for provision of services in integrated settings; and on the educator as a specialist in evaluation, curricular accommodation, and modification. May be taught concurrently with SPE 582. Cannot receive credit for both SPE 582 and SPE 662.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 663 Methods of Teaching Individuals with Mental Retardation/Developmental Disabilities

Prerequisite: SPE 345 and SPE 346; and concurrent enrollment in SPE 493; and Teacher Certification students must be admitted to Teacher Education Program.

The course will stress application of theoretical perspectives and research-based methods for individuals with mental retardation and developmental disabilities. Students will conduct an analysis of assessment data, apply data in the development of diagnostic conclusions and corresponding educational plans. Emphasis will be placed on evaluation and programming for integration in school, community, and vocational settings. May be taught concurrently with SPE 583. Cannot receive credit for both SPE 583 and SPE 663.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring, Summer

SPE 664 Language Development of Exceptional Students

Prerequisite: SPE 345 or SPE 782; and SPE 346 or SPE 792; and admitted to MSED program in Special Education.

Language development and intervention for exceptional individuals. Language assessment and curriculum development for individuals with disabilities, as well as for individuals who are culturally and ethnically diverse, will be addressed. May be taught concurrently with SPE 584. Cannot receive credit for both SPE 584 and SPE 664.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SPE 667 Introduction to the Education of Students with Behavior Disorders

Prerequisite: SPE 310 and Teacher Education students must be admitted to Teacher Education Program.

Students will acquire knowledge of identification, classification, diagnostic, and educational planning procedures based on the predominant conceptual models. Required for certification as teacher of students with behavior disorders. May be taught concurrently with SPE 587. Cannot receive credit for both SPE 587 and SPE 667.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 670 Approaches in Mainstreaming Exceptional Students

Prerequisite: SPE 310 or SPE 340 and Teacher Certification students must be admitted to Teacher Education Program.

Application of methods for modifying instructional materials and curriculum to help special education and regular classroom teachers meet the demands of mainstreaming. May be taught concurrently with SPE 590. Cannot receive credit for both SPE 590 and SPE 670.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 671 Clinical Practicum in Special Education

Prerequisite: permission of instructor.

This course is open to professionals with teaching certification or students pursuing a minor requiring credit hours in addition to SPE 491, 492, or 493. Students will collect data, develop and implement individual educational programs, and submit an extensive written report. Assignments will be based on area of certification. In addition, this course is utilized for credit hours toward an Internship in Orientation and Mobility and Internship in Visual Impairment. See instructor for specific requirements. May be taught concurrently with SPE 591. Cannot receive credit for both SPE 591 and SPE 671.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SPE 709 Methods of Teaching Students with Visual Impairments and Multiple Disabilities

Prerequisite: permission of instructor.

This course is one of six courses offered to provide prospective teachers of children and youth with visual impairments (including those with multiple disabilities) competency-based training for work with this population in K-12 schools. Provides students with the pedagogical preparation to effectively teach Braille reading and writing, organize activities to promote literacy development, utilize assistive technology (including voice output and other computer based applications), teach compensatory skills and strategies for mathematics, development of listening skills, as well as other instructional adaptations for the curricular areas of language arts, science, and social studies. In addition, the course focuses on the teaching of social skills needed for success in education and employment. Participants will demonstrate the ability to assess, adapt, evaluate and teach academic subjects and specialized curricula for students with visual impairments, including those with multiple disabilities. Note: midterm and final examinations will be proctored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SPE 710 Problems in Special Education

Major issues in the field of special education designed to meet individual student needs. May be repeated to a total of 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SPE 711 Braille Reading and Writing II

Prerequisite: SPE 505 or SPE 605.

This advanced course in Braille reading and writing will focus on competencies in reading and writing literary Braille and the Nemeth Codes for science and mathematics. Participants will also demonstrate the ability to teach basic assistive devices, and to provide instruction in tactile graphics. An introduction to the transcription in Braille code for music and foreign languages will also be presented. Instructor and/or site based facilitators will provide monthly face to face instruction to students whenever possible. Note: midterm and final examinations will be proctored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SPE 712 Instructional Techniques and Strategies of Orientation and Mobility

Prerequisite: SPE 506 or SPE 606; and SPE 508 or SPE 608.

Provides participants with the techniques and strategies used by individuals who are blind or visually impaired for independent orientation and mobility. Participants will apply the strategies of orientation and mobility techniques while using blindfolds and low vision simulators. The application of skills will be completed in indoor environments as well as residential, business, rural, and commercial areas.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	6	0	Summer

SPE 714 Professional Issues and Assessment in Orientation and Mobility with Diverse Populations

Prerequisite: SPE 505 or SPE 605; and SPE 506 or SPE 606; and SPE 508 or SPE 608; and SPE 712.

This course will provide participants with the overall philosophy of orientation and mobility including: the Code of Ethics and Certification standards. Current literature and issues pertinent to the profession of orientation and mobility will be discussed. This will include issues impacting programming with students with multiple disabilities, the development and administration of an effective orientation and mobility instructional program, assessment procedures, and research approaches. Note: midterm and final examinations will be proctored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SPE 715 Foundations in Special Education

Focuses on legislation and litigation in the area of Education and Special Education and will include an overview of categorical disabilities including identification, etiology, and prevalence. The integration of individuals with disabilities across educational and community settings will be stressed along with an overview of programming validated to support specialized populations including those with disabilities and cultural and linguistic differences. In addition, the course will focus on strategies to support individuals identified as gifted as well as individuals identified at risk for school failure.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

SPE 717 Methods of Teaching Mathematics to Exceptional Individuals

Prerequisite: SPE 310 or SPE 715; and SPE 345 or SPE 782; and SPE 346 or SPE 792; and admission to graduate program in Special Education.

The focus of the course will include accommodating individual differences and diversifying instruction in the area of mathematics. Students will develop performance based assessment procedures, conduct error analyses, and apply mathematics skills in program planning for the diverse learner. Cannot receive credit for both SPE 450 and SPE 717.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 730 Health, Functional, and Psychosocial Aspects of Disability

Prerequisite: permission of instructor.

This course presents an interdisciplinary approach to the study of disability in education and rehabilitation. It includes information on disabilities such as traumatic brain injury, orthopedic, neuromuscular, sensory, learning, cardiovascular, psychiatric, and other selected disabilities and health conditions, including multiple disabilities. Emphasis is placed upon the characteristics of disabilities and resulting functional effects on persons with additional emphasis on the effects of multiple disabilities. This course also provides an understanding of the psychosocial and environmental factors that impact the integration into society by individuals with disabilities. It examines the philosophy of rehabilitation, major classifications and paradigms, common stereotypes, personal and societal attitudes and measurement, theories of adjustment, psychosocial losses, issues relating to sexuality, personal adjustment training, the role of the family, and the use of effective interaction skills.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

SPE 733 Methods of Teaching Independent Living Skills to Persons with Blindness or Low Vision

Prerequisite: permission of instructor.

Introduction to methodologies, concepts, and techniques to teach persons with blindness or low vision the skills and knowledge needed to function independently in diverse settings. This course provides learners with instruction and laboratory practice in methodologies for teaching skills for independent living, including areas within the expanded core curriculum. Topics include: concept and motor development, spatial organization and orientation, personal management, home management, medical management, communication, and recreation and leisure.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

SPE 740 Verbal Behavior

Prerequisite: SPE 515 or SPE 616; and SPE 516 or SPE 618; and SPE 625; and SPE 627; or permission of instructor.

This course focuses on Skinner's analysis of language, specifically the major verbal operants (mands, tacts, and intraverbals). Students will learn contemporary methods of assessing and teaching verbal behavior utilizing Skinner's analysis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 750 Practicum in Blindness and Low Vision

Prerequisite: SPE 605 and SPE 606 and SPE 607 and SPE 608 and SPE 709 and SPE 711; and permission of instructor.

This course serves as a supervised internship for working with children with blindness or low vision, including those with multiple disabilities and/or linguistic or cultural differences, under a Cooperating Teacher of Children with Visual Impairments and University Supervisor. Students observe, teach, and participate in professional activities in teaching children with blindness or low vision. Students work with individuals or groups during which they are provided the opportunity to apply principles and methods of teaching children with blindness or low vision, including those with additional disabilities. Students also acquire behavior management, instructional planning, and evaluation strategies. Variable credit hour course. Number of contact hours determined by semester hours of credit. May be repeatable up to 8 credit hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-8			Upon demand

SPE 760 Internship-Orientation and Mobility

Prerequisite: SPE 606 and SPE 608 and SPE 712 and SPE 714 or concurrent enrollment in SPE 714; and admitted to the Special Education/Orientation and Mobility program; and permission of instructor.

This course requires a supervised internship experience in an organization or school that serves individuals with blindness or low vision, during which the opportunity is provided for practical application of principles and methods of instruction in orientation and mobility; including techniques of safe, and independent travel. Completion of 350 hours of supervised fieldwork by a certified orientation and mobility specialist (COMS).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Fall, Spring

SPE 776 Cognitive Behavioral Strategies for Children and Adolescents with Autism

Prerequisite: SPE 515 or SPE 616; SPE 525 or SPE 625, or permission of instructor.

This course will focus on cognitive and behavioral research-based practices for children and adolescents with Autism Spectrum Disorders. Specific focus will be on the social learning deficits in Autism and how the executive functioning and theory of mind are impacted.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 777 Advanced Readings in Autism and Behavior Analysis

Prerequisite: permission of instructor.

Students will critically evaluate peer-reviewed behavior-analytic research and develop modifications of procedures reported in research for use in their desired or current area of practice, specifically related to autism spectrum disorders. Empirical research on advanced topics in behavior analysis will be identified, and students will critique experimental methodology and evaluate the extent to which methods and results answer experimental questions. Students will also learn to locate high-quality research on topics related to their area of practice. Class discussions will require a high degree of student participation and the course will be writing intensive.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 779 Application of Technology in Special Education

Prerequisite: admission to the graduate program in Special Education or Early Childhood Special Education.

This course is designed to provide teachers with an in depth treatment of the research, theory, and application of computers and related technologies in the instruction of children and adults with learning, behavior, sensory, motor and communication disabilities. Students will incorporate the principles of reflective practice as it pertains to the assessment, selection of devices, and evaluation of assistive technologies for individuals with disabilities. The General Learning Outcomes 5, 9, and 10 presented in the Conceptual Framework of the Educator Preparation Provider (EPP) are the over arching tenets which guided the development and ongoing revisions to

this course. Students acquire competencies related to the use of assistive devices and emerging technologies through participation in a 60 hour comprehensive field based experience in conjunction with schools and other agencies which serve individuals with disabilities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

SPE 780 Impact of Contemporary Issues and Diversity in Special Education

Prerequisite: permission of instructor.

Analysis of trends, issues, and research in the field of special education will be reviewed and discussed. A comprehensive overview of local, state, and federal legislation and the impact on our public school special educational programs for children with disabilities will be discussed and analyzed. A focus on diversity aspects involved in contemporary issues in special education and disability services will be addressed across all topics. Historical and current litigation involving children with disabilities will be reviewed and discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

SPE 781 Educational Consultation

Prerequisite: admission to the graduate program in Special Education.

Seeks to develop students' skills in collaboration consultation. Emphasis will be placed on the development of innovative service delivery options, personnel training, and development of communication skills. Students will apply theory to practice in a field experience.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

SPE 782 Advanced Diagnosis and Remediation of Students with Mild to Moderate Disabilities

Prerequisite: SPE 310 or SPE 340 or SPE 715; and admission to the graduate program in Special Education or Early Childhood Special Education.

Students will observe and participate in a variety of assessment and multidisciplinary team activities. Development of leadership skills will be stressed through participation in clinical field experiences involving standardized and performance evaluation typically administered to identify students with special needs, analysis

and synthesis of assessment data in clinical staffings, analysis of data for on-going progress monitoring, and development of individualized educational programs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall, Spring

SPE 783 Advanced Assessment to Support Individuals with Developmental and Sensory Disabilities

Prerequisite: permission of instructor.

Students will observe and participate in a variety of assessment and multidisciplinary team activities. Development of leadership skills will be stressed through participation in field experiences involving norm referenced and curriculum based evaluation of individuals with various sensory and developmental disabilities. Analysis and synthesis of assessment data in clinical staffings and development of individual educational plans will be required. Students enrolled in this course should have prior knowledge of assessment including administration, scoring, and interpretation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

SPE 784 Advanced Procedures in Teaching Students with Mild to Moderate Disabilities

Prerequisite: SPE 780 and SPE 782 and SPE 792; and SPE 616 or PSY 614.

Recommended Prerequisite: SPE 517 or SPE 617. The primary purpose of the course is to provide students with the knowledge and skills necessary for development and application of curricula appropriate to the needs of individuals with mild to moderate disabilities. Emphasis will be placed on the philosophical basis of curricula as well as principles of curricula design. Students will apply knowledge and skills in 60 hours of required field experiences.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

SPE 785 Advanced Procedures in Development Disabilities

Prerequisite: admission to the graduate program in Special Education; and SPE 783.

The primary purpose of the course is to provide students with the knowledge and skills necessary for development and application of curricula and methods appropriate to the needs of individuals with mental retardation and other developmental disabilities. Emphasis will be placed on the empirical basis of the procedures and on life referenced programming. Students will apply knowledge and skills in field based activities supervised by the instructor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

SPE 787 Advanced Behavioral Analysis and Intervention

Prerequisite: admission to the graduate program in Special Education or permission of instructor; and SFR 780 and SPE 616 and SPE 780 and SPE 782 and SPE 792.

Study of human behavior. The goal of applied behavior analysis is to seek understanding and improvement of human behavior. The goals of this course is to prepare graduate students to be contributing professionals in the area of applied behavior analysis; specifically, to become reflective behaviorists. Students will learn to identify, measure, and record the occurrence and nonoccurrence of behavior. Students will be expected to implement applied behavioral strategies and learn how to evaluate the success of single-case designs as part of a minimum 60 hour field experience.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SPE 788 Research Seminar in Special Education

Prerequisite: admission to the graduate program in Special Education or permission of instructor; and SFR 780; and SPE 619 and SPE 621 or SPE 709; and SPE 780 and SPE 782 or SPE 783.

An in-depth study of a chosen topic in special education leading to the guided development and completion of an extensive research paper or major creative work as directed by the instructor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SPE 789 Student Teaching-The Exceptional Child

Prerequisite: permission of instructor.

Student observes, teaches, and/or participates in student teaching activities in Special Education under the direction of a cooperating supervisor and University supervisor. Students will work with individuals or groups demonstrating effective teaching and behavior management techniques, as well as expertise in instructional

planning and evaluation. Students must complete required special education program assessments and Missouri Department of Elementary and Secondary Education assessment as identified by the instructor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Upon demand

SPE 790 Educational Workshop

Workshop to upgrade understandings and skills concerned with the improvement of elementary or secondary teaching procedures, curriculum, supervision, administration or guidance. Each workshop will be concerned with a single topic. Number of class hours determined by length of workshop. May be repeated to a maximum of 5 hours. 30 clock hours equal 1 semester hour.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

SPE 791 Clinical Practicum for Individuals with Autism and Challenging Behavior

Prerequisite: SPE 525 or SPE 625; and SPE 516 or SPE 618; or permission of instructor.

This course will involve supervised clinical settings with individuals with Autism and challenging behaviors. Students will conduct a variety of assessments, including functional behavioral assessments, curriculum-based measurements, and social skills profiles. Students will also develop and/or implement research-based strategies with individuals with Autism. Finally, students will participate in a multidisciplinary assessment model to include families and professionals from a variety of disciplines. Students will be required to prepare written reports of professional quality with results of assessments and research-based recommendations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

SPE 792 Advanced Diagnosis and Remediation of Students with Disabilities Lab

Prerequisite: admission to the graduate program in Special Education or Early Childhood Special Education; and concurrent enrollment with SPE 782 or SPE 783.

Students will conduct standardized and informal assessments in the field as part of a 60 hour practicum/lab experience and develop a comprehensive case history. Emphasis will be placed on development of validated educational programs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Spring

SPE 799 Thesis

Prerequisite: admission to the graduate program in Special Education or Applied Behavior Analysis; and SFR 780 and SPE 780 and SPE 787 and SPE 789; and SPE 782 or SPE 783; and SPE 784 or SPE 785.

Independent research and study connected with preparation of thesis. May be repeated to a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

SPE 886 School Psychological Examiner Practicum

Prerequisite: SPE 782 and SPE 787 and SPE 792 and PSY 720, or departmental permission.

Supervised practicum in the administration and interpretation of individual achievement tests, individual intelligence tests, formal and informal diagnostic procedures and diagnostic interviewing techniques in educational or clinical settings. Focus of the course will be on the formation of eligibility determinations using traditional and contemporary models of diagnostic decision-making, including Multi-Tiered Systems of Support and/or Response-to-Intervention, and on the development of instructional plans or IEPs from diagnostic data attained. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Undergraduate Catalog

Special Education/Cross Categorical

Major(s)

Special Education/Cross Categorical

Bachelor of Science in Education (Certifiable grades K-12)

The curriculum for special education teaching leads to the degree of Bachelor of Science in Education and carries with it an initial professional certificate (IPC) to teach in the state of Missouri. Recipients of this special education certificate may be employed to teach in grades K-12 in Cross Categorical settings and other mild/moderate special education settings.

Admission and Retention Requirements

The Department of Counseling, Leadership, and Special Education reserves the right to refuse enrollment or program continuation to any student for whom the special education faculty feel does not possess the ability to successfully complete the required classes and/or required practica.

All special education undergraduate students and postbaccalaureate students seeking special education certification are expected to display professional behaviors and dispositions consistent with the National Council for Exceptional Children's Code of Ethics for Educators of Persons with Exceptionalities. Periodic structured assessments of professional behaviors and dispositions will be completed on all students during selected classes and will also be completed in additional classes on an as needed basis. If a student does not display the required professional behaviors and dispositions as determined by the special education faculty and the Department Head of Counseling, Leadership, and Special Education, the student may be dismissed from the program or may be prevented from taking additional special education certification classes.

XF Policy

High standards of professional conduct are required for admission to the Bachelor of Science in Education Special Education/Cross Categorical program and all special education programs of study. Prospective students

who have been assigned a grade of XF (failure due to academic dishonesty) at Missouri State University (MSU), or the equivalent at another institution of higher education, may be denied admission to the Bachelor of Science in Education Special Education/Cross Categorical program and the affiliated Accelerated Masters degree options, including Accelerated MSED: Special Education/Autism Spectrum Disorders and Accelerated MSED: Early Childhood Special Education. Students who have been assigned a grade of XF at MSU, or the equivalent at another institution of higher education, are required to inform the Department Head of such grade at the time of application, even if the X was subsequently removed. Failure to inform the Department Head of this previous XF or equivalent grade will result in removal from the BSED Special Education/Cross Categorical program. A student assigned a grade of XF while studying toward completion of the BSED Special Education/Cross Categorical program, or the affiliated Accelerated Masters degree programs (i.e., Accelerated MSED: SPE/ASD and Accelerated MSED: ECSE), will be immediately removed from the program(s).

Degree Requirements

In order to meet Missouri state teacher certification requirements, candidates for the Bachelor of Science in Education degree are required to meet the following grade point average requirements. All GPA requirements are a combination of Missouri State and transfer grades.

1. a combined (Missouri State and transfer) GPA of 2.75 or higher.
2. a combined (Missouri State and transfer) GPA of 3.00 or higher across all courses listed under B and C; and a grade of "C" or higher in all courses listed under C.

Additionally, students must earn a composite score or superscore of 20 or better on the ACT or earn passing scores on all four sub-tests of the Missouri General Education Assessment (MoGEA) and successfully complete the Missouri Educator Gateway Assessments (MEGA) as established by the Missouri Board of Education.

All students must be admitted to the Teacher Education Program and have successfully completed Supervised Teaching in order to earn this degree. Refer to [Teacher Education Program \(/Registrar/Catalog/teacher-certification-teacher-education-secondary-ed.htm\)](#) for application procedures.

Program Requirements

1. Specific courses required for major and/or certification which may be used to satisfy General Education Requirements:
 - a. Focus on Written Communication and Information Literacy: [ENG 110\(3\)](#).
 - b. Focus on Written Communication and Integrative and Applied Learning: [ENG 210\(3\)](#).
 - c. Focus on Quantitative Literacy: Completion of general education requirement with a grade of "C" or better. [MTH 130\(3\)](#) recommended.
 - d. Focus on Oral Communication: [COM 115\(3\)](#).
 - e. Focus on Life Sciences: [BIO 100\(4\)](#).
 - f. Focus on Physical Sciences: [PHY 101\(4\)](#).
 - g. Focus on Social and Behavioral Sciences: [PSY 121\(3\)](#).
 - h. Focus on Constitution of U.S. and Missouri and American History and Institutions: [HST 121\(3\)](#) or [HST 122\(3\)](#); and [PLS 101\(3\)](#).
2. Degree Requirements for Teacher Certification (6 hours):
 - a. Mathematics: [MTH 320\(3\)](#).
 - b. English: [ENG 334\(3\)](#).
3. Professional Education (78 hours): Note: A grade of "C" or better in each course is required for program approval of coursework toward degree and certification.
 - a. Foundations of Teaching: [EDC 345\(3\)](#); [PSY 360\(3\)](#); [SPE 310\(3\)](#), [320\(3\)](#), [345\(4\)](#), [346\(2\)](#), [525\(3\)](#).

- b. Teaching Methods: [EDT 365\(3\)](#); [RDG 318\(3\)](#), [420\(3\)](#), [421\(2\)](#); [SPE 450\(3\)](#), [515\(3\)](#), [516\(3\)](#), [517\(3\)](#), [519\(3\)](#), [521\(3\)](#), [550\(3\)](#), [560\(3\)](#), [579\(3\)](#), [584\(2\)](#).
- c. Field and Clinical Experiences: [SPE 322\(1\)](#), [497\(4\)](#), [495\(9\)](#), [496\(3\)](#).
4. Public Affairs Capstone Experience will be fulfilled by completion of [SPE 495\(9\)](#).
5. This program also requires compliance with the [Teacher Education Program](#) for eligibility to enroll in Professional Education courses; admission to and continuance in the Teacher Education Program; approval for supervised teaching; and recommendation for certification.

University level requirements

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Accelerated graduate program in Special Education/Autism Spectrum Disorders

Eligible Missouri State undergraduate students may apply for admission to the Special Education/Autism Spectrum Disorders program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-special-education.htm) (<https://graduate.missouristate.edu/Catalog/prog-special-education.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Early Childhood Special Education

Eligible Missouri State undergraduate students may apply for admission to the Early Childhood Special Education program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-early-childhood-special-education.htm) (<https://graduate.missouristate.edu/Catalog/prog-early-childhood-special-education.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

International Perspectives in K-12 Special Education Certificate

International Perspectives in K-12 Special Education

This certificate provides coursework to improve or broaden the student's cultural competence and understanding of special education and disability-related instructional practices. Students will receive exposure to international approaches to education for persons with disabilities, and will complete one education abroad experience with an emphasis on K-12 special education in an international setting. The goal of this certificate will be to broaden the undergraduate student's perspective regarding education in the global society and the implementation of special education programs and services for children and adults with disabilities.

Admission requirements

Completion of at least 30 hours. International students must meet Missouri State University language proficiency standards for TOEFL (69 for undergraduates) or IELTS (5.5 for undergraduates); language requirement may be waived through successful interview with departmental committee.

Program requirements (12 hours)

1. One introductory course in special education: [SPE 310\(3\)](#) or [SPE 340\(2\)](#).
2. One course in diversity and education or child and family development: [EDC 345\(3\)](#) or [CFD 305\(3\)](#).
3. One course in International Approaches to K-12 Special Education that incorporates a Education Abroad experience involving special education: [SPE 540](#) - International Experiences in K-12 Special Education - Education Abroad (3 hours). For international candidates who seek the certificate through contracted partnerships with Missouri State University, the SPE 540 International Experience will be provided in the Southwest Missouri region.
4. One course in the General Education Focus on Cultural Competence: [ANT 100\(3\)](#), [ENG 289\(3\)](#), [GRY 100\(3\)](#), [IDS 297\(3\)](#), [LLT 180\(3\)](#), [MCL 100\(3\)](#), [MTH 121\(3\)](#), [REL 100\(3\)](#), [REL 210\(3\)](#), [SWK 219\(3\)](#).
5. In the event that completion of required coursework does not result in minimum of 12 hours, such as those students electing to take SPE 340 for 2 hours of credit, students may select related electives as approved

by the Special Education Program Coordinator or CLSE Department Head. Recommended electives include, but are not limited to [SPE 300\(1\)](#) or [DAS 100\(3\)](#)

6. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirements

Students must take a minimum of 12 hours as designated and approved, and must earn a B or better in all courses applied to the certificate.

Undergraduate Catalog

Reading, Foundations, and Technology Courses

Education (EDC) courses

EDC 150 Introduction to Teaching

Prerequisite: permission from the Director of Secondary Education (Secondary) or Coordinator, Professional Education Advisement (Middle School).

This course reviews the process for obtaining admission to Teacher Education for transfer students, and assists students in uploading documentation and artifacts created at the students' sending academic institutions. The transfer student should have had an introduction to teaching course and have completed a 30 hour field experience (practicum) at the secondary level or middle school level in the student's major area of study. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
0	0	0	Fall, Spring

EDC 199 Clinical Experiences in Teaching

Prerequisite: approved application to earn academic credit for two (2) years experience as a Teacher's Aide/Assistant, as permitted by DESE Rule 5 CSR 80-805.040; previous or concurrent enrollment in professional education coursework; and permission of instructor.

Conducted teaching activities by students during aiding/assisting experiences, under the direction of the cooperating teacher and permission of a designated school principal, are verified as comparable to and demonstrating similar competencies of those expected by conventional student teachers. Students also

participate in professional development activities, determined to be appropriate by the instructor. This course is credited only on BSEd or appropriate masters-level certification programs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Fall, Spring

EDC 249 Schooling in America

Prerequisite: 12 hours.

General Education Course (Focus on Public Issues).

Examines the nature and history of schooling in America, the broad social purposes and goals of education, and the crucial role the institution of schooling has and does play in the United States and Missouri with regard to shifting public policy as well as state and federal laws and mandates. Explores social, legal, and political issues as they play out in schools with regard to diversity, racism, sexism, and the effects of social class.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

EDC 345 Introduction to Multicultural Education and Diversity

Prerequisite: EDC 150 or SEC 302 or CFD 260 or ELE 302 or SPE 310 or KIN 200 or MUS 200 or concurrent enrollment.

An introduction to cultural issues, diversity, and related perspectives in education. Examination of individual differences in ethnicity, race, socioeconomic status, gender, exceptionalities, language, religion, sexual orientation, and geographic area in the context of education and society. Development of skills, knowledge, and dispositions related to teaching and learning in varied settings with diverse learners required of all educators to be effective in a global society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

EDC 350 School and Society

Prerequisite: admitted to Teacher Education Program or concurrent enrollment in EDC 150; and PSY 385 or CFD 257 (Elementary Education program) or CFD 160 (Early Childhood Education program) or PSY 360 (Secondary, Middle School, and K-12 programs) or concurrent enrollment.

This course examines the nature and history of schooling in America and the teaching profession, the purposes and goals of education, and educational philosophy. It also explores social, legal, and political issues connected with teaching and learning, diversity, racism, sexism, and the effects of social class on educational success.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

EDC 700 Teaching and Learning I: Current Issues and Trends in Education

Prerequisite: bachelor's degree and certification as a classroom teacher.

This course examines educational issues, questions, concerns, and trends teachers face in their schools and daily practices. The impact of national and state policy-making, directions suggested by emerging educational research, and current educational reform efforts will receive particular attention.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	4	Fall

EDC 701 Teaching and Learning II: Diversity, Curriculum and Research

Prerequisite: EDC 700; bachelor's degree and certification as a classroom teacher.

This course engages students with research projects and curriculum ideas designed to strengthen and deepen student learning, with a special emphasis on questions of student diversity. The course helps students to formulate questions and use appropriate research principles to collect, analyze, interpret, and report data in order to evaluate the effectiveness of classroom instruction and educational policies. Students examine different curriculum models and theories and devise instructional practices to meet the needs of all learners.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	4	Spring

EDC 702 Teaching and Learning III: Management and Assessment of Learning

Prerequisite: EDC 700 and EDC 701; bachelor's degree and certification as a classroom teacher.

This course examines the reasons for, benefits of, and limitations of the increasing call for effective and comprehensive assessment practices and helps teachers plan for, construct, use, and analyze a variety of assessment practices. This course also examines various models of and approaches to classroom management and discipline and the relation of management practices to effective learning.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	4	Fall

EDC 703 Teaching and Learning IV: Curriculum Development

Prerequisite: EDC 700 and EDC 701 and EDC 702; bachelor's degree and certification as a classroom teacher.

This course engages students in a careful examination of the curriculum they teach, from district curriculum goals, national curriculum standards, and course- or grade-level goals. The course encourages reflection about instructional practices in light of curriculum goals.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

EDC 704 Teaching and Learning V: Research Seminar

Prerequisite: EDC 700 and EDC 701 and EDC 702; bachelor's degree and certification as a classroom teacher.

An in-depth study related to a research topic identified earlier in the program or curricular project begun as part of a learning team, leading to the guided development and completion of an extensive research paper.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

EDC 786 Research Seminar in Education

Prerequisite: SFR 780.

An in-depth study of chosen topic in K-12 education leading to the guided development and completion of an extensive research paper or major creative work.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

EDC 800 Teacher Leadership I: Contemporary Educational Problems

Prerequisite: bachelor's degree and certification as a classroom teacher; master's degree in an education related field.

This course examines current educational problems at the macro-social level and how current trends in education ease or exacerbate those problems. These problems include, but are not limited to, the achievement gap, charter schools, socio-economics, homelessness, school funding, race/gender, community-school relationships, the social impact of technology, public school funding, the state of democracy, and so forth.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	4	Fall

EDC 801 Teacher Leadership II: Diversity and Curricular Design

Prerequisite: EDC 800; bachelor's degree and certification as a classroom teacher; master's degree in an education related field.

This course examines diversity and our shrinking global relationships through the lens of various theoretical perspectives (feminist, critical race theory, queer theory, etc.) as the means to critique current curriculum models and construct more culturally responsive curriculum for 21st century students. Participants will lead in the creation of curriculum that is responsive to their particular students, has a global perspective, and is mindful of ability differences

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	4	Fall

EDC 802 Teacher Leadership III: Building Classroom Climate and Effective Student Assessments

Prerequisite: EDC 800 and EDC 801; bachelor's degree and certification as a classroom teacher; master's degree in an education related field.

This course examines various philosophical bases for creating successful classroom communities and reasonable strategies for assessment student growth. This course also examines the myriad ways that classroom community understandings impact why and how students might be assessed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	4	Fall

EDC 803 Teacher Leadership IV: Curriculum Theory

Prerequisite: EDC 800 and EDC 801 and EDC 802; bachelor's degree and certification as a classroom teacher; master's degree in an education related field.

This course engages students in a critical examination of curriculum theory as the basis for making curricular decisions. The course encourages reflection about curriculum goals in light of contemporary and historically understood curriculum theory.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

Educational Technology (EDT) courses

EDT 365 Educational Applications of Technology and Media

Prerequisite: CFD 260 or ELE 302 or SEC 302 or SPE 310, or concurrent enrollment for teacher education majors.

Principles and techniques for selection and utilization of computer and video as well as other basic forms of media and technology. The class combines research, instructional design, equipment operation and materials production in lecture and laboratory settings to prepare teachers to be reflective decision makers on proper methods of using technology in teaching.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

EDT 520 Technologies in a Contemporary School Setting

Prerequisite: EDT 365; and concurrent enrollment in ELE 500 if Elementary Education major or MID 425 if Middle School Education major.

Principles and techniques for integrating current and emerging instructional technology in school settings. Emphasis on building technical competence through inquiry-based methods of exploration and implementation of multi-media and other technologies relevant to today's classroom.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

EDT 530 Technology Systems Management and Maintenance

This course will include an introduction to computer and peripheral hardware, microcomputer operating systems and education-related software packages, and the management of computers in a classroom or school setting. The management and maintenance of a system of computers is useful in many educational, instructional, communication and media production settings. Educational technology students should be prepared to troubleshoot and resolve basic technology problems that occur in an educational setting. Therefore, a variety of

education-specific topics will be presented in this course. May be taught concurrently with EDT 630. Cannot receive credit for both EDT 530 and EDT 630.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

EDT 560 Digital-Age Learning Environments

This course covers uses of instructional systems design model to guide the student in systematically developing e-learning instruction. The theory and practice of e-learning environments to maximize learning for all including usability and accessibility concerns are examined. Practical and theoretical means for ascertaining the needs of learners, implementations of specific technologies to meet those needs, and assessment of the effectiveness of the e-learning environment in meeting learners' needs are presented. Students are expected to apply previously learned skills and knowledge including the principles and techniques for integrating current and emerging instructional technology to plan, create, and manage an e-learning project in a real-world context. May be taught concurrently with EDT 660. Cannot receive credit for both EDT 560 and EDT 660.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

EDT 562 Educational Applications of Computers for Teaching

Using microcomputers in educational settings. Includes the investigation of software in desktop publishing, record management and multimedia applications. Special emphasis will be given to selection of appropriate programs for specific classroom utilization as well as computer interfaced peripheral devices. May be taught concurrently with EDT 662. Cannot receive credit for both EDT 562 and EDT 662.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

EDT 563 Technology Administration and Management

Provides technology specialists, technology coordinators, library media specialists, school administrators and educators with a working knowledge of the administrative processes and concerns of operating an educational technology support facility. The primary focus will be toward leadership, strategic planning, and change management and writing technology plans. The content of this course is primarily structured for educational institutions but could be utilized for instructional and training systems in many types of industrial, religious, medical and corporate organizations that teach and train. May be taught concurrently with EDT 640. Cannot receive credit for both EDT 563 and EDT 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

EDT 565 Selection and Utilization of Educational Technology

Targets principles of attention, perception, and retention regarding selection and implementation of instructional strategies. Students apply instructional design principles and learning theories to develop professional products; develop and implement evaluation strategies for hypermedia materials; combine electronic and non-electronic media; use telecommunications tools for production purposes; and integrate a variety of instructional technology tools. May be taught concurrently with EDT 665. Cannot receive credit for both EDT 565 and EDT 665.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

EDT 597 Topical Issues in Educational Technology

A variable credit course with amount of credit based on the extent of the work required. Special topics related to the field of Educational Technology which may broaden the scope of the program of study. May be repeated up to a maximum of 6 hours. May be taught concurrently with EDT 690. Cannot receive credit for both EDT 597 and EDT 690.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

EDT 630 Technology Systems Management and Maintenance

This course will include an introduction to computer and peripheral hardware, microcomputer operating systems and education-related software packages, and the management of computers in a classroom or school setting. The management and maintenance of a system of computers is useful in many educational, instructional, communication and media production settings. Educational technology students should be prepared to troubleshoot and resolve basic technology problems that occur in an educational setting. Therefore, a variety of education-specific topics will be presented in this course. May be taught concurrently with EDT 530. Cannot receive credit for both EDT 630 and EDT 530.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

EDT 640 Technology Administration and Management

This course is designed to provide technology specialists, technology coordinators, library media specialists, school administrators and educators with a working knowledge of the administrative processes and concerns of operating an educational technology support facility. The primary focus will be toward leadership, strategic planning, and change management and writing technology plans. The content of this course is primarily structured for educational institutions but could be utilized for instructional and training systems in many types of industrial, religious, medical and corporate organizations that teach and train. May be taught concurrently with EDT 563. Cannot receive credit for both EDT 640 and EDT 563.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

EDT 660 Digital-Age Learning Environments

This course covers uses of instructional systems design model to guide the student in systematically developing e-learning instruction. The theory and practice of e-learning environments to maximize learning for all including usability and accessibility concerns are examined. Practical and theoretical means for ascertaining the needs of learners, implementations of specific technologies to meet those needs, and assessment of the effectiveness of the e-learning environment in meeting learners' needs are presented. Students are expected to apply previously learned skills and knowledge including the principles and techniques for integrating current and emerging instructional technology to plan, create, and manage an e-learning project in a real-world context. May be taught concurrently with EDT 560. Cannot receive credit for both EDT 660 and EDT 560.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

EDT 661 Online Teaching and Pedagogy

This course provides students interested in online teaching with best practices in distance learning and pedagogical principles associated with the online learning environment. This course engages students in an overview of the theoretical frameworks, along with emerging trends in distance learning. Students will review the instructional design process for online environments. A survey of the relevant research in online education including case studies is evaluated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

EDT 662 Educational Applications of Computers for Teaching

Using microcomputers in educational settings. Includes the investigation of software in desktop publishing, record management and multimedia applications. Special emphasis will be given to selection of appropriate programs for specific classroom utilization as well as computer interfaced peripheral devices. May be taught concurrently with EDT 562. Cannot receive credit for both EDT 662 and EDT 562.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

EDT 665 Selection and Utilization of Educational Technology

Targets principles of attention, perception, and retention regarding selection and implementation of instructional strategies. Students apply instructional design principles and learning theories to develop professional products; develop and implement evaluation strategies for hypermedia materials; combine electronic and non-electronic media; use telecommunications tools for production purposes; and integrate a variety of instructional technology tools. May be taught concurrently with EDT 565. Cannot receive credit for both EDT 665 and EDT 565.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

EDT 690 Topical Issues in Educational Technology

A variable credit course with amount of credit based on the extent of the work required. Special topics related to the field of Educational Technology which may broaden the scope of the program of study. May be repeated up to a maximum of 6 hours. May be taught concurrently with EDT 597. Cannot receive credit for both EDT 690 and EDT 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

EDT 696 Continuing Education in Educational Technology

Special topics related to Educational Technology for continuing professional development. A variable credit course with amount of credit based on the extent of work required. May be repeated to a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

EDT 763 Administration of Educational Technology

Emphasis is placed on management skills including budgeting; facility design; policies and procedures; selection and utilization; evaluation; assessment and other topics related to coordinating an educational technology program at a building, district, institutional or organizational level.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

EDT 764 Instructional Design

Emphasis on the analysis and development of instruction for large group, small group, and individual student instruction. The utilization of systems approaches and packaged instructional forms will be stressed. The course will integrate systems approaches with learning theory involving educational technology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

EDT 765 Educational Media Production

Principles and techniques of designing and producing advanced forms of media software materials in video, audio, and photography formats with emphasis on multi-media that includes computer generated graphics interfaced with video and audio editing as well as more basic production techniques.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Summer

EDT 767 Educational Technology Practicum

This is a field-experience based course that requires the student to spend a minimum of 20 clock hours in a working environment where educational media technology services and programs are used or developed. The practicum may include: school media services: university programs, development centers in industry, government or medical programs, educational TV studios, computer facilities or other media production venues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Upon demand

EDT 770 Fundamentals of Computer Networking, Cloud Based Technology, and Internet Safety

This introductory graduate course will provide a foundational understanding of networking, cloud based storage, and internet safety. Learners in this course will gain an understanding of office and business networking, using the cloud for storage and safety, and types of internet attacks that they may face. Students will learn how to evaluate the needs of their organization and come to terms with the vulnerabilities or breaches they could face when implementing new technologies and explore ways to protect their organizations online.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

EDT 777 Problems in Educational Technology

Research in or in-depth examination of issues and problems in the field of Educational Technology. May be repeated up to a maximum of 3 hours when topic varies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

EDT 797 Educational Technology Special Research Project

Prerequisite: SFR 780.

An extensive multimedia production project which results in a functional product with extensive written documentation to support its use as a research or instructional tool which could provide results for extended research and publication.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

EDT 798 Research Seminar in Educational Technology

Prerequisite: SFR 780.

An extensive research paper focused on the field of instructional Design and Technology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

EDT 799 Educational Technology Thesis

Prerequisite: SFR 780.

Independent research and study connected with preparation of a thesis in the field of Educational Technology. The paper will consist of original or creative research accountable to committee review and defense. May be repeated for a maximum of 6 hours credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-6			Upon demand

Middle School Education (MID) courses

MID 400 Philosophy, Curriculum, and Organization of Middle School Education

Prerequisite: "C" or better in SEC 302.

An overview of middle level education philosophy, curriculum planning and development, instruction, and organization. Emphasis is on cognitive, behavioral, and affective needs of middle level students, and on the development of interdisciplinary thematic units. Course can be taken concurrently with EDC 150.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MID 421 Philosophy and Organization of Middle School Education

Prerequisite: admitted to Teacher Education Program.

An overview of the philosophy, organization and curriculum of the middle school with emphasis upon teaching methods appropriate for use with students in late childhood and early adolescence. Strategies for advisory, study skills, and transition programs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

MID 425 Middle School Curriculum

Prerequisite: MID 400; and admitted to Teacher Education Program.

Foundations in the development and articulation of middle school curriculum with emphasis placed upon the implementation of developmentally and culturally responsive practices relevant to the young adolescent learner. Integrated approaches to teaching and learning designed, implemented, and evaluated as part of a teaching team to include the exploration of assessment and differentiated instruction in the middle level classroom will be examined. The course requires a 15 hour practicum.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring, Summer

MID 439 Middle School Instructional Strategies

Prerequisite: MID 400 and MID 425; and admitted to Teacher Education Program.

This course will provide opportunities for supervised, direct involvement in the public school setting at the middle level. Preservice teachers will learn and implement instructional strategies used to provide effective instruction for the middle level learner. Includes 45 hours of practicum experience in which a lesson will be taught in the preservice teachers' content area and a formal observation will be conducted by university faculty/staff at local/area middle schools.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

MID 493 Supervised Teaching (Middle School)

Prerequisite: MID 400 or MID 425; and MID 439 and RDG 318 and RDG 474; and all method courses in chosen content areas; a grade of "C" or better in all professional education courses; current pre-professional liability insurance; and approval for supervised teaching; and concurrent enrollment in MID 494.

Student observes then teaches under the direction of the cooperating teacher and university supervisor. Student participates in extra-curricular, co-curricular, and exploratory activities and attends both individual and group conferences. In order to receive a grade in this course, the student's professional portfolio must meet or exceed final criteria. Course will not count toward the major GPA or in the subject matter emphasis area. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6			Fall, Spring

MID 494 Supervised Teaching (Middle School)

Prerequisite: concurrent enrollment in MID 493.

Student observes then teaches under the direction of the cooperating teacher and university supervisor. Student participates in extra-curricular, co-curricular, and exploratory activities and attends both individual and group conferences. In order to receive a grade in this course, the student's professional portfolio must meet or exceed final criteria. Course will not count toward the major GPA or in the subject matter emphasis area. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6			Fall, Spring

MID 499 Clinical Experiences in Teaching II

Prerequisite: EDC 199; and admitted to Teacher Education Program; and grades of "C" or better in all professional education courses; and completion of portfolio checkpoints 1 and 2; and current pre-professional liability insurance; and program approval.

This course is designed to meet HB 1711 for student's experience as a Teacher's Aide or Assistant Rule (Rule 5 CSR 80-805.040), to that of conventional student teachers within the same program. It is also designed to support completion of additional clinical requirements within that program including: seminars and workshops, required meetings, school related activities appropriate to the assignment, demonstrated mastery of the MoSPE standards and completion and overall assessment of a Professional Preparation Portfolio. This course is credited only on BSEd or appropriate masters-level certification programs. Can only receive credit for one of the following: AGE 499, AGT 499, ART 469, COM 493, ECE 499, ELE 499, ENG 434, FCS 498, HST 499, KIN 498, MCL 491, MID 499, MTH 496, MUS 499, SCI 499, SEC 499, SPE 499, THE 493.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Fall, Spring

MID 725 Advanced Theory and Practice in the Teaching of Early Adolescents

Materials, methods, and procedures for designing developmentally appropriate learning experiences for early adolescents; current trends and issues in the field.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MID 810 Foundations of Middle Level Education

An examination of educational programs most appropriate for students in late childhood and early adolescence with emphasis upon the philosophy, curriculum, instruction, and middle grades education.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

Reading (RDG) courses

RDG 107 Critical Reading and Study Skills in Academic Texts

Introduction to college reading designed to help students acquire and improve critical reading comprehension skills of academic texts necessary for college-level coursework. Provides intensive reading instruction in comprehension, vocabulary development, reading rate, reading efficiency techniques, and reading study strategies. Cannot be used to satisfy any General Education Program requirement or any major or minor requirement. Cannot receive credit for both RDG 107 and IDS 118.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

RDG 300 Service Learning in Literacy

Prerequisite: 30 hours and concurrent registration in a RDG course designated as a service learning offering and admitted to Teacher Education Program.

This service component for an existing course incorporates community service with classroom instruction in literacy to provide an integrated learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. Cannot be substituted for RDG 421 or any other required practicum. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

RDG 318 Foundations of Literacy Instruction

Prerequisite: 30 hours.

An initial course in literacy foundations and methods from emergent literacy through middle school/junior high school. Examines various approaches of current literacy instruction and practices, including the basic components of literacy and applications to content areas. Creates a literate environment that fosters reading and writing by integrating foundational knowledge. Emphasizes contemporary classrooms, which are assumed to contain children of diverse cultures and abilities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

RDG 319 Practicum-Foundations of Literacy Instruction

Prerequisite: admitted to Teacher Education Program and current professional liability insurance.

Practical application of developmental, functional, and recreational literacy instructional practices from emergent literacy through middle school/junior high school by the assignment of students to practicum centers where they will be required to observe, prepare, teach, and analyze literacy lessons. Students must obtain a Missouri Volunteer and Employee Criminal History Service (MOVECHS) FBI fingerprinting background check.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

RDG 420 Methods of Assessing and Personalizing Reading and Writing

Prerequisite: RDG 318; and concurrent enrollment in RDG 421.

A practical approach to personalizing elementary literacy instruction, which includes assessing the needs and reading/writing progress of children and selecting appropriate materials and procedures for the contemporary classroom, which is assumed to contain children of diverse cultures and learning abilities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

RDG 421 Practicum-Methods of Assessing and Personalizing Reading and Writing

Prerequisite: RDG 318; and concurrent enrollment in RDG 420.

Practicum application of techniques in personalizing elementary literacy instruction, by the assignment of students to practicum placements where they will be required to assess the reading and writing progress of children and select appropriate materials and applicable instructional methods for the contemporary classroom, which is assumed to contain children of diverse cultures and learning abilities. Twenty clock hour practicum in school setting is required; students must have valid clearance documents on file.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall, Spring, Summer

RDG 422 Techniques of Teaching Literacy in the Content Fields

Prerequisite: RDG 318 and admitted to Teacher Education Program.

Assess literacy levels and select appropriate materials in various content fields. Techniques of teaching reading and writing in content areas, with emphasis on functional and study skills in these materials. Application will be made to the contemporary classroom, which is assumed to contain children of diverse cultures and learning abilities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

RDG 474 Reading and Writing in the Content Fields

Prerequisite: admitted to Teacher Education Program or concurrent enrollment in EDC 150.

Methods and strategies for using reading and writing as tools for learning in regular middle and secondary school classrooms in which there exists a wide range of literacy achievement. Includes awareness of reading and writing approaches and problems; study skills, literacy evaluation and measurement; vocabulary and comprehension development; selection of materials appropriate for each student; and community-based experiences for practical implementation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

RDG 480 Problems in Literacy Education

The student, in consultation with advisor or instructor, selects a topic in literacy for in-depth, independent study. Number of hours of involvement determined by semester hours of credit. May be repeated to a total of 5 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

RDG 540 Analysis and Correction of Difficulties in Literacy

Prerequisite: RDG 318 or both RDG 420 and RDG 421, or equivalent.

Techniques of analysis and correction of difficulties in literacy for elementary, secondary, special education and reading/literacy teachers. Trends in dealing with diagnostic procedures, instructional techniques, special materials, and assessment. Students concentrate study within their level of training. Students must obtain a Missouri Volunteer and Employee Criminal History Service (MOVECHS) FBI fingerprinting background check. May be taught concurrently with RDG 640. Cannot receive credit for both RDG 540 and RDG 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

RDG 556 Topical Issues in Literacy

Prerequisite: permission may be required (see class schedule).

To develop understanding and skills in relevant areas of literacy education. Credit hours may vary depending on topic. Variable content course. May be repeated to a total of 5 hours when topics change. A maximum of 3 hours may be used toward degree. May be taught concurrently with RDG 656. Cannot receive credit for both RDG 656 and RDG 556 on same topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

RDG 560 Diversity Issues in Literacy and Content Area Instruction

Designed for preservice and practicing elementary, middle, and high school teachers working on undergraduate degrees in Elementary Education or Secondary Education; as well as graduate degrees in Literacy, Elementary Education, MAT, or other MS or MSED graduate degrees. Students will expand their knowledge of racial, cultural, ethnic, linguistics, and socio-economics diversity; and learn strategies to implement diversity issues into their literacy instruction and/or content area lessons. Students will be introduced to different aspects of diversity through a wide variety of course readings, multicultural literature, videos, guest speakers, multicultural interview, and community field trips. May be taught concurrently with RDG 660. Cannot receive credit for both RDG 660 and RDG 560.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

RDG 565 Cultural Diversity in Literacy and Instruction: Classrooms and Community

Designed for preservice and practicing middle and high school teachers working on undergraduate degrees in Elementary, Middle School, or Secondary Education. Students will expand their knowledge of ethnicity, race, socio-economics status, gender, exceptionalities, language, religion, sexual orientation, and geographic areas in the context of classrooms, schools, and community; and learn strategies to implement diversity into their literacy instruction and/or content area lessons. Students will be introduced to different aspects of domestic and global diversity through a wide variety of course readings, culturally diverse literature, instructional videos, documentaries, webcasts, and intercultural interviews. May be taught concurrently with RDG 665. Cannot receive credit for both RDG 565 and RDG 665.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

RDG 573 Psychology of Global Literacies

The study of the mindset and behaviors involved in the acquisition and application of literacy from multicultural and global perspectives. Students will investigate and analyze the connections between language, literacy, and culture in schools and communities within a global setting. Students will examine the purpose and function of literacy while reading multicultural and international fiction and nonfiction literature. May be taught concurrently with RDG 673. Cannot receive credit for both RDG 573 and RDG 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

RDG 574 Analysis and Correction of Difficulties in Adolescent Literacy

Prerequisite: RDG 474 or concurrent enrollment, or equivalent.

Techniques of analysis and correction of difficulties in literacy for middle school and secondary teachers whose students struggle with literacy skills, such as reading and writing in content areas. Trends in dealing with diagnostic procedures, instructional techniques, special materials, evaluative devices, instructional interventions for students with reading deficits, and community-based experiences for practical implementation. Students concentrate study within their discipline and level of certification. May be taught concurrently with RDG 624. Cannot receive credit for both RDG 574 and RDG 624.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

RDG 580 Successful Classroom Communities to Enhance Student Learning

Integration of areas supporting student learning including productive interactions with families. Concentrated modules on literacy learning of regular education students, struggling readers, and exceptional students. Basic principles in effective communication with parents and other professionals to reinforce appropriate classroom learning. Cannot be substituted for any course required for Special Education degrees or certificates. May be taught concurrently with RDG 680. Cannot receive credit for both RDG 680 and RDG 580.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Summer

RDG 585 Techniques of Responsive Support in the Literacy Classroom

Techniques to support positive, active learning through appropriate response to intervention plans within the literacy classroom. Study of alternative and appropriate behaviors to meet students' needs in acceptable ways through modeling, guided practice, and cueing within a supportive environment, which includes teachers, parents, and other stakeholders in students' learning. Cannot be substituted for SPE 515, 615, 616, or any course required for a Special Education degree or certificate. May be taught concurrently with RDG 685. Cannot receive credit for both RDG 585 and RDG 685.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Summer

RDG 599 Literacy Projects

This course is designed to provide students an opportunity to informally assess and tutor adults or children exhibiting literacy difficulties. Students are expected to have an increased awareness and understanding pertaining to literacy and to recognize the importance of improving the educational process of adults and children. Number of class hours determined by semester hours of credit. Cannot be substituted for any required reading/literacy course. May be repeated to a total of 3 hours. May be taught concurrently with RDG 600. Cannot receive credit for both RDG 600 and RDG 599.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

RDG 600 Literacy Projects

This course is designed to provide students an opportunity to informally assess and tutor adults or children exhibiting literacy difficulties. Students are expected to have an increased awareness and understanding pertaining to literacy and to recognize the importance of improving the educational process of adults and children. Number of class hours determined by semester hours of credit. Cannot be substituted for any required reading/literacy course. May be repeated to a total of 3 hours. May be taught concurrently with RDG 599. Cannot receive credit for both RDG 599 and RDG 600.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

RDG 624 Analysis and Correction of Difficulties in Adolescent Literacy

Prerequisite: RDG 474 or concurrent enrollment, or equivalent.

Techniques of analysis and correction of difficulties in literacy for middle school and secondary teachers whose students struggle with literacy skills, such as reading and writing in content areas. Trends in dealing with diagnostic procedures, instructional techniques, special materials, evaluative devices, instructional interventions for students with reading deficits, and community-based experiences for practical implementation. Students concentrate study within their discipline and level of certification. May be taught concurrently with RDG 574. Cannot receive credit for both RDG 574 and RDG 624.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

RDG 631 Introduction to Dyslexia: Literacy Development, Language, and the Brain

Prerequisite: admission to the graduate certificate in Dyslexia program.

This course will begin with an overview of dyslexia. Historical issues, relevant laws and policies, as well as current legislation will be discussed. Students will learn common characteristics and possible identifiers of children with dyslexia and related language difficulties. Common misconceptions and myths related to dyslexia will also be addressed. Foundations of literacy development and an in-depth study of language processing, including orthographic, phonological, semantic, syntactic, and discourse, will be included. This course also addresses the neurobiological aspect of dyslexia, including the role of attention, executive functioning, memory, and processing speed in reading and writing development.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

RDG 632 Assessment Procedures for Students with Dyslexia

Prerequisite: permission from graduate Literacy Program Coordinator.

This course focuses on assessment procedures and techniques for working with exceptional children, with a strong emphasis on determining whether or not children display characteristics of dyslexia. The course will address differences among screening, diagnostic, outcome, and progress-monitoring assessments, and when it would be most appropriate to use each type of assessment. Students enrolled in the course will also learn how to use assessment results to plan interventions and guide instruction for children with dyslexia or other learning difficulties.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

RDG 633 Interventions for Students with Dyslexia

Prerequisite: permission from graduate Literacy Program Coordinator.

This course provides students with information on research-based strategies and interventions for use with children identified as dyslexic. Students will learn effective ways to support children who experience difficulties in various aspects of literacy development. The course focuses on explicit instruction and interventions using a multisensory approach. Students will learn how to provide instruction in all areas of literacy, including phonemic awareness, phonics, fluency, vocabulary, comprehension, spelling, and writing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

RDG 634 Dyslexia Practicum: Assessments and Interventions

Prerequisite: permission from graduate Literacy Program Coordinator.

This practicum course allows students to work in a one-on-one setting with a child identified as dyslexic or one displaying characteristics of dyslexia. The course allows students to integrate theoretical and practical knowledge gained from previous courses to administer assessments and plan appropriate interventions. Students will submit assessment results, lesson plans, progress monitoring data, in addition to videoed lessons.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

RDG 640 Analysis and Correction of Difficulties in Literacy

Prerequisite: RDG 318 or both RDG 420 and RDG 421, or equivalent.

Techniques of analysis and correction of difficulties in literacy for elementary, secondary, special education and reading/literacy teachers. Trends in dealing with diagnostic procedures, instructional techniques, special materials, and assessment. Students concentrate study within their level of training. May be taught concurrently with RDG 540. Cannot receive credit for both RDG 640 and RDG 540.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

RDG 656 Topical Issues in Literacy

Prerequisite: permission may be required (see class schedule).

To develop understanding and skills in relevant areas of literacy education. Credit hours may vary depending on topic. Variable content course. May be repeated to a total of 5 hours when topics change. A maximum of 3 hours may be used toward degree. May be taught concurrently with RDG 556. Cannot receive credit for both RDG 556 and RDG 656 on same topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

RDG 660 Diversity Issues in Literacy and Content Area Instruction

Designed for preservice and practicing elementary, middle, and high school teachers working on undergraduate degrees in Elementary Education or Secondary Education; as well as graduate degrees in Literacy, Elementary Education, MAT, or other MS or MSED graduate degrees. Students will expand their knowledge of racial, cultural, ethnic, linguistics, and socio-economics diversity; and learn strategics to implement diversity issues into their literacy instruction and/or content area lessons. Students will be introduced to different aspects of diversity through a wide variety of course readings, multicultural literature, videos, guest speakers, multicultural interview, and community field trips. May be taught concurrently with RDG 560. Cannot receive credit for both RDG 560 and RDG 660.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

RDG 665 Cultural Diversity in Literacy and Instruction: Classrooms and Community

Designed for preservice and practicing middle and high school teachers working on graduate degrees in Literacy, Educational Technology, Master of Arts in Teaching, Master of Arts in Teaching and Learning, Elementary Education, or other MS, MA or MEd graduate degrees. Students will expand their knowledge of ethnicity, race, socio-economics status, gender, exceptionalities, language, religion, sexual orientation, and geographic areas in the context of classrooms, schools, and community; and learn strategies to implement diversity into their literacy instruction and/or content area lessons. Students will be introduced to different aspects of domestic and global diversity through a wide variety of course readings, culturally diverse literature, instructional videos, documentaries, webcasts, and intercultural interviews. May be taught concurrently with RDG 565. Cannot receive credit for both RDG 665 and RDG 565.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

RDG 673 Psychology of Global Literacies

The study of the mindset and behaviors involved in the acquisition and application of literacy from multicultural and global perspectives. Students will investigate and analyze the connections between language, literacy, and culture in schools and communities within a global setting. Students will examine the purpose and function of literacy while reading multicultural and international fiction and nonfiction literature. May be taught concurrently with RDG 573. Cannot receive credit for both RDG 673 and RDG 573.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

RDG 680 Successful Classroom Communities to Enhance Student Learning

Integration of areas supporting student learning including productive interactions with families. Concentrated modules on literacy learning of regular education students, struggling readers, and exceptional students. Basic principles in effective communication with parents and other professionals to reinforce appropriate classroom learning. Cannot be substituted for any course required for Special Education degrees or certificates. May be taught concurrently with RDG 580. Cannot receive credit for both RDG 680 and RDG 580.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Summer

RDG 685 Techniques of Responsive Support in the Literacy Classroom

Techniques to support positive, active learning through appropriate response to intervention plans within the literacy classroom. Study of alternative and appropriate behaviors to meet students' needs in acceptable ways through modeling, guided practice, and cueing within a supportive environment, which includes teachers, parents, and other stakeholders in student's learning. Cannot be substituted for SPE 515, 615, 616, or any course required for a SPE degree or certificate. May be taught concurrently with RDG 585. Cannot receive credit for both RDG 585 and 685.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Summer

RDG 700 Relationship of Language to Literacy and Intellectual Development

Utilizing elements of language and intellectual development which provide the basis for the development of appropriate literacy skills. Helping teachers gain skill in using teaching strategies which help children develop language and intellectual competencies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

RDG 710 Content Area Literacy

Teaching subject matter in content areas in ways for utilizing and further developing fundamental literacy; effective reading and writing skills, vocabulary development in specific areas, study skills, utilization of cognitive processes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

RDG 720 Use of Multi-Media Resources in Literacy

Criteria, methods and tools for selection and effective utilization of both print and nonprint material, enhancing and encouraging competency in literacy; production of materials utilizing various media. Students concentrate study within their level of training (elementary or secondary.)

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

RDG 730 Assessment and Instruction of Less Skilled Readers and Writers

Prerequisite: RDG 318; or both RDG 420 and RDG 421, or equivalent.

Supervised small group practice in a clinical setting assessing and instructing students who are experiencing difficulty learning to read and write. Planned with and directed by a graduate faculty member. Less intensive and more generalized clinical experience for those not intending to pursue Special Reading Teacher certification. Cannot be substituted for any course required for special reading certification (RDG 540/640, 780, 781, or 782). Students in Literacy program must enroll for 6 hours, others may enroll for 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-6			Upon demand

RDG 740 Issues and Trends in Literacy Education

Provides intensive study of significant issues and trends in literacy education. Emphasis on locating and analyzing current issues and trends and encouraging teachers and administrators to apply the information to research-based best practices in the classroom.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

RDG 770 Curriculum Design in Literacy

This course examines the theories and research on literacy from comprehension to implications for instructional practice. Candidates will gain knowledge and share with classmates influences on the teaching of literacy, which may include practices from historical to contemporary times. Research and read literature to prepare for establishing a total school literacy curriculum.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

RDG 780 Assessment Procedures for the Literacy Specialist

Prerequisite: RDG 640.

Designed especially for the special reading teacher or literacy coach who needs an advanced course for special reading teacher certification. Psycho-educational testing techniques, multisensory teaching techniques, report writing, resource personnel, and clinic operations will form the basis for this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

RDG 781 Assessment of Literacy Problems

Prerequisite: RDG 780; and concurrent enrollment in RDG 782.

Supervised individual practice diagnosing literacy problems. Students work with elementary, secondary, or adult learners. Includes 4 hours of practicum.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Spring, Summer

RDG 782 Remediation of Literacy Problems

Prerequisite: RDG 780; and concurrent enrollment in RDG 781.

Supervised individual practice with remedial procedures for literacy problems. Students work with elementary, secondary, or adult learners. Includes 4 hours of practicum.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Spring, Summer

RDG 791 Problems in Literacy Education

In consultation with the advisor, major issues in the field of literacy education are selected for investigation through independent study. Number of hours of involvement determined by semester hours of credit. May be repeated to a total of 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

RDG 795 Research Seminar in Literacy

Prerequisite: SFR 780.

An in-depth study of a topic in literacy, leading to the guided development and completion of an extensive research paper.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

RDG 799 Thesis

Prerequisite: SFR 780.

Independent research and study connected with preparation of thesis. May be repeated to a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Secondary Education (SEC) courses

SEC 300 Clinical and Field Experiences in Secondary Education

Prerequisite: SFR 250; and earned a composition score or superscore of 20 or better on the ACT or attempted Missouri State Board of Education entry examination; and concurrent enrollment in SEC 301.

Students enrolled attend a weekly clinical and/or discussion session on campus and participate in field experiences at the Greenwood Laboratory School and/or area secondary schools. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Upon demand

SEC 301 Introduction to Teaching in the Secondary School

Prerequisite: SFR 250; and earned a composition score or superscore of 20 or better on the ACT or attempted Missouri State Board of Education entry examination; and concurrent enrollment in SEC 300.

Principles and objectives of secondary education; methods of meeting the diverse educational needs of today's secondary students; techniques of teaching; unit construction and daily planning. Required first portfolio checkpoint will occur in this course. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SEC 302 General Methods of Instruction in the Middle and Secondary Schools

Prerequisite: 30 hours and 2.50 combined GPA.

Principles and objectives of secondary education; methods of meeting the diverse educational needs of today's middle and secondary students; techniques of teaching; unit construction and daily planning. Students participate in a 30 hour field experience at the Greenwood Laboratory School and/or area middle or secondary schools. A grade of C or better is required in this course in order to enroll in supervised teaching. Required first transition checkpoint will occur in this course. This course is a combination of previously offered SEC 300/301 and students cannot receive credit for both SEC 300/301 and SEC 302. Students must have either earned a composite score or superscore of 20 or better on the ACT or have passed all sections of the Missouri State Board of Education entry examination to proceed beyond this point in the Professional Education Program. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

SEC 439 Vocational Business Education Instructional Strategies

Prerequisite: SEC 522 and SEC 527; and admitted to Teacher Education Program.

This course will provide opportunities for supervised, direct involvement in the public school setting at the secondary level. Preservice teachers will learn and implement instructional strategies used to provide effective instruction for the vocational learner. This course includes 45 hours of practicum experience. A lesson will be taught, and a formal observation will be conducted by university faculty/staff at local/area secondary schools.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

SEC 493 Supervised Teaching (Secondary)

Prerequisite: completion of all method courses in chosen content area; a grade of "C" or better in all professional education courses; current pre-professional liability insurance; and approval for supervised teaching; and concurrent enrollment in SEC 494.

Student observes, then teaches under the direction of the cooperating teacher and the university supervisor. Student participates in school-related activities appropriate to the assignment and attends all required meetings. In order to receive a grade in this course, the student's professional portfolio must meet or exceed final criteria. Course will not count toward the major GPA.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5-6			Fall, Spring

SEC 494 Supervised Teaching (Secondary)

Prerequisite: concurrent enrollment in SEC 493.

Student observes, then teaches under the direction of the cooperating teacher and the university supervisor. Student participates in school-related activities appropriate to the assignment and attends all required meetings. In order to receive a grade in this course, the student's professional portfolio must meet or exceed final criteria. Course will not count toward the major GPA.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5-6			Fall, Spring

SEC 495 Theory into Practice: Applications Workshop

Prerequisite: completion of all method courses in chosen content area; a grade of C or better in all professional education courses; approval for student teaching; and concurrent enrollment in SEC 493 or other supervised teaching course.

Students enroll in workshops, offered during the student teaching semester, that help student teachers with particularly important and difficult tasks involving such things as how to work with diverse student populations, how to apply effective reading strategies, and how to manage students in the classroom. Additional aspects of teaching unique to particular subject matter areas will also be explored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

SEC 499 Clinical Experiences in Teaching II

Prerequisite: EDC 199; and admitted to Teacher Education Program; and grades of "C" or better in all professional education courses; and completion of portfolio checkpoints 1 and 2; and current pre-professional liability insurance; and program approval.

This course is designed to meet HB 1711 for student's experience as a Teacher's Aide or Assistant Rule (Rule 5 CSR 80-805.040), to that of conventional student teachers within the same program. It is also designed to support completion of additional clinical requirements within that program including: seminars and workshops, required meetings, school related activities appropriate to the assignment, demonstrated mastery of the MoSPE standards and completion and overall assessment of a Professional Preparation Portfolio. This course is credited only on BSEd or appropriate masters-level certification programs. Can only receive credit for one of the following: AGE 499, AGT 499, ART 469, COM 493, ECE 499, ELE 499, ENG 434, FCS 498, HST 499, KIN 498, MCL 491, MID 499, MTH 496, MUS 499, SCI 499, SEC 499, SPE 499, THE 493.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Fall, Spring

SEC 522 Philosophy of Vocational Business Education

Philosophical foundations of vocational education; philosophies of Vocational Business Education in a contemporary school setting; including assessing specific program needs as determined from occupational surveys and other demographic data, and evaluating the overall effectiveness of the program on manpower needs in a given labor market area. May be taught concurrently with SEC 622. Cannot receive credit for both SEC 622 and SEC 522.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SEC 526 Coordination of Cooperative Education

Problems and procedures in organizing and operating part-time cooperative and evening occupation programs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SEC 527 Teaching and Learning in the Vocational Business Education Classroom

Rise of the vocational education movement; learning abilities, educational interests of young adults; instructional strategies; vocational curriculum; problems and procedures in organizing and managing a vocational education classroom; the relationship between secondary education, community colleges, and career education centers.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SEC 528 Measurement and Evaluation of Vocational Education Programs

Assessing specific program needs as determined from occupational surveys and other demographic data; follow-up techniques to evaluate the overall effectiveness of the program on manpower needs in a given labor market area. Identical with AGV 528. May be repeated to a total of 3 hours. May be taught concurrently with SEC 628. Cannot receive credit for both SEC 628 and SEC 528.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SEC 622 Philosophy of Vocational Education

Philosophical foundations of vocational education; philosophies of vocational education in contemporary school. Identical with AGV 622. May be repeated to a total of 3 hours. May be taught concurrently with SEC 522. Cannot receive credit for both SEC 522 and SEC 622.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SEC 626 Coordination of Cooperative Education

Problems and procedures in organizing and operating part-time cooperative and evening occupation programs. Restricted to those who can qualify as coordinators. Identical with AGV 626. May be repeated to a total of 2 hours. May be taught concurrently with SEC 526. Cannot receive credit for both SEC 526 and SEC 626.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

SEC 627 Teaching Adults in Vocational Education

Rise of the adult education movement; learning abilities, educational interests and vocational needs of adults; problems and procedures in organizing and operating adult education programs; relationship of adult education to public school education. Identical with AGV 627 and AGE 608. Cannot receive credit for SEC 627 and AGV 627 and AGE 608. May be taught concurrently with SEC 527. Cannot receive credit for both SEC 527 and SEC 627.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SEC 628 Measurement and Evaluation of Vocational Education Programs

Assessing specific program needs as determined from occupational surveys and other demographic data; follow-up techniques to evaluate the overall effectiveness of the program on manpower needs in a given labor market area. Identical with AGV 628. May be repeated to a total of 3 hours. May be taught concurrently with SEC 528. Cannot receive credit for both SEC 528 and SEC 628.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SEC 701 Secondary School Curriculum

Foundation course in the development and organization of the secondary school curriculum.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SEC 703 Seminar in Current Trends in Teaching English

Prerequisite: ENG 405.

For experienced teachers of English in grades 9-12; research and recent developments in teaching literature and composition.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SEC 704 Seminar in Current Trends in Teaching Social Studies

Prerequisite: HST 418.

For experienced teachers of social studies in grades 9-12; research and recent developments in teaching various areas of social studies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SEC 705 Curriculum Construction in Business Education

Objectives and interrelationships of business education courses and programs. Development of curricular materials and evaluative devices. May be repeated to a total of 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SEC 706 Seminar in Current Trends in Teaching Business Education

For experienced teachers of business education in grades 9-12; research and recent developments in teaching business education.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SEC 707 Seminar in Current Trends in Teaching Mathematics

Prerequisite: MTH 409.

For experienced teachers of mathematics in grades 9-12; research in recent trends and developments in teaching mathematics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

SEC 708 Seminar in Current Trends in the Teaching of Biology

Prerequisite: SCI 414.

Methods of teaching biology; emphasizing modern techniques and developments in both the biological science curriculum and instructional procedures relating to that curriculum.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SEC 783 Internship in Teaching I

Prerequisite: SFR 797; complete appropriate background check and obtain current professional liability insurance.

A site-based clinical experience. Students will observe the operations of a school, serve as teacher aides and administrative aides in the school; and work closely with school and community service organizations. Students will also complete an on-going seminar through online or literature based delivery systems. Students will implement an initial Teacher Work Sample in a classroom under the supervision of a cooperating teacher.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall

SEC 784 Internship in Teaching II

Prerequisite: SEC 783; and acceptance into the Master of Arts in Teaching degree program.

The candidate must have successfully completed the Missouri Educator Gateway Assessments (MEGA) as established by the Missouri Board of Education, obtained current pre-professional liability insurance, completed the appropriate background check and be approved for supervised teaching. A semester-based supervised teaching experience. Students teach full time, under the supervision of a cooperating teacher and a University supervisor. Students also attend an ongoing seminar and design and implement a Teacher Work Sample required for graduation. The candidate's professional portfolio should be completed during this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
10	2	16	Spring

SEC 785 Internship in Teaching III

Prerequisite: SEC 783 and SEC 784.

Students will complete a professional preparation portfolio. The professional portfolio will be evaluated by instructors in order to determine how well the candidate demonstrated understanding of DESE content standards and MoSPE standards.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

Secondary Education, Foundations and Educational Research (SFR) courses

SFR 250 Foundations of American Education

Prerequisite: 30 hours.

This course introduces education majors to the departments. Knowledge Base with its emphasis on teachers as reflective decision-makers. It examines both the nature and history of the teaching profession, K-12 school orientation, and educational theories. It also explores sociocultural, political, and legal issues in American education.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SFR 305 Field Experiences in Education

Student attends scheduled discussion sessions on campus and participates in field experiences at Greenwood Laboratory School and/or area schools. Designed for transfer students who have partially completed the field experiences requirement and students working on a certification which requires a second field experience. 1(0-2) or

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall, Spring

SFR 351 Philosophical Problems of Education

Prerequisite: admitted to Teacher Education Program.

Introduction to educational problems involving language, logic, ethics, theory of knowledge, and theory of action, as they apply to school problems of pedagogy, curriculum, and policy. Contemporary and historical treatments of the problems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 353 History of Educational Thought

Prerequisite: admitted to Teacher Education Program.

The history of major educational ideas and their relationships to contemporary educational theories and practices.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 354 Social and Philosophical Foundations of American Education

Prerequisite: admitted to Teacher Education Program.

The roles and functions of the school in the social and philosophical context of American culture. Attention to cultural diversity and its effects upon the school and the learner.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 396 Student Assessment and Evaluation

Prerequisite: admitted to Teacher Education Program.

Planning, constructing, using, and analyzing a variety of assessment practices to enable preservice teachers to make reflective decisions in the classroom.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 399 Problems in Education

Independent research conducted on topics relevant to the field of education. The student and instructor mutually agree upon the direction and extent of the project. Credited only on the BSEd degree. May be repeated to a maximum of 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SFR 442 Techniques of Classroom Management

Prerequisite: admitted to Teacher Education Program.

Emphasis on prevention of behavior problems. The study of theoretical approaches to handling disruptive behavior in the classroom. Application of theory to simulated classroom situations. Includes assistance in teaching students with handicaps and/or from different cultural backgrounds.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 444 Approaches to Individualizing Education

Prerequisite: admitted to Teacher Education Program.

Analyzing the academic interest, levels, and learning styles of the student. Methods of developing individual programs, self-instructional packages, and learning aids. Introduction to prepared materials and other technology to enable the teacher to individualize instruction.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 482 Teacher Relationships with the School of Society

Prerequisite: admitted to Teacher Education Program.

Professional responsibilities and roles of the teacher in relationships with students, staff, and community; job procurement and interview skills, teaching as a career and profession.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 486 Management and Assessment in the Middle and Secondary Classroom

Prerequisite: admission to Teacher Education Program or concurrent enrollment in EDC 150; and PSY 360 or equivalent competencies.

Planning, constructing, using, and analyzing a variety of assessment practices and understanding uses of standardized testing in education. Covers adolescent social behavior, management theory and strategies that promote effective learning and development while minimizing disruptive behavior. Application of theory to classroom practice and everyday situations. Identical with PSY 486. Cannot receive credit for both SFR 486 and PSY 486.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

SFR 521 Techniques for Teaching Adults

Prerequisite: admitted to Teacher Education Program.

A survey of the principles, objectives and trends in instructional techniques for adult education. May be taught concurrently with SFR 621. Cannot receive credit for both SFR 621 and SFR 521.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SFR 547 Guidance and Interpersonal Relationships in the Classroom

Prerequisite: admitted to Teacher Education Program.

Appropriate classroom communication and interpersonal skills. Emphasis on the relationship between self concept development and achievement in a diverse student population. May be taught concurrently with SFR 647. Cannot receive credit for both SFR 647 and SFR 547.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 576 Topical Issues in Education

To develop further understanding and skills in the improvement of teaching procedures, curriculum, supervision, or administration. Each course is concerned with a single topic. Number of class hours determined by semester hours of credit. A maximum of 3 hours may be used on a degree program. Variable Content Course. May be taught concurrently with SFR 676. Cannot receive credit for both SFR 676 and SFR 576.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

SFR 581 Law and the Classroom Teacher

Prerequisite: admitted to Teacher Education Program.

Rights and responsibilities of classroom teachers as determined by the legal structure created by state and federal constitutions, legislative actions, and judicial decisions. Implications of legal foundations for teachers relative to ethics, relationships with students, colleagues, minority groups, professional organizations, and others. May be taught concurrently with SFR 681. Cannot receive credit for both SFR 681 and SFR 581.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 583 Contemporary Issues in Education

Prerequisite: admitted to Teacher Education Program.

In-depth analysis of selected issues currently generating great interest and controversy in American education. Attention to the effects of the issues on the teaching profession, curriculum, instruction, and school personnel. May be taught concurrently with SFR 682. Cannot receive credit for both SFR 682 and SFR 583.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 595 Applications of Educational Measurement

Prerequisite: admitted to Teacher Education Program.

Using the results of testing in schools. The role, advantages, and limitations of evaluative instruments and techniques in educational decision making. May be taught concurrently with SFR 695. Cannot receive credit for both SFR 695 and SFR 595.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 621 Techniques for Teaching Adults

A survey of the principles, objectives and trends in instructional techniques for adult education. May be taught concurrently with SFR 521. Cannot receive credit for both SFR 521 and SFR 621.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SFR 647 Guidance and Interpersonal Relationships in the Classroom

Appropriate classroom communication and interpersonal skills. Emphasis on the relationship between self concept development and achievement in a diverse student population. May be taught concurrently with SFR 547. Cannot receive credit for both SFR 547 and SFR 647.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 676 Topical Issues in Education

To develop further understanding and skills in the improvement of teaching procedures, curriculum, supervision, or administration. Each course is concerned with a single topic. Number of class hours determined by semester hours of credit. A maximum of 3 hours may be used on a degree program. Variable Content Course. May be taught concurrently with SFR 576. Cannot receive credit for both SFR 576 and SFR 676.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

SFR 681 Law and the Classroom Teacher

Prerequisite: Teacher Certification students must be admitted to Teacher Education Program.

Rights and responsibilities of classroom teachers as determined by the legal structure created by state and federal constitutions, legislative actions, and judicial decisions. Implications of legal foundations for teachers relative to ethics, relationships with students, colleagues, minority groups, professional organizations, and others. May be taught concurrently with SFR 581. Cannot receive credit for both SFR 581 and SFR 681.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 682 Contemporary Issues in Education

Prerequisite: Teacher Certification students must be admitted to Teacher Education Program.

In-depth analysis of selected issues currently generating great interest and controversy in American education. Attention to the effects of the issues on the teaching profession, curriculum, instruction, and school personnel. May be taught concurrently with SFR 583. Cannot receive credit for both SFR 583 and SFR 682.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 695 Applications of Educational Measurement

Prerequisite: Teacher Certification students must be admitted to Teacher Education Program.

Using the results of testing in schools. The role, advantages, and limitations of evaluative instruments and techniques in educational decision making. May be taught concurrently with SFR 595. Cannot receive credit for both SFR 595 and SFR 695.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 698 College Teaching Practicum

Prerequisite: permission of the coordinator of the College Teaching Graduate Certificate.

This is a field experience-based course that requires the student to spend a minimum of 20 clock hours in a college teaching environment where students observe, teach, and/or participate in professional activities in college teaching under the direction of a cooperating supervisor/faculty. Students will demonstrate effective teaching and behavior management techniques, as well as expertise in instructional planning and evaluation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	1	Fall, Spring, Summer

SFR 709 Individualizing Instruction

Training in various procedures for individualizing instruction at all grade levels.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SFR 711 Principles and Organization of Student Activities

Acquaints teachers and administrators with problems and procedures involved in the organizations and supervision of student activities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 723 Organization and Administration of Adult Education

Theory and practice relating to the organization, administration, and supervision of adult education. Emphasis will be placed upon adult education programs in the public school and the junior-community college.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SFR 724 Organization and Administration of Vocational Education

Problems, procedures and local, state and federal relationships in organization and administration of vocational education in the contemporary school. Identical with AGV 724. May be repeated to a maximum of 3 credit hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SFR 730 Curriculum Construction in the School

Traditional, humanistic, and behavioristic approaches to advanced curriculum development in the school.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 750 Philosophies of Education

This course provides students with fundamental knowledge in such areas as the philosophy and history of education, education law and policy derived from educational philosophies, the political nature of educational policy, and broader philosophical and sociocultural issues impacting school and its relationship to society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Summer

SFR 751 Introduction to Teaching and Learning

The purpose of this course is to develop deep understandings and skills pertaining to teaching and the procedures, methods, curriculum design, classroom management, and foundations - those fundamental pedagogical skills - required to be a practicing teacher. Candidates will be introduced to the electronic portfolio. Electronic portfolio checkpoint one will occur in this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

SFR 753 Comparative Educational Systems

Comparative analysis of major ideas and institutions of selected international systems of education. Comparisons between international systems of education and systems dominant in America.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 780 Educational Research Methodology

Survey of research methods used in education; research design and evaluation; problems of interpretation and application; development of a formal research proposal.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

SFR 781 Applied Educational Research

Introduction to research methodologies utilized in educational research to include an exploration of qualitative, quantitative, and mixed methods research. Students will learn to examine, evaluate, synthesize, and apply research in their professional work. This course focuses on research to inform and improve upon an educator's pedagogical skills, the work of the school, and to meet the needs of students and community.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SFR 791 Educational Workshop

Workshop to upgrade understandings and skills, concerned with the improvement of secondary teaching procedures, curriculum, supervision, administration or guidance. Each workshop will be concerned with a single topic. Number of class hours determined by length of workshop. May be repeated to a maximum of 9 hours. Thirty clock hours equal one credit hour.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-9			Upon demand

SFR 792 Supervision of Student Teachers

Prerequisite: valid elementary or secondary teaching certificate.

For public school teachers cooperating in college student-teaching programs; organizing and directing work of the student teacher.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

SFR 793 Qualitative Research Methods

This course is focused on qualitative methods in the social sciences and specifically in educational research, including educational action research. Depending on prior research work, students will plan, implement, or further a qualitative or action research study. Students will learn firsthand about collecting and analyzing qualitative data, developing theories, and writing up the results. Students will also explore the role of educational action research in professional development, in improving classroom practices, and in developing school policy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SFR 794 Research Practicum

Prerequisite: SFR 780.

Conducting research projects with schools and other educational agencies. Students will be engaged in articulating research problems, reviewing literature, collecting and analyzing data, and presenting results.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SFR 796 Problems in Education

Specific problems in education related to needs and interests of the student. May be repeated to a total of 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SFR 797 Advanced Studies in Teaching and Learning

Prerequisite: admitted to the Master of Arts in Teaching program.

The purpose of this course is to develop deep understandings and skills regarding secondary teaching, procedures, methods, curriculum, supervision, administration and foundations. Candidates will be introduced to the electronic portfolio. Portfolio checkpoint one will occur in this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
9			Upon demand

SFR 799 Thesis

Prerequisite: SFR 780.

May be repeated to a maximum of 6 hours credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

SFR 858 Current Issues Affecting Education

This multi-disciplinary mini-course is composed of selected topics of current interest to all school personnel. Opportunities are provided for object examination of highly volatile controversies surrounding education. May be repeated for a total of 6 hours credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SFR 890 Field Research and Evaluation

Specifically designed to give each student the prerequisite skills and competencies necessary for completion of field study research project(s) as well as preparation for conducting on-the-job institutional research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

Middle School Education

Major(s)

Middle School Education

Bachelor of Science in Education (Certifiable grades 5-9)

The curriculum for middle school teaching leads to the degree of Bachelor of Science in Education and carries with it an initial professional certificate (IPC) to teach in the state of Missouri. Holders of this middle school certificate may be employed to teach in grades 5-9 in the certificate subject area (program option).

Degree requirements

Candidates for the Bachelor of Science in Education degree are required to meet the following grade point average requirements. All GPA requirements include both Missouri State and transfer grades.

1. at least a 2.75 GPA on all course work attempted at all colleges attended.
2. at least a 3.00 GPA in the certificate subject area (major field of study) which includes all courses listed under B and C.
3. at least a 3.00 GPA in any additional certificate subject area.
4. at least a 3.00 GPA in the professional education courses and no grade lower than a "C" in all professional education courses which includes all courses listed under C.

Additionally, students must earn a composite score or superscore of 20 or better on the ACT or earn passing scores on all four sub-tests of the Missouri General Education Assessment (MoGEA) and successfully complete the other Missouri Educator Gateway Assessments (MEGA) as established by the Missouri Board of Education.

All students must be admitted to the Teacher Education Program and have successfully completed Supervised Teaching in order to earn this degree. Refer to "[Teacher Education Program \(/Registrar/Catalog/teacher-certification-teacher-education-secondary-ed.htm\)](#)" for application procedures.

Program requirements

1. Specific courses required for major and/or certification which may be used to satisfy General Education Requirements:
 - a. Focus on Written Communication (6 hours): [ENG 110\(3\)](#) and [ENG 210\(3\)](#).
 - b. Focus on Quantitative Literacy: Completion of general education requirement with a grade of "C" or better. [MTH 130\(3\)](#) recommended.
 - c. Focus on Oral Communication: [COM 115\(3\)](#).
 - d. Focus on Life Sciences: [BIO 100\(4\)](#).
 - e. Focus on Physical Sciences: [PHY 101\(4\)](#).
 - f. Focus on Social and Behavioral Sciences: [PSY 121\(3\)](#). Note: [ECO 155](#) cannot be double-counted if Social Science is chosen as an area of subject matter option.
 - g. Focus on Cultural Competence: [GRY 100](#) is required if Social Science is chosen as an area of subject matter option.
 - h. Courses used to meet the Focus on Humanities and the Focus on the Arts must have two (2) different course codes to meet state certification requirements. [ART 200](#) or [MUS 241](#) recommended.
 - i. Focus on Constitution of U.S. and Missouri and American History and Institutions (6 hours): [HST 121\(3\)](#) or [122\(3\)](#); and [PLS 101\(3\)](#).
2. Area of Subject Matter Options (24 hours): Students must complete one of the following program options. This requirement is met by combining coursework required for General Education (section A) and additional hours in the content area option. General Education requirements are bolded. Courses noted with an asterisk are those that cannot be double-counted toward both General Education requirements and the program option.
 - a. **Language Arts Option** (24 hours):
 - i. [ENG 110\(3\)](#), [210\(3\)](#), [338\(3\)](#), [390\(3\)](#); [520\(3\)](#) or [521\(3\)](#).
 - ii. Three courses from: [ENG 235\(3\)](#), [296\(3\)](#), [340\(3\)](#), [341\(3\)](#), [350\(3\)](#), [351\(3\)](#), [354\(3\)](#), [355\(3\)](#).
 - b. **Mathematics Option** (24-26 hours):
 - i. [MTH 130\(3\)](#), [320\(3\)](#), [343\(3\)](#), [360\(3\)](#), [377\(3\)](#), [478\(3\)](#), [479\(3\)](#).
 - ii. One course from: [MTH 134\(3\)](#), [136\(3\)](#), [137\(3\)](#), [138\(5\)](#).
 - c. **Science Option** (24 hours): [BIO 100\(4\)](#), [PHY 101\(4\)](#), [BIO 205\(2\)](#), [CHM 116\(4\)](#), [CHM 117\(1\)](#), [GRY 108\(3\)](#), [GRY 240\(4\)](#), [PHY 501\(2\)](#).
 - d. **Social Sciences Option** (24 hours):
 - i. [GRY 100\(3\)](#), [HST 121\(3\)](#), [HST 122\(3\)](#), [PLS 101\(3\)](#), [HST 103\(3\)*](#), [HST 104\(3\)*](#), [ECO 155\(3\)*](#).
 - ii. One course from: [HST 324\(3\)](#), [331\(3\)](#), [335\(3\)](#), [343\(3\)](#), [350\(3\)](#), [369\(3\)](#), [380\(3\)](#), [381\(3\)](#).

*Cannot be double-counted toward both General Education requirements and the program option.
3. Professional Education (50-51 hours): Note: A grade of "C" or better in each course is required.
 - a. Foundations of Teaching: [EDC 345\(3\)](#), [EDC 350\(3\)](#), [EDT 365\(3\)](#), [EDT 520\(1\)](#), [PSY 360\(3\)](#), [SPE 340\(2\)](#).
 - b. Teaching Methods: [MID 400\(3\)](#), [RDG 474\(3\)](#), [RDG 574\(3\)](#), [SFR 486\(3\)](#).
 - c. Complete a content area methods course related to option chosen above:
 - i. [ENG 405\(3\)](#) - Language Arts
 - ii. [MTH 409\(3\)](#) - Mathematics
 - iii. [SCI 404\(3\)](#) - Science
 - iv. [HST 418\(4\)](#) - Social Sciences
 - d. Clinical Experiences: [SEC 302\(3\)](#), [MID 425\(2\)](#), [MID 439\(3\)](#), [MID 493\(6\)](#), [MID 494\(6\)](#).
 - e. EDC 150(0) Introduction to Teaching. EDC 150 is required for students who completed a beginning teaching methods/field experience course at another institution and who wish to apply course credit toward completion of the SEC 302 requirement.
4. Public Affairs Capstone Experience will be fulfilled by completion of [MID 493\(6\)](#) and [494\(6\)](#).

5. This program also requires compliance with the [Teacher Education Program](#) for eligibility to enroll in Professional Education courses; admission to and continuance in the Teacher Education Program; approval for supervised teaching; and recommendation for certification.

University level requirements

2. [General Baccalaureate Degree Requirements](#)

Accelerated graduate program in Educational Technology

Eligible Missouri State undergraduate students may apply for admission to the Educational Technology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-educational-technology.htm) (<https://graduate.missouristate.edu/Catalog/prog-educational-technology.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Literacy

Eligible Missouri State undergraduate students may apply for admission to the Literacy program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-literacy.htm) (<https://graduate.missouristate.edu/Catalog/prog-literacy.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

3. at least a 3.00 GPA in any additional certificate subject area
4. at least a 3.00 GPA in the professional education courses and no grade lower than a "C" in all professional education courses, which includes all courses listed under 3.

Additionally, students must earn a composite score of 20 or better on the ACT, a super score of 20 on the ACT, or earn passing scores on all four sub-tests of the Missouri General Education Assessment (MoGEA) and successfully complete the other Missouri Educator Gateway Assessments (MEGA) as established by the Missouri Board of Education.

All students must be admitted to the Teacher Education Program and have successfully completed Supervised Teaching to earn this degree. Refer to "[Teacher Education Program \(/Registrar/Catalog/teacher-certification-teacher-education-secondary-ed.htm\)](/Registrar/Catalog/teacher-certification-teacher-education-secondary-ed.htm)" for application procedures.

Note: Bachelor of Science in Education majors cannot count more than 30 hours of business courses (25 percent of the 123 hours required for graduation) toward the degree. All exceptions must have the written approval of the Dean of the College of Business. Students found to be in violation of this policy will be dropped from all courses exceeding the maximum number of business course hours.

Program requirements

1. Specific courses required for major and/or certification which may be used to satisfy General Education Requirements:
 - a. First-year Seminar (2 hours). [GEP 101\(2\)](#). Note: UHC 110 required for Honors College students.
 - b. Focus on Written Communication (6 hours): [ENG 110\(3\)](#) and [ENG 210\(3\)](#).
 - c. Focus on Quantitative Literacy (3 hours): grade of "C" or better in [MTH 134\(3\)](#).
 - d. Focus on Oral Communication (3 hours): [COM 115\(3\)](#).
 - e. Focus on Social and Behavioral Sciences (6 hours): [ECO 155](#) and [PSY 121\(3\)](#).
 - f. Focus on Constitution of U.S. and Missouri and American History and Institutions (6 hours): [HST 121\(3\)](#) or [122\(3\)](#); and [PLS 101\(3\)](#).
 - g. Focus on Public Issues (3 hours): [ITC 200](#).
2. Business Content (27 hours). This requirement is met through coursework in the Missouri State University College of Business Core. Specific courses required to meet the Department of Elementary and Secondary Education (DESE) Business Content requirements: [ACC 201\(3\)](#), [ACC 211\(3\)](#), [ECO 165\(3\)](#), [ITC 201\(3\)](#), [LAW 231\(3\)](#), [MGT 286\(3\)](#), [MGT 340\(3\)](#), [MKT 350\(3\)](#); [QBA 237\(3\)](#) or [FIN 150\(3\)](#).
3. Professional Education (51 hours): Note: A grade of "C" or better in each course is required.
 - a. Foundations of Teaching (18 hours): [EDC 345\(3\)](#), [EDC 350\(3\)](#), [EDT 365\(3\)](#), [EDT 520\(1\)](#), [PSY 360\(3\)](#), [SFR 486\(3\)](#), [SPE 340\(2\)](#).
 - b. Literacy Methods (6 hours): [RDG 474\(3\)](#), [RDG 574\(3\)](#).
 - c. Content Area Methods and Vocational Courses (9 hours): [SEC 522\(3\)](#), [SEC 526\(3\)](#), [SEC 527\(3\)](#).
 - d. Clinical Experiences (18 hours): [SEC 302\(3\)](#), [SEC 439\(3\)](#), [SEC 493\(6\)](#), [SEC 494\(6\)](#).
 - e. EDC 150(0) Introduction to Teaching. EDC 150 is required for students who completed a beginning teaching methods/field experience course at another institution and who wish to apply course credit toward completion of the SEC 302 requirement.
4. Public Affairs Capstone Experience will be fulfilled by completion of [SEC 493\(6\)](#) and [494\(6\)](#).
5. This program also requires compliance with the [Teacher Education Program](#) for eligibility to enroll in Professional Education courses; admission to and continuance in the Teacher Education Program; approval for supervised teaching; and recommendation for certification.

University level requirements

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Accelerated graduate program in Educational Technology

Eligible Missouri State undergraduate students may apply for admission to the Educational Technology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit).

Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-educational-technology.htm) (https://graduate.missouristate.edu/Catalog/prog-educational-technology.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](https://Registrar/mixedcredit.htm) (/Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Literacy

Eligible Missouri State undergraduate students may apply for admission to the Literacy program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-literacy.htm) (https://graduate.missouristate.edu/Catalog/prog-literacy.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](https://Registrar/mixedcredit.htm) (/Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

Background security check and drug screening requirements

Some academic programs in the health related areas will require students to pass a background security check and a drug screening. These programmatic screening policies are a result of health organizations' requirements for placement at their clinical sites. Students will be financially responsible for the background security check and drug screening. Review the academic program requirements, applications materials and admission standards for specific detailed information. Students who do not pass the appropriate screenings may not be able to complete the program or practice professionally.

Center for research and service

RStats Institute

The Institute offers individual consultations with students and faculty researchers, sharing expertise in research design, statistical analysis, and manuscript preparation. Learn more: [RStats Institute](#) (/RStats/)

Clinics

Undergraduate Catalog

Anesthesia Courses

Nurse Anesthesia (ANE) courses

ANE 620 RNFA Introductory Principles

Prerequisite: acceptance into the Registered Nurse First Assist Program.

Beginning RNFA course will cover RNFA's collaborating with other health care providers during the peri-operative period focusing on safe effective patient care. Multiple techniques will be covered, instruments, medical devices, providing surgical site exposure, handling and or cutting tissue, providing homeostasis, wound care management, and suturing. Post operative patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring, Summer

ANE 621 RNFA Perioperative Management I

Prerequisite: acceptance into the Registered Nurse First Assist Program.

This course includes a distance didactic component emphasizing the expanded functions unique to the RNFA. Classes will have both synchronous and asynchronous components. Management I will cover surgical patient pre-op assessments, anatomy and physiology review and health care provider communication along with surgical instrument recognition.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring, Summer

ANE 622 RNFA Clinical Practicum

Prerequisite: acceptance into the Registered Nurse First Assist Program.

Course will cover the clinical component of the RNFA curricula. Board Certified Surgeon will supervise in the area of the RNFA's primary area of practice. Students are required to obtain collaboration with a surgeon of their choice to supervise in their area of practice. Final practicum review will occur during the onsite time.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Fall, Spring, Summer

ANE 623 RNFA Perioperative Management II

Prerequisite: acceptance into the Registered Nurse First Assist Program.

This course includes distance didactic components emphasizing the expanded functions unique to the RNFA. Classes will have both synchronous and asynchronous components. Management II will include demonstration of expanded skills and cover surgical site exposure, handling tissue, providing homeostasis along with suturing and wound management. Patient discharge planning and community collaboration is included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring, Summer

ANE 624 RNFA Cumulative Review

Prerequisite: acceptance into the Registered Nurse First Assist Program.

Course will cover RNFA's collaborating with other health care providers during the peri-operative period focusing on safe effective patient care, and preparation for the RNFA certification exam.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring, Summer

ANE 700 Informatics and Graduate Studies for Anesthesia

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Study of the researcher role, research process, research skills, scientific writing, professional development, and research ethics. Study the use of technology in graduate studies. Dissect the meaning of a capstone project and its purpose.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

ANE 702 Clinical Conference I

Review of significant cases involving complex anesthesia considerations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

ANE 705 Clinical Conference II

Prerequisite: ANE 702.

A review of significant cases involving complex anesthesia considerations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

ANE 708 Clinical Conference III

Prerequisite: ANE 705.

Continuing review of significant cases involving complex anesthesia considerations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

ANE 711 Clinical Conference IV

Prerequisite: ANE 708.

Continuing review of significant cases involving complex anesthesia considerations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

ANE 712 Special Topics in Anesthesia

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program and permission of the Program Director.

Selected topics of an advanced nature relating specifically to anesthesia and accreditation requirements which will vary from semester to semester. Variable content course. May be repeated to a maximum of six hours provided topics are different. Can be seated or distance as accreditation needs dictate.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-6			Fall, Spring, Summer

ANE 714 Orientation to Clinical Anesthesia

Prerequisite: permission from program director.

Introduction to anesthesia equipment, monitoring equipment, positioning, intravenous considerations, records, departmental management, ethics, departmental organization and function, legal and professional aspects.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

ANE 717 Physics and Chemistry of Anesthesia

A presentation of the principles and laws of physics and chemistry applicable to the field of anesthesia.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

ANE 720 General Principles of Anesthesia

A presentation of the principles of laws of physics and chemistry applicable to the field of anesthesia long with an in-depth analysis of structure and function of the cardiac, respiratory, circulatory, endocrine, hepatic, renal, neurologic, autonomic, and central nervous systems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

ANE 721 Equipment, Instrumentation, and Technology for Anesthesia

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice (BS-DNAP) program.

A thorough review of anesthesia delivery systems, airway equipment, and the multiple monitoring devices that may be utilized during anesthesia. A review of principles and laws of physics, biochemistry, and chemistry as applicable to the field of anesthesia. An in-depth review of equipment, instrumentation, and technology needed for anesthesia management. Various types of radiological imaging and radiation safety will be presented.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ANE 723 Application of Anatomy and Physiology to Anesthesia II

An in-depth analysis of the special relationships between anesthesiology and the endocrine, hepatic, renal, neurologic, autonomic, and central nervous systems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

ANE 726 Introduction to Clinical Anesthesia

Preoperative evaluation of patients, airway management, inhalation techniques, common complications of induction and emergence.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

ANE 732 Anesthesia for Surgical Procedures and Special Populations I

Prerequisite: ANE 720.

An in-depth review of subjects essential to the practice of anesthesia. Subjects correlating anatomy, physiology, pathophysiology, and pharmacology related to specific anesthetic patient needs for surgical or diagnostic procedures. Anesthetic needs for surgical procedures explored will include intra-abdominal, extra thoracic, neuro- skeletal, orthopedic, perineal and surgical diagnostic procedures. Exploration of special anesthetic

considerations for specific populations will be included involving the following populations: pediatric, obstetric, geriatric, and obese patients.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	5	0	Fall

ANE 734 Advanced Physical Assessment and Clinical Reasoning

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Advanced critical thinking, communication and diagnostic skills needed to obtain comprehensive and focused history and physical exams, analyze assessment data, generate differential diagnoses, evaluate and utilize screening and diagnostic modalities appropriately. An evidence-based practice framework will be utilized. Identical with NUR 734. Cannot receive credit for both ANE 734 and NUR 734.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	6	Fall

ANE 735 Clinical Practicum

Prerequisite: admission to Doctor of Nurse Anesthesia Practice program.

Clinical experience in the anesthesiology department at multiple clinical sites. Specialty content may be included as part of the practicum experience. May be repeated to a maximum of 44 hours. Hours are based on clinical practicum days in the clinical area. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-10			Fall, Spring, Summer

ANE 742 Clinical Physiology

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Clinical interpretation of organ systems with a consideration of disease etiology and diagnosis. Current research topics will be introduced and discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Spring

ANE 744 Pharmacology in Anesthesia

Prerequisite: ANE 720.

A review of the effects of drugs required by patients with preexisting medical conditions and their continuation in the perioperative period.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

ANE 745 Anesthesia Pharmacology I

Prerequisite: BMS 620.

A study of the principles of clinical pharmacology and the pharmacokinetics and pharmacodynamics of commonly used anesthetic agents during the perioperative period. A review of the effects of drugs required by patients during the perioperative period with and without preexisting medical conditions and their continuation in the perioperative period. Detailed study of inhalational agents and stages of anesthesia, opioids, opioid agonists/antagonists, barbiturates and non-barbiturates, and drug interactions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Fall

ANE 746 Anesthesia Pharmacology II

Prerequisite: ANE 745.

A study of the principles of clinical pharmacology and the pharmacokinetics and pharmacodynamics of commonly used anesthetic agents during the perioperative period. A review of the effects of drugs required by patients during the perioperative period with and without preexisting medical conditions and their continuation in the perioperative period. Detailed study of neuromuscular blocking drugs, and local anesthetics. Course includes an introduction to autonomic pharmacology and cardiovascular pharmacology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ANE 750 Anesthesia for Surgical Procedures and Special Populations II

Prerequisite: ANE 720.

An in-depth review of the subjects essential to the practice of anesthesia. Subjects correlating anatomy, physiology, pathophysiology, and pharmacology related to specific patient needs for surgical or diagnostic procedures. Surgical procedures covered will include extracranial and intracranial, intrathoracic, neck, vascular, diagnostic and therapeutic procedures. Patient populations will include trauma, burns, resuscitations, organ transplants, organ procurement and laser procedures.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	5	0	Spring

ANE 754 Healthcare Ethics for Anesthesia Providers

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

This course is designed to apply the principles of biomedical and health care ethics toward a more informed understanding of realistic cases of ethical decision making in the healthcare environment, for anesthesia providers. The course looks towards a systematic approach to ethical problems that arise in the clinical and administrative settings, as well as the ethical responsibilities of all participants in each of these areas.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ANE 800 Leadership for Evidence-Based Practice

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Advanced critical thinking, communication and diagnostic skills needed to obtain comprehensive and focused history and physical exams, analyze assessment data, generate differential diagnosis, evaluate and utilize screening and diagnostic modalities appropriately. An evidence-based practice framework will be utilized. Cannot receive credit for both ANE 800 and NUR 800.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

ANE 803 Human Factors and Patient Safety for Healthcare

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Examines healthcare from a safety perspective and how to facilitate change for caregivers at the "sharp end of the stick" according to the Reason theory of errors. Discussion of an environment and philosophy of safety. Explores basis of human error, patient safety and quality assurance by introducing a system approach, including crisis management, simulation and teamwork in healthcare.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ANE 804 Business of Anesthesia

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Comprehensive study of the business of anesthesia, and all models of practice and billing. Legal and healthcare implications explored. Analysis of the structure, function and outcomes of healthcare delivery systems and organizations. Designed for practicing CRNA's and DNAP students. Course design is both seated and distance.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

ANE 806 Professional Practice in Anesthesia

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Emphasizes learning through advanced clinical experiences in anesthesia practice. Explores concepts of nurse anesthesia practice, competence and expertise, and incorporation of critical thinking skills and reflection as an evaluation method. The focus is on methods of determining best practice through identification of problems, review, and systematic evaluation of current research, interdisciplinary collaboration and consideration of economic and other factors that impact patient outcomes. A professional portfolio will be expected at the conclusion of the program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ANE 807 Anesthesia and Healthcare Policy

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Examines government and non-government issues that influence nurse anesthesia practice. Focuses on development of skills that contribute to leadership and personal effectiveness in implementing change in nurse anesthesia and healthcare. Emphasizes interdisciplinary relationships between the CRNA, nurse, physician, and administration, policy makers and other key stakeholders that format healthcare policy; equips the student with up-to-date information on various global health topics and perspectives; a basic perspective of health policy issues in different geographical regions, and explains how global health policy is affected by significant world events, including coverage of new infectious diseases with human rights, stigma of diseases and disclosure. Comparison of health and healthcare universally.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

ANE 810 Health and Wellness in the Healthcare Setting

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Health and wellness in the healthcare setting for the healthcare provider in modern day medical settings. Health coping strategies investigated. Pitfalls of stressors in healthcare with evidence-based solutions. Addiction and recovery for healthcare professionals reviewed with AANA wellness modules, and peer assistance as well as University assistance for students reviewed. Health lifestyles including dietary, mental, physical, spiritual wellness for healthcare providers discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

ANE 897 Research for Scholarly Project

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

The Capstone Project is the culminating experience of the DNAP program, and presents an opportunity for students to investigate a problem relevant to the practice of anesthesia. Because nurse anesthesia practice includes administrative and educational roles as well as clinical practice, the project is open to a wide variety of ideas and interests. Students are encouraged to be creative in identifying problems and suggesting corrective actions; solutions must be based on sound evidence. ANE 897 and ANE 898 are consecutive courses to allow the student time to complete the Capstone Project during their anesthesia study periods. The initial class provides direction and approval for the class, while the latter class provides presentation and evaluation of the determined project. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

ANE 898 Capstone Project Presentation

Prerequisite: ANE 897 and admission to the Doctor of Nurse Anesthesia Practice program.

The Capstone Project is the culminating experience of the DNAP program, and presents an opportunity for students to investigate a problem relevant to the practice of anesthesia. Because nurse anesthesia practice includes administrative and educational roles as well as clinical practice, the project is open to a wide variety of ideas and interests. Students are encouraged to be creative in identifying problems and suggesting corrective actions; solutions must be based on sound evidence. ANE 897 and ANE 898 are consecutive courses to allow

the student time to complete the Capstone Project during their anesthesia study periods. The initial class provides direction and approval for the class, while the latter class provides presentation and evaluation of the determined project.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Biomedical Sciences Courses

Biomedical Sciences (BMS) courses

BMS 100 Essentials in Human Biology

General Education Course (Focus on Life Sciences).

A lecture course designed to help non-science majors understand the biological basis of human life by introducing the major concepts and principles of human biology. Topics include cell biology, the chemical basis of life, genetics, and basic anatomy and physiology. Current ethical issues and human disease are emphasized through discussion. Designed for students interested in human biology, but who do not plan on further study of life sciences. Cannot receive credit for both BMS 100 and BMS 110.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring, Summer	LIFS 100 - Essentials in Human Biology.

[Access the CORE 42 portal](#)

BMS 101 Essentials in Human Biology Laboratory

Prerequisite: BMS 100 or concurrent enrollment.

General Education course (Focus on Life Sciences).

A laboratory course designed to help non-science majors understand the biological basis of human life by introducing the major concepts of human biology. This laboratory course will emphasize scientific observation and investigation in topics including cell biology, the chemical basis of life, genetics, and basic anatomy and

physiology. This course is designed for students interested in human biology, but who do not plan further study or laboratory work in the life sciences. Cannot receive credit for both BMS 101 and BMS 111.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
1	0	2	Fall, Spring	LIFS 100L - Essentials in Human Biology with Lab.

[Access the CORE 42 portal](#)

BMS 110 Introduction to Human Biology

Prerequisite: eligibility for both ENG 110 and MTH 134 or MTH 136.

General Education Course (Focus on Life Sciences).

An introduction to concepts and techniques related to human anatomy, physiology, genetics, cellular and molecular biology. Recommended for students in preprofessional programs and Allied Health careers. Cannot receive credit for both BMS 100 and BMS 110. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring, Summer	LIFS 150 - Human Biology.

[Access the CORE 42 portal](#)

BMS 111 Introduction to Human Biology Laboratory

Prerequisite: BMS 110 or concurrent enrollment; and eligibility for both ENG 110 and MTH 134 or MTH 136.

General Education Course (Focus on Life Sciences).

This course is designed for students who require intensive introductory laboratory experience in human biology and biomedical sciences techniques to prepare for future laboratory work in the biomedical sciences. Cannot receive credit for both BMS 101 and BMS 111. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
1	0	2	Fall, Spring, Summer	LIFS 150L - Human Biology with Lab.

[Access the CORE 42 portal](#)

BMS 113 Introduction to Medical Laboratory Sciences

Designed to acquaint students with the field of medical technology through performance of simple procedures and explanation of test principles and diagnostic interpretation of results. Also designed to provide adequate exposure to the medical laboratory so that the student will be able to make a rational decision concerning a career in laboratory medicine.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	3	Spring

BMS 195 Introduction to the Health Professions

Prerequisite: freshman or sophomore standing only; Recommended **Prerequisite:** enroll in IDS 120 in the fall semester.

Designed to familiarize students with a variety of health career opportunities, and to provide guidance in early curriculum planning and alternative career options. Identical with HLH 195. Cannot receive credit for both BMS 195 and HLH 195.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring

BMS 230 Human Genetics

Prerequisite: C grade or better in BMS 110 and 111 or BIO 121.

A survey of genetic principles in humans with emphasis on molecular genetics and human genetic abnormalities causing diseases and behavioral changes. A portion of the course requires students to research, report on, and discuss current topics in human genetics. Cannot receive credit for both BMS 230 and BMS 231.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BMS 231 Human Genetics with Laboratory

Prerequisite: C" grade or better in BMS 110 and 111 or BIO 121; and Cell and Molecular Biology or Clinical Laboratory Science-Medical Technology major or Biomedical Sciences minor.

A survey of genetic principles in humans with emphasis on molecular genetics and human genetic abnormalities causing diseases and behavioral changes. A portion of the course requires students to research, report on, and discuss current topics in human genetics. The laboratory emphasis is on techniques and skills that expand the understanding of genetic concepts. Cannot receive credit for both BMS 230 and BMS 231.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

BMS 232 Human Genetics Laboratory

Prerequisite: BMS 230.

This course is identical to the laboratory portion of BMS 231 and is designed for students who require laboratory experience in genetics to prepare for future laboratory work in the biomedical sciences. Cannot receive credit for both BMS 231 and 232.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

BMS 260 Biology of Aging

Prerequisite: BMS 110 and 111 or BIO 121.

The physiology and biology of aging in humans. Designed for gerontology majors.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BMS 300 Service Learning in Biomedical Sciences

Prerequisite: 30 hours and concurrent enrollment in a Biomedical Sciences course designated as service learning offering.

This service component for an existing course incorporates community service with classroom instruction in one of the subdisciplines of Biomedical Sciences to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

BMS 307 Human Anatomy

Prerequisite: C grade or better in BMS 110 and 111 or BIO 121.

A regional-based lecture and laboratory study of selected human cells, tissues, organs and organ systems. Human cadaver and supplemental models of various regions studied in laboratory. Emphasis is on application of problem solving skills to clinical cases and activities. Cannot receive credit for both BMS 307 and BMS 267-West Plains Campus course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

BMS 308 Human Physiology

Prerequisite: C grade or better in BMS 307 or BIO 380; and C grade or better in CHM 116 or CHM 160.

A study of mechanisms for maintaining homeostasis in the human organism. Topics covered include cellular structure and function, neurophysiology, metabolism, endocrinology, cardiovascular, pulmonary, renal, and gastrointestinal physiology. Emphasis is on cellular and molecular mechanisms of physiology. A grade of C or better is required in this course in order to take BMS 567. Cannot receive credit will both BMS 308 and BMS 268-West Plains course. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

BMS 310 Nutrition and Physical Activity in Aging

Prerequisite: BMS 260 or BMS 308.

Study of the nutritional requirements and physical activity needs of the elderly with emphasis on cardiorespiratory, musculoskeletal, and metabolic health and disease. Designed for gerontology majors, gerontology minors, and others interested in aging.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 320 Biomolecules and Metabolism

Prerequisite: C or better in BMS 230 or BMS 231; Recommended **Prerequisite:** past or concurrent enrollment in CHM 201 and 202 or CHM 342 and 345.

An introduction to the types and consequences of small and large molecular interactions in the living cell with an emphasis on the integrated metabolic exchanges of information, energy, and materials among cellular compartments. Cannot receive credit for both BMS 320 and BMS 321.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BMS 321 Biomolecular Interactions

Prerequisite: C grade or better in BMS 231 or in BMS 230 and 232; Recommended **Prerequisite:** concurrent enrollment in CHM 342 and 345.

Concentration is on the major classes of biomolecules (proteins, nucleic acids, carbohydrates, and lipids) important in cell and molecular biology that signal, control, and regulate cellular function and the coordination of these interactions. Other topics include: biosynthesis and catabolism of biological macromolecules and related topics in biotechnology, biological nanotechnology and molecular medicine. Laboratory emphasizes hands-on experience with current techniques in biomolecular science. Cannot receive credit for both BMS 320 and BMS 321.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

BMS 322 Laboratory Methods in the Biomedical Sciences

Prerequisite: BMS 320.

This laboratory course familiarizes students with the instrumentation, proper laboratory techniques, and analytical procedures that are used in the biomedical sciences. Cannot receive credit for both BMS 321 and BMS 322.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

BMS 380 Cooperative Education in Biomedical Sciences

Prerequisite: permission of instructor.

Provides the opportunity to earn academic credit by participation in supervised work experience. Variable content course. May be repeated to a maximum of six hours. Graded Pass/Not Pass only. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

BMS 400 International Service Learning

Prerequisite: 30 hours and permission of instructor.

The integrated service learning component for this course incorporates international community service with classroom instruction focusing on health and health education in a developing country. This course provides an integrative learning experience addressing the practice of citizenship and promotes an awareness of and participation in international public affairs. Includes 15 service hours benefiting an international community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated to a maximum of six hours. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

BMS 405 Clinical Practicum: Preventive and Rehabilitative Exercise

Prerequisite: BMS 567 or KIN 369 and permission of department head.

Field experience in a comprehensive health enhancement organization under the supervision of a certified preventive and rehabilitative program director. Students are assigned to Hammons Heart Institute. May be repeated to a maximum of six hours. Enrollment is limited. Students planning to participate in the clinical practicum must contact the Biomedical Sciences Department Head during the first two weeks of registration. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

BMS 442 Physiology of the Cell

Prerequisite: C grade or better in BMS 307; and BMS 321 or BIO 320 or CHM 352 or CHM 554 or concurrent enrollment.

The molecular, chemical, membrane and cellular basis of metabolic homeostatic processes in cells, cytoplasmic compartments and primary organ systems. Cannot receive credit for both BMS 442 and BMS 308. May be taught concurrently with BMS 641. Cannot receive credit for both BMS 442 and BMS 641.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BMS 450 Introduction to Biomedical Biomechanics

Prerequisite: BMS 307.

Biomechanical fundamentals and principles as they apply to the human organism; description of normal motion emphasizing orthopedic biomechanics and neuromuscular control. May be taught concurrently with OTE 650. Cannot receive credit for both BMS 450 and OTE 650.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BMS 455 Astrobiology

Prerequisite: introductory course in BMS or BIO; and introductory course in AST, PHY, CHM or GLG.

Scientific, technological, and philosophical foundations of astrobiology with emphasis on origins of life, life beyond Earth, and searches for extraterrestrial intelligence (SETI). Content stresses scientific evidence and knowledge, not science fiction.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

BMS 460 Biology of HIV/AIDS

Prerequisite: BMS 100 and 111 or BMS 110 and 111 or BIO 121 or BIO 101 and 111, and 60 hours.

Biological aspects of infection by HIV (human immunodeficiency virus) the disease syndrome known as AIDS (acquired human immunodeficiency syndrome) and social response to the disease.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

BMS 467 Anatomy and Mechanics of Human Motion

Prerequisite: BMS 307.

Biological analysis of normal articulation and body segment motions, emphasizing neuromuscular control. Biomechanical fundamentals and principles that relate to anatomy of human motion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BMS 490 Peer Instruction in Biomedical Sciences

Prerequisite: acceptance into Cell and Molecular Biology, Clinical Laboratory Sciences-Medical Technology, or Nutrition and Dietetics program; and 60 hours; and permission of course director.

A mentored experience in teaching within the Biomedical Sciences. Students will serve as undergraduate learning assistants (ULAs) in a BMS course along with the instructor and teaching assistants. Students will be required to attend an intersession workshop and weekly sessions for reflection and discussion in addition to their weekly BMS course assignment. Intended for students interested in developing classroom leadership skills. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Fall, Spring

BMS 494 Senior Seminar in Cell and Molecular Biology

Prerequisite: Cell and Molecular Biology major and BMS 521; and 90 hours.

Discussion of emerging topics and issues in the fields of cell and molecular biology. Opportunity for students to gain skill in oral and written scientific communication, and explore and prepare for employment opportunities, graduate school, and professional programs. Completion of a subject assessment examination and seminar attendance is required. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

BMS 497 Topics in Biomedical Sciences I

Prerequisite: permission of instructor.

Selected topics which will vary from semester to semester. Variable content course. May be repeated to a maximum of six hours provided topics are different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

BMS 498 Undergraduate Research

Prerequisite: permission of instructor.

Individualized and directed research. May be repeated to a maximum of eight hours. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

BMS 499 Projects in the Biomedical Sciences

Prerequisite: permission of instructor.

Supervised experience in an area of the Biomedical Sciences. Course may be taken by students majoring or minoring in an area of the biomedical sciences.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

BMS 500 Special Topics in Biomedical Sciences II

Prerequisite: permission of department head.

Selected topics of an advanced nature which will vary from semester to semester. May be repeated to a maximum of eight hours provided topics are different. May be taught concurrently with BMS 602. Cannot receive credit for both BMS 500 and BMS 602.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

BMS 514 Scanning Electron Microscopy

Prerequisite: 60 hours.

An introduction to microsurface analysis using scanning electron microscopy and X-ray microanalysis. Theoretical considerations and laboratory procedures involve both techniques but the major emphasis will be on generation of secondary electron images. Some attention is devoted to backscattered electron imaging, X-ray mapping, stereo pair imaging, and related image processing techniques. May be taught concurrently with BMS 614. Cannot receive credit for both BMS 514 and BMS 614.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall

BMS 516 Transmission Electron Microscopy

Prerequisite: 20 hours in BMS or BIO.

Demonstration of basic transmission electron microscopy techniques and microscope use. Emphasis is on ultrathin sectioning techniques; additional techniques include support film preparation, negative staining, immunogold localization procedures, and digital processing of photographic prints and negatives. May be taught concurrently with BMS 616. Cannot receive credit for both BMS 516 and BMS 616.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Spring

BMS 520 Medical Cell Biology

Prerequisite: C grade or better in BMS 320 or BMS 321.

Focus on the molecular aspects of cell biology for students in the Nurse Anesthesia program. Content identical to the lecture part of BMS 521. Cannot receive credit for both BMS 520 and 521. May be taught concurrently with BMS 620 . Cannot receive credit for both BMS 520 and BMS 620.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BMS 521 Molecular Cell Biology

Prerequisite: C grade or better in BMS 321; and [CHM 201 and 202] or CHM 342 and 345 (or credit for CHM 342 taken prior to Fall 2019).

Origins, structure and function of cells and basic life processes from a molecular perspective. Major topics focus on the energy, chemical, and information exchanges within and among cells and their environment. Cannot receive credit for both BMS 520 and 521. May be taught concurrently with BMS 622. Cannot receive credit for both BMS 521 and BMS 622.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

BMS 524 Virology

Prerequisite: C grade or better in BIO 312 and BIO 313 (or C grade or better in BIO 310 taken prior to Fall 2019); or C grade or better in BMS 521.

The molecular biology and pathogenicity of animal viruses; basic techniques of tissue culture and virology will be performed in the laboratory. May be taught concurrently with BMS 624. Cannot receive credit for both BMS 524 and BMS 624.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BMS 525 Molecular Biology

Prerequisite: C grade or better in BMS 521.

In-depth examination of nucleic acid structure, function, regulation, repair, and mutagenesis; principles of genetic engineering. Laboratory provides experience in the techniques used to isolate, separate, quantitate, characterize, and modify nucleic acids. The course also includes an introduction to the GenBank and EMBL nucleic acid and protein sequence databases. May be taught concurrently with BMS 625. Cannot receive credit for both BMS 525 and BMS 625.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

BMS 528 Molecular Mechanisms of Bacterial Pathogenesis

Prerequisite: BMS 521.

An in-depth study of the methods of genetic control and production of pathogenic factors employed by disease causing bacteria. The course will use both reference material and primary literature to illustrate the topics under discussion. May be taught concurrently with BMS 628. Cannot receive credit for both BMS 528 and BMS 628.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

BMS 529 Molecular Genetics

Prerequisite: C grade or better in BMS 525.

Laboratory skills course that provides guided experience designing and implementing modern molecular techniques to answer research questions. Allows an in-depth exploration of principles at the core of molecular biology such as: quantification of gene expression (e.g. qRT-PCR, Northern blot, western blot, flow cytometry), genetic engineering (e.g. cloning, site-directed mutagenesis, genome manipulation), analyzing genetic material (e.g. genotyping, genetic screening, sequencing), and isolating molecules of interest (e.g. immuno-purification, RNA isolation, PCR). May be taught concurrently with BMS 629. Cannot receive credit for both BMS 529 and BMS 629.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall

BMS 530 Cell Biology of Cancer

Prerequisite: C grade or better in BMS 521; or C grades or better in BIO 312 and BIO 313 (or C grade or better in BIO 310 taken prior to Fall 2019); or C grade or better in BIO 320.

Discussion of the initiation, cellular and genetic events which lead to cancer as well as its prevention, treatment, and personal consequences. An extensive paper and presentation are required. May be taught concurrently with BMS 631. Cannot receive credit for both BMS 530 and BMS 631.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

BMS 535 Signal Transduction

Prerequisite: BMS 521.

This course will examine the molecular mechanisms of various ligand/receptor interactions. The dynamics involved in ligand/receptor binding will be studied and examples of receptor-mediated signal transduction will be introduced. Signaling pathways within the cell will be discussed. Primary literature and reference materials will be utilized to illustrate specific examples under discourse. May be taught concurrently with BMS 635. Cannot receive credit for both BMS 535 and BMS 635.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

BMS 540 Biotechnology

Prerequisite: C grade or better in BMS 321; or C grades or better in BIO 312 and BIO 313 (or C grade or better in BIO 310 taken prior to Fall 2019); or C grade or better in BIO 320 or CHM 352.

The applications of the methodologies of cell and molecular biology in the rapidly-evolving biotechnology and biopharmaceutical industries with an emphasis on the major sectors involving human therapeutics, human diagnostics, and genomics. Cell and molecular biology technologies adapted to mass production techniques to produce the products of biotechnology are surveyed. Typical pathways of product development from original basic research, product inception, clinical trials, regulatory approval, and commercialization are covered. Students will examine the current programs of the research and development of selected biotechnology and big pharmaco corporations. May be taught concurrently with BMS 640. Cannot receive credit for both BMS 540 and BMS 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

BMS 542 Physiology of Organ Systems

Prerequisite: C grade or better in BMS 442.

Course will continue the investigation of human physiology by organ system including the cardiovascular and respiratory systems as well as mechanisms of body defense. May be taught concurrently with BMS 642. Cannot receive credit for both BMS 542 and BMS 642.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 558 Recombinant DNA and Protein Techniques

Prerequisite: C grade or better in BMS 521.

A laboratory intensive course designed to extend the biochemical and molecular biology principles and current techniques used in gene cloning, transformation of eukaryotic cells, gene expression through reverse transcriptase PCR and western blot analysis, immunoprecipitation, DNA sequencing, and mass spectrometry. May be taught concurrently with BMS 658. Cannot receive credit for both BMS 558 and BMS 658.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall, Spring

BMS 561 Medical and Pathologic Physiology

Prerequisite: "C" grade or better in BMS 308 or BMS 542.

A study of physiological dysfunction in human disease with consideration of disease etiology, diagnosis, clinical interpretation, and treatment. Designed for students and professionals in the health sciences. May be taught concurrently with BMS 661. Cannot receive credit for both BMS 561 and BMS 661.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 562 Medical and Pathologic Physiology Laboratory

Prerequisite: permission of instructor.

Experience using laboratory techniques and case studies to enhance knowledge of pathophysiology. May be taught concurrently with BMS 660. Cannot receive credit for both BMS 562 and BMS 660.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

BMS 563 Advanced Work Physiology

Prerequisite: C grade or better in BMS 308; and C grade or better in BMS 567 or KIN 362.

Review of cellular metabolism, energy transfer, and oxygen transport during work; excitation-contraction coupling in skeletal muscle; physiological mechanisms of fatigue; neuroendocrine regulation of metabolism and other responses to work; environmental factors in work performance. Emphasis on molecular and cellular mechanisms and contemporary research. May be taught concurrently with BMS 663. Cannot receive credit for both BMS 563 and BMS 663.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 564 Human Reproductive Physiology

Prerequisite: C grade or better in BMS 308 or BMS 442; and either BMS 321 or CHM 352.

A detailed examination of the physiological, cellular and molecular aspects of human reproduction with particular emphasis on the endocrine aspects of reproduction. May be taught concurrently with BMS 664. Cannot receive credit for both BMS 564 and BMS 664.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

BMS 565 Human Cardiopulmonary Physiology

Prerequisite: C grade or better in BMS 308 or BMS 542; and either BMS 321 or CHM 352.

A cellular and molecular study of human cardiovascular and respiratory physiology and related human diseases. Emphasis will be on the molecular mechanisms for normal and abnormal functions of the blood, the blood vessels, the heart, the respiratory tract, and the lung. Current research topics and results will be introduced and discussed. May be taught concurrently with BMS 665. Cannot receive credit for both BMS 565 and BMS 665.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BMS 567 Physiology of Exercise Metabolism

Prerequisite: C grade or better in BMS 308 and C grade or better in DTN 240.

Introduction to the study of human metabolic and work physiology. Digestion, absorption, and metabolism of biologically important nutrients as they affect cellular energy transfer; mechanisms of energy transfer in cells during various forms of work; oxygen transport and utilization at the cellular and system level; factors modifying the efficiency of human work performance. Cannot be taken Pass/Not Pass. May be taught concurrently with BMS 667. Cannot receive credit for both BMS 567 and BMS 667.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

BMS 568 Physiology of the Human Gastrointestinal and Urinary Systems

Prerequisite: BMS 308; and either BMS 321 or CHM 352.

Structure and function of the gastrointestinal and urinary systems including pathophysiology of common clinical conditions. May be taught concurrently with BMS 668. Cannot receive credit for both BMS 568 and BMS 668.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

BMS 569 Neurobiology

Prerequisite: C grade or better in BMS 308 or BMS 542.

Study of the mammalian nervous system including anatomy and principles of function. May be taught concurrently with BMS 669. Cannot receive credit for both BMS 569 and BMS 669.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 570 Principles of Pharmacology

Prerequisite: C grade or better in BMS 308 or BMS 442 or BMS 521 or BIO 361.

Overview of the aspects of pharmacology including: pharmacodynamics, pharmacokinetics, pharmacogenomics, drug selectivity, toxicity, metabolism, drug development, and drug regulation. Additionally, an overview of the major classification of drugs and their mechanisms of action will be presented. May be taught concurrently with BMS 670. Cannot receive credit for both BMS 570 and BMS 670.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 572 Human Renal Physiology

Prerequisite: C grade or better in BMS 308 or BMS 442.

An overview of the structure and functions of the human kidneys, associated organs, and diseases. The course emphasizes important cellular and molecular mechanisms regulating body fluids, body electrolytes, renal circulation, and renal functions under physiological and pathophysiological conditions. May be taught concurrently with BMS 672. Cannot receive credit for both BMS 572 and BMS 672.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Summer

BMS 573 Endocrine Physiology

Prerequisite: C or better in either BMS 308 or BMS 442 and either BMS 321 or CHM 352.

A detailed examination of the physiological, cellular and molecular aspects of the human endocrine system. May be taught concurrently with BMS 673. Cannot receive credit for both BMS 573 and BMS 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

BMS 582 Embryology

Prerequisite: C grade or better in BMS 307 or BIO 380.

A study of prenatal human development with emphasis on the cellular and subcellular mechanisms correlating normal development with common congenital malformations. Topics include cell division, gametogenesis, fertilization, and development of the embryo from zygote to the differentiation of the neural tube. The development of specific human organ systems including, skeletomuscular, cardiovascular, respiratory, pharyngeal, craniofacial, digestive, urinary, genital, and endocrine systems will be covered throughout prenatal development. Prepares students in pre-professional medical, dental, and allied health curricula, as well as any student requiring a background in embryology. May be taught concurrently with BMS 682. Cannot receive credit for both BMS 582 and BMS 682.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 584 Molecular Mechanisms in Animal Development

Prerequisite: BMS 521 or BIO 320.

An overview of the relationship between the anatomy of developing embryos and fundamental molecular mechanisms that generate this morphology, with an emphasis on vertebrates. Some invertebrate systems will be presented. Selected topics will include cell signaling during fertilization, gene activity in early development, cytoskeleton dynamics during morphogenesis, cell-cell adhesion, master pattern genes, and regulated cell death. May be taught concurrently with BMS 686. Cannot receive credit for both BMS 584 and BMS 686.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 585 Histology

Prerequisite: BMS 308 or BMS 542 or BIO 361 and BIO 380; Recommended **Prerequisite:** BMS 521.

Microscopic structure of cells, tissues, and organ systems, with special emphasis on human tissues. Extensive laboratory experience with interpretation of structures in stained tissues mounted on microslides. Recommended for students in medical, dental, optometric, and other preprofessional curricula, or as an elective for students enrolled in medical laboratory sciences, cell and molecular biology, and zoology. May be taught concurrently with BMS 688. Cannot receive credit for both BMS 585 and BMS 688.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall

BMS 593 Bioinformatics and Biomedical Resources

Prerequisite: C or better in BMS 321.

Use of biomedical source materials and methods of data access, selection, organization, and evaluation. May be taught concurrently with BMS 693. Cannot receive credit for both BMS 593 and BMS 693.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

BMS 599 Health Literacy in the Human Services

Prerequisite: junior standing and permission of instructor.

This course offers an interdisciplinary approach to understanding functional health literacy and how the public's literacy skills affect interactions with health and human services professionals. Includes an examination of the data for national and international literacy levels and populations at risk for low literacy; research on health literacy; assessment tools; and practical techniques for addressing literacy issues in spoken and written communications at the practitioner and organizational levels. Identical with SWK 599. Cannot receive credit for both BMS 599 and SWK 599.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 602 Special Topics in Biomedical Sciences II

Prerequisite: permission of department head.

Selected topics of an advanced nature which will vary from semester to semester. May be repeated to a maximum of eight hours provided topics are different. May be taught concurrently with BMS 500. Cannot receive credit for both BMS 500 and BMS 602.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

BMS 614 Scanning Electron Microscopy

An introduction to microsurface analysis using scanning electron microscopy and X-ray microanalysis. Theoretical considerations and laboratory procedures involve both techniques but the major emphasis will be on generation of secondary electron images. Some attention is devoted to backscattered electron imaging, X-ray

mapping, stereo pair imaging, and related image processing techniques. May be taught concurrently with BMS 514. Cannot receive credit for both BMS 514 and BMS 614.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall

BMS 616 Transmission Electron Microscopy

Demonstration of basic transmission electron microscopy techniques and Microscope use. Emphasis is on ultrathin sectioning techniques; additional techniques include support film preparation, negative staining, immunogold localization procedures, and digital processing of photographic prints and negatives. May be taught concurrently with BMS 516 . Cannot receive credit for both BMS 516 and BMS 616.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Spring

BMS 620 Medical Cell Biology

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Focus on the molecular aspects of cell biology for students in the Nurse Anesthesia program. Content identical to the lecture part of BMS 622. Cannot receive credit for both BMS 620 and 622. May be taught concurrently with BMS 520. Cannot receive credit for BMS 520 and BMS 620.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BMS 622 Molecular Cell Biology

Prerequisite: permission of instructor.

Origins, structure and function of cells and basic life processes from a molecular perspective. Major topics focus on the energy, chemical, and information exchanges within and among cells and their environment. Cannot receive credit for both BMS 620 and 622. May be taught concurrently with BMS 521. Cannot receive credit for BMS 521 and BMS 622.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

BMS 624 Virology

Prerequisite: BMS 622.

The molecular biology and pathogenicity of animal viruses; basic techniques of tissue culture and virology will be performed in the laboratory. May be taught concurrently with BMS 524. Cannot receive credit for BMS 524 and BMS 624.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BMS 625 Molecular Biology

Prerequisite: permission of the instructor.

In-depth examination of nucleic acid structure, function, regulation, repair, and mutagenesis; principles of genetic engineering. Laboratory provides experience in the techniques used to isolate, separate, quantitate, characterize, and modify nucleic acids. The course also includes an introduction to the GenBank and EMBL nucleic acid and protein sequence databases. May be taught concurrently with BMS 525. Cannot receive credit for BMS 525 and BMS 625.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

BMS 628 Molecular Mechanisms of Bacterial Pathogenesis

Prerequisite: BMS 622.

An in-depth study of the methods of genetic control and production of pathogenic factors employed by disease causing bacteria. The course will use both reference material and primary literature to illustrate the topics under discussion. May be taught concurrently with BMS 528. Cannot receive credit for both BMS 528 and BMS 628.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

BMS 629 Molecular Genetics

Prerequisite: BMS 625 or concurrent enrollment.

Laboratory skills course that provides guided experience designing and implementing modern molecular techniques to answer research questions. Allows an in-depth exploration of principles at the core of molecular biology such as: quantification of gene expression (e.g. qRT-PCR, Northern blot, western blot, flow cytometry),

genetic engineering (e.g. cloning, site-directed mutagenesis, genome manipulation), analyzing genetic material (e.g. genotyping, genetic screening, sequencing), and isolating molecules of interest (e.g. immuno-purification, RNA isolation, PCR). May be taught concurrently with BMS 529. Cannot receive credit for both BMS 529 and BMS 629.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall

BMS 631 Cell Biology of Cancer

Prerequisite: BMS 622.

Discussion of the initiation, cellular and genetic events which lead to cancer as well as its prevention, treatment, and personal consequences. An extensive paper and presentation are required. May be taught concurrently with BMS 530. Cannot receive credit for both BMS 530 and BMS 631.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

BMS 635 Signal Transduction

Prerequisite: BMS 622.

This course will examine the molecular mechanisms of various ligand/receptor interactions. The dynamics involved in ligand/receptor binding will be studied and examples of receptor-mediated signal transduction will be introduced. Signaling pathways within the cell will be discussed. Primary literature and reference materials will be utilized to illustrate specific examples under discourse. May be taught concurrently with BMS 535. Cannot receive credit for both BMS 535 and BMS 635.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

BMS 640 Biotechnology

Prerequisite: permission of instructor.

The applications of the methodologies of cell and molecular biology in the rapidly-evolving biotechnology and biopharmaceutical industries with an emphasis on the major sectors involving human therapeutics, human diagnostics, and genomics. Cell and molecular biology technologies adapted to mass production techniques to produce the products of biotechnology are surveyed. Typical pathways of product development from original basic research, product inception, clinical trials, regulatory approval, and commercialization are covered.

Students will examine the current programs of the research and development of selected biotechnology and big pharmaco corporations. May be taught concurrently with BMS 540. Cannot receive credit for both BMS 540 and BMS 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

BMS 641 Physiology of the Cell

Prerequisite: admission to the Cell and Molecular Biology graduate program or permission of the instructor.

The molecular, chemical, membrane and cellular basis of metabolic homeostatic processes in cells, cytoplasmic compartments and primary organ systems. May be taught concurrently with BMS 442. Cannot receive credit for both BMS 641 and BMS 442.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BMS 642 Organ Physiology

Prerequisite: C or better in BMS 641.

Course will continue the investigation of human physiology by organ system including the cardiovascular and respiratory systems as well as mechanisms of body defense. May be taught concurrently with BMS 542. Cannot receive credit for both BMS 642 and BMS 542.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 645 Clinical Gross Anatomy

Prerequisite: admission to Master of Occupational Therapy program.

The course offers in-depth coverage of basic, applied and clinical aspects of gross anatomy. An advanced musculoskeletal anatomy course that emphasizes the study of functional relationships between musculature, nervous tissue, vascular and skeletal components for the extremities and axial skeleton: Cadaver dissection laboratory experience is used to enhance understanding of three dimensional anatomical relationships for specific body regions. Students observe, discuss, teach, learn and dissect all body systems in detail. This course incorporate traditional didactic lectures, discussions, laboratory dissection, students teaching students (peer-teaching) in laboratory sessions and assignments that rely on critical thinking. Identical with OTE 645. Cannot receive credit for both BMS 645 and OTE 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	6	Summer

BMS 658 Recombinant DNA and Protein Techniques

Prerequisite: C grade or better in BMS 521 or BMS 622.

A laboratory intensive course designed to extend the biochemical and molecular biology principles and current techniques used in gene cloning, transformation of eukaryotic cells, gene expression through reverse transcriptase PCR and western blot analysis, immunoprecipitation, DNA sequencing, and mass spectrometry. May be taught concurrently with BMS 558. Cannot receive credit for both BMS 558 and BMS 658.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall, Spring

BMS 660 Medical and Pathologic Physiology Laboratory

Prerequisite: admission to MS in Cell and Molecular Biology Program.

Experience using laboratory techniques and case studies to enhance knowledge of pathophysiology. May be taught concurrently with BMS 562. Cannot receive credit for both BMS 562 and BMS 660.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

BMS 661 Medical and Pathologic Physiology

Prerequisite: admission to MS in Cell and Molecular Biology Program.

A study of physiological dysfunction in human disease with consideration of disease etiology, diagnosis, clinical interpretation, and treatment. Designed for students and professionals in the health sciences. May be taught concurrently with BMS 561. Cannot receive credit for both BMS 561 and BMS 661.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BMS 663 Advanced Work Physiology

Review of cellular metabolism, energy transfer, and oxygen transport during work; excitation-contraction coupling in skeletal muscle; physiological mechanisms of fatigue; neuroendocrine regulation of metabolism and other responses to work; environmental factors in work performance. Emphasis on molecular and cellular mechanisms and contemporary research. May be taught concurrently with BMS 563. Cannot receive credit for both BMS 563 and BMS 663.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 664 Human Reproductive Physiology

A detailed examination of the physiological, cellular and molecular aspects of human reproduction with particular emphasis on the endocrine aspects of reproduction. May be taught concurrently with BMS 564. Cannot receive credit for both BMS 564 and BMS 664.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

BMS 665 Human Cardiopulmonary Physiology

Prerequisite: admission to MS in Cell and Molecular Biology program.

A cellular and molecular study of human cardiovascular and respiratory physiology and related human diseases. Emphasis will be on the molecular mechanisms for normal and abnormal functions of the blood, the blood vessels, the heart, the respiratory tract, and the lung. Current research topics and results will be introduced and discussed. May be taught concurrently with BMS 565. Cannot receive credit for both BMS 565 and BMS 665.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BMS 667 Physiology of Exercise Metabolism

Introduction to the study of human metabolic and work physiology. Digestion, absorption, and metabolism of biologically important nutrients as they affect cellular energy transfer; mechanisms of energy transfer in cells during various forms of work; oxygen transport and utilization at the cellular and system level; factors modifying the efficiency of human work performance. May be taught concurrently with BMS 567. Cannot receive credit for both BMS 567 and BMS 667.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

BMS 668 Physiology of the Human Gastrointestinal and Urinary Systems

Structure and function of the gastrointestinal and urinary systems including pathophysiology of common clinical conditions. May be taught concurrently with BMS 568. Cannot receive credit for both BMS 568 and BMS 668.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

BMS 669 Neurobiology

Prerequisite: permission of instructor.

Study of the mammalian nervous system including anatomy and principles of function. May be taught concurrently with BMS 569. Cannot receive credit for both BMS 569 and BMS 669.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 670 Principles of Pharmacology

Prerequisite: permission of instructor.

Recommended Prerequisite: BMS 622. Overview of the aspects of pharmacology including: pharmacodynamics, pharmacokinetics, pharmacogenomics, drug selectivity, toxicity, metabolism, drug development, and drug regulation. Additionally, an overview of the major classification of drugs and their mechanisms of action will be presented. May be taught concurrently with BMS 570. Cannot receive credit for both BMS 670 and BMS 570.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 672 Human Renal Physiology

Prerequisite: C grade or better in BMS 308 or BMS 442; or admission to the Cell and Molecular Biology graduate program.

An overview of the structure and functions of the human kidneys, associated organs, and diseases. The course emphasizes important cellular and molecular mechanisms regulating body fluids, body electrolytes, renal circulation, and renal functions under physiological and pathophysiological conditions. May be taught concurrently with BMS 572. Cannot receive credit for both BMS 572 and BMS 672.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Summer

BMS 673 Endocrine Physiology

Prerequisite: admission to the Cell and Molecular Biology graduate program or permission of the instructor.

A detailed examination of the physiological, cellular and molecular aspects of the human endocrine system. May be taught concurrently with BMS 573. Cannot receive credit for both BMS 673 and BMS 573.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

BMS 682 Embryology

Recommended Prerequisite: human anatomy. A study of prenatal human development with emphasis on the cellular and subcellular mechanisms correlating normal development with common congenital malformations. Topics include cell division, gametogenesis, fertilization, and development of the embryo from zygote to the differentiation of the neural tube. The development of specific human organ systems including, skeletomuscular, cardiovascular, respiratory, pharyngeal, craniofacial, digestive, urinary, genital, and endocrine systems will be covered throughout prenatal development. Prepares students in pre-professional medical, dental, and allied health curricula, as well as any student requiring a background in embryology. May be taught concurrently with BMS 582. Cannot receive credit for both BMS 582 and BMS 682.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 686 Molecular Mechanisms in Animal Development

An overview of the relationship between the anatomy of developing embryos and fundamental molecular mechanisms that generate this morphology, with an emphasis on vertebrates. Some invertebrate systems will be presented. Selected topics will include cell signaling during fertilization, gene activity in early development, cytoskeleton dynamics during morphogenesis, cell-cell adhesion, master pattern genes, and regulated cell death. May be taught concurrently with BMS 584. Cannot receive credit for both BMS 584 and BMS 686.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 688 Histology

Microscopic structure of cells, tissues, and organ systems, with special emphasis on human tissues. Extensive laboratory experience with interpretation of structures in stained tissues mounted on microslides. Recommended for students in medical, dental, optometric, and other preprofessional curricula, cell and molecular biology, and zoology. May be taught concurrently with BMS 585. Cannot receive credit for both BMS 585 and BMS 688.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall

BMS 693 Bioinformatics and Biomedical Resources

Prerequisite: permission of instructor.

Use of biomedical source materials and methods of data access, selection, organization, and evaluation. May be taught concurrently with BMS 593. Cannot receive credit for both BMS 593 and BMS 693.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

BMS 700 Introduction to Graduate Studies in the Biomedical Sciences

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

Study of the researcher role, the research process, and research ethics relating to the biomedical sciences.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BMS 701 Research in the Biomedical Sciences

Prerequisite: admission to MS in Cell and Molecular Biology program.

Focus on research skills, scientific writing, and professional development. May be repeated to a maximum of four hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

BMS 707 Medical Human Anatomy

Prerequisite: admission to the Cell and Molecular Biology graduate program.

This course offers an in-depth coverage of basic, applied, and clinical aspects of gross anatomy. Students observe, discuss, teach, learn, and dissect all body systems in detail. This course incorporates traditional didactic lectures, discussions, laboratory dissection, students teaching students in laboratory teaching sessions, and assignments that rely on critical thinking. Students make oral presentations and use the library and other sources of information (such as the internet and our Computer Laboratory) to learn and teach applied gross anatomy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	3	10	Fall

BMS 711 Microbial Genetics

Prerequisite: BMS 622.

Course is designed to investigate various aspects of microbial genetics using advanced laboratory techniques. Experiments may include DNA and plasmid isolation and characterization, mutagenesis, transformation, transduction and conjugation of bacteria.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

BMS 717 Medical Human Anatomy and Radiology

Prerequisite: admission to the Physician Assistant Studies program.

Regional study of the human body. Course will include lecture and laboratory activities including cadaver dissection, study of anatomic models, computer images, x-ray, CAT scan and MRI, and ultrasound imaging. Identical with PAS 717. Cannot receive credit for both BMS 717 and PAS 717.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	3	11	Spring

BMS 726 Advanced Topics in Cell and Molecular Biology

Prerequisite: permission of instructor.

Focused or detailed consideration of advanced or timely topics in cell and molecular biology. May involve group discussion from another institution or represent individual study. Credit for BMS 726 may be given for electronic and distance learning courses available via the internet with the approval of the cell and molecular biology faculty who will determine the credit hours and topic title. Variable content course. May be repeated to a maximum of six hours provided topics are different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring

BMS 727 Human Gross Anatomy

In-depth study of the gross anatomy of the human body in areas of interest relating to administration of anesthesia.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Fall

BMS 728 Human Neurophysiology and Anatomy

Prerequisite: admission to the Doctor of Nurse Anesthesia Practice program.

This course is designed for a study of human neuroanatomy and neurobiology with emphasis on understandings of pain sensation and perception. Lecture is focused on fundamental structure and function of central nerve system and peripheral nerve system with respect to pain followed by understandings of its regulatory mechanisms and pathological pain. The lecture portion incorporated non-traditional online lectures and discussion in classroom. Laboratory offers hands-on learning opportunities with emphasis on pain-related Gross Anatomy and pain management. Students observe, discuss, teach, and learn about the human nervous system in a cooperative learning environment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Summer

BMS 730 Current Literature Topics

Prerequisite: admission to MS in Cell and Molecular Biology program.

A weekly forum of faculty and graduate students to discuss reports in the current literature from cell, molecular, and developmental biology. Participants are assigned to report on developments in their specialty or area of interest and provide background for understanding the basis and significance of the report to others in the group. May be repeated. Required each regular semester for full time students.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

BMS 732 Clinical Preventive Medicine

Prerequisite: permission of instructor.

A review of current scientific evidence regarding effective screening tests and interventions to improve health status.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 752 Medical Physiology

Prerequisite: admission to Physician Assistant Studies program or Doctor of Physical Therapy program or MS in Cell and Molecular Biology program.

The study of biological function of the human organism. Emphasis will be placed on mechanisms and regulation using examples focusing on the field of medicine. Topics covered will include general cell function, neural, endocrine, cardiovascular, respiratory, gastrointestinal and renal physiology and regulation of acid-base balance. The course stresses the interrelated functions of the body systems in homeostasis and builds on this knowledge to introduce how disease alters the homeostatic controls.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BMS 784 Developmental Genetics

Prerequisite: BMS 625.

A study of developmental gene families, their expressions as related to the normal and abnormal development of form and structure, and their intrinsic and extrinsic regulation in various animal model systems, including

humans. Specific gene-programmed and gene regulated mechanisms such as those regulating pattern formation, triggering cell differentiation, initiating regeneration (as it applies to specific tissues and organs), controlling apoptosis, and determining rates of cellular and organismal aging are included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

BMS 785 Histology and Tissue Biology

Prerequisite: admission to MS in Cell and Molecular Biology program.

This course emphasizes the structure and basic function of all the major tissues and cell types in the human body. It includes normal cell and tissue morphology and the adaptations that occur as a result of various stimuli both normal and abnormal.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

BMS 797 Non-Thesis Project

Prerequisite: permission of instructor.

In-depth study in an area of interest, culminating in a presentation of an extensive scholarly paper. Graded Pass/Not Pass Only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Fall, Spring

BMS 798 Research

Prerequisite: permission of instructor.

Application of the research process in the supervised study of a selected problem. May be repeated to a maximum of six hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

BMS 799 Thesis

Prerequisite: permission of instructor.

Demonstration of the capacity for research and independent thought culminating in a thesis. May be repeated to a maximum of six hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

Dietetics and Nutrition (DTN) courses

DTN 130 Essentials of Nutrition

Non-health science major course discussing basic concepts of human nutrition which includes carbohydrates, lipids, proteins, vitamins, minerals, absorption, digestion, and energy utilization as they relate to health and food consumption at different stages of the life cycle. Emphasis is placed on early childhood. Cannot receive credit for both DTN 130 and DTN 240.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	LIFS 100N - Essentials in Human Biology- Human Nutrition.

[Access the CORE 42 portal](#)

DTN 240 Introduction to Nutrition

Prerequisite: C grade or better in CHM 116 or [CHM 116 and 117] or CHM 160 or [CHM 160 and 161] or concurrent enrollment.

Study of nutrients with emphasis on their sources and functions in human growth and health. Discussion of current nutrition issues. A grade of "C" or better is required in this course in order to take BMS 567. Cannot receive credit for both DTN 130 and DTN 240. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DTN 300 Service Learning in Dietetics and Nutrition

Prerequisite: 30 hours and concurrent enrollment in a Dietetics and Nutrition course designated as service learning offering.

This service component for an existing course incorporates community service with classroom instruction in one of the Dietetics and Nutrition courses to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

DTN 305 Introduction to Nutrition and Dietetics

Prerequisite: DTN 240 or concurrent enrollment.

This course is open only to potential dietetics majors. Examination of the role of dietetics in the health care system, exploration of the responsibilities of nutrition and dietetics professionals, legal and ethical considerations, educational requirements and career opportunities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

DTN 306 Computer Applications in Nutrition and Dietetics

Prerequisite: DTN 240.

Students will be introduced to and learn computer software applications related to food production, nutrition analysis, and computer skills required for the discipline including Nutritionist Pro, Food Processor, PowerPoint, Excel, and Publisher.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

DTN 330 Food Selection and Preparation for Health

Prerequisite: DTN 130 or DTN 240 or concurrent enrollment.

Selection and preparation of food that supports optimum health. Food and nutrition information on grocery shopping, dining out, preparation of meals, snacks, and special occasion foods.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall, Spring

DTN 331 Food Science

Prerequisite: DTN 240 and DTN 330; and CHM 201.

Experimental approach to the study of physical and chemical factors influencing food quality during processing, preparation and storage.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Spring

DTN 332 Food and Culture

Prerequisite: DTN 130 or DTN 240.

Exploration of ethnic, religious and regional influences on nutrition and health status, including the role of diet in traditional health beliefs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DTN 333 Nutrition Throughout the Life Span

Prerequisite: DTN 240.

Factors that influence nutrient requirements during pregnancy, lactation, infancy, childhood, adolescence and aging. Recommendations for food intake based upon assessment of case studies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DTN 334 Introduction to Nutrition Assessment and Sports Nutrition

Prerequisite: DTN 130 or DTN 240.

This course is designed to help students and practitioners understand how nutrients affect health and athletic performance as well as the role of diet in performance and in disease prevention. Nutrition assessment of anthropometric, biochemical, clinical and dietary factors will be covered as to their application to sport and performance. Basic meal planning for athletes and a general introduction to sports supplements will also be taught. This is a course for non-dietetics majors and does not meet any requirements for the Dietetics major. This course may be used for the Nutrition minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DTN 335 Nutritional Assessment

Prerequisite: DTN 240.

Methods used to assess the nutritional status of individuals and populations. Interpretation of anthropometric, biochemical, clinical and dietary data as a basis for recommending nutritional care.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

DTN 338 Food Safety Certification

Prerequisite: BIO 212 and BIO 213 (or credit for BIO 210 taken prior to Fall 2019).

Sanitation policies and procedures for dietitians, food service professionals, restaurant owners and foodservice employees. Includes chemical, biological, and physical food hazards, basics of food safety systems including HACCP, methods of safe food handling, equipment cleaning and sanitizing, and controlling pests. A passing score on the National ServSafe Food Safety Certification examination is required for a "C" or better in this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

DTN 340 Nutrition Education and Communications

Prerequisite: DTN 240; and DTN 330 or concurrent enrollment; and PSY 121.

Application of educational theories and techniques to nutrition education. Emphasis on subject matter and skills necessary to develop, implement, evaluate and document nutrition education sessions for individuals and groups utilizing a variety of communication methods. Development of nutrition educational materials.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall, Spring

DTN 345 World Hunger

Prerequisite: DTN 130 or DTN 240 or AGR 100.

Global issues related to hunger and nutrition including sustainability, inequity, food production, malnutrition, biotechnology, ecological destruction, population growth, globalization, and aid. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DTN 390 The Exchange System

Prerequisite: DTN 240.

This course is designed to assist the student in understanding the use of the Exchange System and Carbohydrate Counting in the dietetics profession, as well as being able to apply MyPlate and nutrient content of foods to the creation of menus. This course may count towards the Nutrition minor. It is not required for the Dietetics major but may be beneficial. Variable content course. With different topics, may be repeated to a maximum of two hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

DTN 391 Home Food Preservation

This course is designed to teach students the basics of food science as applied to home food preservation at varying times of the year utilizing what is in season. Students will utilize a variety of home canning equipment and a wide variety of fruits and vegetables in the production of different home food preservation projects. Variable content course. With different topics, may be repeated to a maximum of four hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

DTN 392 The Mediterranean Diet

Prerequisite: permission.

This is an Intersession Education Abroad opportunity that requires travel to a Mediterranean country to study the Mediterranean diet. The instructor and students will travel to an identified country and students will complete assignments based on the food and culture of the region and attend experiences related to food and health. Tour is provided by an outside vendor and fees are collected by the vendor and course fees by the Office of Education Abroad. Variable content course. With travel to different countries/regions, may be repeated to a maximum of four hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring

DTN 395 Nutrition Intervention in Eating Disorders

Prerequisite: DTN 240.

This course is designed to assist the student in understanding the current guidelines for the different types of eating disorders (EDO) and how the Registered Dietitian (RD) may assist in their treatment. This course may be helpful to the practicing RD if they do not have a background in psychology of eating disorders. Students in related disciplines will be able to understand eating disorders and the role the dietitian would play as a member of the team.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

DTN 396 Alcohol, Addiction, and Nutrition

Prerequisite: DTN 240.

This course is designed to assist the student in understanding the use and abuse of alcohol and other substances in the American diet and nutrition interventions that may be needed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

DTN 397 Topics in Heart Healthy Cooking

Selected topics on heart healthy cooking techniques. Variable content course. With different topics, may be repeated to a maximum of six hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

DTN 400 International Service Learning: Malnutrition in Developing Countries

Prerequisite: 30 hours and permission of instructor.

The integrated service learning component for this course incorporates international community service with classroom instruction in nutrition specifically focusing on malnutrition and nutrition education in a developing country. This course provides an integrative learning experience addressing the practice of citizenship and promotes an awareness of and participation in international public affairs. Includes 15 service hours benefiting an international community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated for a maximum of six hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

DTN 430 Sports Nutrition

Prerequisite: DTN 240 and BMS 308.

Nutrition as related to athletic performance and other areas of physical activity, including training and competition nutrition, fluids and hydration, weight management, supplements and ergogenic aids, the child athlete, and eating disorders.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

DTN 437 Quantity Foods in Healthcare and School Food Service

Prerequisite: DTN 240 and DTN 306 and DTN 330; and BIO 212 or concurrent enrollment; and BIO 213 or concurrent enrollment.

Application of sanitation policies and procedures, preparation, production, and distribution of food to people in hospitals, schools, community programs, and senior living facilities. Other topics include menu planning, recipe developments, food procurements, receiving and storage, food production, quality assurance, equipment select

and layout. A passing score on the National ServSafe Food Safety Certification examination is required for completion of this course. Transportation is required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall, Spring

DTN 445 Community Nutrition

Prerequisite: DTN 335 and DTN 536 and PLS 101.

Must be taken last spring term before expected graduation. Factors affecting the nutritional status of the community; nutritional assessment and surveillance methodologies; governmental nutrition policies and legislation; community resources. The role of the community dietitian in nutrition program planning, implementation and evaluation. Transportation required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

DTN 532 Human Nutrition and Metabolism

Prerequisite: DTN 240 and BMS 308; and CHM 201 or concurrent enrollment.

Food nutrients, their digestion, absorption and metabolism. Methods of determining requirements and interrelationships of nutrients.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

DTN 536 Medical Nutrition Therapy I

Prerequisite: admission to Nutrition and Dietetics program; and DTN 306 and DTN 335 and DTN 532; and CHM 352 or concurrent enrollment.

Principles and application of medical nutrition therapy as related to disease and stress. Transportation required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall

DTN 538 Administrative Dietetics

Prerequisite: DTN 240 and DTN 306 and DTN 330 and DTN 437; and BIO 212 or concurrent enrollment; and BIO 213 or concurrent enrollment; and admission to the Nutrition and Dietetics program.

This course will teach the application of managerial processes in various food service establishments. Areas covered include quality management, risk management, strategic management, theories of management and leadership, financial management, and computer-assisted management systems. Additional topics include human resource management in food service operations including hiring, training, supervision and evaluation. Transportation is required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

DTN 539 Senior Seminar in Dietetics

Prerequisite: admission to the Nutrition and Dietetics program.

Must be taken last fall term before expected graduation. Procedures and application process for obtaining professional status through dietetic registration and licensure. Professional ethics and legal responsibilities. Strategies for integration of current issues into dietetic practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall

DTN 546 Medical Nutrition Therapy II

Prerequisite: DTN 536.

Principles and application of medical nutrition therapy as related to complex disease states. Transportation required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

DTN 550 Nutrition Counseling

Prerequisite: DTN 340; and DTN 536 or concurrent enrollment.

Interviewing techniques, counseling theory and methods applied to nutrition counseling. Emphasis is on development of skills necessary to plan, implement, evaluate and document culturally sensitive nutritional care for individuals and groups. Includes simulated techniques and work with clients in selected settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall, Spring

DTN 595 Introduction to Research in Dietetics

Prerequisite: 90 hours; DTN 335 and DTN 532; and statistics course: QBA 237 or SOC 302 or PSY 200 or MTH 340 or MTH 545.

Fundamentals of research in nutrition including research design, methodology, data collection and analysis, and presentation. Grant writing and funding process for research. Class discussions to include critiques of published research. Class projects to include research proposal/project and presentation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

DTN 740 Medical Nutrition Therapy I Practicum

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program or the graduate Dietetic Internship Certificate Program.

This is the first of a two-semester course sequence providing field experience in patient/client nutritional management at various sites under professional supervision (37 hours per week). Emphasis will be on utilizing the nutrition care process in providing basic medical nutrition therapy to include at least diabetes, heart disease, lung disease and basic health promotion in an acute or clinical setting.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

DTN 741 Medical Nutrition Therapy II Practicum

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program or the graduate Dietetic Internship Certificate Program.

This is the second of a two-semester course sequence providing eight weeks of field experience in patient/client nutritional management at various sites under professional supervision (40 hours per week). Emphasis will be on utilizing the nutrition care process in providing medical nutrition therapy to include at least tube feeding, TPN, pre/post surgery patients in an acute or clinical setting with a research component required as part of the practicum.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

DTN 742 Population Health Nutrition Practicum

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program or the graduate Dietetic Internship Certificate Program.

This course provides a 222 hour field experience in the delivery of population health and community nutrition programs at local, state, national levels at various sites under professional supervision. Current issues relating to nutrition promotion and preventive health care will be examined. Students will evaluate nutrition components of various community health agencies and participate in the delivery of services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

DTN 743 Food Service Management Practicum

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program or the graduate Dietetic Internship Certificate Program.

This course provides a five week field experience (37 hours per week) practicing a systems approach to nutrition services management, including the human dimensions of management, management tools and techniques for assessing accountability, cost containment, productivity and marketing plans. Projects include development of a personnel and operational budget for nutrition services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

DTN 744 Practicum in Area of Concentration

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program or the graduate Dietetic Internship Certificate Program.

This course provides a minimum of 240 hours in either Population Health, Public Affairs or Rural Health. Field placements and experiences will be developed with each student and the program director.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

DTN 745 Topics and Issues in Dietetics

Prerequisite: admission to the graduate Dietetic Internship Certificate Program.

This course provides a six week forum (3 hours per week) for topics pertinent to the practice setting and transition to professional practice. Topics of interest will cover areas such as managed health care, ethical decision-making, registration examination, charting, etc. May be repeated to 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

DTN 750 Advanced Medical Nutrition Therapy

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program or graduate Dietetic Internship certificate program.

Advanced study of metabolic demands in complex disease processes using the Nutrition Care Process in an evidence based approach to altered nutritional needs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall

DTN 752 Advanced Population Health Nutrition I

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program or graduate Dietetic Internship certificate program.

Advanced population health information in preparation for the registered dietitian examination, including review of basic community information. Overview of interpretation of census data and assessing disparities within the population. Other topics include: nutrition public policy, local and global food insecurity, and population health determinants with an emphasis in rural communities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall

DTN 753 Advanced Foodservice Management

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program or graduate Dietetic Internship Certificate Program.

Project and research based application of management concepts and skills to deliver food to people in various settings including schools and hospitals. In addition, review of basic foodservice management concepts and knowledge to include foodservice systems, menu planning, sustainability, and quality improvement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall

DTN 755 Advanced Nutrition Counseling

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program.

Advanced counseling techniques, nutrition interventions, and behavior change theories applied to nutrition counseling. Emphasis on motivational interviewing, including application in practice to provide the learner with strategies and counseling skills to promote behavior change in patients/clients.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Summer

DTN 762 Advanced Population Health Nutrition II

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program.

Course designed as a continuation of DTN 752 to further analyze population health disparities and to develop and implement community programs/policy strategies. Graduate students will be actively involved in developing strategies for implementation based on community needs assessment. This course will include both didactic and experiential components where much of the framework for student learning and evaluation will take place in partnership with community nutrition practitioners.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

DTN 797 Non-thesis Project

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program.

In-depth scientific study of a nutrition and dietetics problem of interest that culminates in a scholarly paper and formal community or professional presentation. Student must have research project proposal approved by faculty supervisor and program director prior to enrollment. Must be repeated for a total of 3 hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

DTN 799 Thesis

Prerequisite: admission to the Master of Science in Nutrition and Dietetics program.

Demonstration of the capacity for research and independent thought culminating in a thesis. May be repeated for a maximum of 6 hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Medical Technology (MTC) courses

MTC 401 Clinical Chemistry

Analytical and theoretical aspects of the clinical biochemistry of body fluid constituents, utilizing both manual and instrumental techniques including automation and special procedures.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
9-12			Upon demand

MTC 402 Clinical Microscopy-Urinalysis

Principles and techniques of the physical, chemical and microscopic examination of urine and other excreta as related to disease processes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

MTC 403 Hematology-Coagulation

A study of the cellular element of blood and bone marrow; theory of cell production, release and survival; morphological characteristics of normal and abnormal cells; quantitative and qualitative abnormalities. Principles and techniques involved in the study of hemostasis, blood coagulation and hemorrhagic disorders.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4-6			Upon demand

MTC 404 Serology-Immunology

The science of immunity including antibody development, principles of antigen-antibody interactions, and techniques of serological testing for various disease states.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-4			Upon demand

MTC 405 Clinical Microbiology

Sterile technique, methods of handling and inoculating specimens containing pathogenic microorganisms, isolation and identification of pathogenic microorganisms, laboratory test in chemotherapy, and diagnostic bacteriology, mycology, and parasitology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
7			Upon demand

MTC 406 Blood Bank-Immunohematology

A study of blood group systems and the immune response. Methods of cross-matching, antibody screening, and phenotyping. Administrative safeguards and legal aspects of blood banking. Proper clinical utilization of blood components.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-5			Upon demand

MTC 407 Special Topics in Medical Technology-Education and Management

Instruction will include lecture and/or clinical practice in the areas of In-Service Education, Management and Supervision, Research and Development, and Principles and Techniques of the Instructional Process.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Upon demand

Undergraduate Catalog

Cell and Molecular Biology

Major(s)

Cell and Molecular Biology (Comprehensive)

Bachelor of Science

The comprehensive major in Cell and Molecular Biology (CMB), is a rigorous and selective program in the sciences that prepares academically-serious students for:

1. Graduate work in cell biology or molecular biology,
2. Graduate work in fields such as biotechnology, biochemistry, physiology, pharmacology, and microbiology where a strong undergraduate foundation in cell and molecular biology would be an asset,
3. Professional schools of medicine, dentistry, optometry, or other health-related professions and,
4. Employment in cell biology and biotechnology-based industries.

Because of sequential prerequisites, limited course offerings, and tight course scheduling, students seeking formal admission to the degree program must begin to plan their program with a Cell and Molecular Biology (CMB) advisor in the Department of Biomedical Sciences early during their freshman year.

Admission Requirements

Formal admission to the Cell and Molecular Biology (CMB) major requires:

1. Completion of at least 25 hours of course work, including [BMS 110](#), [BMS 111](#), [BMS 231](#), and [CHM 160](#) and [CHM 161](#),
2. A cumulative and science GPA of 2.50 or higher.
3. A student must achieve a grade of "C" or better in all specific general education requirements (item 1 below), all required BMS core courses (item 2 below), and all requirements from other departments (item 3

below).

4. A grade of "C" or better must be obtained in a prerequisite course prior to taking a sequential course.
5. In the terminal semester, student is required to take a comprehensive assessment examination in Cell and Molecular biology.

Major requirements (65-69 hours)

1. Specific General Education requirements: [BMS 110\(3\)](#), [111\(1\)](#); [PHY 123\(4\)](#) or [203\(5\)](#); [MTH 287\(3\)](#) or [261\(5\)](#).
2. Biomedical Sciences courses: [BMS 231\(4\)](#), [321\(4\)](#), [494\(1\)](#), [521\(4\)](#), [525\(4\)](#).
3. Required courses from other departments: [CHM 160\(4\)](#), [161\(1\)](#), [170\(3\)](#), [171\(1\)](#), [342\(3\)](#), [343\(3\)](#), [345\(2\)](#); [PHY 124\(4\)](#) or [204\(5\)](#).
4. Other requirements: At least 16 hours of appropriate electives, selected in consultation with the student's advisor, numbered 300 or higher. At least 10 of these elective hours must carry a BMS course code.
Recommended Electives: [BMS 308\(4\)](#), [497\(1-3\)](#), [498\(1-3\)](#), [514\(2\)](#), [516\(4\)](#), [524\(3\)](#), [529\(3\)](#), [540\(2\)](#), [558\(3\)](#), [569\(3\)](#), [582\(4\)](#), [584\(3\)](#), [585\(4\)](#); [BIO 312\(3\)](#), [313\(2\)](#), [511\(4\)](#); [CHM 504\(3\)](#), [505\(1\)](#), [556\(3\)](#), [557\(2\)](#).
5. Public Affairs Capstone Experience will be fulfilled by completion of [BMS 494\(1\)](#) and any combination of the following courses equaling three total hours: [BMS 300\(1\)](#), [380\(1-3\)](#), [400\(2\)](#), [490\(3\)](#), [498\(1-3\)](#).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Accelerated graduate program in Cell and Molecular Biology

Eligible Missouri State undergraduate students may apply for admission to the Cell and Molecular Biology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-cell-and-molecular-biology.htm) (<https://graduate.missouristate.edu/Catalog/prog-cell-and-molecular-biology.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Undergraduate Catalog

Clinical Laboratory Sciences-Medical Technology

Major(s)

Clinical Laboratory Sciences-Medical Technology (Comprehensive)

Bachelor of Science

Students desiring to enter clinical laboratory sciences-medical technology may secure preparatory training at Missouri State University. All the requirements for the Bachelor of Science must be met with a minimum of 95 credit hours, including the capstone course, completed prior to entry into the clinical phase of the program. For the major, the University will grant 30-39 hours of upper-division credit upon completion of the work given in a NAACLS approved school of clinical laboratory sciences-medical technology. The actual number of hours granted depends on which school of clinical laboratory sciences-medical technology the student attends. Before a student matriculates to an approved school, he/she must secure a letter from the Office of the Registrar which indicates the completion of all requirements for the degree other than the training at the school of clinical laboratory sciences-medical technology.

Missouri State University has entered into agreements with the school of clinical laboratory sciences-medical technology at Mercy (Joplin), Cox Medical Center (Springfield), and North Kansas City Hospital (Kansas City) whereby a clinical laboratory sciences-medical technology major may complete his/her work at one of those schools. Under these agreements, the student must meet the requirements for admission at the school of his/her choice as outlined above. Courses taken at one of the above schools will be entered directly on the Missouri State academic record and the grades earned in those courses will be calculated into the cumulative Missouri State grade point average. This combined averaging of grades applies only to clinical laboratory sciences-medical technology students attending one of the affiliated schools. MTC courses may not be used toward satisfying the University's residence requirements for graduation. Those requirements must be met

before entering a school of clinical laboratory sciences-medical technology. The descriptions of the courses to be taken at the school of clinical laboratory sciences-medical technology are listed under the MTC prefix.

Neither admission to the Missouri State program of preparatory training nor completion of that program will ensure admission to a school of clinical laboratory sciences-medical technology. The student may apply for admission at the beginning of the third year at Missouri State, but acceptance by the clinical laboratory sciences-medical technology school is at the discretion of that school. Recent graduates of other majors who have met the prerequisites may also apply to these schools.

Major requirements:

1. Specific General Education requirement: [BIO 121\(4\)](#) or [BMS 110\(3\)](#) and [111\(1\)](#).
2. [BMS 231\(4\)](#) or [BIO 235\(3\)](#) and [236\(1\)](#); and [BMS 307\(4\)](#) and [BMS 308\(4\)](#); and [BIO 312\(3\)](#) and [BIO 313\(2\)](#) and [BIO 511\(3\)](#).
3. [CHM 160\(4\)](#) and [CHM 161\(1\)](#); [CHM 170\(3\)](#) and [CHM 171\(1\)](#); and [CHM 201\(3\)](#) and [202\(2\)](#), or [CHM 342\(3\)](#) and [345\(2\)](#); [BMS 321\(4\)](#) or [CHM 352\(3\)](#) and [CHM 353\(2\)](#).
4. Statistics course: [BIO 550](#) or [MTH 340](#) or [PSY 200](#) or [QBA 237](#) or [SOC 302](#) or equivalent.
5. Complete one of the following emphases:
 - a. Microbiology Emphasis: [BIO 520\(3\)](#) and [BMS 524\(3\)](#).
 - b. Molecular Diagnostics Emphasis: [BMS 321\(4\)](#) and [BMS 521\(4\)](#) and [BMS 525\(4\)](#). Note: BMS 321 may also count as one of the required science courses.
 - c. Management Emphasis: [MGT 286\(3\)](#) and [MGT 340\(3\)](#).
6. With advisor approval, choose at least one additional course from the following that is not taken in the required courses or emphasis: [BMS 321\(4\)](#) or [BIO 520\(3\)](#) or [BMS 521\(4\)](#) or [BMS 524\(3\)](#) or [CHM 302\(5\)](#) or [CHM 352\(3\)](#) and [CHM 353\(2\)](#) or [MGT 286\(3\)](#) or [MGT 340\(3\)](#).
7. Clinical Course Requirements: [MTC 401\(10-12\)](#), [402\(1-3\)](#), [403\(4-6\)](#), [404\(3-4\)](#), [405\(7\)](#), [406\(3-5\)](#), [407\(2\)](#).
8. Public Affairs Capstone Experience will be fulfilled by completion of any combination of the following courses equaling 3 total hours: [BMS 300\(1\)](#), [BIO 300\(1\)](#), [CHM 300\(1\)](#), [BMS 400\(2\)](#).

Cultural Competence in International Nutrition Certificate

Cultural Competence in International Nutrition

This certificate is designed for students interested in developing culturally relevant international nutrition knowledge and skills while working with diverse cultures in a variety of settings. The certificate also provides education abroad opportunities to further assist in the development of culturally competent citizens.

This certificate provides coursework and experiences to enhance students' knowledge of basic principles of nutrition as applied to the foods, health, and religious beliefs of different cultures worldwide. Additionally, students will examine how certain foods and health traditions are important to various cultures. Students completing this program will have an enhanced understanding of foods, health beliefs and practices, and the religions of a variety of cultures with which they may come into contact.

Program requirements (12 hours)

1. [DTN 130\(3\)](#) or [240\(3\)](#); and [DTN 332\(3\)](#).
2. Additional courses from the following to total 12 hours for the certificate: [DTN 345\(3\)](#), [IPE 376\(3\)](#), [IPE 377\(3\)](#).
3. Additionally, up to 3 hours of advisor approved education abroad electives may be selected from: [IDS 297\(3\)](#), [BMS 380\(1-3\)](#), [DTN 392\(1-3\)](#), [BMS 400\(1-3\)](#), [DTN 400\(1-3\)](#).
4. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a grade of C or better in all courses used to fulfill the certificate requirements.

Foundations of Nutrition Certificate

Foundations of Nutrition

This certificate is designed for students interested in understanding general principles of food and nutrition, human nutritional needs, and how nutrition affects health. Additionally, students will learn about the psychological, cultural, and social factors influencing dietary intake. Students completing this program will have an enhanced personal understanding of nutrition and health.

Program requirements (12 hours)

1. [DTN 130\(3\)](#) or [240\(3\)](#).
2. Nine hours from: [DTN 330\(2\)](#), [332\(3\)](#), [333\(3\)](#), [334\(3\)](#), [345\(3\)](#), [391\(1\)](#), [397\(1-3\)](#), [BMS 497\(1-3\)](#) or other approved electives (1-3) may be counted with approval of certificate advisor.
3. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Nutrition and Dietetics

Major(s)

Nutrition and Dietetics (Comprehensive)

Bachelor of Science

Accreditation

The Nutrition and Dietetics program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics, 120 South Riverside Plaza, Suite 2190, Chicago, IL 60606-6995, (800) 877-1600 ext. 5400. Graduates who meet the requirements for a Verification Statement are eligible to apply for a ACEND-accredited Dietetics Internship and, following its successful completion, to take the national registration examination to become credentialed as a Registered Dietitian Nutritionist (RDN).

Requirements for Verification Statement of Completion of Didactic Program in Dietetics

A cumulative GPA of at least 2.90 with a grade of "C" or higher in all courses associated with program requirements.

Admission requirements

1. Completion of at least 45 hours.
2. [DTN 240](#), [DTN 305](#); [BMS 308](#); [CHM 116](#) and [117](#) or ([CHM 160](#), [161](#), [170](#) and [171](#)) with grades of "C" or better in each of the courses.
3. A Missouri State GPA of at least 2.90; and a combined (Missouri State and transfer) GPA of at least 2.90. Exception to the minimum GPA may be made in unusual circumstances.

4. Provide a signed copy of the Dietetics Honor Code.

Major requirements (78 hours)

1. Specific General Education requirements (14 hours double count): [BMS 110\(3\)](#) and [111\(1\)](#); [CHM 116\(4\)](#) and [117\(1\)](#); [ENG 321\(3\)](#); [MTH 134\(3\)](#) or [136\(5\)](#) or [137\(3\)](#) or [138\(5\)](#) or [261\(5\)](#) or [287\(3\)](#); [PSY 121\(3\)](#).
2. Dietetics and Nutrition courses: [DTN 240\(3\)](#), [305\(1\)](#), [306\(1\)](#), [330\(2\)](#), [331\(3\)](#), [332\(3\)](#), [333\(3\)](#), [335\(3\)](#), [340\(2\)](#), [345\(3\)](#), [430\(3\)](#), [437\(3\)](#), [445\(3\)](#), [532\(3\)](#), [536\(4\)](#), [538\(3\)](#), [539\(1\)](#), [546\(4\)](#), [550\(2\)](#), [595\(1\)](#).
3. Biomedical Science courses: [BMS 110\(3\)](#), [111\(1\)](#), [230\(3\)](#), [307\(4\)](#), [308\(4\)](#).
4. Public Affairs Capstone Experience will be fulfilled by completion of [DTN 345\(3\)](#).
5. Related requirements: [BIO 212\(2\)](#) and [213\(1\)](#); [CHM 201\(3\)](#); [CHM 352\(3\)](#); [MTH 340\(3\)](#) or [545\(3\)](#) or [PSY 200\(3\)](#) or [QBA 237\(3\)](#) or [SOC 302\(3\)](#).

Undergraduate Catalog

Communication Sciences and Disorders Courses

Communication Sciences and Disorders (CSD) courses

CSD 201 Introduction to Communication Disorders

Provides a general understanding of normal and deviant speech, language and hearing in adults and children. Considers the normal development of communication behavior, and the nature of communication disorders.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 209 Basics of Linguistics for the Communication Sciences

General coverage of linguistic theories and application as relevant to the communication sciences and disorders professional. Also coverage of the specific components of language (phonology, morphology, syntax, semantics, and pragmatics), including procedures for description and analysis commonly used in the communication sciences and disorders.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 210 Phonetics

Instructional application of international phonetic alphabet in transcribing normal/disordered American English.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

CSD 260 Survey of Interests in Deaf and Hard of Hearing

A survey course on the effects of hearing impairments as they relate to development, learning, education, and social interaction across the lifespan. Resources and agencies that assist persons who are deaf and hard of hearing at the local, state, and national levels will be discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 312 Normal Language Acquisition

Theories and sequence of normal language development, emphasizing phonological, morphological, syntactic, semantic, and pragmatic abilities. Emphasis on first six years.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

CSD 315 Language Disorders in Children

Prerequisite: grade of C or better in CSD 312.

Nature, evaluation and treatment of language disorders in children. The goal of the course is to introduce students to the populations of children who experience language disorders including children with developmental language disorders, autism spectrum disorders, and intellectual disabilities. The course will examine tools and strategies used to assess language disorders as well as evidenced-based intervention strategies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 316 Introduction to Language and Cognitive-Linguistic Disorders in Adults

Prerequisite: grade of C or better in CSD 312.

Nature, evaluation and treatment of acquired language and cognitive-linguistic disorders in adults caused by stroke, brain injury and neurological disease. Study of current clinical approaches and evidenced-based practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 318 Introduction to Speech Sound Disorders

Prerequisite: grade of C or better in CSD 210.

Introduction to the nature, evaluation, and treatment of speech sound disorders.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 319 Anatomy and Physiology of Speech

Particular structure and functions of human anatomy related to the processes of speech.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 321 Conceptually Accurate Signed English I

Gain beginner level skill in sign language and fingerspelling through Manually Coded English. Development of a general knowledge base including the history of sign language and the spectrum of sign options available. May be taught concurrently with CSD 621. Cannot receive credit for both CSD 321 and CSD 621.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

CSD 322 Conceptually Accurate Signed English II

Prerequisite: CSD 321.

Emphasis on the expansion of Manually Coded English sign language skills through the use of conversation and the increased development of vocabulary. May be taught concurrently with CSD 631. Cannot receive credit for both CSD 322 and CSD 631.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 330 Introduction to American Sign Language (ASL)

A beginning level course in American Sign Language. Students will gain information about the history and structure of this unique visual/gestural system of communication, its vocabulary and syntax, and practical experience in its use, both expressively and receptively. May be taught concurrently with CSD 636. Cannot receive credit for both CSD 330 and CSD 636.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	LANG 105 - Foreign Language I.

[Access the CORE 42 portal](#)

CSD 331 American Sign Language (ASL) II

Prerequisite: CSD 330.

An advanced beginning level course in American Sign Language. Students will gain more complex introductory information about the history and structure of this unique visual/gestural system of communication, its vocabulary and syntax, and practical experience in its use, both expressively and receptively. May be taught concurrently with CSD 637. Cannot receive credit for both CSD 331 and CSD 637.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	LANG 106 - Foreign Language II.

[Access the CORE 42 portal](#)

CSD 332 American Sign Language (ASL) III

Prerequisite: CSD 331.

An intermediate level course in American Sign Language. Students will gain information regarding vocabulary, syntax and cultural factors related to this unique visual/gestural system of communication. Students will gain further practical experience in its use, both expressively and receptively. May be taught concurrently with CSD 638. Cannot receive credit for both CSD 332 and CSD 638.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 333 American Sign Language (ASL) IV

Prerequisite: CSD 332.

An advanced level course in American Sign Language. Students will gain information regarding vocabulary, syntax and cultural factors related to this unique visual/gestural system of communication. Students will gain further practical experience in its use, both expressively and receptively. May be taught concurrently with CSD 639. Cannot receive credit for both CSD 333 and CSD 639.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 360 Hearing and Speech Science

Elementary acoustical theory and application to the study of speech production, reception and perception, decibel notation, and traditional psychophysical methods.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Summer

CSD 362 Speech Science

Prerequisite: grade of C or better in CSD 319.

Analysis of research on the acoustic parameters, the perceptual and productive processes of normal speech.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 370 Audiology

Prerequisite: grade of C or better in CSD 360.

Principles of hearing measurement: test methods, screening methods, test interpretation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 380 Development, Diversity, and Deafness

Includes prevalence, terminology and the effects of hearing loss and its management on child development. Comprehensive scope of communication options will be explored. Exceptionalities, including cultural and linguistic differences among individuals who are deaf or hard of hearing will be considered within the context of family and development, both educationally and socially. May be taught concurrently with CSD 685. Cannot receive credit for both CSD 380 and CSD 685.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 388 Cultural and Linguistic Diversity

The purpose of this course is to introduce students to multicultural issues designed to better prepare them to serve diverse populations while employed in health and education professions. Students enrolled in this course will be given the tools to begin to develop cultural competence as future service providers. Course will examine the role of culture in the development, assessment and management of normal and disordered speech and language. This course will address the cultural and socio-political issues of education and clinical treatment of U.S. groups by race/ethnicity, class, gender, sexual orientation, age, disability and religious practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 400 Introduction to Research in Communication Sciences and Disorders

An introduction to the principles and methods of statistics used in research, critical reading of the literature, and scientific writing in communication sciences and disorders. Contains prerequisite knowledge needed for the graduate course in research that is required of all majors.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 417 Clinical Assessment and Intervention of Voice, Speech and Swallowing Disorders

Prerequisite: grade of C or better in CSD 319; and admission to the CSD program.

Introduction to the assessment and intervention of adult voice, speech and swallowing problems. A strong emphasis will be on how clinical technologies can be used to enhance the effectiveness of common behavioral approaches.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 482 Introduction to Clinical Methods

Prerequisite: admission to the CSD program and a 3.00 GPA in the major at the time of enrollment.

A study of assessment and treatment principles, methods and procedures relating to speech, language and hearing disorders.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 484 Introduction to Practice Settings on Communication Sciences and Disorders

A course focusing on the varied settings in which audiologists and speech-language pathologists work. Seniors majoring in audiology or speech-language pathology who complete this course may accrue up to 8 hours of the ASHA-required 25 hours of observation in their field of study.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 492 Issues in Communication Sciences and Disorders

Prerequisite: permission.

Supervised independent study exploring in-depth selected areas. Selected readings, controlled by conferences, progress reports and term paper. May be repeated to a total of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

CSD 495 Observation Clinical Practicum I

Prerequisite: admission to Communication Sciences and Disorders major.

Students will make observations and complete assignments relating to service delivery in their respective disciplines. A minimum of 12 hours will be direct observation. Course content will emphasize assessment practices, professional code of ethics, skills in reflective decision-making, and technical writing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall

CSD 496 Observation Clinical Practicum II

Prerequisite: CSD 495.

Students will make observations and complete assignments relating to service delivery in their respective disciplines. A minimum of 13 hours will be direct observation and/or participation. Emphasis will be on professional competencies, technical writing, and implementation of discipline-specific practices. May be repeated to total of 4 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

CSD 497 Observation Clinical Practicum

Prerequisite: admission to CSD undergraduate major.

Students will make observations and complete assignments relating to service delivery in their respective disciplines. A minimum of 12 hours will be direct observation. Course content will emphasize assessment practices, professional code of ethics, professional competencies, reflective decision-making, technical writing and implementation of discipline-specific practices. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Fall

CSD 522 Neural Bases of Human Communication

Prerequisite: grade of C or better in CSD 319; and admission to the CSD program.

Study of the nervous system and its role in normal and abnormal speech and language processing. May be taught concurrently with CSD 623. Cannot receive credit for both CSD 623 and CSD 522.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 562 Psycho-Social Implications of Being Deaf and Hard of Hearing

Prerequisite: admission to the CSD program.

Characteristics and problems of persons who are D/HH as they affect interaction with general society. Emphasis on interpersonal relationships through the lifespan. Introduction to adolescent development and psychology of learning of the typical child. May be taught concurrently with CSD 669. Cannot receive credit for both CSD 669 and CSD 562.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 572 Aural Rehabilitation

Prerequisite: CSD 370 or concurrent enrollment.

Principles of habilitation/rehabilitation of communication disorders related to hearing impairment. Types of amplification and assistive listening devices used in classrooms. Issues of classroom acoustics and ways to optimize the classroom listening environment. May be taught concurrently with CSD 673. Cannot receive credit for both CSD 673 and CSD 572. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 580 Technical Solutions in Communication Disorders

Review and demonstration of current hard- and software systems for the evaluation, treatment, and research of communication disorders. May be taught concurrently with CSD 681. Cannot receive credit for both CSD 681 and CSD 580.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSD 621 Conceptually Accurate Signed English I

Gain beginner level skill in sign language and finger-spelling through Manually coded English. Develop a general knowledge base including the history of sign language and the spectrum of sign options available. May be taught concurrently with CSD 321. Cannot receive credit for both CSD 321 and CSD 621. Students will be required to complete a project in an area related to their professional course of study.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 623 Neural Bases of Human Communication

Study of the nervous system and its role in normal and abnormal speech and language processing. May be taught concurrently with CSD 522. Cannot receive credit for both CSD 522 and CSD 623.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 631 Conceptually Accurate Signed English II

Prerequisite: CSD 321 or CSD 621.

Emphasis on the expansion of Manually Coded English sign language skills through the use of conversation and the increased development of vocabulary. Students will be required to complete a project in an area related to their professional course of study. May be taught concurrently with CSD 322. Cannot receive credit for both CSD 631 and CSD 322.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 636 Introduction to American Sign Language (ASL)

A beginning level course in American Sign Language. Students will gain information about the history and structure of this unique visual/gestural system of communication, its vocabulary and syntax, and practical experience in its use, both expressively and receptively. May be taught concurrently with CSD 330. Cannot receive credit for both CSD 636 and CSD 330.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 637 Introduction to American Sign Language (ASL) II

Prerequisite: CSD 636.

An advanced beginning level course in American Sign Language. Students will gain more complex introductory information about the history and structure of this unique visual/gestural system of communication, its vocabulary and syntax, and practical experience in its use, both expressively and receptively. May be taught concurrently with CSD 331. Cannot receive credit for both CSD 637 and CSD 331.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 638 Introduction to American Sign Language (ASL) III

Prerequisite: CSD 637.

An intermediate level course in American Sign Language. Students will gain information regarding vocabulary, syntax and cultural factors related to this unique visual/gestural system of communication. Students will gain further practical experience in its use, both expressively and receptively. May be taught concurrently with CSD 332. Cannot receive for both CSD 638 and CSD 332.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 639 Introduction to American Sign Language (ASL) IV

Prerequisite: CSD 638.

An advanced level course in American Sign Language. Students will gain information regarding vocabulary, syntax and cultural factors related to this unique visual/gestural system of communication. Students will gain

further practical experience in its use, both expressively and receptively. May be taught concurrently with CSD 333. Cannot receive credit for both CSD 639 and CSD 333.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 669 Psycho-Social Implications of Being Deaf and Hard of Hearing

Prerequisite: permission.

Characteristics and problems of persons who are D/HH as they affect interaction with general society. Emphasis on interpersonal relationships through the lifespan. Introduction to adolescent development and psychology of learning of the typical child. May be taught concurrently with CSD 562. Cannot receive credit for both CSD 562 and CSD 669.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 673 Aural Rehabilitation

Prerequisite: CSD 360.

Principles of habilitation/rehabilitation of communication disorders related to hearing impairment. Types of amplification and assistive listening devices used in classrooms. Issues of classroom acoustics and ways to optimize the classroom listening environment. May be taught concurrently with CSD 572. Cannot receive credit for both CSD 572 and CSD 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 681 Technical Solutions in Communication Disorders

Review and demonstration of current hard- and software systems for the evaluation, treatment, and research of communication disorders. May be taught concurrently with CSD 580. Cannot receive credit for both CSD 580 and CSD 681.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSD 685 Development, Diversity, and Deafness

Includes prevalence, terminology and the effects of hearing loss and its management on child development. Comprehensive scope of communication options will be explored. Exceptionalities, including cultural and linguistic differences among individuals who are deaf or hard of hearing will be considered within the context of family and development, both educationally and socially. Fifteen hours of integrated service-learning will be a component of the course. May be taught concurrently with CSD 380. Cannot receive credit for both CSD 685 and CSD 380. Students in this course will be required to complete additional assignments compared to those students in CSD 380 for the purpose of developing skills, knowledge, and dispositions related to teaching and learning in varied settings with diverse learners required for all educators to be effective in a global society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 701 Research: Deaf and Hard of Hearing

Prerequisite: permission.

Foundation for research study in the education of individuals who are deaf and hard of hearing. Emphasis will be placed on evaluation of research and professional writing as it pertains to education of individuals who are deaf and hard of hearing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Summer

CSD 702 Research Methods in Communication Disorders

Prerequisite: CSD 712 or concurrent enrollment.

Nature of qualitative and quantitative research methodology, experimental design, scientific writing, and the exploration of efficacy and effectiveness in evidence-based practice. Examination of research literature through critical reviews of articles. The design of research pertaining to speech, language and hearing functions, and the analysis of data.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 710 Developmental Psycholinguistics

Prerequisite: CSD 712 or concurrent enrollment.

Presentation of current theories associated with psycholinguistic development. Focus will be on auditory perception, individual differences, cognitive hypotheses, and stage transition.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 712 Child Language I

Prerequisite: admission to graduate program in Department of Communication Sciences and Disorders.

Issues related to the area of language development and disorders in children age birth to five will be presented. The course will focus on best practices for the assessment and treatment of children age birth to five with language disorders.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 713 Child Language II

Prerequisite: CSD 712 or concurrent enrollment.

Current issues within the area of oral and written language development and disorders in school-age children and adolescents will be discussed. Methods for critically evaluating research and applying this research to clinical practice with children and adolescents with language disorders will be covered. Focus of course is on optimal methods for assessment and treatment of language disorders in children and adolescents.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 714 Language Disorders: Rehabilitation

Prerequisite: CSD 712 or concurrent enrollment.

Diagnostic and therapeutic strategies for language disorders in adults associated with auditory discrimination, perception, short and long-term memory, semantic and syntactical concept formation, and retrieval of auditory information.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSD 715 Infants and Toddlers: Communication Assessment and Treatment

Prerequisite: CSD 712 or concurrent enrollment.

Issues regarding communication assessment and intervention for infants and toddlers will be discussed. Course content will include a study of at-risk factors and established risks for developmental disabilities. Service delivery models for the assessment and treatment of communication disorders for infants and toddlers will be presented. Play-based assessment and intervention strategies will be included in course content.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

CSD 716 Craniofacial Anomalies

Prerequisite: CSD 712 or concurrent enrollment.

The study of communication and associated problems related to congenital and acquired craniofacial anomalies. Emphasis on interdisciplinary procedures relative to amelioration of communication deficits manifest in these anomalies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 718 Fluency Disorders

Theoretical, clinical, and experimental approaches to the study and treatment of fluency disorders.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Summer

CSD 720 Voice Disorders

The study of the human voice and its disorders. Emphasis on 1) evaluation and treatment of neurogenic, psychogenic, and idiopathic voice disorders, and 2) respiratory, laryngeal and velopharyngeal dysfunction.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Summer

CSD 724 Aphasia

Prerequisite: CSD 712 or concurrent enrollment.

Emphasis on language impairment as a result of brain dysfunction. A theoretical and clinical analysis of the neurolinguistic basis for describing, diagnosing, remediating, and/or providing means for alternative communication for individuals who suffer from aphasia.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSD 725 Motor Speech Disorders

Prerequisite: CSD 712 or concurrent enrollment.

Study of neurogenic speech disorders. Emphasis on the evaluation and treatment of (1) the dysarthrias and dyspraxias, and (2) underlying neurologic and vocal tract dysfunction.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 726 Diagnostics: Speech and Language Assessment

Prerequisite: CSD 712 or concurrent enrollment.

Principles and procedures for tests of language and speech dysfunctions. Interpretation of diagnostic findings leading to clinical decision-making, rehabilitative planning and reporting. Students obtain clinical experience in diagnostic procedures at the University Speech and Hearing Clinic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

CSD 728 Advanced Study of Phonological (Sound System) Disorders in Children

Prerequisite: CSD 712 or concurrent enrollment.

Discussion of processes involved in phonological production and how breakdowns in these processes, including hearing loss or deafness, lead to specific problems. Methods for critically evaluating research and applying this research to the study of phonological disorders will be covered. Focus of course is on optimal methods for assessment and treatment of phonological disorders in children.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 729 Cognitively-Based Communication Disorders

Prerequisite: admission to graduate program in Department of Communication Sciences and Disorders.

Exploration of the pathophysiology, nature, appraisal, prevention, and management of a variety of neurogenic communication disorders, excluding the aphasias, that affect human cognition. These disorders include right hemisphere syndrome, and traumatic brain injury, in both children and adults, and the dementias.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

CSD 732 Speech and Language Assessment and Treatment for Special Populations

Prerequisite: CSD 712 or concurrent enrollment.

Information on the speech and language disabilities associated with children with special needs. Target populations will include children with cognitive disabilities, dual sensory disabilities, autism spectrum disorders, behavioral disabilities and/or physical disabilities, and children who are deaf and hard of hearing. Communication development and prevention, assessment, and intervention for each of these populations will be addressed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSD 733 Introduction to Augmentative and Alternative Communication

Prerequisite: admission to graduate program in Department of Communication Sciences and Disorders.

This course will cover the basic components of AAC as well as assessment and intervention strategies. In addition, the operation, evaluation, and application of the technology associated with AAC will be presented. AAC assessment and intervention will be discussed in regards to the following populations: children and adults with developmental disabilities and individuals with acquired disabilities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 741 Dysphagia

Prerequisite: CSD 712 or concurrent enrollment.

Comprehensive study of normal and disordered swallowing. Special emphasis will be placed on the evaluation and treatment of disordered swallowing processes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 742 Speech-Language Services in Medical Settings

Prerequisite: CSD 712 or concurrent enrollment.

This course is designed to provide a guide to the concepts, policies, and procedures encountered in the medical setting. It is hoped that at the end of this course, students will feel more comfortable entering the medical setting in various practicum settings that are required in our graduate program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

CSD 758 Early Intervention Assessment: Deaf and Hard of Hearing

Prerequisite: admission to Education of Deaf and Hard of Hearing graduate program or graduate certificate.

Methods and techniques for working with families as well as in the educational environment of infants and children who are deaf or hard-of-hearing from birth through the beginning elementary school years. Emphasis on methods and procedures of formal and informal assessment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

CSD 759 Early Intervention: Deaf and Hard of Hearing

Prerequisite: admission to Education of Deaf and Hard of Hearing graduate program or graduate certificate.

Methods and techniques for working with families who have infants, toddlers and/or young children who are deaf or hard of hearing from birth to the beginning elementary school years in both natural and educational environments. Emphasis on methods and procedures for intervention, interpretation of assessment data and prescriptive instruction.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

CSD 760 Language Development: Deaf and Hard of Hearing I

Prerequisite: admission to Education of Deaf and Hard of Hearing graduate program or graduate certificate.

Theories and research into language development in individuals with hearing and those with losses of hearing are explored with implications for assessment and intervention. Problems and issues related to language development are presented for reflection and discussion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 761 Language Development: Deaf and Hard of Hearing II

Prerequisite: admission to Education of Deaf and Hard of Hearing graduate program.

Methods, strategies, and techniques of language development that may be applied in assessing and instructing students with hearing losses.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

CSD 762 Speech Development: Deaf and Hard of Hearing I

Prerequisite: admission to Education of Deaf and Hard of Hearing graduate program or graduate certificate.

Theories of speech development as they apply to persons who are deaf or hard of hearing. Phonetics including transcription. Anatomy and physiology of the speech mechanisms. Techniques for analyzing speech will be stressed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 763 Auditory Development: Deaf and Hard of Hearing

Prerequisite: admission to Education of Deaf and Hard of Hearing graduate program.

Development of listening skills across settings by maximizing use of residual hearing and hearing technologies, notably cochlear implants. Auditory re/habilitation assessment, intervention, and principles as it relates to individuals who are deaf or hard of hearing and their families with emphasis on a developmental model for the acquisition of speech and language. Challenges with classroom acoustics and ways to optimize the classroom listening environment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 764 Instructional Strategies: Deaf and Hard of Hearing

Prerequisite: admission to Education of Deaf and Hard of Hearing graduate program.

Development of instructional strategies for teaching students who are deaf or hard of hearing with an emphasis on differentiated instruction. Focus on upper elementary through the secondary school levels, including career education.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 765 Reading: Deaf and Hard of Hearing

Prerequisite: admission to Education of Deaf and Hard of Hearing graduate program or graduate certificate.

Theories of reading with an emphasis on adaptations for assessment and intervention for students who are deaf or hard of hearing. Introduction to available resources.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 766 Counseling: Deaf and Hard of Hearing

Prerequisite: admission to Education of Deaf and Hard of Hearing graduate program or graduate certificate.

Theoretical bases of counseling and the role of the educator in the counseling process. Emphasis on the counseling process as it affects the educational, personal, social, and familial adjustment of individuals who are deaf or hard of hearing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

CSD 767 Amplification Systems in the Educational Setting

Prerequisite: permission.

The different types of amplification and assistive listening devices used in classrooms will be discussed in detail. Students will be able to discuss issues of acoustics and amplification devices in educational settings. They will learn vocabulary needed for communication with other professionals, and they will obtain hands-on experience with hearing aids and assistive devices found in classrooms.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 782 Acoustic Phonetics

Prerequisite: CSD 712 or concurrent enrollment.

Investigation of the acoustic characteristics of normal and pathological speech and voice production.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

CSD 783 Physiological Phonetics

Prerequisite: CSD 712 or concurrent enrollment.

Analyses of the physiological features underlying voice, speech and language processes; theories of encoding, and encoding control mechanisms.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

CSD 784 Non-Thesis Project

In-depth study in an area of communication sciences and disorders, culminating in a presentation of an extensive scholarly paper. Syllabi with specific expectations will be developed for each semester. SLP Emphasis: Students register for 1 credit hour per semester for a minimum of 3 semesters; may be repeated. DHH Emphasis: Students register for 3 credit hour in the first semester of enrollment and then 1 credit hour in the subsequent semester for a minimum total of 4 credit hours, may be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

CSD 788 Professional Issues I: Education Settings

Prerequisite: CSD 712 or concurrent enrollment.

This course will be taught in conjunction with student's school practicum experiences and will focus on professional issues in school settings. Topics will include overview of service delivery systems, business aspects of service delivery, scope of practice, quality assurance/assessment, legal and ethical responsibilities, professional organizations, and career development issues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 789 Professional Issues

Prerequisite: CSD 712 or concurrent enrollment.

This functionally-oriented course is designed to complement students' concurrent clinical externships in educational and healthcare settings. Issues include, but are not limited to, in-depth discussion and analysis of relevant local, state, and national policies and procedures for ethical and effective evidence-based service delivery; models of collaborative team assessment and treatment applications to a variety of speech-language pathology settings; professional organizations; and recognition of potential external influences that may impact treatment objectives and length of intervention.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 790 Workshop in Communication Disorders

Prerequisite: permission.

A concentration of work to improve the skill and knowledge in specific areas. Each workshop will be concerned with a single topic. Number of class hours determined by length of workshop. Thirty clock hours equal 1 semester hour. May be repeated to a maximum of 6 hours credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

CSD 791 Professional Issues in Speech-Language Pathology

Prerequisite: CSD 712 or concurrent enrollment.

Functionally-oriented course designed to complement students' concurrent clinical externships in educational and healthcare settings. Issues include, but are not limited to, in-depth discussion and analysis of relevant local, state, and national policies and procedures for ethical and effective evidence-based service delivery; models of collaborative team assessment and treatment applicable to a variety of practice settings; and recognition of potential external influences that may impact treatment objectives and length of intervention.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

CSD 792 Independent Study

Prerequisite: permission.

Study may be a reading project or a practical application of theories. May be repeated to a maximum of 4 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CSD 794 Orientation to Clinic Speech Pathology

Prerequisite: CSD 712 or concurrent enrollment.

Preparation for practicum work in speech pathology. Clinic procedures, observation guidelines, documentation requirements, shadowing of practicing clinicians, development of integration of knowledge and skills in speech pathology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring, Summer

CSD 795 Advanced Clinical Practice

Prerequisite: admission to graduate program in Department of Communication Sciences and Disorders.

Training in audiology, speech and language disorders, and education of the deaf and hard of hearing in clinical, hospital, school, and/or other settings. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

CSD 796 Supervised Teaching

Prerequisite: admission to Education of Deaf and Hard of Hearing graduate program or graduate certificate.

The assumption of teaching responsibilities at an approved practicum site under the direction of a University CED certified supervisor and practicum site instructor. Students enrolled in this course may be required to have a physical examination, including a TB test before placement in the practicum setting.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
8			Upon demand

CSD 797 Speech-Language Pathology Externship

Prerequisite: CSD 712 or concurrent enrollment.

Professionally supervised practice in speech-language assessment and intervention in clinical, hospital, school, and/or other settings. Students enrolled in this course may be required to have a TB test, immunizations, and malpractice insurance. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring, Summer

CSD 799 Masters Thesis

Prerequisite: admission to graduate program in Department of Communication Sciences and Disorders.

In-depth research culminating in a presentation and defense of the thesis. Syllabi with specific expectations will be developed for each semester. SLP Emphasis: Students register for 2 credit hours per semester for a minimum of 3 semesters; may be repeated. DHH Emphasis: Students register for 3 credit hours per semester for a minimum of 2 semesters; may be repeated. Students must be registered for at least one credit hour until the thesis has been approved.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

CSD 800 Research Methods in Audiology

Prerequisite: CSD 807 or concurrent enrollment.

This course will outline the research process in audiology beginning from proposing a research question to drawing and disseminating conclusions. Special emphasis will be placed on conducting clinical research and evaluating published research findings in audiology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 807 Auditory System: Physiology/Neurophysiology

Prerequisite: admission to Doctor of Audiology program.

This course describes in depth aspects of the peripheral and central auditory system as it pertains to anatomy and physiology. Students learn about the functional development of the human auditory system as well as comparative anatomy. The peripheral anatomy will include external (pinna, canal, and tympanic membrane), middle (ossicular mechanism, eustachian tube, facial nerve) and cochlear structures (microanatomy, ultrastructures, sensory epithelium, cochlear fluids, vascular system). The central anatomy will include the cochlear nerve, neural transmission, afferent and efferent pathways (brainstem and midbrain) and cortical function.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSD 834 Diagnostic Audiology I

Prerequisite: admission to Doctor of Audiology program.

A comprehensive study of a variety of site of lesion tests. The course will cover acoustic immittance and reflectance measures including tympanometry and acoustic reflex measures for detection of middle ear

disorders and site of lesions in the auditory pathway. Other site of lesion tests include threshold and suprathreshold tone decay, loudness recruitment, loudness balance. Short Increment Sensitivity Index, Bekesy tests and brief tone audiometry. Tests for detection of nonorganic hearing loss will also be discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 835 Auditory Electrophysiology I

Prerequisite: CSD 807 or concurrent enrollment.

This course introduces the electrophysiological auditory responses with a focus on the inner ear responses. The course discusses the different types of otoacoustic emissions (OAEs) and the cochlear potentials of the Electrocochleography test (cochlear microphonics [CM] and summing potentials [SP]) in detail. Students will learn how to record, analyze and interpret OAEs, CM and SP. Students will, also, learn screening and diagnostic applications of electrophysiological responses in a variety of auditory pathologies. Several academic disciplines contribute to the material covered, including: physiology, anatomy, and pathology. Topics extend to the auditory efferent system, ototoxicity monitoring, neonatal hearing screening, noise induced hearing loss, and beyond.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 840 Speech Pathology for the Audiologist

Prerequisite: CSD 807 or concurrent enrollment.

In-depth discussion of normal and disordered speech and language development, with emphasis on hearing loss and its effect on speech and language. Central auditory processing disorders, adult communication disorders, and proper evaluation and referral processes for speech and language also discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSD 842 Vestibular Assessment and Rehabilitation

Prerequisite: CSD 807 or concurrent enrollment.

An examination of the physiological aspects of the vestibular system, chemical effects on the vestibular system, medical and chemical treatment methods, balance system assessment, assessment of the efficacy of intervention, and anatomy, neuroanatomy, and physiology of the pertinent sections of the auditory system (peripheral and central) will be covered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Fall

CSD 844 Auditory Electrophysiology II

Prerequisite: CSD 807 or concurrent enrollment.

A look at various techniques and theories behind electrodiagnostic testing procedures. Advanced study of auditory evoked responses applied in audiology. Anatomy, neuroanatomy, and physiology of the pertinent sections of the auditory system (peripheral and central) will be covered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 846 Instrumentation and Calibration

Prerequisite: CSD 807 or concurrent enrollment.

Detailed investigation into instrumentation and calibration and its importance in the field of Audiology. Emphasis on bioelectrical hazards, physical characteristics and measurement of acoustic, electric, and other non-acoustic stimuli, determination of calibration in relation to accepted standards, and use of various types of instrumentation according to manufacturer's specifications and recommendations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

CSD 848 Cochlear Implants and Other Assistive Listening Devices

Prerequisite: CSD 807 or concurrent enrollment.

This course provides an investigation into the various types of cochlear implants and an understanding of the anatomical and psychological aspects, including controversies surrounding implantation of children. Emphasis will include intervention and therapy techniques for children and adults with cochlear implants and other alternative listening devices.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

CSD 849 Basic Audiometry

Prerequisite: CSD 807 or concurrent enrollment.

This course describes aspects of basic diagnostic testing in clinical audiology. Students learn about basic diagnostic test procedures including air-conduction and bone-conduction threshold testing, speech audiometric test procedures and clinical masking procedures.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 850 Pediatric Audiology

Prerequisite: CSD 807 or concurrent enrollment.

Overview of auditory development. Presentation of auditory disorders, audiological assessment, and treatment needs specific to infants and children. Emphasis on parent-child interactions and family dynamics in habilitating hearing-impaired children. Relevant calibration and instrumentation issues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

CSD 852 Advanced Hearing Science

Prerequisite: admission to Doctor of Audiology program.

Acoustics and physical measures involving the properties of sound as well as psychoacoustics and sound perception.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 866 Counseling in Audiology

Prerequisite: admission to Doctor of Audiology program.

Various counseling strategies used in clinical audiology practice will be discussed. Counseling needs of adults with hearing loss and families of children with hearing loss will be reviewed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

CSD 868 Amplification Systems I

Prerequisite: CSD 807 or concurrent enrollment.

Current concepts in amplification and assistive listening devices. Evaluation, selection, and fitting of prosthetic devices for the hearing impaired. Relevant calibration and instrumentation issues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

CSD 870 Clinical Audiology II

Prerequisite: CSD 807 or concurrent enrollment.

Theory and practice of electrophysiological testing for the auditory and vestibular systems. Relevant calibration and instrumentation issues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

CSD 871 Amplification Systems II

Prerequisite: CSD 807 or concurrent enrollment.

Coverage of recent developments in remediation of communication disorders related to hearing loss in adults and children.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 873 Educational Audiology

Prerequisite: CSD 807 or concurrent enrollment.

This course includes information and strategies students need to work in today's inclusive school environment, functioning as part of a collaborative team, helping develop IFSPs, IEPs and ITPs, supervising audiological screening and conservation programs. It will prepare students to perform the various roles of the educational audiologist, clinician, community liaison service coordinator, supervisor, and advocate. Issues that affect learners with hearing impairment across the lifespan (infant toddlers, elementary and high school students, and college and adult learners) and various regulations related to the delivery of effective educational services (e.g., ADA, IDEA) will be discussed. This course will also include information on the evaluation of, and referral process for, speech and language disorders related to hearing loss.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSD 874 Clinical Audiology III

Prerequisite: CSD 807 or concurrent enrollment.

Discussion of recent advances in audiology and hearing science research which have potential clinical application.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSD 875 Medical Audiology

Prerequisite: CSD 807 or concurrent enrollment.

Detailed analysis of the etiology and assessment of common pathologies of the auditory system. Medical intervention and audiologic test battery interpretation discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 876 Hearing Conservation and Calibration

Prerequisite: CSD 807 or concurrent enrollment.

This course will prepare the audiologist to meet industrial needs for sound measurement and hearing conservation. Government standards will be reviewed and applied to industrial settings that fall under OSHA guidelines for hearing conservation. This will include the anatomical and physiological effects of noise on humans; federal standards and damage-risk criteria, the susceptibility and predisposing factors related to

industrial noise as well as conducting and reporting a noise survey with a hearing conservation plan. The course will also cover calibration of audiometers and the use of ANSI standards.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

CSD 878 Professional Issues in Audiology

Prerequisite: admission to Doctor of Audiology program.

Investigation into current professional issues and ethics in the field of audiology will be covered. Topics will include laws, ethics, current issues, regulations and policies. Emphasis on discussing topics as they relate to the three pillars of Missouri State University's public affairs mission: community engagement, cultural competence, and ethical leadership.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Spring

CSD 879 Practice Management in Audiology

This course will provide an introduction to audiology practice management. Emphasis is placed on private and clinical practice. Development of a business proposal, relevant laws, current issues, regulations, policies, management and marketing of practices, record maintenance and technology and social media in the workplace will be covered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSD 880 Grand Rounds in Audiology

Prerequisite: CSD 807 or concurrent enrollment.

Describes in-depth aspects of audiological evaluation, diagnosis and management of routine and complex cases. The course will review cases in which behavioral, electrophysiologic, central, and vestibular testing are necessary to allow differential diagnosis. Each case study will involve the progression of the disorder and audiological/medical manifestations that occur during this period. Discussion involving strategies for (re)habilitation, remediation and management of each auditory disorder will be examined. The latter may include amplification, central auditory processing, counseling and tinnitus management. Case presentations will be obtained from audiology, otology, and neurology journals, text and personal cases. In addition, with respect to aural (re)habilitation, presentations will be made on current trends in amplification management regarding manufacturers' products and their applicability to specific cases. Must be repeated to a minimum of 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Summer

CSD 884 Doctoral Project

Prerequisite: CSD 807 or concurrent enrollment.

In-depth study in an area of Audiology, culminating in a presentation of an extensive scholarly paper. Must be repeated for a minimum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

CSD 895 Advanced Clinical Practice

Prerequisite: CSD 807 or concurrent enrollment.

Training in audiology, speech and language disorders, and education of the deaf and hard of hearing in clinical, hospital, school, and/or other settings. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

CSD 900 Professional Preparation for Externship

This course will guide students through the process of obtaining a fourth year externship. Construction of a cover letter, professional resume and interview techniques will be covered. In addition, requirements of the 4th year externship and professional licensure and certification after graduation will be covered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

CSD 945 Central Auditory Processing Disorders

Prerequisite: CSD 807 or concurrent enrollment.

This course describes various aspects of central auditory processing and disorders. Students learn about the underlying processes of auditory processing in the central nervous system. They are provided with a review of

several evaluation and remediation approaches used in the management of individuals with central auditory disorders.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSD 972 Advanced Auditory Re/Habilitation

Prerequisite: CSD 807 or concurrent enrollment.

Course will include detailed investigation into clinical assessment, treatment techniques, and evaluation of auditory re/habilitation and discussion of the theories and research of language development in individuals with both normal and impaired hearing. Implications for intervention are reviewed and discussed. Various counseling strategies for both adults with hearing loss and families of children with hearing loss will be discussed as they relate to case management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

CSD 996 Audiology Externship

Prerequisite: CSD 807 or concurrent enrollment.

Professionally supervised practice in auditory assessment and intervention in clinical, hospital, school, and/or other settings. Students enrolled in this course may be required to have a TB test, immunizations, and malpractice insurance. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-9			Fall, Spring, Summer

CSD 999 Doctoral Thesis

Prerequisite: CSD 807 or concurrent enrollment.

In-depth research in an area of Audiology, culminating in a presentation and defense of the thesis. Must be repeated for a minimum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

Undergraduate Catalog

Communication Sciences and Disorders

Major(s)

Communication Sciences and Disorders (Comprehensive)

Bachelor of Science

Admission Requirements

1. Attainment of at least a 3.00 GPA (based on a 4.00 scale). For students with transfer credit, a combined GPA of at least a 3.00 must be achieved for all transfer coursework plus all coursework attempted at Missouri State.
2. Completion of at least 50 semester hours including the following General Education courses with grades of "C" or better. Select from the courses below to be eligible for consideration for admission to the major. Students pursuing the accelerated Doctor of Audiology degree have different requirements than other students. Contact your advisor to determine eligibility to pursue the accelerated Doctor of Audiology degree. Course options were selected to fulfill Knowledge and Skills in Communication Sciences and Disorders (CSD). Contact your advisor to determine any available course substitutions.
 - a. Chemistry and/or Physics*
 - i. Students pursuing the accelerated Doctor of Audiology degree must complete a chemistry course and a physics course selected from [CHM 116\(4\)](#) and [117\(1\)](#) or [CHM 160\(4\)](#) and [161\(1\)](#); and [PHY 100\(4\)](#) or [PHY 123\(4\)](#) or [PHY 203\(5\)](#).
 - ii. All other students select one course from [CHM 107\(3\)](#), [CHM 116\(4\)](#), [PHY 100\(4\)](#), [PHY 203\(5\)](#). Higher level CHM or PHY courses may be considered.
 - b. Biology*
 - i. Students pursuing the accelerated Doctor of Audiology degree must complete [BIO 121\(4\)](#) or [BMS 110\(3\)](#) and [111\(1\)](#).

- ii. All other students select one course from [BIO 101\(3\)](#), [BIO 121\(4\)](#), or [BMS 100\(3\)](#) and [101\(1\)](#) or [BMS 110\(3\)](#) and [111\(1\)](#). Higher level BIO courses may be considered.
- c. College level mathematics course
 - i. Students in the SLP or Audiology option (both accelerated and traditional) must select from MTH 135, 138, 261, or 287. Higher level MTH courses may be considered.
 - ii. Students in the EDHH option may select any course that meets the General Education Focus on Quantitative Literacy requirement.
- d. Complete the Knowledge of Human Cultures section of the General Education Program (12 hours).

*For students pursuing the accelerated Doctor of Audiology degree, at least two of the three required science courses must include a laboratory component. For all other students, at least one of the science courses must include a laboratory component.

Major requirements (48-55)

Within the General Education Knowledge of the Natural World requirement, students pursuing the accelerated Doctor of Audiology degree must complete a biology course, a chemistry course, and a physics course as described in the Admission section. Two of the three courses must include a laboratory component.

All other students must complete a biology course and a chemistry or physics course as described in the Admission section. One of the courses must include a laboratory component.

In addition, all students must complete a statistics course.

This major does not require completion of a minor. Students should consult with their advisor to determine which program option is best for them.

Major core (29-30 hours):

1. [CSD 312\(3\)](#), [321\(3\)](#), [360\(3\)](#), [370\(3\)](#); [CSD 380\(3\)](#) or SLP students substitute [388\(3\)](#); [CSD 400\(3\)](#); [CSD 495\(2\)](#) and [496\(2\)](#) or EDHH students substitute [CSD 497\(3\)](#); [CSD 572\(3\)](#); [PSY 121\(3\)](#); [PSY 200\(3\)](#).
2. Public Affairs Capstone Experience will be fulfilled by completion of [CSD 572\(3\)](#) or [CSD 497\(3\)](#).

Complete one the following options:

Audiology option (20 hours):

1. [ENG 296\(3\)](#) or [CSD 209\(3\)](#); [CSD 210\(2\)](#), [315\(3\)](#), [318\(3\)](#), [319\(3\)](#), [522\(3\)](#), [562\(3\)](#).
2. For students pursuing the accelerated Doctor of Audiology degree, CSD 496(2) will be repeated for a total of 4 hours. Additionally, ENG 296 and CSD 318 will be waived; CSD 807(3), 849(3), 852(3), and 878(3) will be taken as mixed credit; and CSD 868(3) and 895(1) will be taken as senior permission. Students wishing to pursue the accelerated Doctor of Audiology degree must apply to the program in the spring of the junior year.

Education of Deaf and Hard of Hearing option (18 hours):

1. [EDC 345\(3\)](#); [SPE 310\(3\)](#); [CSD 322\(3\)](#), [330\(3\)](#), [331\(3\)](#), [562\(3\)](#).
2. This option does not prepare students for teacher certification or entry into the accelerated master's program. EDHH students pursuing a career as a certified teacher of the deaf and hard of hearing should apply to the accelerated master's program in the spring of their junior year. Students admitted to the

accelerated program take the following courses for undergraduate and graduate credit (mixed credit): [CSD 760\(3\)](#), [762\(3\)](#), [763\(3\)](#), [795\(3\)](#). See certification requirements below for more information.

Speech-Language Pathology option (26 hours):

1. [CSD 209\(3\)](#), [210\(2\)](#), [315\(3\)](#), [316\(3\)](#), [318\(3\)](#), [319\(3\)](#), [417\(3\)](#), [482\(3\)](#), [522\(3\)](#).

GPA and grade requirements:

1. All students must attain a cumulative GPA of at least 3.00 in the CSD major to graduate from the program.
2. CSD courses cannot be taken on a Pass/Not basis.
3. Courses in the major cannot be taken more than twice.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Certification Requirements for Deaf and Hard of Hearing

Contact advisor or department head for the requirements and coursework required to meet state and national certification requirements. Students must complete specific coursework through the [Teacher Education Program](#) ([/Registrar/Catalog/teacher-certification-teacher-education-secondary-ed.htm](#)) and meet the following requirements to be recommended for state certification.

1. Successfully complete all practicum requirements with a grade of "B" or better.
2. Successfully complete the graduate degree in Communication Sciences and Disorders with option in the Deaf and Hard of Hearing.
3. Successfully complete the state approved exit assessments.
4. Complete all state certification requirements in effect at the time a recommendation is made.

Accelerated graduate program in Communication Sciences and Disorders/Education of Deaf and Hard of Hearing

Eligible Missouri State undergraduate students may apply for admission to the Communication Sciences and Disorders/Education of Deaf and Hard of Hearing program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](#) (<https://graduate.missouristate.edu/Catalog/prog-communication-sciences-and-disorders-EDHH.htm>) for specific admission requirements.

Accelerated graduate program in Audiology

Eligible Missouri State undergraduate students may apply for admission to the Doctor of Audiology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](#) (<https://graduate.missouristate.edu/Catalog/prog-audiology.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(/Registrar/mixedcredit.htm\)](https://Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

General information

Kinesiology/service courses

KIN 101-149 are available as electives for students for the purpose of providing a means to maintain and/or improve physical well-being.

Radiography (RAD) courses

These courses are specifically designed to provide the basis for professional training in Radiography. Enrollment in any of these courses is contingent on acceptance of the student by the School of Radiologic Technology. The emphasis in all cases is towards applicability to Radiography. These courses are credited only on the Bachelor of Science degree in Radiography.

Respiratory Therapy (RTH) courses

These courses are not offered at Missouri State University and are treated as transfer courses.

Undergraduate Catalog

Kinesiology Courses

Kinesiology (KIN) courses

KIN 101 Beginning Swimming

Designed to teach novice swimmer basic swimming skills.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

KIN 102 Intermediate Swimming

Prerequisite: KIN 101 or demonstrate swimming skill first day of class; first aid and CPR certification.

Review of basic strokes. Instruction in competitive strokes. Basic diving instruction. May be taken twice for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Summer

KIN 103 Lifesaving

Prerequisite: KIN 102 or demonstrate swimming skill first day of class, first aid and CPR certification.

Development of personal safety skills and techniques of aquatic rescue for lifeguarding; certification in American Red Cross Life Guard Training may be obtained.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

KIN 104 Water Safety Instruction

Prerequisite: KIN 103 and permission of instructor.

Prepares the student for complete American Red Cross Water Safety Instruction Certificate.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring

KIN 105 Alpine Skiing

Prerequisite: permission of instructor.

Fundamental skills of alpine skiing; required Student Union ski trip for the purpose of instruction and practice on snow.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall

KIN 106 Sailing

Prerequisite: demonstrate swimming skill first day of class.

Development of skills and knowledge of sailing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 107 Intermediate Sailing

Prerequisite: KIN 106 or comparable skill and swimming skills.

The course includes a refinement of basic skills and discussion of sailing theory and sailboat racing tactics. May be repeated to a maximum of 2 hours credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 109 Cycling

Cycling as a means of transportation, leisure activity, and fitness medium. Emphasis placed on safety, bikepacking, and cycle maintenance. Student must furnish a bicycle (ten-speed recommended). Field trips required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

KIN 110 Backpacking

Backpacking as a lifetime leisure activity. Emphasis on equipment, safety, techniques, and trip planning. Field trips required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

KIN 111 Beginning Badminton

Fundamentals of grip, stance, footwork and badminton strokes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 112 Beginning Handball

Rules, techniques and strategy of four wall handball.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 113 Beginning Racquetball

Fundamental skills, rules, techniques and strategy of racquetball.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 114 Canoeing

Prerequisite: demonstrate swimming skill first day of class.

River canoeing as a lifetime leisure activity. Emphasis on safety, techniques, trip planning, and equipment. Field trips required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

KIN 118 Bowling

History, fundamental skills, techniques, terminology, rules, strategy and safety skills of bowling.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 120 Beginning Gymnastics

Emphasis on skill progressions in tumbling and vaulting with an introduction to apparatus and balance work. Principles of training, conditioning, and spotting included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 121 Intermediate to Advanced Gymnastics

Prerequisite: KIN 120.

Emphasis on skill progressions for the Olympic events. Principles of training, conditioning, and spotting are included. May be repeated for a maximum of 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 122 Fencing

History, fundamental skills, techniques, terminology, nomenclature, rules, strategy and safety skills of fencing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 123 Intermediate Fencing

Prerequisite: KIN 122.

Advanced compound offenses and defenses; detailed work on competitive techniques. May be taken twice for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 124 Techniques and Principles of Hunting and Fishing

Skills and safety factors of hunting and fishing; Missouri hunting, fishing, and conservation laws and principles upon which these laws are founded.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 125 Aerobic Dance

Aerobic Dance is an exercise program of choreographed routines involving continuous rhythmic activity. The combination of motor skills, jogging, dancing, and vigorous exercise are set to music in a motivational manner. The routines are designed to be simple enough for all individuals to be successful as they move toward cardiovascular fitness.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 126 Folk and Square Dance

Understanding folk and square dance skills, directional patterns, structure.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 127 Weight Training

Scientifically founded isotonic and isometric weight training programs; development of cardiovascular and muscular endurance, strength and flexibility.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 128 Western Square Dance

Review of the 50 basics and introduction to the 25 extended basic skills and patterns of Western Square Dance.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

KIN 130 Adapted Physical Activity

Prerequisite: physician's approval.

Adapted physical activity to meet the needs of students with disabilities and other physical limitations. May be repeated for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 133 Volleyball

Basic skills of power volleyball.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

KIN 135 Selected Activities

A variable content course designed to develop lifetime skills in sports, fitness, and/or leisure activities. Activities selected will vary according to demand. Course may be repeated any number of times provided the same activity is not retaken.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

KIN 136 Ballroom Dance

Ballroom dances: technique, lead and style.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 138 Archery

Cultural aspects of archery throughout history; target archery, field archery, bowhunting and bowfishing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 143 Beginning Tennis

Fundamental tennis skills and mechanical principles. Rules, courtesies and etiquette.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 144 Intermediate Tennis

Prerequisite: KIN 143.

Instruction in intermediate and advanced elements of strokes and strategy used in singles and doubles. May be taken twice for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 145 Beginning Golf

Choice and use of clubs, form to be used, rules and courtesies of golf.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 146 Intermediate Golf

Prerequisite: KIN 145.

Correction of errors in basic strokes with all clubs. Application of mechanical principles. Instruction concerning strategy used on different golf courses in variable weather. May be taken twice for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 147 Beginning Judo

Fundamental falling (ukemi), holding techniques (Katamewaza), basic mat and free exercises (mat randori), and history of judo.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 148 Intermediate Judo

Prerequisite: KIN 147 or Brown or Black Belt Ranking.

Basic throwing techniques of judo; all mat techniques required for third degree brown belt status (sankyu). May be taken twice for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring

KIN 149 Self Defense

Prerequisite: KIN 147.

Introduction to self-defense techniques including combative and defensive stances and position, taisabaki movement, parries, counterattack movement, hold releases, attack techniques, and ground defense.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 200 Foundations of Education and Physical Education

Prerequisite: KIN 210; COM 115 with a "C" grade or better; and combined (Missouri State and transfer) GPA of 2.50 or better.

This course introduces the physical education major to the profession of education while focusing on the discipline of health and physical education in American education. It provides the prospective teacher/coach a knowledge base in the theoretical aspects of PK-12 education. Additionally, this course examines both the nature and history of the teaching profession, PK-12 school orientation, educational theories, and legal issues pertaining to the American educational institution. It also explores the nature of physical movement, as well as the breadth, scope, and significance of physical education and its role and relationship to the overall curriculum of the American public schools. Emphasis will be placed on professional competencies required for certification and professional development. This course also requires a twenty (20) hour observational experience, utilizing the Systematic Supervision Model, designed to explore professional teaching qualifications, cultural diversity, student needs, and school orientation with emphasis on training educators as reflective-decision makers. This observational experience will include both on-campus and approved PK-12 off-campus placement sites. As a portion of the course grade students will be required to satisfy the first checkpoint of the artifact development as required for the Professional Preparation Portfolio. A grade of "C" or better is required in this course for graduation. For students who have not earned a composite score or superscore of 20 or better on the ACT, the

Missouri State Board of Education entry examination must be taken during enrollment in this course. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

KIN 210 Healthy Lifestyles: Preventive Approaches

Prerequisite: 12 hours.

General Education Course (Focus on Public Issues).

This course introduces conceptual and practical information relating to the impact of lifestyle choices on the health and wellness of the individual and society. Students in this course study a variety of fitness-wellness topics while initially and summatively garnering personal fitness-wellness data in both academic and laboratory settings. Collected data are synthesized and critically appraised, resulting in the construction of individualized fitness-wellness programs implemented and periodically re-evaluated over the course of the semester via reflective journal writing; and periodic quizzes and examinations that tie lecture theories to laboratory practices in critical thinking-peer teaching contexts. Laboratory activities help the individual discover his/her needs for achieving and maintaining high level wellness.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

KIN 212 Introduction to Exercise Science

Orientation for students interested in exercise science. Various professional options will be discussed and research methodology in the field will be explored through applied examples. Exercise and Movement Science majors are required to earn a grade of "C" or better in this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

KIN 218 Organization and Administration of Intramurals

Prerequisite: 30 hours.

Organization and administration of an effective program of intramural activities for secondary and college levels.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

KIN 234 Sports Officiating

Procedures and requirements for registration as a Missouri State High School Activities Association (MSHSAA) Sports Official. Ethical standards and development of a philosophy for an official. Knowledge, rules and basic skills for officiating basketball, football, baseball, softball, track and field, volleyball, and wrestling. Students select a practicum experience in at least one sport.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	1	Fall, Spring

KIN 240 Creative Dance and Exploratory Activities for Children

Creative activities for movement and dance necessary for the physical development of elementary school students.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall, Spring

KIN 250 Applied Human Anatomy

Prerequisite: BIO 101 and 111, or BIO 121, or BMS 110 and 111.

Study of the structure of the human body with emphasis on the organ systems operational in effecting human movement. Integrating structural and biomechanical aspects of movement; focusing on functional anatomy using a systematic approach. A grade of "C" or better is required in this course in order to take KIN 360.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

KIN 252 Applied Human Physiology

Prerequisite: CHM 116 or CHM 160; and BMS 307 or a grade of "C" or better in KIN 250.

Study of the function and responses of each organ system in the body. Emphasis is directed toward a process of examining functional concepts requisite to critical assessment and description of human movement, exercise, sport and wellness. A grade of "C" or better is required in this course in order to take KIN 362.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

KIN 253 First Aid

First aid and civil defense knowledge; procedures in times of emergency, sickness, wounds, shock, poisoning, fractures, unconsciousness, stoppage of breathing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

KIN 256 Community Health

School, community, state, national and international health programs; their relationship to the student; major communicable and non-communicable diseases and community health.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

KIN 257 Personal Health

Health problems; factors that contribute to development and maintenance of health for the individual living in a contemporary, automated society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

KIN 260 Outdoor Leisure Education

Introduction to outdoor leisure skills. Selected outdoor education activities, e.g. orienteering, hiking, etc. Field trips required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall, Spring

KIN 261 Wrestling Techniques

Fundamental wrestling skills necessary for demonstration purposes in teaching-coaching situations. Recommended for men only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall

KIN 264 Team Sports

Fundamental skills and techniques of basketball, field hockey, soccer/speedball, softball and volleyball; emphasis on demonstration in teaching-coaching situations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall, Spring

KIN 270 Recreational and Aerobic Dance Techniques

Fundamental skills in folk, square, social, and aerobic dance necessary for demonstration purposes in teaching situations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 273 Aquatics

Prerequisite: demonstrate swimming skill first day of classes.

Emphasis on stroke mechanics for swimming and basic diving. Development of the skills necessary to demonstrate in teaching-coaching situations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 277 Individual and Dual Sports

Fundamental skills and techniques of golf, racket sports, track and field, and tumbling/apparatus; emphasis on demonstration in teaching-coaching situations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall, Spring

KIN 281 The Athlete's Diet

Instruction on the current research and concepts on diet and exercise performance, body weight and composition, fluid and electrolyte balance during exercise, and selected topics on proposed dietary ergogenic aids.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

KIN 282 Sports Conditioning

Instruction on the theory and practical aspects of designing and evaluating training and conditioning programs for competitive athletes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

KIN 286 Ethics and Diversity in American Sport

Prerequisite: 12 hours.

General Education Course (Focus on Public Issues).

This course introduces students to the current and pervasive ethical and diversity issues present in contemporary American sport. Particular attention is given to the practical application of decision-making processes and to the development of sensitivity to divergent views of ethical and diversity issues in sport settings (e.g., cheating, race, gender, disability, youth sport, ethical leadership.)

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 297 Special Topics

Special study of physical education or leisure skills. Variable content and variable credit course. May be repeated for credit to a maximum of 4 credit hours. Same topic may be repeated once for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

KIN 300 Teaching and Coaching Volleyball

Prerequisite: 60 hours.

Analysis of volleyball skills. Strengths and weaknesses of various offensive and defensive systems. Development of coaching and game plays, discussion of strategies, screening and selection of player personnel.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 301 Teaching and Coaching Football

Prerequisite: 60 hours.

Analysis of football skills. Offensive and defensive systems applicable to varying skill levels. Analysis of game strategy, scouting, yearly organization. Training, recruiting and organization of coaching personnel and daily coaching plans.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 302 Teaching and Coaching Basketball

Prerequisite: 60 hours.

Analysis of basketball Skills. Factors which compose the game of basketball; analysis of varying offenses and defenses used in competition. Team selection, development and organization.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 303 Teaching and Coaching Track and Field

Prerequisite: 60 hours.

Analysis of track and field skills. Organization and development of a track and field team. Preparation and selection of athletes for competition. Practical application of meet management techniques.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 304 Teaching and Coaching Baseball

Prerequisite: 60 hours.

Analysis of baseball skills. Development of a baseball team, selection of players by position, team drills, offensive and defensive strategies, scouting, management of players.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 305 Teaching and Coaching Softball

Prerequisite: 60 hours.

Analysis of softball skills. Development of competitive softball team, player selection by position, team drills, offensive and defensive strategies, scouting and player management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

KIN 310 Philosophical and Historical Issues in Physical Education, Recreation and Sport

Prerequisite: ENG 110 and KIN 200 or REC 152; and 45 hours.

A writing intensive course focusing on the synthesis or philosophical and historically relevant material emanating from contemporary problems in physical education, recreation and sport. Writing tasks will involve the use of extensive research and critical analysis of major issues in the fields of physical education and recreation to bridge the gap between theory and practice. Areas of coverage will vary with the instructor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 335 Organization and Administration of Physical Education and Sport

Prerequisite: 60 hours.

Organizational procedures and management principles of sport and physical education programs. Directed coaching experience on campus and in the middle/secondary school setting is required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall, Spring

KIN 341 Physical Education for Elementary Teachers

Prerequisite: KIN 210.

Games, rhythms, material and methods utilized by elementary school classroom teachers to teach physical education.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

KIN 350 Health and Wellness Promotion

Principles and objectives of health and wellness promotion. Critical issues in health and wellness. The structure, function, and contribution of public, private, and voluntary agencies involved in health and wellness promotion. Individual and group factors related to the promotion, maintenance, and restoration of health. Exercise and Movement Science majors are required to earn a grade of "C" or better in this course. A grade of "C" or better is required in this course in order to take KIN 550.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 358 Health Education Methods

Methods, materials and resources for preparation, development and implementation of an effective school Health Education program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 359 Introduction to Biomechanics

Prerequisite: 30 hours and KIN 250 or permission.

Biomechanical concepts and principles related to fundamental movement skills, rhythmic activities, sport, and recreational pursuits in K-12 physical education settings. Application through movement analysis technology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 360 Kinesiology

Prerequisite: BMS 307 or grade of "C" or better in KIN 250.

Mechanics of sports and related activities; principles of motion, body movements, muscle action and joint mechanics in relation to human movement. Principles of anatomic and biomechanical analysis. A grade of "C" or better is required in this course in order to take KIN 468. A maximum of 4 credit hours will be granted for KIN 359 and KIN 360.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

KIN 361 Principles of Motor Learning in Physical Education

Prerequisite: BMS 307 or grade of "C" or better in KIN 250; and BMS 308 or grade of "C" or better in KIN 252.

Process by which motor skills are learned; individual variables which affect acquisition of motor skills; techniques of improving motor performance. Exercise and Movement Science majors and Physical Education majors are required to earn a grade of "C" or better in this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

KIN 362 Exercise Physiology

Prerequisite: BMS 308 or grade of "C" or better in KIN 252.

Physiologic effects of muscular activity under different intensities, durations and environments on the human organism. A grade of "C" or better is required in this course in order to take KIN 465, 468, 569 and BMS 563. Cannot not be taken Pass/Not Pass. Cannot receive credit for both KIN 362 and KIN 366.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

KIN 366 Exercise Physiology

Prerequisite: BMS 308 or grade of "C" or better in KIN 252.

Same course as KIN 362 except it does not include a laboratory component. Course counts on a coaching minor only and cannot count toward a physical education major. Cannot receive credit for both KIN 362 and KIN 366.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 370 Introduction to Safety Education

General safety education in the instruction program of elementary and secondary schools; accident causes and remedial action.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

KIN 371 Driver Task Analysis

Prerequisite: valid operator's license.

Prepares student to teach driver education in secondary school. Methods, lesson planning, psychophysical testing and driver education materials presented. Each student instructs one individual to operate an automobile.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

KIN 372 Developing Vehicle Operation Skills and Competencies

Prerequisite: KIN 371.

Acquaints the prospective driver education teacher with problems of automotive and traffic safety.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

KIN 373 Developing Classroom Knowledge

Prerequisite: KIN 371 and KIN 372.

Course provides students the opportunity to do an action research project with regard to knowledge and skills necessary to provide quality classroom instruction. successfully manage the on-street activities and provide for appropriate student evaluation. This course should be viewed as the culmination of the Driver Education endorsement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

KIN 386 Social Basis of Physical Activity and Sport

Prerequisite: 60 hours.

Study of the growth and development of physical education, athletics and sports organization and their effect on participants, spectators, and communities in America since 1875.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 392 Coaching Practicum

Prerequisite: permission of instructor.

Students should have completed coursework or concentrated experience in an area selected for practicum. A practical experience which students can relate to coaching theory. The students are assigned to participate in coaching related activities on or off campus in the secondary schools for exposure to coaching philosophies, organization, methods and procedures for preparing athletes and athletic teams for competition. May be taken twice for credit. 1(0-2) or

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall, Spring

KIN 400 Movement to Enhance Cognition: Elementary Physical Education for Elementary Teachers

Prerequisite: concurrent enrollment in ELE 500 for 4 hours.

Games, rhythms, materials, and methods utilized by elementary school classroom teachers to teach physical education and integrate kinesthetic movement into classroom instruction.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring, Summer

KIN 402 Women In Sport

Prerequisite: 60 hours.

A survey of the role of women in sport and how they have developed to present status. Topics to be covered include women in the history of sport: athletic injury specific to women, care and prevention: physiology of the woman athlete and sport psychology for the woman athlete.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

KIN 405 Gender and Sport

An examination of sport as a major institutional locus for the historical and contemporary construction of gender relations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

KIN 411 Teaching of Secondary Physical Education

Prerequisite: KIN 264 and KIN 270 and KIN 273 and KIN 277 and KIN 360; and at least "C" grades in KIN 431 and KIN 440; and admitted to teacher education program; and combined (Missouri State and transfer) GPA of 2.75 or higher; and earned a composite

score or superscore of 20 or better on the ACT or passed all sections of the Missouri State Board of Education entry examination.

Exploration of various teaching methods and selection of activities as they apply to secondary physical education. Unit planning, lesson planning and micro teaching of physical education activities. Second portfolio checkpoint and participation in clinical/field experiences in area secondary schools is required. A grade of "C" or better is required in this course in order to take KIN 493 or KIN 496. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

KIN 430 History and Philosophy of Physical Education

Prerequisite: KIN 200 and 75 hours.

Synthesis of historically relevant material emanating from contemporary problems in physical education and Sport. Use of critical analysis of physical education concepts in teaching to bridge the gap between theory and practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 431 Teaching K-4 Physical Education

Prerequisite: KIN 240 and KIN 264 and KIN 270; and admitted to Teacher Education Program; and combined (Missouri State and transfer) GPA of 2.75 or higher; and earned a composite score or superscore of 20 or better on the ACT or passed all sections of the Missouri State Board of Education entry examination.

Emphasis on current teaching methods, management skills, and curriculum development for teaching physical education to K-4 students. An on-campus lecture/lab and participation in clinical/field experiences in the area elementary schools. A grade of "C" or better is required in this course in order to take KIN 493 or KIN 496. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

KIN 440 Middle School (5-9) Physical Education

Prerequisite: KIN 240 and KIN 264 and KIN 270 and KIN 360; and admitted to Teacher Education Program; and combined (Missouri State and transfer) GPA of 2.75 or higher; and earned a composite score or superscore of 20 or better on the ACT or passed all sections of the Missouri State Board of Education entry examination.

Emphasis on current teaching methods, management skills, and curriculum development for teaching physical education in the middle school (5-9). An on campus lecture/lab and clinical/field experiences in area middle

schools. A grade of "C" or better is required in this course in order to take KIN 493 or KIN 496. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

KIN 445 Teaching of Middle and Secondary Physical Education

Prerequisite: 70 hours; and KIN 200, 240, 250, 252, 261, 264, 270, 273, 277, and 360; and combined (Missouri State and transfer) GPA of 2.75 or higher; and earned a composite score or superscore of 20 or better on the ACT or passed all sections of the Missouri State Board of Education entry examination.

Course will include exploration of Mosston and Ashworth's teaching spectrum, teaching methods, and selection of activities. Emphasis will be placed on current teaching methodology, program content inclusive to MOSTEP and NASPE standards, scope and sequencing of physical activities, development of unit and lesson plans, and classroom management for middle and secondary school physical education. Also included will be discussions regarding legal issues and the attitudes and values surrounding middle and secondary education. Additional focus will be placed on curriculum development, implementation, and assessment of the curriculum process. To promote critical thinking and reflective decision making, a comprehensive field experience in both middle and secondary physical education settings is required. This course is credited only on the BS in Education degree. Students will be required to generate selected artifacts as required for completion of the Professional Preparation Portfolio. A grade of "C" or better is required in this course in order to enroll in KIN 493 or KIN 496. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall, Spring

KIN 465 Exercise Prescription: Strength and Conditioning

Prerequisite: "C" or better in KIN 362.

Physiology and biomechanics of strength training and conditioning. Topics include: testing and evaluation of athletics, resistance training techniques, training program design, and organization and administration of a strength training facility. This course is designed to prepare students to apply the skills needed to be a leader in strength and conditioning. Exercise and Movement Science majors are required to earn a grade of "C" or better in this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall, Spring

KIN 466 Physical Education for Intellectual Disabilities

Prerequisite: permission of instructor.

Identification and program development of physical activities for individuals with varying levels of intellectual disabilities. Laboratory is off campus.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

KIN 468 Adapted Physical Education

Prerequisite: grade of "C" or better in KIN 360 and in KIN 362; and cumulative GPA of 2.50 or better for EMS majors and a combined (Missouri State and transfer) GPA of 2.75 or higher for Physical Education majors.

Emphasizes nature and scope of physical, cognitive, and emotional disabilities; referral, placement, and programming in physical education; federal and state laws that pertain to the education and physical education of special populations; and instruction in the modification of motor and fitness activities, and therapeutic exercise. Three hours of directed practicum per week. Exercise and Movement Science majors are required to earn a grade of "C" or better in this course. A grade of "C" or better is required in this course in order to take KIN 493 or KIN 496. May be taught concurrently with KIN 668. Cannot receive credit for both KIN 468 and KIN 668.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall, Spring

KIN 485 Psychology of Sport and Physical Activity

Prerequisite: PSY 121.

Inquiry into the psychological implications of sport and physical activity participation in relation to motivation and behavior of the participant.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

KIN 490 Sports Practicum

Prerequisite: senior or graduate standing.

Short-term course updates physical educators in new developments within selected sport areas. Techniques of coaching and conditioning. May be repeated for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring

KIN 491 Field Experience

Prerequisite: 80 hours and permission.

Supervised experience or internship in a cooperative program with business, government, community, clinical, or related establishments in exercise science, health, or health promotion. Credit will be based on the length and scope of the field experience/internship. May be repeated for credit but no more than 12 hours will be credited toward a degree. Exercise and Movement Science majors are required to earn a grade of "C" or better in this course. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-12			Fall, Spring, Summer

KIN 493 Supervised Teaching (Secondary Physical Education)

Prerequisite: completion of all method courses in physical education; and a grade of "C" or better in all professional education courses; and current pre-professional liability insurance; and completion of portfolio checkpoints 1 and 2; and a combined (Missouri State and transfer) GPA of 2.75 or higher; and approval for supervised teaching; and concurrent enrollment in KIN 496.

Student observes then teaches physical education classes under the direction of the cooperating teacher and the university supervisor. Student participates in school-related activities appropriate to the assignment and attends all required meetings. In order to receive a grade in this course, the student's professional portfolio must meet or exceed final criteria. Course will not count toward the major GPA. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5-6			Fall, Spring

KIN 496 Supervised Teaching (Elementary Physical Education)

Prerequisite: concurrent enrollment in KIN 493.

Student observes, then teaches physical education classes under the direction of the cooperating teacher and the university supervisor. Student participates in school-related activities appropriate to the assignment and attends all required meetings. In order to receive a grade in this course, the student's professional portfolio must meet or exceed final criteria. The course will not count toward the major GPA. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5-6			Fall, Spring

KIN 498 Clinical Experiences in Teaching II

Prerequisite: EDC 199; and admitted to Teacher Education Program; and grades of "C" or better in all professional education courses; and completion of portfolio checkpoints 1 and 2; and current pre-professional liability insurance; and program approval.

This course is designed to meet HB 1711 for student's experience as a Teacher's Aide or Assistant Rule (Rule 5 CSR 80-805.040), to that of conventional student teachers within the same program. It is also designed to support completion of additional clinical requirements within that program including: seminars and workshops, required meetings, school related activities appropriate to the assignment, demonstrated mastery of the MoSPE standards and completion and overall assessment of a Professional Preparation Portfolio. This course is credited only on BSEd or appropriate masters-level certification programs. Can only receive credit for one of the following: AGE 499, AGT 499, ART 469, COM 493, ECE 499, ELE 499, ENG 434, FCS 498, HST 499, KIN 498, MCL 491, MID 499, MTH 496, MUS 499, SCI 499, SEC 499, SPE 499, THE 493.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Fall, Spring

KIN 499 Special Problems

Prerequisite: permission of department head.

Investigation of a problem within physical education, leisure services, dance, safety education, or coaching as assigned by members of the departmental faculty. May be repeated up to a maximum of 5 hours of credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Fall, Spring

KIN 500 Seminar in Physical Education

Prerequisite: 60 hours and permission of department head.

Directed reading and special investigation of selected subjects in physical education, health, and safety; research projects under faculty supervision. May be repeated for a maximum of 9 hours of credit. Variable content course. May be taught concurrently with KIN 600. Cannot receive credit for both KIN 500 and KIN 600. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

KIN 545 Perceptual and Motor Development

Prerequisite: PSY 360 or PSY 380 or PSY 385 or PSY 390 or CFD 160; and 90 hours.

Perceptual and motor development from prenatal life to adolescence; relationships of growth factors that influence motor abilities; difficulties that may arise when the normal course of development is interrupted. Includes a laboratory and a practicum experience. May be taught concurrently with KIN 645. Cannot receive credit for both KIN 545 and KIN 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

KIN 550 Organization and Administration for Kinesiology Professionals

Prerequisite: "C" grade or better in KIN 350.

This course will cover the fundamentals of program administration, legal considerations of health and exercise business management, and basic leadership responsibilities. This course will provide students the knowledge and skills associated with the resources required to implement health and physical activity programs and run exercise-related businesses. May be taught concurrently with KIN 650. Cannot receive credit for both KIN 550 and KIN 650.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

KIN 567 Physical and Leisure Activities for the Aging Adult

Prerequisite: KIN 250 or BMS 307; and KIN 252 or BMS 308.

The effects of aging and common degenerative diseases of the aged on physical performance and leisure. Included are units on assessment of physical working capacity, flexibility, body composition, strength maintenance. Also, units on selection of recreational and performance activities commensurate with functioning capacity. May be taught concurrently with KIN 667. Cannot receive credit for both KIN 567 and KIN 667.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 569 Health Appraisal and Exercise Testing Techniques

Prerequisite: "C" grade or better in KIN 362.

Introduction to appropriate health appraisal and exercise tests for the purpose of exercise programming and prescription. May be taught concurrently with KIN 669. Cannot receive credit for both KIN 669 and KIN 569. Exercise and Movement Science majors are required to earn a grade of "C" or better in this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

KIN 575 Measurement and Evaluation Applied to Physical Education

Prerequisite: 90 hours; and admitted to Teacher Education Program, and a combined (Missouri State and transfer) GPA of 2.75 or higher.

Use of authentic and traditional assessment techniques in assessing student performance and informing curricular change. Includes basic statistics, use of statistical software packages, evaluation of test validity and bias, and written test construction. A grade of "C" or better required in this course in order to take KIN 493 or KIN 496. Cannot be taken Pass/Not Pass. May be taught concurrently with KIN 675. Cannot receive credit for both KIN 575 and KIN 675.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 600 Seminar in Physical Education

Directed reading and special investigation of selected subjects in physical education, health, and safety; research projects under faculty supervision. May be repeated for a maximum of 9 hours of credit. Variable content course. May be taught concurrently with KIN 500. Cannot receive credit for both KIN 600 and KIN 500.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

KIN 645 Perceptual and Motor Development

Recommended Prerequisite: PSY 360. Perceptual and motor development from prenatal life to adolescence; relationships of growth factors that influence motor abilities; difficulties that may arise when the normal course of development is interrupted. Includes a laboratory and a practicum experience. May be taught concurrently with KIN 545. Cannot receive credit for both KIN 645 and KIN 545.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

KIN 650 Organization and Administration for Kinesiology Professionals

This course will cover the fundamentals of program administration, legal considerations of health and exercise business management, and basic leadership responsibilities. This course will provide students the knowledge and skills associated with the resources required to implement health and physical activity programs and run exercise-related businesses. May be taught concurrently with KIN 550. Cannot receive credit for both KIN 550 and KIN 650.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

KIN 667 Physical and Leisure Activities for the Aging Adult

The effects of aging and common degenerative diseases of the aged on physical performance and leisure. Included are units on assessment of physical working capacity, flexibility, body composition, strength maintenance. Also, units on selection of recreational and performance activities commensurate with functioning capacity. May be taught concurrently with KIN 567. Cannot receive credit for both KIN 667 and KIN 567.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 668 Adapted Physical Education

Prerequisite: Acceptance into the MS in Health Promotion and Wellness Management program, including accelerated option.

This course includes symptomology, sources of referral, typical behavior aberrations, and principles and problems related to the physical education of the exceptional child. Additional focus is placed on the modification of motor activities, general fitness activities, and therapeutic exercises for exceptional students.

Three hours of directed practicum per week, totaling 30 hours, is required. May be taught concurrently with KIN 468. Cannot receive credit for both KIN 668 and KIN 468.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall, Spring, Summer

KIN 669 Health Appraisal and Exercise Testing Techniques

Introduction to appropriate health appraisal and exercise tests for the purpose of exercise programming and prescription. May be taught concurrently with KIN 569. Cannot receive credit for both KIN 669 and KIN 569.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

KIN 675 Measurement and Evaluation Applied to Physical Education

Use of authentic and traditional assessment techniques in assessing student performance and informing curricular change. Includes basic statistics, use of statistical software packages, evaluation of test validity and bias, and written test construction. May be taught concurrently with KIN 575. Cannot receive credit for both KIN 675 and KIN 575.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 700 Research Methods in Kinesiology

Nature of research methodology, experimental design and scientific writing. Opportunity to explore research literature and to conduct research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

KIN 705 Applied Statistics in Kinesiology

Prerequisite: HLH 700 or equivalent or permission of instructor.

Applications of descriptive and inferential statistics to research problems in Kinesiology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 733 Current Problems in Sports Administration

Identification, analysis, and evaluation of current problems, research and trends in sports administration.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

KIN 735 Administration of School Physical Education and Athletic Programs

Financial and legal aspects, personnel management, program development, public relations, and evaluation as they apply to physical education and athletics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

KIN 737 Curriculum Designs in Physical Education

A comprehensive inquiry of the principles underlying the curriculum of physical education in grades K-12. An in-depth analysis will be given to the problems in development and evaluation of physical education curriculum.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 739 Principles of Sports Management

Introduction to theories and principles of sports management as applied to all segments of the sports industry from high school, collegiate, professional and international sports, to health, fitness and recreational settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

KIN 755 Fitness as Preventive Medicine

Recommended Prerequisite: KIN 362 or equivalent. Development and implementation of scientifically-based fitness programs as vehicles of preventative medicine.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

KIN 759 Contemporary Health Problems

In-depth consideration of relevant pertinent health issues, trends, controversy, and current research in Health Education.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

KIN 760 Applied Biomechanics of Human Movement

Recommended Prerequisite: KIN 360 or equivalent. Biomechanical principles applied to the analysis of human motion and performance. Techniques of cinematography, computerized motion analysis and other methods of analysis will be used.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

KIN 762 Applied Exercise Physiology

Recommended Prerequisite: KIN 362 or equivalent. A study of the mechanisms underlying the body's physiological responses and adaptations to exercise and training. Application is made to health-related concerns, environmental stress, exercise practices, and the aging process.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

KIN 780 Legal Aspects in Sports, Physical Education, and Wellness Programs

The legal aspects in sports, physical education, recreation and wellness programs as related to personnel, facilities, participants, spectators and contracts. Includes a review of legal concepts, necessary for in-depth study of the law, as it relates to sports, or other programmed activities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

KIN 781 Contemporary Issues in Physical Education

Exploration of basic issues and trends in physical education using a philosophical approach to contemporary American education. Individual problem solving will assist the student in identifying, analyzing and evaluating recent developments and basic issues in physical education and sport.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

KIN 785 Psychology of Sport and Physical Activity

This course focuses on applying basic theories of human behavior to the practice of sport psychology in professional settings. Emphasis will be placed on developing an understanding of how sport and physical activity settings influence human behavior and how this knowledge may be used in applied settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

KIN 791 Graduate Internship

Prerequisite: HLH 645 and HLH 700 and KIN 705 and KIN 785 or approval from Graduate Internship Coordinator.

Supervised field experience in a related field. Directly involves student utilization of knowledge and skills to demonstrate proficiency in a professional setting. Student must complete a minimum of 210 internship hours corresponding assignments.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Fall, Spring, Summer

KIN 795 Research Project

Prerequisite: HLH 700 or equivalent; a statistics course; and permission of graduate coordinator.

Original research supervised by the departmental staff. Designed to enable students through firsthand experience to understand the various parts of research papers, methods of gathering data, appropriate statistical tests, interpretation of findings and implications for further study.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

KIN 797 Graduate Seminar

Selected topics in health, physical education, and recreation. Topics may vary from semester to semester. May be repeated for credit when topic varies. A total of 6 hours may be applied to a degree program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

KIN 798 Field Experience in Sports Management

Prerequisite: completion of the application process for the field experience and 12 credits in the certificate program.

The Field Experience is the culminating experience for all students in the certificate program. The field experience provides students the opportunity to become directly involved in the application of organizational and sport management skills in sport related venues. Possible sites include: professional or club sports teams, university athletic departments, sports sales, sports agencies, professional and university sports facilities. Selection is dependent on the students' background and career expectations. All required courses must be completed in order to be eligible. The field experience can be completed during the fall, spring, or summer and requires at least 400 hours. All field experiences must be approved by the internship coordinator.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-6			Upon demand

KIN 799 Thesis

Prerequisite: HLH 700 or equivalent; a statistics course; and permission of graduate coordinator.

Independent research and study connected with the preparation of a thesis. May be repeated but no more than 6 hours may be counted toward degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Radiography (RAD) courses

RAD 110 Introduction to Radiologic Technology

An introduction to the field, orientation to hospital and school policies, history, and fundamentals of radiography, basic radiation protection, professional ethics, patient care, nursing procedures, and basic cardiac life support (CPR).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

RAD 120 Radiographic Anatomy

An introduction to human anatomy with a detailed study of the structure of the human skeletal system with special emphasis on radiographic landmarks.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

RAD 130 Radiographic Procedures I

Fundamentals of radiographic procedures and terminology. This course includes all routine positions and a discussion of the resulting radiographic projections. Includes image analysis, lab demonstrations, practice, and lab evaluations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Upon demand

RAD 140 Medical Terminology

A structural analysis of word roots, suffixes, and prefixes for terms pertinent to the medical field with an emphasis on radiologic technology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

RAD 150 Radiologic Science I

A study of the fundamentals of atomic theory, basic electricity and x-ray circuitry, construction of x-ray tubes, the production of x-radiation, and interactions of x-radiation with matter.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

RAD 160 Radiographic Procedures II

Advanced procedures and positioning techniques with emphasis on trauma and special views of bony anatomy. Includes image analysis, lab demonstrations, practice, and lab evaluations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

RAD 170 Image Processing

A study of the equipment, materials, and procedures used to produce radiographic images to include quality control procedures and image analysis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

RAD 180 Radiographic Imaging I

A study of the formation of radiographic images to include a discussion of the image devices, exposure factors, and the geometric properties of the x-ray beam. Methods of improving image quality, reducing patient exposure to ionizing radiation, and image analysis are also included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

RAD 190 Practicum I

First-year student clinical training. Duties begin under the direct supervision of the Registered Technologists. This will involve duties performed by a practicing technologist including the following: routine radiography, tomography, fluoroscopy, digital imaging, portable radiography, trauma radiography, and surgical radiography. Also included is an extensive clinical competency and performance evaluation system.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
7	1	12	Upon demand

RAD 310 Radiologic Physiology

Normal structure and function of human systems with emphasis on related radiographic examinations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

RAD 315 Radiologic Pathology

The study of human disease to include disease etiology, diagnosis, clinical interpretation and treatment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

RAD 320 Radiographic Procedures III

A comprehensive study of examinations utilizing contrast media to visualize various aspects of the digestive and urinary systems. Includes image analysis, lab demonstrations, practice, and lab evaluations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

RAD 330 Radiographic Procedures IV

A general overview of the examinations requiring special techniques and/or contrast agents. Special emphasis is placed on new modalities or procedures that may have replaced these examinations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

RAD 340 Contrast Agents

A general study of contrast agents and pharmacology, including types, uses, patient reactions, and emergency treatment for reactions. The basic techniques of venipuncture are included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

RAD 350 Radiographic Science II

An in-depth study of radiation biology to include the effects of ionizing radiation on living tissues, organs, and systems. Advanced study of radiation protection principles and regulations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

RAD 360 Radiographic Imaging II

A study of specialized imaging technologies to include fluoroscopy, digital imaging, tomography, and other modalities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

RAD 370 Radiographic Procedures V

An introduction to advanced procedures to include: interventional technology, computerized tomography, diagnostic medical sonography, nuclear medicine, radiation therapy, and magnetic resonance imaging. Includes resume and cover letter writing and the job interview process.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

RAD 380 Practicum II

Second-year clinical training includes a continuation of first-year duties with increased responsibilities under supervision of Registered Technologists. Rotations will include but may not be limited to: interventional technology, cardiac cath lab, computed tomography, nuclear medicine, diagnostic medical sonography, radiation therapy, and magnetic resonance imaging. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
8	1	14	Upon demand

Recreation, Sport, and Park Administration (REC) courses

REC 152 Introduction to Recreation, Sport, and Park Administration

Implications of leisure values in society and the role that organizations, agencies, institutions and municipalities have played in the recreation, sport, and park industries. Theories, concepts, and philosophies of leisure and recreation in society. A survey of the career opportunities in the recreation, sport and park venues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 160 Outdoor Initiatives

This course is designed to give the student an experiential exposure to the processes of facilitating individual and group outdoor initiatives. Students will be actively involved in a weekend course experience which includes individual and group activities, initiative games, trust building activities and low and high ropes activities. Concepts of dynamic group leadership, facilitation skills, group decision making and problem solving as well as personal development will be incorporated in the weekend experience.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

REC 161 Basic Low Impact Camping

Prerequisite: permission of instructor.

This course is designed to provide the students with practical skills in camping. Basic campcraft skills such as toolcraft, firecraft, ropecraft, outdoor cooking, map and compass will be included with a minimum impact camping orientation. Skills will be taught with an emphasis on appropriately leading others in outdoor settings and with safety and risk management considered. Field trips required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

REC 190 Applied Social Recreation

Applied approach to developing leadership skills in games, activities, contests and social recreation activities. Activity analysis as applied to expected outcomes, instructional techniques, age appropriateness, and activity leadership skills is emphasized.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

REC 200 Inclusion and Diversity in Recreation, Sport, and Park Administration

Prerequisite: REC 152 or concurrent enrollment.

The course is designed to orient the student to the broad implications of inclusive recreation, sport, and park administration: programs and services for people of all ages, abilities, cultures, ethnicities, genders, races, and religion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 205 Concepts in Therapeutic Recreation

Prerequisite: REC 152 or concurrent enrollment.

Orientation to the broad applications of clinical and community based therapeutic recreation approaches to programs and services for individuals with disabilities. Specific considerations given to mental retardation, developmental disabilities, mental illness, physical disabilities, aging, juvenile and adult corrections.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 210 Camp Counseling

Overview of the camping movement in America, the role of the counselor, and the personal development of the camper.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

REC 211 Principles of Outdoor Recreation

An analysis of the history, nature, and importance of the outdoor recreation field. An overall view of outdoor recreation philosophy based on legislation, theory, geographic factors, land use, and open space factors. Field trips may be required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 235 Adaptive Recreation Techniques Equipment

The identification of techniques associated with the utilization of adapted and modified recreational and personal aids, appliances, and equipment utilized in leisure pursuits by individuals with physical impairments.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

REC 300 Service Learning in Recreation, Sport, and Park Administration

Prerequisite: 30 hours and concurrent registration in a communication course designated as a service learning offering.

This service component for an existing course incorporates community service with classroom instruction in recreation, sport, and park administration to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

REC 301 The Role of Animals in Recreation

In rural or urban, public or private settings, humans are attracted to domestic or wild animals as a recreation activity...keeping, observing, showing, breeding, harvesting, capturing, fighting, training, and riding. This is a seminar course that will offer the student an opportunity to make a critical survey of the "recreational role of animals" in society (for persons with or without disability) as well as its surrounding commercial recreation industry and technology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

REC 302 Ecotourism

Students will gain an appreciation for ecotourism as a recreation experience. The course will examine our local ecotourism resources and compare them to the international trends and issues related to ecotourism, models of tourism and recreation planning, and ecotourism, especially focusing on the issue of sustainability. Field trips required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 303 Recreational Tourism Frontiers

This is a seminar course that will offer the student an opportunity to make a critical survey of current trends and issues (some controversial) in the field of recreational tourism. Recreational trends such as health, sport, festivals, gambling, genealogy/reunions, incentive travel, adventure, contests/shows/meetings, heritage/nostalgia, tourism for the disabled, nature, arts, farm/home visits and more...seem to be on the cusp of popularity. Students will examine practices, resources, delivery systems, ethics, career development issues, literature, and research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

REC 304 Community Recreation and Tourism

This course focuses on inventory, survey, assessment, and promotion of products/services of community recreation resources for visitors and residents. Students will learn how tourism is an important component of community recreation programming.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

REC 305 Meeting Planning

This course presents concepts necessary for the meeting planner to successfully solicit/develop and manage conventions and special events, commonly participated in during leisure time. Techniques of delivery, planning, managing and assessing economic impact, as well as highlighting the role of the convention and visitors bureau as a catalyst for regional leisure economic development of business travel will be included. As an elective, this course is for students in recreation, communications, marketing, and other fields. Though the course makes reference to the hotel industry, it is taught from the perspective of the meeting planner.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 307 Outdoor Pursuits-Land

Prerequisite: permission of instructor.

Skill development in outdoor recreation land-based activities (hiking, bouldering, caving, backpacking, etc.) and related environmental practices. Focuses on outdoor leadership development. Field trips and overnight educational outings may be required. Students are responsible for their own transportation to off-campus meetings. Students in the Parks and Outdoor Recreation emphasis will have additional course cost related to specific gear and clothing related to their profession.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

REC 309 Outdoor Pursuits-Water

Prerequisite: permission of instructor.

Skill development in outdoor recreation water-based activities (canoeing, kayaking, etc.) and related environmental practices. Focuses on outdoor leadership development. Students are responsible for their own transportation to off-campus meetings. Field trips and weekend educational outings required. Students of the Parks and Outdoor recreation emphasis will have additional course costs due to the gear and clothing required by their profession.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

REC 311 Outdoor/Adventure Education

The scope, methods, and importance of using the outdoors as a teaching tool for both individual and group education settings. Field trip(s) required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 315 Introduction to Private/Commercial Recreation

Overview of the spectrum of private planning, delivery and assessment of goods and services in the private and commercial sector.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 320 Fundamentals of Tourism

Geographical and recreational elements of tourism and travel including social, economic, environmental and political factors. Career options will be identified. Students participate in tourism research projects. One field trip may be required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

REC 325 Leisure Education

This course is designed to identify and experientially implement the concept of leisure education and examine individual interview techniques, group process approaches, techniques, and strategies, and other appropriate materials facilitating the leisure education process.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 328 Statistical Applications in Recreation, Sport and Park Administration

Prerequisite: 30 hours and completion of General Education mathematics requirement.

Introduction to statistical applications most commonly used in recreation, sport, and park administration services research; analysis, interpretation and presentation of data related to recreation, sport, and park administration services; particularly measures of central tendency and dispersion, elementary probability, probability distributions, sampling, standard error, interval estimation, and hypothesis testing. Cannot receive credit toward a degree for more than one of the following courses: AGR 330, IPE 381, MTH 340, PSY 200, QBA 237, SOC 302.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 330 Leisure Research Applications

Prerequisite: REC 152 and REC 328.

An overview of the purpose, basic procedures, research designs, and computer applications in leisure research. Familiarization with and interpretation of research literature in the field of recreation, sport, and park services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 335 Recreation, Sport, and Park Administration Practicum

Prerequisite: REC 152 and REC 190 and REC 200; and permission of practicum instructor.

A practical experience which the student can relate to classroom theory. Students are assigned to recreation, sport, and park administration agencies for exposure to structure, programming, and philosophy of the cooperating agency. Practicum experience must be a minimum of 100 hours. Students should report to the Recreation, Sport, and Park Administration office at least six (6) months prior to the semester the practicum is desired. May be repeated once for credit but each practicum must be in a different recreation, sport, and park administration agency. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Fall, Spring, Summer

REC 390 Recreation Programming

Prerequisite: REC 152 and REC 190 and REC 200 and 60 hours.

Students will examine various program areas and various approaches to program determination; development process for program planning, and gain experience in brochure and survey development.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 400 Therapeutic Recreation Foundations

Prerequisite: REC 205; and either KIN 250 or BMS 307 or concurrent enrollment.

Acquaint students with history, philosophy, theories, principles, concepts, techniques, and skills in the provision of therapeutic recreation programs and services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

REC 401 Therapeutic Recreation Assessment Evaluation, Intervention Techniques and Modalities

Prerequisite: REC 400.

Focuses on use of assessment, evaluation, and facilitation technique in the delivery of treatment program modalities commonly found in therapeutic recreation practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

REC 405 Camp Administration

A study of the techniques and principles involved in the administration of modern camps.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 406 Promoting Leisure Services

Prerequisite: REC 152.

To provide the Recreation, Sport, and Park Administration students with an emphasis in Recreation Management or Sport Administration with an overview of low-cost strategies of planning and executing promotion for non-profit, government and profit making leisure services. Emphasis will be made on working with non-profit organizations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 410 Recreation Leadership Supervision

Prerequisite: REC 152 and REC 190 and REC 200 and 60 credit hours.

A study of the processes, methods, and characteristics of leadership and supervision in the delivery of leisure services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 411 Outdoor Pursuits

Prerequisite: permission of instructor.

To acquaint the student with a variety of outdoor pursuit activities. Skill development, environmental values and impact considerations of outdoor experiences will be emphasized. Field trips and a weekend educational outing required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

REC 415 Risk Management for Recreation, Sport, and Park Agencies

Prerequisite: 75 hours.

This course is designed to look at the various risk management concepts, laws, and administrative practices that address the legal environment of recreation, sport, and park agencies within the scope of our legal culture. Our Constitution, legal liability related to safe environs, crowd control, transportation, employee rules and regulations, workplace risk, and the general management of risk situations and aspects will be the central core of this course. May be taught concurrently with REC 415. Cannot receive credit for both REC 415 and REC 615.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 420 Trends and Issues in Therapeutic Recreation

Prerequisite: REC 401; and either KIN 252 or BMS 308 or concurrent enrollment.

Designed to focus on contemporary issues, trends, practices, and professional literature, media resources, and research related to the delivery of therapeutic recreation services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

REC 422 Recreation Facility and Area Management

Prerequisite: admission to the Recreation, Sport, and Park Administration program (major or minor); and 90 hours; and REC 390.

Elements of locating, planning, developing, maintaining, and financing various recreation facilities and areas management. Study of management principles and responsibilities applicable to leisure settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 423 Administration of Recreation, Sport, and Park Agencies

Prerequisite: admission to the Recreation, Sport, and Park Administration program (major or minor); and 90 hours; and REC 390.

This course is usually taken with REC 422. Presentation of administrative principles of leisure oriented agencies. Specific approaches to financing, personnel budgets, facility operation, policy development, departmental structure, public relations, legal aspects, and evaluation procedures are presented. May be taught concurrently with REC 623. Cannot receive credit for both REC 423 and REC 623.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 451 Outdoor Leadership

Prerequisite: permission of instructor.

This course emphasizes experiential teaching/learning using the Wilderness Education Association curriculum under field conditions which builds upon the student's prior outdoor study and experience. The result is a practical group experience in the outdoors spent enjoyably and safely with minimum harm to the environment. This environmental stewardship course stresses leadership, decision making, low impact camping, sound expedition behavior and environmental ethics. Field trips will be required. May be repeated once. May be taught concurrently with REC 651. Cannot receive credit for both REC 451 and REC 651.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall, Spring, Summer

REC 490 Orientation to Internship

Prerequisite: permission of instructor.

Orientation to the internship experience, including the student application process, the agency application and contractual agreement, the expectations of the University, the responsibilities of the student and the agency, appropriate completion of logs, planned experiences, time summaries and assigned problems. Students planning to intern in the Spring semester must enroll in this course during the preceding Fall semester, and students planning to intern in the Summer or Fall semesters must enroll in this course during the preceding Spring semester.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

REC 491 Recreation, Sport, and Park Administration Internship

Prerequisite: complete all other coursework (including General Education Program, major(s), minors(s), if applicable, and all general baccalaureate degree requirements); and cumulative Missouri State GPA of at least 2.20; and first-aid and CPR competency met and maintained current throughout internship; and permission of internship coordinator.

Supervised field experience which provides the student with an opportunity to make the transition from the classroom to actual involvement in a leisure service agency. In addition to the 10 week (optional 15 week) involvement, students are required to (1) meet with the Recreation, Sport, and Park Administration internship coordinator during the preceding semester to secure an internship site and clarify internship responsibilities, and (2) complete a notebook during the internship. Credit will be based on the length of the internship period and students receive either 8 hours or 12 hours. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
8-12			Fall, Spring, Summer

REC 495 Seminar in Recreation, Sport, and Park Administration

Prerequisite: permission of instructor.

Study of various recreation, sport, and park administration topics from contemporary and/or technical points of view. Students should check the current class schedule to determine the topic. May be repeated, provided the topic is different, to a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

REC 499 Special Problems

Prerequisite: permission of Recreation, Sport, and Park Administration Program Director.

Directed reading or special investigation of a particular problem within the field of recreation, sport, and park administration and research projects under faculty supervision. May be repeated up to a maximum of 5 hours of credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Fall, Spring, Summer

REC 615 Risk Management for Recreation, Sport and Park Agencies

This course is designed to look at the various risk management concepts, laws, and administrative practices that address the legal environment of recreation, sport, and park agencies within the scope of our legal culture. Our Constitution, legal liability related to safe environs, crowd control, transportation, employee rules and regulations, workplace risk, and the general management of risk situations and aspects will be the central core of this course. May be taught concurrently with REC 415. Cannot receive credit for both REC 415 and REC 615.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 623 Administration of Recreation, Sport, and Park Agencies

Presentation of administrative principles of leisure-oriented agencies. Specific approaches to financing, personnel budgets, facility, operation, policy development, departmental structure, public relations, legal aspects, and evaluation procedures are presented. May be taught concurrently with REC 423. Cannot receive credit for both REC 423 and REC 623.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REC 651 Outdoor Leadership

Prerequisite: permission of instructor.

This course emphasizes experiential teaching/learning using the Wilderness Education Association curriculum under field conditions which builds upon the student's prior outdoor study and experience. The result is a

practical group experience in the outdoors spent enjoyably and safely with minimum harm to the environment. This environmental stewardship course stresses leadership, decision making, low impact camping, sound expedition behavior and environmental ethics. Field trips will be required. May be repeated once. May be taught concurrently with REC 451. Cannot receive credit for both REC 451 and REC 651.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

Respiratory Therapy (RTH) courses

RTH 111 Fundamentals of Respiratory Therapy I

Topics in medical terminology, function of the respiratory system including: ventilatory mechanisms, gas transport in the blood and regulation of ventilation. Medical gas delivery devices will be considered with classroom knowledge being used to develop skills in the clinical setting.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Upon demand

RTH 112 Fundamentals of Respiratory Therapy II

A continuation of fundamentals with major emphasis and topics of aerosols, humidity, equipment maintenance, IPPB therapy and asepsis techniques.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Upon demand

RTH 113 Fundamentals of Respiratory Therapy III

Ventilatory insufficiency and failure, mechanical ventilation, and chest physio-therapy. Skills and techniques are developed in the clinical setting.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Upon demand

RTH 311 Pulmonary Functions

Application of specialized diagnostic facilities including pulmonary function and blood gas analysis. Approach and application of fundamental skills are extended to primary intensive care facilities of the participating institution.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Upon demand

RTH 313 Clinical Application of Acid-Base Balance

Prerequisite: RTH 311.

Acid-Base Homeostasis is related to clinical therapeutics. Topics include expired gas analysis, hemodynamics, biomedical instrumentation of biostatistical analysis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

RTH 350 Respiratory Therapy Pharmacology

Provides the student with the skills and knowledge for the safe usage of therapeutic drugs. An introduction to the general principles and mechanisms of drug actions, interactions, and toxicity of the use of therapeutic drugs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Upon demand

RTH 352 Pathology and Chest Disease

Physio-pathology of respiratory disease states as they relate to normal structure.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Upon demand

RTH 360 Respiratory Therapy Practicum

Departmental responsibilities including principles and practices of planning, directing and evaluating a respiratory therapy department.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

RTH 361 Respiratory Physiology

In-depth study and analysis of ventilation, the response to chemical and gaseous agents and manifestation and diagnosis and treatment of pulmonary disease.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Upon demand

RTH 370 Advanced Clinical Techniques

Prerequisite: permission of instructor.

Selected topics in the use of biomedical electronic and health related equipment as applied to Respiratory Therapy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Upon demand

RTH 371 Cardiovascular Physiology

A course describing detailed anatomy and physiology of the cardiovascular system. Topics included are: neurogenic and histogenic homeostasis, shock, disease processes and diagnostic testing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

RTH 380 Special Studies in Respiratory Therapy

Provides the student with the opportunity for advanced work in a specialty area on an individual basis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Upon demand

RTH 381 Clinical Practicum in Respiratory Care

Supervised practical application of various respiratory care procedures performed in clinical settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

RTH 382 Clinical Practicum in Respiratory Care

Prerequisite: RTH 381.

Supervised practical application of various respiratory care procedures performed in clinical settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

RTH 383 Clinical Practicum in Respiratory Care

Prerequisite: RTH 382.

Continuation of RTH 382.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

Admission requirements

Satisfaction of the following minimum criteria is required for admission to the program:

1. A valid ACT score on file if required by the University for admission purposes.
2. A combined (Missouri State and transfer) GPA of 2.50 or higher.
3. Completion of [COM 115](#) with a grade of "C" or higher, or concurrent enrollment in COM 115.
4. Completion of at least 30 credit hours.

Major requirements (77-89):

Note: 14 hours may be double counted toward General Education requirements.

Major core (51-53 hours):

Note: a grade of C or better is required in all KIN courses.

1. Specific General Education requirements:
 - a. [BIO 101](#)(3) and [111](#)(1), or [BIO 121](#)(4), or [BMS 110](#)(3) and [111](#)(1).
 - b. [CHM 116](#)(4) and [117](#)(1) for Health Studies option; or [PHY 123](#)(4) for Pre-Professional option.
 - c. [PSY 121](#)(3), [KIN 210](#)(3).
2. [BIO 101](#)(3) and [111](#)(1), or [BIO 121](#)(4), or [BMS 110](#)(3) and [111](#)(1); [PSY 121](#)(3); [KIN 250](#)(3) or [BMS 307](#)(4); [KIN 252](#)(3) or [BMS 308](#)(4); [KIN 212](#)(1), [350](#)(3), [360](#)(4), [361](#)(2), [362](#)(4), [465](#)(2), [468](#)(4), [569](#)(4); [ATC 222](#)(2) or [KIN 253](#)(2);

[DTN 240\(3\)](#); [PSY 200\(3\)](#) or [SOC 302\(3\)](#) or [MTH 340\(3\)](#) or [QBA 237\(3\)](#) or [AGR 330\(3\)](#) or [PSY 527\(3\)](#); [KIN 500\(3\)](#) or [KIN 491\(3\)](#).

3. Public Affairs Capstone Experience will be fulfilled by completion of [KIN 500\(3\)](#) or [KIN 491\(3\)](#).

Complete one of the following options:

Health Studies option (26-27 hours):

1. [CHM 116\(4\)](#) and [117\(1\)](#); [KIN 256\(2\)](#) or [358\(3\)](#); [KIN 257\(2\)](#), [485\(2\)](#), [550\(3\)](#), [567\(3\)](#); [DTN 334\(3\)](#); [PSY 508\(3\)](#); [SWK 330\(3\)](#).
2. A grade of "C" or better is required in all KIN courses.

Pre-Professional option (30-36 hours):

1. [MTH 138\(5\)](#) or [261\(5\)](#) or [287\(3\)](#); [PHY 123\(4\)](#); [CHM 160\(4\)](#) and [161\(1\)](#); [CHM 170\(3\)](#) and [171\(1\)](#) or [CHM 352\(3\)](#) and [353\(2\)](#); [CHM 201\(3\)](#) and [202\(2\)](#) or [CHM 342\(3\)](#) and [345\(2\)](#); [BIO 122\(4\)](#) or [BIO 212\(2\)](#) and [213\(1\)](#) or [BIO 312\(3\)](#) and [313\(2\)](#); [BMS 230\(3\)](#) or [BIO 235\(3\)](#) and [236\(1\)](#) or [PHY 124\(4\)](#); [PSY 304\(3\)](#).
2. Students selecting the Pre-Professional option should meet with an advisor to determine the most appropriate course selection. Those preparing for possible selection into a physician assistant program should take both CHM 170(3) and 171(1), and both CHM 352(3) and 353(2). Students preparing for clinical science should take BMS 307(4) and 308(4) for the anatomy and physiology requirement.

Additional requirements:

1. Students must pass the ACSM Certified Exercise Physiologist Exam, or the NSCA Certified Strength and Conditioning Specialist Exam, or score at least at the 70th percentile on a major field achievement exam.
2. Students must pass a drug test and a background check to participate in required field experiences in clinical settings, in the workplace, and/or in schools.
3. Student certification in first aid and CPR must be documented and maintained throughout the program.
4. Transfer credit courses must have grade of "C" or better and be from a regionally accredited college or university.
5. A combined (Missouri State and transfer) GPA of 2.50 or higher and a grade of "C" or better in all KIN courses is required for graduation.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Accelerated graduate program in Health Promotion and Wellness Management

Eligible Missouri State undergraduate students may apply for admission to the Health Promotion and Wellness Management program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-health-promotion-and-wellness-management.htm\)](https://graduate.missouristate.edu/Catalog/prog-health-promotion-and-wellness-management.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(//Registrar/mixedcredit.htm\)](https://Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Kinesiology

Eligible Missouri State undergraduate students may apply for admission to the Kinesiology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-kinesiology.htm\)](https://graduate.missouristate.edu/Catalog/prog-kinesiology.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(//Registrar/mixedcredit.htm\)](https://Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Professional Studies

Eligible Missouri State undergraduate students may apply for admission to the Master of Professional Studies program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/professionalstudies.htm\)](https://graduate.missouristate.edu/Catalog/professionalstudies.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(//Registrar/mixedcredit.htm\)](https://Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

Physical Education

Major(s)

Physical Education

Bachelor of Science in Education (Certifiable K-12)

Missouri State University is approved by the Missouri State Board of Education to offer basic and advanced professional education programs for purposes of professional certification. Admission to the University does not automatically qualify a student to participate in the professional component of the teacher education program. A high level of academic and professional competence is required for admission to and continuation in the teacher education program. Completion of the program is designed to lead to certification to teach in Missouri public schools.

Students majoring in Physical Education are encouraged to participate in athletics, recreational sports, and/or engage in personal physical fitness programs.

Students who complete the degree requirements for the Bachelor of Science in Education in Physical Education are certified to teach physical education and professionally qualified to coach.

All students pursuing Missouri certification are required to meet a series of Transition Points that will be assessed, evaluated, and monitored throughout the teacher education program with assistance and guidance from faculty. There are five distinct Transition Points students meet from entry to their education program to follow up post graduate training.

Completion of certification requirements is a four-step process. Students who receive a certification recommendation must meet the standards for certification eligibility as outlined below:

1. **Requirements for Eligibility to Enroll in KIN 200:** Before a student can enroll in KIN 200 the following eligibility requirements must be met:
 - a. A combined (Missouri State and transfer) GPA of 2.50 or higher.

- b. Completed [COM 115](#) with a minimum grade of "C" or concurrent enrollment in COM 115.
- c. Completed [KIN 210](#).
- d. Completed at least 30 semester hours.
- e. Completion of Missouri Volunteer and Employee Criminal History Service (MOVECHS) FBI Fingerprinting Background Check prior to any clinical experience placement. For more information, refer to [Compliance Documents Required for Practicum, Internship or Student Teaching](#).

2. Requirements for Admission to Physical Education Teacher Education (PETE) Program: Students who plan to complete teacher certification requirements must be admitted to the PETE Program. Eligibility is automatically monitored when enrolling in [KIN 200](#). Admission to the PETE Program is required before students are allowed to begin additional courses in the Physical Education Teacher Education component. Student application for admission to the PETE Program is complete when the requirements listed below are satisfied. Note: All of these requirements must be met before students are permitted to enroll in Physical Education Professional Education courses (KIN 411, 431, 440, 468, and 575)

- a. A combined (both Missouri State and Transfer) GPA of 2.75 or higher.
- b. Earned a composite score or superscore of 20 or better on the ACT or earned passing scores on all four sub-sets of the Missouri General Education Assessment (MoGEA). Refer to the [MoGEA website](#) for details.
- c. Completed [COM 115](#) with a minimum grade of "C".
- d. Completed [KIN 200](#) with minimum grade of "C".
- e. Completion of Missouri Volunteer and Employee Criminal History Service (MOVECHS) FBI Fingerprinting Background Check prior to any clinical experience placement. For more information, refer to [Compliance Documents Required for Practicum, Internship or Student Teaching](#).
- f. Completed Disposition Checklist and Student Contract.
- g. Complete at least 45 semester hours.
- h. Upon completion of the above requirements, a student's record is reviewed and submitted to the Educator Preparation Provider Council (EPPC) for admission to Teacher Education. A student's qualifications for continuance in the Teacher Education Program is subject to review and change by the EPPC at any time while the student is enrolled.

3. Requirements for Continuance in the PETE Program: In order to progress through the PETE program a student must:

- a. Maintain a combined (Missouri State and transfer) GPA of 2.75 or higher.
- b. Maintain a combined (Missouri State and transfer) GPA of 3.00 or higher in the major.
- c. Complete Physical Education Professional Education courses with a minimum grade of "C".
- d. Been admitted to the degree program.

4. Requirements for Assignment to Supervised Teaching (effective Fall 2017 and after): The criteria used to determine eligibility for Supervised Teaching are outlined below. The student must have:

- a. Been admitted to the PETE Program and completed Transition Point #1 and Transition Point #2.
- b. A combined GPA of 2.75 or higher for all college level course work completed.
- c. Current and valid TB test.
- d. Current and valid Professional Liability Insurance.
- e. Completion of Missouri Volunteer and Employee Criminal History Service (MOVECHS) FBI Fingerprinting Background Check prior to any clinical experience placement. For more information, refer to [Compliance Documents Required for Practicum, Internship or Student Teaching](#).
- f. Completed at least 15 hours at Missouri State.
- g. Completed all courses in the major with a combined (Missouri State and Transfer) GPA of 3.00 or higher.
- h. Completed all Physical Education Professional Education courses with a minimum grade of "C".
 - i. Recommendation of student's advisor.
 - j. Recommendation of Department of Kinesiology.

- 5. Requirements for Certification Recommendation (effective Fall 2017 and after):** To be recommended for an initial Missouri teaching certification the student must have:
- Successfully completed Supervised Teaching.
 - Met all Missouri teacher certification requirements which are in effect at time of certification.
 - A combined (Missouri State and transfer) GPA of 2.75 or higher.
 - Completed all professional education courses with a combined (Missouri State and transfer) GPA of 3.00 or higher and no grade lower than "C".
 - A combined (Missouri State and transfer) GPA of 3.00 or higher in the certificate subject area (major).
 - Successful completion of Missouri Educator Gateway Assessments (MEGA) as established by the Missouri Board of Education. Refer to the [MEGA website](#) for details.
 - Completed Transition Point #3.
 - The Missouri Department of Elementary and Secondary Education will require in FBI background check prior to issuing a certificate.

Major requirements (63 hours):

- Specific General Education requirements: [BIO 101\(3\)](#) and [111\(1\)](#) or [BIO 121\(4\)](#); [CHM 116\(4\)](#).
- A grade of "C" or better is required in each of the following courses:
 - [ATC 222\(2\)](#); [KIN 200\(3\)](#), [210\(3\)*](#), [240\(2\)](#), [250\(3\)](#), [252\(3\)](#), [253\(2\)](#), [260\(2\)](#), [264\(2\)](#), [270\(1\)](#), [277\(2\)](#), [335\(2\)](#), [358\(3\)](#), [359\(3\)](#), [361\(2\)](#), [362\(4\)](#), [386\(3\)](#), [411\(3\)](#), [430\(3\)](#), [431\(3\)](#), [440\(3\)](#), [468\(4\)](#), [485\(2\)](#), [575\(3\)](#).
- Public Affairs Capstone Experience will be fulfilled by completion of [KIN 493\(6\)](#); [KIN 496\(6\)](#).
*KIN 210 may double count in General Education requirements.

Professional Education requirements (21 hours):

A grade of "C" or better is required in each of the following courses.

- [EDC 345\(3\)](#), [PSY 360\(3\)](#), [RDG 474\(3\)](#), [KIN 493\(6\)](#), [KIN 496\(6\)](#).
- The following major courses listed above will satisfy the Professional Education competencies as required for certification: [KIN 200\(3\)](#), [411\(3\)](#), [431\(3\)](#), [440\(3\)](#), [468\(4\)](#), [575\(3\)](#).

University level requirements:

- [General Education Program and Requirements](#)
- [General Baccalaureate Degree Requirements](#)

Missouri State Teacher Certification

Driver Education

(Certifiable grades 9-12, additional endorsement only)

Students who complete the Bachelor of Science in Education degree with a major in Secondary Education or K-12 Physical Education may receive Missouri state certification in Driver Education grades 9-12 by:

- Completing the following courses: [KIN 370\(3\)](#), [371\(3\)](#), [372\(3\)](#), and [373\(3\)](#).
- In order to meet Missouri State teacher certification requirements, all candidates for the Bachelor of Science in Education degree must have a combined (Missouri State and transfer) GPA of 3.00 or above in the

certificate subject area which includes all courses previously listed.

Health Education

(Certifiable grades K-9, K-12, 9-12, additional endorsement only)

Students who complete the Bachelor of Science in Education degree with a major in Physical Education may receive Missouri state certification in Health Education grades K-9, K-12, or 9-12 by:

1. Completing the following courses: [BMS 307\(4\)](#) or [KIN 250\(3\)](#), [BMS 308\(4\)](#) or [KIN 252\(3\)](#), or equivalents; [CFD 163\(3\)](#); [DTN 130\(3\)](#) or [DTN 240\(3\)](#); [KIN 253\(2\)](#), [256\(2\)](#), [257\(2\)](#), [358\(3\)](#); [PSY 101\(3\)](#); [SWK 330\(3\)](#).
2. 9-12 certification student must select additional hours of electives in health-related courses, in consultation with their advisor, to bring total to 30 hours.
3. K-12 certification student must select additional hours of electives in health-related courses, in consultation with their advisor, to bring total to 32 hours.
4. In order to meet Missouri state teacher certification requirements, student must have a combined (Missouri State and transfer) GPA of 3.00 or above in the certificate subject area which includes all courses previously listed.

Accelerated graduate program in Health Promotion and Wellness Management

Eligible Missouri State undergraduate students may apply for admission to the Health Promotion and Wellness Management program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-health-promotion-and-wellness-management.htm\)](https://graduate.missouristate.edu/Catalog/prog-health-promotion-and-wellness-management.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Kinesiology

Eligible Missouri State undergraduate students may apply for admission to the Kinesiology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-kinesiology.htm\)](https://graduate.missouristate.edu/Catalog/prog-kinesiology.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Professional Studies

Eligible Missouri State undergraduate students may apply for admission to the Master of Professional Studies program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/professionalstudies.htm) (<https://graduate.missouristate.edu/Catalog/professionalstudies.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Radiography

Major(s)

Radiography (Comprehensive)

Bachelor of Science

The Department of Kinesiology, in cooperation with Cox College and Mercy College of Nursing and Health Sciences of Southwest Baptist University and other JRCERT accredited programs, offers a baccalaureate degree in Radiography. This program contains professional training that must be from a clinical school that is accredited by the Joint Review Committee on Education in Radiologic Technology sponsored by the American Medical Association (foreign credentials are not accepted). The curriculum includes both university course work that can be completed in 6 semesters and a 22-24 month clinical school of radiography. Each student must have at least a 2.00 GPA in both the coursework at Missouri State and in a school of radiologic technology. To be a registered radiologic technologist, the student, after having completed the clinical coursework, must pass a Registry Examination and obtain a letter of good standing from the American Registry of Radiologic Technologists.

A student may pursue this program by completing prerequisite courses at Missouri State and by seeking admission to any JRCERT school of radiologic technology. Application deadlines vary by school of radiologic technology. Courses completed at the clinical school are treated as transfer credit, are assigned a P (Pass) grade only, and are evaluated as a block of 21 credit hours of lower-division Radiography electives and a block of 21 credit hours of upper-division Radiography electives, not as individual courses.

The Radiography courses are credited only on the Bachelor of Science degree with a major in Radiography.

Major requirements:

Major core (61-63 hours):

Note: 21 hours may double count in General Education requirements.

1. Specific General Education requirements: [BMS 110\(3\)](#) and [111\(1\)](#); [CHM 116\(4\)](#) and [117\(1\)](#); [ECO 155\(3\)](#); [KIN 210\(3\)](#); [MTH 135\(3\)](#); [PSY 121\(3\)](#). Note: CHM 160 should be selected if the science option is chosen.
2. [BIO 212\(2\)](#) and [213\(1\)](#) or [BIO 312\(3\)](#) and [313\(2\)](#); [BMS 307\(4\)](#), [308\(4\)](#); [CHM 201\(3\)](#) and [202\(2\)](#); [CSC 121\(3\)](#).
3. 42 hours of coursework completed in the professional curriculum from a school of radiologic technology evaluated as a block of 21 credit hours of lower-division Radiography electives and a block of 21 credit hours of upper-division Radiography electives, not as individual courses.
4. Public Affairs Capstone Experience will be fulfilled by completion of second year clinical practicum at the school of radiologic technology.

Complete one of the following options:

Education option (15-16 hours):

1. [PSY 360\(3\)](#), [SEC 301\(2\)](#), [EDT 565\(3\)](#), [SFR 396\(2\)](#).
2. Two courses from: [PSY 200\(3\)](#); [PSY 306\(3\)](#) or [502\(3\)](#); [PSY 508\(3\)](#), [PSY 529\(3\)](#); [SFR 547\(2\)](#).

Management option (15 hours):

1. [ACC 201\(3\)](#); [MGT 340\(3\)](#), [MGT 341\(3\)](#).
2. Two courses from: [ACC 211\(3\)](#); [HCM 301\(3\)](#), [HCM 303\(3\)](#); [MGT 345\(3\)](#), [MKT 367\(3\)](#), [MKT 368\(3\)](#); [QBA 237\(3\)](#).

Science option (14 hours):

1. 14 hours in Biology, Biomedical Sciences, or Physics electives selected with approval of advisor.
2. CHM 160 is recommended as a General Education course for this option.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Accelerated graduate program in Health Promotion and Wellness Management

Eligible Missouri State undergraduate students may apply for admission to the Health Promotion and Wellness Management program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-health-promotion-and-wellness-management.htm\)](https://graduate.missouristate.edu/Catalog/prog-health-promotion-and-wellness-management.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(//Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Kinesiology

Eligible Missouri State undergraduate students may apply for admission to the Kinesiology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to

the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-kinesiology.htm) (https://graduate.missouristate.edu/Catalog/prog-kinesiology.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](/Registrar/mixedcredit.htm) (/Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Professional Studies

Eligible Missouri State undergraduate students may apply for admission to the Master of Professional Studies program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/professionalstudies.htm) (https://graduate.missouristate.edu/Catalog/professionalstudies.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](/Registrar/mixedcredit.htm) (/Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

Undergraduate Catalog

Recreation, Sport, and Park Administration

Major(s)

Recreation, Sport, and Park Administration (Comprehensive)

Bachelor of Science

Major requirements (78 or 82 hours):

Note: three hours may double count in General Education requirements.

1. All coursework (including General Education Program, major(s), minor(s), if applicable), and all General Baccalaureate Degree Requirements, must be completed prior to taking [REC 491](#), Recreation, Sport, and Park Administration Internship.
2. Specific General Education requirement: [KIN 210\(3\)](#) or [KIN 286\(3\)](#).
3. Core requirements (51 or 55 hours):
 - a. [REC 152\(3\)](#), [190\(3\)](#), [200\(3\)](#); [REC 211\(3\)](#) or [311\(3\)](#); [302\(3\)](#), [328\(3\)](#), [335\(3\)](#), [390\(3\)](#), [406\(3\)](#), [410\(3\)](#), [415\(3\)](#), [422\(3\)](#), [423\(3\)](#), [490\(1\)](#), [491\(8 or 12\)](#).
 - b. Three hours of skills classes, with advisor approval, from the following: [KIN 110\(1\)](#), [112\(1\)](#), [113\(1\)](#), [114\(1\)](#), [118\(1\)](#), [125\(1\)](#), [127\(1\)](#), [130\(1\)](#), [133\(1\)](#), [135\(1\)](#), [143\(1\)](#), [145\(1\)](#), [147\(1\)](#), [149\(1\)](#), [234\(2\)](#), [240\(2\)](#), [260\(2\)](#), [264\(2\)](#), [270\(1\)](#), [273\(1\)](#); [AGS 161\(3\)](#), [162\(1\)](#); [MIL 101\(2\)](#), [102\(2\)](#), [211\(2\)](#); [REC 160\(1\)](#), [307\(3\)](#), [309\(3\)](#), [451\(3\)](#).
4. 24 hours from one of the following emphasis areas:
 - a. Health and Wellness Promotion. Prepares students for various opportunities in the fitness industry, health-related services, and wellness management and promotion. Courses required: [KIN 257\(2\)](#); [281](#) or [282\(1\)](#); [350\(3\)](#), [360\(4\)](#), [362\(4\)](#), [569\(4\)](#); [DTN 130\(3\)](#); [MKT 150\(3\)](#).
 - b. Parks and Outdoor Recreation. Prepares students for careers in parks and outdoor recreation and outdoor education within the public or private sector in adventure recreation, outdoor recreation/education facilities, or government natural resource management agencies. Courses

- required: [REC 211](#) or [311\(3\)](#); [305\(3\)](#), [307\(3\)](#), [309\(3\)](#), [325\(3\)](#); [451\(3\)](#) or outdoor activity hours approved by advisor: [COM 325\(3\)](#), [GRY 318\(3\)](#).
- c. Recreation Management. Prepares students for careers in administering recreation services and events in the Armed Forces, municipal parks and recreation departments, campus recreation, sporting goods retail, facility management, residential camps, resort recreation, travel, tourism and hospitality industry, meeting planning, and not-for-profit organizations: at-risk youth organizations, Boys and Girls Clubs, church recreation, Scouting, and YMCA. Courses required: [REC 305\(3\)](#), [REC 320\(3\)](#), [REC 325\(3\)](#), [KIN 234\(2\)](#), [KIN 468\(4\)](#), [BUS 135\(3\)](#), [MGT 286\(3\)](#), [MGT 340\(3\)](#).
- d. Sport Administration: Prepares students for careers in leadership opportunities in administering athletic programs, athletic teams, competitive sport camps and clinics, facilities and leagues; managing various sport entities, including Olympic training sites, municipal league programs, youth sport agencies, tournament management, sport administration and marketing, special event planning, retail sports industries, and coaching at the college or above level. Courses required: [REC 305\(3\)](#), [REC 325\(3\)](#); [KIN 210](#) or [286\(3\)](#); [KIN 218\(2\)](#), [KIN 234\(2\)](#), [KIN 386\(3\)](#), [KIN 485\(2\)](#), [BUS 135\(3\)](#), [MGT 286\(3\)](#).
- e. Therapeutic Recreation: This emphasis has been temporarily suspended and is not being offered at this time. Contact the Kinesiology Department for more information.
- f. First Aid Proficiency: Each major must show proficiency in First Aid and Cardio Pulmonary Resuscitation (CPR). Students must provide copies of their **current** First Aid and CPR cards/certifications to the internship coordinator prior to enrolling in REC 491 and maintain current certifications throughout the internship. Certifications can be completed by the following:
- Complete the American Red Cross First Aid course and CPR course and obtain certification (see www.redcross.org for information).
 - Complete the American Heart Association First Aid course and CPR course and obtain certification (see www.americanheart.org for information).
 - Emergency Medical Technician (EMT) certification.
5. Public Affairs Capstone Experience will be fulfilled by completion of [REC 335\(3\)](#) and [491\(8 or 12\)](#).

University level requirements:

- [General Education Program and Requirements](#)
- [General Baccalaureate Degree Requirements](#)

Recreation, Sport, and Park Administration (Non-Comprehensive)

Bachelor of Science

Major requirements (59 or 63 hours):

Note: All other coursework (including General Education Program, major(s), minor(s), if applicable), and all General Baccalaureate Degree Requirements, must be completed prior to taking [REC 491](#) (https://www.missouristate.edu/registrar/catalog/courses_hr.htm#REC491), Recreation, Sport, and Park Administration Internship.

- Core requirements (50 or 54 hours):
 - Specific General Education requirement: [KIN 210\(3\)](#) or [KIN 286\(3\)](#).

- b. [REC 152\(3\)](#), [190\(3\)](#), [200\(3\)](#); [REC 211\(3\)](#) or [311\(3\)](#) or [411\(3\)](#); [328\(3\)](#), [330\(3\)](#), [335\(3\)](#), [390\(3\)](#), [410\(3\)](#), [422\(3\)](#), [423\(3\)](#), [490\(1\)](#), [491\(8 or 12\)](#).
- c. Five hours of skills classes, with advisor approval, from the areas below with a maximum of four hours from any one area:
- i. Arts and Crafts: [ART 100\(3\)](#), [115\(3\)](#), [212\(3\)](#), [255\(3\)](#); [ITC 205\(3\)](#).
 - ii. Dance and Rhythms: [KIN 125\(1\)](#), [240\(2\)](#), [270\(1\)](#); [MUS 100\(2\)](#), [103\(3\)](#), [104\(3\)](#), [133\(1\)](#), [135\(1\)](#), [137\(1\)](#).
 - iii. Drama and Theater: [ENG 334\(3\)](#); [THE 224\(1\)](#), [255\(2\)](#), [506\(3\)](#).
 - iv. Outdoor Education Activities: [AGS 161\(3\)](#), [162\(1\)](#); [MIL 101\(2\)](#), [102\(2\)](#), [211\(2\)](#); [KIN 110\(1\)](#), [114\(1\)](#), [260\(2\)](#); [REC 160\(1\)](#), [451\(3\)](#).
 - v. Sports: [KIN 112\(1\)](#), [113\(1\)](#), [118\(1\)](#), [127\(1\)](#), [130\(1\)](#), [133\(1\)](#), [135\(1\)](#), [143\(1\)](#), [145\(1\)](#), [147\(1\)](#), [149\(1\)](#), [234\(2\)](#), [264\(2\)](#), [273\(1\)](#).
2. Nine hours from one of the following emphases with advisor approval:
- a. Recreation Management: Prepares students for careers in administering recreation services and events in the Armed Forces, municipal parks and recreation departments, campus recreation, sporting goods retail, facility management, residential camps, resort recreation, travel, tourism and hospitality industry, meeting planning, and not-for-profit organizations: at-risk youth organizations, Boys and Girls Clubs, church recreation, Scouting, and YMCA. Complete the following three courses: [REC 406\(3\)](#), [415\(3\)](#); [MGT 340\(3\)](#) or [PSY 305\(3\)](#).
 - b. Sport Administration: Prepares students for careers in leadership opportunities in administering athletic programs, athletic teams, competitive sport camps and clinics, facilities and leagues; managing various sport entities, including Olympic training sites, municipal league programs, youth sport agencies, tournament management, sport administration and marketing, special event planning, retail sports industries, and coaching at the college or higher level. Complete the following three courses: [REC 325\(3\)](#), [406\(3\)](#), [415\(3\)](#).
3. First Aid Proficiency: Each student must show proficiency in First Aid and Cardio Pulmonary Resuscitation (CPR). Students must provide copies of their **current** First Aid and CPR cards/certifications to the internship coordinator prior to enrolling in REC 491 and maintain current certifications throughout the internship. Certifications can be completed by the following:
- a. Complete the American Red Cross First Aid course and CPR course and obtain certification. Refer to www.redcross.org for information.
 - b. Complete the American Heart Association First Aid course and CPR course and obtain certification. Refer to www.americanheart.org for information.
 - c. Emergency Medical Technician (EMT) certification.
4. Public Affairs Capstone Experience will be fulfilled by completion of [REC 335\(3\)](#) and [491\(8 or 12\)](#).
5. Minor required (or second major).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Minor(s)

Recreation, Sport, and Park Administration

Bachelor of Arts

Bachelor of Science

1. [REC 152\(3\)](#), [190\(3\)](#), [200\(3\)](#), [390\(3\)](#), [422\(3\)](#), [423\(3\)](#).
2. One course from: [REC 211\(3\)](#), [311\(3\)](#).

Accelerated graduate program in Health Promotion and Wellness Management

Eligible Missouri State undergraduate students may apply for admission to the Health Promotion and Wellness Management program and begin taking graduate course work as they complete the work for a bachelor's degree. Respiratory Therapy

Major(s)

Respiratory Therapy (Comprehensive)

Bachelor of Science

Major requirements:

Eligibility for admission to this program is limited to those persons who have completed a registry level program in Respiratory Therapy. This program is intended for those who are seeking career enhancement in the field of Respiratory Therapy.

Major core (69 hours):

Note: 11-14 hours may double count in General Education requirements.

1. Specific General Education requirements: [BIO 121\(4\)](#) or [BMS 110\(3\)](#) and [111\(1\)](#); [PHY 123\(4\)](#); [PSY 121\(3\)](#).
2. [BMS 307\(4\)](#), [308\(4\)](#), [561\(4\)](#); [BIO 212\(2\)](#) and [213\(1\)](#); [ACC 201\(3\)](#) or [ECO 155\(3\)*](#); [CHM 116\(4\)](#) and [117\(1\)](#) or [CHM 160\(4\)](#) and [161\(1\)](#).

* May double count in General Education requirements.

3. Completion of a registry level program in Respiratory Therapy. 12 hours of lower division and 23 hours of upper division transfer credit will be awarded.

Complete one of the following options:

Education option (16-18 hours):

1. [PSY 390\(3\)](#), [SEC 300\(2\)](#), [SEC 301\(2\)](#), [EDT 565\(3\)](#), [SFR 396\(2\)](#).
2. Two courses from: [PSY 441\(3\)](#); [SFR 250\(3\)](#) or [353\(2\)](#) or [354\(2\)](#); [SFR 547\(2\)](#).

Management option (15 hours):

1. [ECO 155\(3\)](#); [MGT 340\(3\)](#), [MGT 341\(3\)](#).
2. Two courses from: [ACC 211\(3\)](#); [MGT 345\(3\)](#), [MKT 367\(3\)](#), [MKT 368\(3\)](#); [QBA 237\(3\)](#).

Science option (14 hours):

1. [MTH 340\(3\)](#).
2. 11 hours of electives selected with approval of advisor.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

General information

Clinical hours

Clinical and laboratory hours represent the number of hours per week the course will meet in clinical and laboratory experiences outside the classroom.

In nursing, three clinical hours are required for one credit hour. For example, a four credit hour clinical course with two hours of lecture will have six hours of clinical experiences.

Two laboratory hours are required for one credit hour. For example, a four credit hour laboratory course with two hours of lecture will have four hours of laboratory experience.

Undergraduate Catalog

Nursing Courses

Nursing (NUR) courses

NUR 199 Health Topics

Topics of general interest in health care system, and the health professions. Topics may vary each semester; the course may be taken to a maximum of 10 hours provided the same topic is not repeated. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

NUR 300 Nursing Transition

Prerequisite: graduate of a practical nurse program approved by a US state board of nursing.

Content relevant to the transition from the practical nurse role to the professional registered nurse role.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall

NUR 302 Concepts in Nursing

Prerequisite: admission to Nursing (Pre-licensure).

Introduction to nursing process, theory, and concepts relevant to professional nursing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 303 Art and Science of Nursing I

Prerequisite: admission to Nursing (Pre-licensure).

Introduction to basic skills and technology used in professional nursing. Includes clinical experience of not less than 96 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	6	Fall, Spring

NUR 304 Art and Science of Nursing II

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements.

Introduction to complex skills, technology, and nursing care of the adult client in professional nursing. Includes clinical experience of not less than 96 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	6	Fall, Spring

NUR 312 Medical Surgical Nursing II

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements.

Professional nursing care of adult clients experiencing acute and chronic illness. Includes clinical experience of not less than 90 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	4	6	Fall, Spring

NUR 315 Issues in Contemporary Nursing

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements or permission of instructor.

Introduction to contemporary nursing issues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

NUR 322 Nursing: The Childbearing Family

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements.

Professional nursing care of childbearing families in diverse settings. Includes clinical experience of not less than 45 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

NUR 323 Nursing: The Pediatric Client and Family

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements.

Professional nursing care of pediatric clients and their families in diverse settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 325 The Pediatric Client Clinical Experience

Prerequisite: NUR 323; and admission to Nursing (Pre-licensure); and meet program progression requirements.

Professional nursing care of pediatric clients and their families in diverse settings; includes clinical experience of not less than 96 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	6	Summer

NUR 326 Current Issues in Children's Health and Safety

Issues relative to the health and safety of children. Methods to reduce morbidity and mortality rates are included. Content appropriate for non-nursing majors. Variable content course. Cannot be used to meet the nursing

elective requirement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

NUR 327 Issues in Women's Health

Issues concerning women's health. Content is appropriate for non-nursing majors. Variable course content. Cannot be used to meet the nursing elective requirement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

NUR 331 Nursing: The Mental Health Client

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements.

Professional nursing care of mental health clients in diverse settings. Includes clinical experience of not less than 48 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

NUR 342 Nursing: Health Assessment

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements.

Acquisition and utilization of skills in health history interviewing and physical assessment of clients throughout the life span.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

NUR 355 Nursing: Pathophysiology for Healthcare Providers

Prerequisite: admission to Nursing (Pre-licensure); and introductory biology course and physiology course; and meet program progression requirements or permission of instructor.

Exploration of pathophysiology with a focus on health care problems relevant to the entry-level nurse or healthcare professional.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 360 Introduction to Pharmacology

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements, or permission of instructor.

Introduction to basic pharmacology, pharmacokinetics and pharmacodynamics of major drug classifications.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 416 Nursing: The Older Adult Client

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements.

Professional nursing care of older adults in diverse settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

NUR 420 Integrative Healthcare Concepts

Exploration of integrative health care concepts and interventions used to promote health and well being of individuals, families and groups from diverse backgrounds. Provides an introduction to theories and research which underlie patient education, family assessment and intervention, and selected noninvasive therapies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

NUR 442 Nursing: Community Health

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements.

Theory and clinical experience in community nursing practice with a focus on vulnerable populations across the global spectrum. Focus on nursing knowledge and skills in community health nursing and nursing research to promote health and prevent disease. Includes clinical experiences of no less than 45 hours. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

NUR 475 Nursing Internship

Prerequisite: admission to Nursing (Pre-licensure).

This clinical course fosters the development of nursing roles, clinical nursing skills, communication, therapeutic nursing interventions, and critical thinking in approved health care agencies and in the community. Will include clinical hours of not less than 135 hours. May be repeated. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	9	Fall, Spring, Summer

NUR 478 Nursing: Senior Seminar

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements.

Exploration of issues and policies affecting nursing as a profession. Also includes preparation for licensure.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

NUR 482 Nursing: Leadership and Management

Prerequisite: admission to Nursing (Pre-licensure); and meet program progression requirements.

Development of the nurse as a leader and manager in diverse settings. Includes clinical experience of not less than 96 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	4	6	Fall, Spring

NUR 487 Research and Evidence-Based Practice

Prerequisite: admission to the Nursing (Pre-licensure); and meet program progression requirements.

This course provides the student an introduction of nursing research and scholarly writing, evidence-based practice, and concepts of quality improvement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 490 Critical Care Nursing

Prerequisite: NUR 312; admission to Nursing (Pre-licensure); and meet progression requirements or permission of instructor.

An overview of physiological, psychological, social, cultural, legal and ethical factors that influence the health of persons with critical health care needs. Emphasis will be placed on roles and responsibilities for critical care providers.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

NUR 492 Basic EKG Interpretation

Prerequisite: admission to Nursing (Pre-licensure or completion program for registered nurses); and meet program progression requirements or permission of instructor.

This course introduces a systematic method of assessing single lead EKG's. The course includes analysis and treatment of sinus rhythms, conduction blocks, atrial, junctional and ventricular dysrhythmias. Content appropriate for nurses and other health care professions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

NUR 499 Special Topics in Nursing

Prerequisite: permission.

Independent study in area of special interest. May be taken up to maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

NUR 501 Gerontological Health Care

Prerequisite: junior standing.

This course will address health issues of older adults, including the normal biological and psychosocial aging process, common health problems, and access to and use of health services. It includes international models of aging and geriatric care. The focus is on healthy aging and adaptation to chronic health conditions. This course has a community experience component. May be taught concurrently with NUR 631. Cannot receive credit for both NUR 631 and NUR 501.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 502 Rural Health

Prerequisite: junior standing.

This course offers a study of health care delivery in rural communities. It includes theoretical foundations, cultural considerations, and specific characteristics of rural environments and people. Local and international perspectives will be explored. This course has a community experience component. Identical with SWK 502. Cannot receive credit for both NUR 502 and SWK 502. May be taught concurrently with NUR 632. Cannot receive credit for both NUR 632 and NUR 502.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 503 Transcultural Healthcare

Prerequisite: permission of instructor.

Exploration of health beliefs, values, and practices of other cultures. This is a short-term Education Abroad course and counts as an elective toward the Bachelor of Science in Nursing degree. May be taught concurrently with NUR 633. Cannot receive credit for both NUR 633 and NUR 503.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

NUR 515 Healthcare Informatics

Integration of health, computer and information sciences in managing information to support healthcare and research. Development of skill in managing information and using information systems relevant to health care.

Identical with NRS 515. Cannot receive credit for both NUR 515 and NRS 515. May be taught concurrently with NUR 635. Cannot receive credit for both NUR 635 and NUR 515.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

NUR 530 Forensic Nursing: A Multidisciplinary Approach

Prerequisite: admission to Nursing (Pre-licensure or completion program for registered nurses); and meet program progression requirements or permission of instructor.

This course will explore the professional, ethical, and legal aspects of forensic nursing including the multidisciplinary approach to the care of the sexual assault victim and other victims of violent crime, the collection of forensic evidence and documentation of findings, and testifying in court. This course meets the educational component to take the certification exam as a Sexual Assault Nurse Examiner (SANE) nurse.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

NUR 565 Advanced Human Pathophysiology

Prerequisite: admission to Nursing (Pre-licensure or completion program for registered nurses); and meet program progression requirements or permission of instructor.

Exploration of pathophysiology with focus on health care problems relevant to nursing. Identical with NRS 565. Cannot receive credit for both NUR 565 and NRS 565. May be taught concurrently with NUR 640. Cannot receive credit for both NUR 565 and NUR 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 596 Independent Study in Nursing

Prerequisite: permission of instructor.

Special topics for individual students may be offered as specific topics of interest or as needs arise which are not covered by courses or content in the program. May be repeated for credit for a maximum of 6 credit hours as topics change. May be taught concurrently with NUR 695. Cannot receive credit for both NUR 695 and NUR 596.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

NUR 597 Special Topics in Nursing

Prerequisite: permission of instructor.

Special topics for groups of students may be offered as specific topics of interest or as needs arise which are not covered by courses or content in the program. May be repeated for credit for a maximum of 6 credit hours as topics change. May be taught concurrently with NUR 696. Cannot receive credit for both NUR 696 and NUR 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3	1	3	Upon demand

NUR 631 Gerontological Health Care

This course will address health issues of older adults, including the normal biological and psychosocial aging process, common health problems, and access to and use of health services. It includes international models of aging and geriatric care. The focus is on healthy aging and adaptation to chronic health conditions. This course has a community experience component. May be taught concurrently with NUR 501. Cannot receive credit for both NUR 501 and NUR 631.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 632 Rural Health

This course offers a study of health care delivery in rural communities. It includes theoretical foundations, cultural considerations, and specific characteristics of rural environments and people. Local and international perspectives will be explored. This course has a community experience component. Identical with SWK 602. Cannot receive credit for both NUR 632 and SWK 602. May be taught concurrently with NUR 502. Cannot receive credit for both NUR 502 and NUS 632.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 633 Transcultural Healthcare

Prerequisite: permission of instructor.

Exploration of health beliefs, values, and practices of other cultures. This is a short-term Education Abroad course. May be taught concurrently with NUR 503. Cannot receive credit for both NUR 503 and NUR 633.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

NUR 635 Healthcare Informatics

Integration of health, computer and information sciences in managing information to support healthcare and research. Development of skill in managing information and using information systems relevant to health care. May be taught concurrently with NUR 515. Cannot receive credit for both NUR 635 and NUR 515.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

NUR 640 Advanced Human Pathophysiology

Prerequisite: admission to a graduate nursing program or permission of instructor.

Exploration of pathophysiology with focus on health care problems relevant to nursing. May be taught concurrently with NUR 565. Cannot receive credit for both NUR 640 and NUR 565.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 695 Independent Study in Nursing

Prerequisite: permission of instructor.

Special topics for individual students may be offered as specific topics of interest or as needs arise which are not covered by courses or content in the program. May be repeated for credit for a maximum of 6 credit hours as topics change. May be taught concurrently with NUR 596. Cannot receive credit for both NUR 596 and NUR 695.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

NUR 696 Special Topics in Nursing

Prerequisite: permission of instructor.

Special topics for groups of students may be offered as specific topics of interest or as needs arise which are not covered by courses or content in the program. May be repeated for credit for a maximum of 6 credit hours as topics change. May be taught concurrently with NUR 597. Cannot receive credit for both NUR 597 and NUR 696.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3	1	3	Upon demand

NUR 700 Epidemiology

Prerequisite: admission to a graduate program in Nursing.

This course is an introduction to the epidemiological methods and procedures utilized in the study of the origin, distribution, and control of disease. It will include the study of infectious and non-infectious disease etiology, including vector control, host defenses and resistance, and investigation of disease outbreaks. Students will learn to use basic epidemiological concepts and methods for program planning, evaluation, and research. Basic statistical measures used in the analysis of clinical and epidemiological evaluations, including measures of disease frequency and measures of absolute and relative effects, will be covered. Identical with PBH 720. Cannot receive credit for both NUR 700 and PBH 720.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 701 Nursing Science

Prerequisite: admission to a graduate program in nursing or permission of instructor.

This course is designed to address how nursing science has evolved and the state of the art of nursing science. Emphasis will be placed on analysis and critique of existing nursing models and theories.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

NUR 703 Population Health: A Local to Global Perspective

Prerequisite: admission to a graduate program in nursing or permission of instructor.

This course fosters development of advanced knowledge of health systems and social determinants of population health from a local, state, national, and global perspective. The phenomena of cultural competence,

health disparities, health promotion, community health assessment, and a global health outlook will be explored. The course is a pre/corequisite for NUR 704.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

NUR 704 Population Health Practicum

Prerequisite: admission to a graduate program in nursing or permission of instructor; NUR 703 or concurrent enrollment.

This course is a clinical component of NUR 703. The clinical experience will include 96 hours of immersion into a vulnerable, underserved or culturally diverse population.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Fall

NUR 705 Population Health Management I

Prerequisite: NUR 703 and NUR 704 and admission to a graduate program in nursing or permission of instructor.

This course builds on foundational knowledge of population health concepts, models, skills, roles, and technology used to identify the health care needs of vulnerable populations experiencing health disparities. An emphasis is placed on data science, risk management, and program planning and development of interventions across the continuum of care.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Summer

NUR 706 Population Health Management II

Prerequisite: NUR 703 and NUR 704 and NUR 705 and admission to a graduate program in nursing.

This course builds on knowledge and skills in population health used to deliver, manage, and evaluate health care across the care continuum. Achieving sustainable solutions to health disparities and evaluation of outcomes in terms of quality, safety, effectiveness, satisfaction, and fiscal considerations are emphasized. A focus on disease prevention and management using health informatics, data science, and models of collaborative health care delivery is provided.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	6	Fall

NUR 711 Advanced Roles and Leadership in Nursing

Prerequisite: admission to a graduate program in Nursing.

Examination of advanced nursing roles with emphasis on role theory, leadership, and advanced competencies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

NUR 729 Acute Care Treatment Modalities I

Prerequisite: admission to a graduate program in nursing or permission of instructor.

This course will introduce a variety of diagnostic and treatment modalities common to the acute care setting to be utilized in practice as an Adult-Gerontology Acute Care Nurse Practitioner (AGACNP). The course will require an on-campus residency where hands-on techniques will be used to teach AGACNP students common procedures used in the acute care setting as well as faculty observed head to toe assessment which must be completed prior to matriculation into clinical courses.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Summer

NUR 730 Family Practice I

Prerequisite: admission to a graduate program in nursing or permission of instructor.

Emphasis on evidence-based clinical practice to promote health and prevent chronic disease. Didactic and clinical experiences include assessment, diagnosis and management of acute health problems in the geriatric, adult and pediatric population. Includes clinical experiences of not less than 96 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	4	6	Fall

NUR 733 Advanced Physical Assessment and Health Promotion

Prerequisite: admission to a graduate program in nursing or permission of instructor.

Advanced critical thinking, communication and diagnostic skills needed to obtain comprehensive and focused history and physical exams, analyze assessment data, and focus on health prevention and promotion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

NUR 734 Advanced Physical Assessment and Clinical Reasoning

Prerequisite: admission to a graduate program in nursing or permission of instructor.

Advanced critical thinking, communication and diagnostic skills needed to obtain comprehensive and focused history and physical exams, analyze assessment data, generate differential diagnoses, evaluate and utilize screening and diagnostic modalities appropriately. An evidence-based practice framework will be utilized. Identical with ANE 734. Cannot receive credit for both NUR 734 and ANE 734. Variable credit course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5-6			Fall, Spring

NUR 735 Acute Care Treatment Modalities II

Prerequisite: NUR 729 and NUR 745 and NUR 755 and permission.

This course will build on previous treatment modalities and clinical courses. An online case study and discussion format will be used to guide students to apply the acute care knowledge gained in previous courses as they develop their role as Adult-Gerontology Acute Care Nurse Practitioners. This course should be completed prior to the final clinical semester.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring, Summer

NUR 745 Acute Care I

Prerequisite: NUR 729 or concurrent enrollment and permission.

This course will introduce practicing masters and doctoral prepared nurses to the role of Adult-Gerontology Acute Care Nurse Practitioner. This is the first course designed to prepare the student to assess, diagnose, and manage the complex and acutely ill adult and geriatric patient. The course will build on previous theory, technology, and pharmacological knowledge and incorporate advanced physical assessment, diagnostics, and evidence-based guidelines for the care of the complex and acutely ill adult and geriatric patient. Teaching methods including both didactic and clinical components. The clinical component includes no less than 168 direct-care hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	3	9	Fall

NUR 750 Family Practice II

Prerequisite: admission to a graduate program in nursing or permission of instructor.

Emphasis on evidence-based clinical practice to promote health and prevent chronic disease. Didactic and clinical experiences include assessment, diagnosis and management of chronic health problems in the geriatric, adult and pediatric population. Includes clinical experiences of not less than 96 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	4	6	Spring

NUR 755 Acute Care II

Prerequisite: NUR 729 and NUR 745 and permission.

This course will further develop concepts necessary for practice as an Adult-Gerontology Acute Care Nurse Practitioner acquired in Acute Care I. The course will continue to build on previous theory, technology, and pharmacological knowledge and incorporate advanced physical assessment, diagnostics, and evidence-based guidelines for the care of the complex and acutely ill adult and geriatric patient. Teaching methods include both didactic and clinical components. The clinical component includes no less than 168 direct-care hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	3	9	Spring

NUR 761 Advanced Pharmacotherapeutics

Prerequisite: admission to a graduate program in nursing or permission of instructor.

An in-depth analysis of clinical pharmacotherapeutics for nurses in advanced practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 762 Prescriptive Practices for the Advanced Practice Nurse

Prerequisite: admission to the graduate program in Family Nurse Practitioner or permission of instructor; and concurrently enrollment in NUR 761, section 1.

This course is taken in conjunction with NUR 761 Section 1, to further investigate pharmacokinetics and pharmacodynamics for the advanced practice nurse. Emphasis will be placed on drug management and rationale prescribing including regulatory considerations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

NUR 765 Applications of Advanced Pathophysiology

Prerequisite: admission to a graduate program in Nursing.

Clinical application of advanced pathophysiology for advanced nursing roles. Includes laboratory experiences of not less than 32 contact hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

NUR 770 Family Practice III

Prerequisite: admission to a graduate program in nursing or permission of instructor.

This course covers special clinical topics in nurse practitioner practice including, but not exclusive to procedures, emergencies/trauma, wilderness medicine, pain management, and generic disorders. Includes clinical experiences of not less than 96 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	4	6	Fall

NUR 772 Advanced Research Methods in Nursing

Prerequisite: admission to a graduate program in nursing or permission of instructor.

Critical analysis of the researcher role, the research process, and research ethics within a nursing framework. Application of learned principles will result in the development of the research proposal.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

NUR 775 Acute Care III

Prerequisite: NUR 729 and NUR 735 and NUR 745 and NUR 755 and permission.

This course will further develop concepts necessary for practice as an Adult-Gerontology Acute Care Nurse Practitioner and will build on knowledge acquired in Acute Care I and II to guide the student in the developing the Adult-Gerontology Acute Care Nurse Practitioner role. The course will continue to build on previous theory, technology, and pharmacological knowledge and incorporate advanced physical assessment, diagnostics, and evidence-based guidelines for the care of the complex and acutely ill adult and geriatric patient. Teaching methods include both didactic and clinical components. The clinical component includes no less than 224 direct-care hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	2	12	Fall

NUR 780 Teaching/Learning for Health Care Educators

Prerequisite: admission to a graduate program in nursing or permission.

Designed to examine works of major learning theorists and investigate research related to teaching methods and learning. Identification of teaching/learning strategies used in health care education and practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NUR 781 Nursing Education Practicum

Prerequisite: NUR 780; and admission to a graduate program in nursing or permission.

Clinical experience in a nurse educator role in a basic education program. Application of educational and clinical practice theories and principles in a clinical teaching setting. This course has no less than 144 clinical hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	9	Fall, Spring, Summer

NUR 782 Program Development and Evaluation in Nursing Education

Prerequisite: NUR 780; and admission to a graduate program in Nursing; or permission of instructor.

Explore components, processes, and skills involved in the development, implementation, and evaluation of academic and non-academic settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

NUR 783 Nursing Education Practicum II

Prerequisite: admission to the Nurse Educator specialization.

Clinical experience in a nurse educator role in a healthcare or community setting with emphasis on application of educational theories and principles. Includes clinical experiences of not less than 96 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	6	Fall, Spring

NUR 784 Technology in Health Care Education

Prerequisite: permission.

This course explores various technology-based health education resources, such as blogs, wikis, YouTube/SchoolTube, Podcasts, Webinars, and social networking tools utilized to support the teaching and learning process. Strategies to assess learners, to develop learner evaluation plans, and to measure learning outcomes will be discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

NUR 785 Population Health Management Education Practicum

Prerequisite: NUR 703 and NUR 704 and NUR 705; and NUR 706 or concurrent enrollment in NUR 706; and admission to a graduate program in nursing.

This clinical course applies knowledge of population health concepts, models, skills, and roles to the health care needs of vulnerable populations. Aspects of program development, implementation, and evaluation will be

emphasized.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	9	Fall, Spring, Summer

NUR 787 Advanced Nursing Clinical Management

Prerequisite: NUR 780 and NUR 782; and admission to a graduate nursing program or permission.

Clinical experience in advanced nursing roles to develop in-depth knowledge and expertise in a healthcare or community setting. This course has no less than 96 clinical hours. This course may be taken as variable credit, may be taken as 2-4 credit hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2-4			Fall, Spring, Summer

NUR 790 Family Nurse Practitioner Advanced Practicum

Prerequisite: admission to a graduate program in nursing or permission of instructor.

Development of the role of a family nurse practitioner in a supervised setting. Includes clinical experiences of not less than 240 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	1	15	Fall, Spring, Summer

NUR 797 Capstone Project

Prerequisite: NUR 772; and admission to a graduate program in nursing.

Active participation in the development, implementation, and evaluation of advanced nursing role capstone project. Must be repeated for a minimum of 3 hours. Variable credit, may be taken 1-3 credit hours. This course has no less than 144 clinical hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

NUR 798 Research

Prerequisite: permission of research advisor.

Application of the research process in the supervised study of a selected problem. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

NUR 799 Thesis

Prerequisite: admission to the Family Nurse Practitioner or Nurse Educator specialization.

Demonstration of the capacity for research and independent thought culminating in a thesis. Must be repeated for a minimum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

NUR 800 DNP Leadership I: Concepts for Evidence-Based Practice

Prerequisite: admission to the DNP Program and meet program progression requirements.

This course explores and applies foundational concepts and theories for the development of the DNP nurse leader and the DNP Change Project. Concepts include transforming healthcare through evidence-based practice, quality improvement, leadership in healthcare systems, project planning, evaluation of evidence, and consideration of disparities in health and healthcare from a population focus. This course has no less than 48 clinical hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	1	Summer

NUR 802 Emerging Science and Methods of Advanced Practice

Prerequisite: admission to the DNP Program and completion of a graduate level nursing theory course and a graduate level nursing research course.

In this course, concepts, theories, and philosophical perspectives relevant to nursing science, research, and advanced nursing practice will be examined. Emphasis will be placed on exploring, analyzing, and applying concepts, theories, philosophies, and traditional and translational research methods, to the discipline of nursing,

and to the student's area of research. The use of systematic reviews, meta-analysis, and meta-synthesis in the student's DNP project and in nursing practice will be explored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

NUR 810 Finance Management and Entrepreneurship for Advanced Nursing Roles

Prerequisite: admission to the DNP Program and meet program progression requirements.

This course focuses on the understanding and analysis of concepts and issues related to finance, budgeting, resource management, funding, reimbursement, cost-benefit analysis, and entrepreneurship as applicable to advanced nursing roles within the changing health care environment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

NUR 824 Health Policy to Improve Health Disparities

Prerequisite: admission to a graduate program in nursing.

This course will explore the advanced roles and skills needed in health policy advocacy, analysis, development, implementation, and evaluation. Advanced advocacy skills and tools for addressing health care cost, quality, and access issues; as well as social justice, vulnerable populations, and health disparities, will be explored. Emphasis will be placed on understanding the complexities of local, national, and global health issues and policy initiatives necessary to improve health outcomes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

NUR 830 DNP Leadership II: Impacting Disparities in Health and Healthcare

Prerequisite: admission to the DNP Program and meet program progression requirements.

Building on NUR 800, the focus of this course includes the concepts of leadership, change, problem solving, ethical decision making theories and their application to project planning. The concepts of translational research, quality improvement, and budgeting, within a health and healthcare disparities framework will be addressed and applied. This course has no less than 144 clinical hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	3	3	Fall, Spring

NUR 840 Technology for Transforming Nursing and Healthcare Systems

Prerequisite: admission to a graduate program in nursing or permission.

This course is designed to provide an overview of nursing and healthcare information technology applicable to advanced nursing roles. The purpose of this course is to explore information system concepts and leverage technologies that can be used to improve quality, enhance patient safety, and transform the health of individuals, families, communities and populations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring, Summer

NUR 860 DNP Leadership III: Transforming Systems

Prerequisite: admission to the DNP Program and meet program progression requirements.

This course builds on previous DNP Leadership courses with an emphasis on advanced leadership roles for transforming health and healthcare disparities at the systems level. Concepts addressed include implementing a strategic plan and evaluating plan outcomes; resource management; leading and managing change and innovation in diverse healthcare environments; healthcare economics; influencing healthcare policy, and organizational culture and behavior; program/impact evaluation. Advanced leadership roles, such as consultant, entrepreneur, grant writer, mentor, advanced advocate, and change agent will be included. During this course an evidence-based DNP project to transform practice within a healthcare system will be implemented and evaluated. This course has no less than 144 clinical hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	3	3	Fall, Spring

NUR 880 Leadership and Innovation in Population Health Nursing

Prerequisite: admission to the Post-Masters Population Health Certificate program or permission.

This course is for students who need additional clinical learning experiences to meet the required clinical contact hours to meet DNP clinical admission requirements. The course focuses on experiential learning emphasizing the use of evidence-based practice, innovation, organizational collaboration, and leadership in

health care. Students will acquire clinical experiences through a non-paid internship with healthcare leaders. Activities include completion of an organizational and needs assessment, and implementation of an evidence-based change project. This course includes clinical experience of not less than 144 contact hours. Clinical hours are counted towards the post-baccalaureate clinical hours required for DNP programs. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	9	Fall, Spring, Summer

NUR 896 Independent Study in Community and Population Health Leadership

Prerequisite: admission to the Post-Masters Population Health Certificate program, or permission, and completion of graduate epidemiology course.

This course is for students who need additional clinical learning experiences to meet the required clinical contact hours to achieve DNP competencies. Clinical experiences via independent study will focus on specific topics of interest in community and population health leadership. This course includes clinical experience of 48 contact hours per credit hour. Clinical hours are counted towards the post-baccalaureate clinical hours required for DNP programs. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

NUR 993 Transforming Practice

Prerequisite: admission to the DNP program and meet program progression requirements.

During this course, the DNP student will utilize and synthesize project findings with current evidence to develop scholarly products of publications and presentations for dissemination. This course has no less than 192 clinical hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	0	12	Fall, Spring, Summer

NUR 998 Clinical Development

Prerequisite: admission to a graduate program in nursing or permission.

This course is continued clinical application for the students requiring additional clinical time. This course cannot be repeated. This course has no less than 48 clinical hours. This course can be taken for either 1 or 2 credit

hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

NUR 999 Active in DNP Project

Prerequisite: permission of DNP project advisor.

This course is continued application of translational research process in the supervised project of a selected evidence-based practice problem. This course is for students who require additional time to complete the DNP project. May be repeated for a maximum of 6 hours. Does not count toward degree requirements.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

Nursing-RN Completion Program (NRS) courses

NRS 306 Professional Emergence

Prerequisite: admission to Nursing (completion program for registered nurses).

Enhancement of nurses' ability to function as professionals. Survey of past, current, and developing trends in nursing and health care delivery, including historical, socio-cultural, legal and ethical dimensions in nursing practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

NRS 335 Pathophysiology for the Registered Nurse

Prerequisite: admission to Nursing (completion program for registered nurses); and meet program progression requirements or permission of instructor.

This course provides a study of the essential concepts of major diseases/disorders and disease processes relevant to the registered nurse.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NRS 338 Pharmacology for the Registered Nurse

Prerequisite: NRS 335 or permission of the instructor; and admission to Nursing (completion program for registered nurses); and meet program progression requirements.

This course provides an in-depth study of the pharmacological treatments of the most current diseases/disorders and disease processes identified in Missouri.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NRS 341 Nursing: Individuals and Families

Prerequisite: RN; and admission to Nursing (completion program for registered nurses); and meet program progression requirements.

Application of nursing theory and nursing process in the health care of individuals and families.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NRS 342 Nursing: Health Assessment

Prerequisite: admission to Nursing (completion program for registered nurses); and meet program progression requirements.

Improvement and utilization of skills in health history interviewing and physical assessment of clients throughout the life span.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

NRS 353 Research for the Registered Nurse

Prerequisite: Writing I General Education Course and 300 level or greater statistics course.

This course provides the registered nurse an introduction to nursing research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NRS 357 Evidence Based Practice for the Registered Nurse

Prerequisite: NRS 353 or permission of instructor; and admission to Nursing (completion program for registered nurses); and meet program progression requirements.

This course provides the registered nurse an introduction to evidence-based practice, and concepts of quality improvement at the baccalaureate level.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

NRS 442 Community Health Nursing I

Prerequisite: admission to Nursing (completion program for registered nurses); and permission of instructor.

Theory of nursing practice to aggregates and communities. Focus on nursing knowledge in public health, community health nursing, and nursing research to promote health and prevent disease.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

NRS 443 Community Health Nursing II

Prerequisite: NRS 442; and concurrent enrollment in NRS 482; and admission to Nursing (completion program for registered nurses); and permission of instructor.

Theory and clinical experience in nursing practice to aggregates and communities. Focus on nursing knowledge and skills in community health and research to promote health and prevent disease. Includes clinical experiences of not less than 48 hours. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Fall, Spring, Summer

NRS 482 Advanced Leadership and Management for Registered Nurses

Prerequisite: concurrent enrollment in NRS 443; and admission to Nursing (completion program for registered nurses); and permission of the instructor.

Development of the licensed registered nurse as a leader and manager in diverse settings. Includes clinical experience of not less than 48 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Fall, Spring, Summer

NRS 515 Nursing Informatics

Prerequisite: admission to Nursing (completion program for registered nurses).

This course is designed to provide an integration of health, computer, and information sciences in managing information to support healthcare and research. The students will develop skills in managing information and using information systems relevant to healthcare. Identical with NUR 515. Cannot receive credit for both NUR 515 and NRS 515.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

NRS 565 Advanced Human Pathophysiology

Prerequisite: admission to Nursing (completion program for registered nurses).

Exploration of pathophysiology with focus on health care problems relevant to nursing. Identical with NUR 565. Cannot receive credit for both NRS 565 and NUR 565.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

Health Care Management (HCM) courses

HCM 301 Health Care Organization

Analysis of organizational structure, the nature of health and health care delivery. Emphasizes the interrelatedness of cultural, economic, political, and social aspects of health care delivery along with its services and management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HCM 303 Health Care Legal Issues

Introduction to the legal system as it relates to health care. Legal responsibilities and issues related to health care institutions, health provider/patient relationships, medical records, malpractice insurance, licensure of health professionals, and ethical problems/questions in health care.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HCM 504 Health Care Economics

Recommended Prerequisite: ECO 165 or AGB 144. A basic study of the major economic issues facing the health care industry. Emphasis will be placed on the major elements of economic theory from a micro-economic perspective and how these theories are applied in the area of health care. Identical with ECO 504. Cannot receive credit for both HCM 504 and ECO 504. May be taught concurrently with HCM 604. Cannot receive credit for both HCM 604 and HCM 504.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HCM 604 Health Care Economics

Recommended Prerequisite: ECO 165 or AGB 144. A basic study of the major economic issues facing the health care industry. Emphasis will be placed on the major elements of economic theory from a micro-economic perspective and how these theories are applied in the area of health care. Identical with ECO 604. Cannot receive credit for both HCM 604 and ECO 604. May be taught concurrently with HCM 504. Cannot receive credit for both HCM 504 and HCM 604.

Nursing (Pre-licensure, 4-year program)

Major(s)

Nursing (Pre-licensure, 4-year program)

Bachelor of Science in Nursing

The School of Nursing offers a pre-licensure, 4-year nursing program that leads to a Bachelor of Science in Nursing degree (BSN). Admission to this program is by application and selection as stated in the admission policies.

1. Student should refer to the *BSN Pre-Nursing Handbook* for additional information of application and admission policies.
2. Student should refer to the *BSN Student Handbook* for additional information on the policies and procedures in the School of Nursing.

Admission to the Bachelor of Science in Nursing program

1. Admission to the Bachelor of Science in Nursing program (BSN) is competitive and selective, and not all who apply can be accommodated.
 - a. Students will be admitted to the nursing program twice a year for full-time study.
 - b. Applications for admission to the program are due January 31 or July 31, on or before 5:00 PM CST and will be reviewed beginning the following month and continue until the class is full.
2. Students are encouraged to meet with an advisor in the [McQueary College of Health and Human Services Advisement Center](#) prior to or upon entering the University to ensure the proper selection and sequencing of prerequisites for the BSN program.
3. The decision to admit a student to the BSN program will be based on a holistic picture of the completed course work and values that are consistent with the conduct of the profession and the ANA Code of Ethics

for Nurses (ANA, 2015).

Application policy

1. Admission to Missouri State University.
2. Completion of application to the Pre-licensure BSN program to the School of Nursing, including a current resume.
3. Complete a job shadowing experience with a registered nurse (RN) for a minimum of eight (8) total hours. Provide the required information as indicated on the application.
4. Submission of official transcripts of all college course work.
5. Completion of a minimum of 43 credit hours.
6. Completion of the General Education Foundations courses.
7. Completion of the prerequisites [BMS 307\(4\)](#) or [KIN 250\(3\)](#); [BMS 308\(4\)](#) or [KIN 252\(3\)](#) with a grade of "B-" or higher.
8. Completion of the specific General Education requirements listed in section A. of program requirements with a grade of "C" or higher.
9. [MTH 134\(3\)](#) or a higher numbered mathematics course listed in the General Education Quantitative Literacy requirement, chemistry, and anatomy will be given additional points in the selection process if completed by the application date.
10. A minimum cumulative GPA of 2.75 in all attempted college course work. Complete nursing prerequisites with a grade of "C" or higher.
11. Meet technical standards of the program in order to successfully undertake the course of study. These standards are included in the *BSN Pre-Nursing Handbook*, discussed in the application process and available upon request from the School of Nursing.
12. Applicants who have previously attended a nursing school or another school of a health-related profession must have a letter submitted from the Dean or Head of that school that includes a statement regarding the student's standing at the previous school. Applicants who have been previously dismissed from a program or were not in good standing at the time of dismissal will not be considered for admission.
13. Applicants must demonstrate academic potential to successfully complete the program.
14. Applicants must demonstrate acceptable levels of maturity, integrity, and behavior and attitudes normally expected of professional nurses.
15. Admission is based on completion of all admission requirements; on cumulative GPA of all attempted college course work, with some additional preference given to current Missouri State University students and to individuals with previous healthcare experience, leadership experience, and/or community service. Additional consideration will be awarded for the grade received on the first attempt of chemistry, anatomy, and the university mathematics requirement.

Admission policy

Once a student has been selected for admission to the BSN Program, they will receive an acceptance letter. The letter will state a required return date and the additional documentation required for full admission. All documentation must be submitted by the required date or the student will forfeit the admission and the School of Nursing will consult the waiting list to extend the next offer of admission.

The additional items include:

1. Submit evidence of current immunizations (MMR, Tetanus, Varicella, complete Hepatitis B series, and a PPD or evidence of appropriate medical follow-up for PPD positive individuals).
2. Current American Heart Association (AHA) Basic Life Support (BLS) for Healthcare Providers certification. AHA course information and requirements may be accessed at the [American Heart Association](#)

[website](#).

3. All students must carry health insurance throughout the entire program.

Additional requirements of the program

Students are:

1. Expected to purchase uniforms and initial equipment before beginning nursing courses. A list of the items and their prices can be obtained from the School of Nursing.
2. Expected to provide their own transportation to clinical sites.
3. Required to pay course fees for each semester they are enrolled in clinical nursing courses. These fees are used to pay for student liability insurance, student evaluation throughout the program, NCLEX-RN preparation, and laboratory and clinical supplies and equipment.
4. Required to initiate and pay for any security checks and drug screenings required for clinical agencies, for application to take the NCLEX-RN, and when applying for licensure with a State Board of Nursing.
5. Apply for criminal record check and receive response that the applicant has not been convicted of any crime pursuant to Section 660.317 RSMo or other disqualification that would prohibit licensure as a registered nurse.

Major requirements:

1. Specific General Education requirements that must be passed with a grade of C or better: [CHM 116\(4\)](#) or [CHM 160\(4\)](#); [PSY 121\(3\)](#); [SOC 150\(3\)](#); [MTH 134\(3\)](#) or a higher numbered mathematics course listed in the General Education Quantitative Literacy requirement. Note: CHM 160 is preferred over CHM 116.
2. The following prerequisites must be completed with a grade of B- or better before beginning the first nursing course: [BMS 307\(4\)](#) or [KIN 250\(3\)](#); [BMS 308\(4\)](#) or [KIN 252\(3\)](#).
3. The following prerequisites must be completed with a grade of C or better before beginning the first nursing course: [BIO 212\(2\)](#) and [213\(1\)](#); [DTN 240\(3\)](#).
4. Upper division Nursing must be completed with a grade of C or better (64 hours): [NUR 302\(3\)](#), [303\(5\)](#), [304\(5\)](#), [312\(6\)](#), [315\(1\)](#), [322\(4\)](#), [323\(3\)](#), [325\(2\)](#), [331\(4\)](#), [342\(4\)](#), [355\(3\)](#), [360\(3\)](#), [416\(2\)](#), [442\(6\)](#), [478\(2\)](#), [482\(6\)](#), [487\(3\)](#), [490\(2\)](#).
5. One course in statistics must be completed with a grade of C or better: [IPE 381\(3\)](#), [SOC 302\(3\)](#), [PSY 200\(3\)](#), [MTH 340\(3\)](#), [QBA 237\(3\)](#), [AGR 330\(3\)](#), [PSY 527\(3\)](#).
6. Public Affairs Capstone Experience will be fulfilled by completion of [NUR 442\(6\)](#).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Retention, progression, and graduation policies

1. After admission into the Nursing major, the students must achieve the following for retention in the major.
 - a. Achieve a grade of "C" or higher in all required courses.
 - b. Receive a "pass" in all clinical evaluations.
 - c. Maintain a University cumulative GPA of 2.50 or higher.
 - d. Maintain a cumulative GPA of 2.50 or higher in all nursing and supportive courses.

- e. Courses in the nursing major may not be taken more than twice.
 - f. Credit for upper division nursing courses taken more than eight (8) years before the student's date of graduation may be disallowed by the School of Nursing.
 - g. Demonstrate acceptable levels of maturity, integrity, and behaviors and attitudes normally expected of professional nurses.
 - h. Maintain current CPR certification, immunizations, annual PPD or appropriate medical follow-up for PPD positive individuals, and health insurance requirements.
 - i. Maintain the ability to meet technical standards of the program.
 - j. Once admitted to the nursing major, students must maintain continuous enrollment in nursing courses and progression through the program.
 - k. Students are required to complete a live NCLEX review course before graduation.
2. Students who fail to meet the retention criteria may be (a) placed on academic or clinical probation in the nursing major, or (b) dismissed from the nursing program. Students on academic probation must achieve a grade of "B-" or higher in the next 9 hours of course work in nursing or supporting courses attempted. Students on clinical probation must receive a "Pass" in all remaining nursing clinical courses. Students who fail to meet the probationary criteria or are dismissed from the program are not eligible for readmission to the nursing major.
 3. Graduation from the Pre-licensure BSN program does not guarantee a student's eligibility to become licensed as a professional nurse. Eligibility requirements include passing the NCLEX-RN exam and meeting RN licensure requirements for the state in which licensure is sought by the individual. The Missouri State Board of Nursing reserves the right to deny, revoke, or suspend a license. Refer to [State of Missouri Revisor of Statutes website](#).

Readmission policy

Students who have interrupted their progression in the nursing courses for one semester or more must apply for readmission to the School of Nursing Admission, Progression and Graduation Committee.

1. Applications for readmission will only be considered if the student was in good academic standing in both didactic and clinical courses at the time of withdrawal from the program, and if their studies have been interrupted three (3) semesters or less (excluding summer session).
2. Applications for readmission for students who were in good academic standing at the time of withdrawal and meet the time limit will be reviewed on an individual basis and be based on: space availability in the cohort, prior success in the program, and potential for successful graduation from the program.
3. Students seeking readmission should refer to the current version of the [BSN Student Handbook](#) for further information on the Reinstatement Policy for the Pre-licensure BSN program.

Transfer policy

Transfer students with prior nursing courses will be reviewed on an individual basis by evaluating course content and objectives.

Missouri State

Office of the Registrar

Undergraduate Catalog

Nursing (completion program for registered nurses)

Major(s)

Nursing (completion program for registered nurses)

Bachelor of Science in Nursing

The School of Nursing offers a junior-senior level nursing program leading to a Bachelor of Science in Nursing degree (BSN) for registered nurses. Degree candidates must be licensed registered nurse graduates of associate degree or diploma nursing programs. Admission to the program is by application and selection as stated in the admission policies. Students should refer to the *BSN-C Student Handbook* for additional information on the policies and procedures in the School of Nursing.

Admission policies

1. Acceptance of application to the University by the Office of Admissions. Note: Admission to the University does NOT automatically constitute acceptance for the professional program in nursing.
2. Current licensure in good standing as a registered nurse in the State of Missouri or in the state where they practice.
3. Students preparing to graduate from an RN program may apply and be provisionally accepted to the BSN-C program, but will be unable to take NRS courses until the RN license has been attained.
4. GPA of 2.50 or higher on a 4.00 scale, based on at least 30 hours of college work. GPAs below 2.50 will be considered on an individual basis.
5. An admission conference with a member of the School of Nursing faculty or advisor is recommended for direction in sequencing courses.
6. Applicants must demonstrate acceptable levels of maturity, integrity, and behaviors and attitudes normally expected of professional nurses.
7. Applicants must demonstrate acceptable academic potential to successfully complete the program.

8. Application deadlines for admission are August 1 for the fall semester, December 1 for the spring semester, and May 1 for the summer semester

Provisional admission requirements

Once the application has been accepted by the School of Nursing, the student will be granted provisional acceptance until the following requirements are completed and/or documentation is submitted to and accepted by the School of Nursing. Students will not be allowed to register for NRS courses until complete acceptance has been granted.

1. Criminal background check:
 - a. The School of Nursing will email the student information regarding completion of a criminal background check.
 - b. The applicant must receive a clear background check without convictions of any crime pursuant to Section 660.317 RSMo or other disqualifications that would prohibit licensure as a registered nurse.
2. Urine drug screen:
 - a. The School of Nursing will email information regarding the required urine drug screen. The information will be time sensitive, and it will be the responsibility of the student to complete the testing before the time elapses.
 - b. The applicant must receive a clear drug screen that would not hinder the professional actions of a registered nurse or prohibit licensure as a registered nurse.
3. Proof of registration with the [Family Care Safety Registry](#).

Application process

The application process for the BSN-C program is now completed through the [Nursing CAS](#) (<https://nursingcas.liaisoncas.com/applicant-ux/#/login>). The following items are required to complete the CAS application.

1. Acceptance of application to the University by the Office of Admissions. Note: Admission to the University does NOT automatically constitute acceptance for the professional program in nursing.
2. Missouri State University BearPass/M number and email address.
3. Application Fee to the School of Nursing of \$50.00. Pay online thru [Cashnet](#).
4. Proof of RN license without disqualification in state of practice or expected date of graduation from RN program. Students preparing to graduate from an RN program may apply and be provisionally accepted to the BSN-C program, but will be unable to take NRS courses until the RN license has been attained.

Additional requirements of the program

Once accepted into the BSN-C program, students will be required to purchase items required for clinical and submit the following program compliance documentation:

1. When starting coursework students will need to pay the fee for tracking software (Typhon) \$50.00.
2. Prior to clinical coursework the nursing students will be required to provide the following documentation:
 - a. Proof of negative TB status (within 1 year) or medical follow-up if positive (renewed annually).
 - b. Proof of influenza vaccination documentation for clinical (renewed annually).
 - c. Proof of current American Heart Association Basic Life Support (BLS) certification.
 - d. Proof of varicella (chicken pox) vaccination (series of two) or immunity.

- e. Proof of measles, mumps, and rubella (MMR) immunization as an adult.
 - f. Proof of hepatitis B (must complete series of 3 vaccinations) or immunity.
 - g. Proof of tetanus vaccination (within 10 years).
 - h. Proof of current health insurance.
 - i. Proof of professional liability insurance (minimum limits of \$1,000,000 each occurrence and \$3,000,000 aggregate).
3. Students are required to purchase community uniform and initial equipment before beginning nursing clinical courses. The complete community uniform is outlined in the BSN-C handbook. Items required for purchase include a School of Nursing polo shirt and name badge.
 4. Students are expected to provide their own transportation to clinical sites.
 5. Students are required to pay course fees for each semester they are enrolled in clinical nursing courses.

Major requirements (42 hours):

1. Specific General Education requirements: [SOC 150\(3\)](#) and [PSY 121\(3\)](#).
2. Upper division nursing requirements: [NRS 306\(3\)](#), [335\(3\)](#), [338\(3\)](#), [341\(3\)](#), [342\(3\)](#), [353\(3\)](#), [357\(3\)](#), [442\(3\)](#), [443\(3\)](#), [482\(3\)](#); [IPE 375\(3\)](#).
3. One course in statistics from: [SOC 302\(3\)](#), [AGR 330\(3\)](#), [MTH 340\(3\)](#), [IPE 381\(3\)](#), [PSY 527\(3\)](#), or others by permission.
4. Public Affairs Capstone Experience will be fulfilled by completion of [NRS 443\(3\)](#).
5. A maximum of six hours in NUR 499 may be counted toward the degree.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Technical requirements

The Missouri State University BSN-C is an online program. Didactic online content is delivered using asynchronous and synchronous formats. Applicants to the BSN-C program must be computer literate and be comfortable using word processing, spreadsheet management, and presentation graphics software. Students are expected to manage files, navigate the Internet and access resources, and use a computer, camera, video, scanner, and email. Students who have deficiencies in these areas are encouraged to seek training before the start of the program.

The School of Nursing uses the Blackboard course management system for all courses. Students will be required to upload documents and download files. Additionally Adobe Macromedia software is used for synchronous course offerings and other experiences. Video conferencing software may be used. Requirements of the program include access to broadband (cable or DSL) connections, a web camera and microphone, and a computer with wireless capabilities to meet the minimal hardware requirements. MSU multimedia content is optimized for Internet Explorer and Firefox.

Readmission policy

Continuing enrollment in Missouri State University must be maintained to be considered a student in the BSN-C program. Students who interrupt their education for a year or more must follow University readmission policies

and petition the School of Nursing to be reinstated in the BSN-C program at which time the previous course work will be reevaluated.

Retention, progression and graduation policies

1. After admission into the Nursing major, the students must achieve the following for retention in the major.
 - a. Achieve a grade of "C-" or better in all required courses.
 - b. Receive a "pass" in all clinical evaluations.
 - c. Maintain a University cumulative GPA of 2.50 or higher.
 - d. Maintain a cumulative GPA of 2.50 or higher in all nursing and supportive courses.
 - e. Courses in the nursing major may be repeated only one time.
 - f. Credit for upper division nursing courses taken more than 8 years before the student's date of graduation may be disallowed by the School of Nursing.
 - g. Maintain current immunizations, annual PPD or appropriate medical follow-up for PPD positive individuals, health insurance, and professional liability insurance.
 - h. Maintain current American Heart Association BLS certification.
2. Students who fail to meet the retention criteria may be (a) placed on academic or clinical probation in the nursing major or (b) dismissed from the nursing program. Students on academic probation must achieve a grade of "B-" or higher in the next 9 hours of coursework in the BSN-C program. Students on clinical probation must receive a "Pass" in all remaining nursing clinical courses. Students who fail to meet the probationary criteria or are dismissed from the program are not eligible for readmission to the BSN-C program.

Undergraduate Catalog

Occupational Therapy Courses

Occupational Therapy (OTE) courses

OTE 610 Foundations and Theory in Occupational Therapy

Prerequisite: admission to the Master of Occupational Therapy program.

This course establishes a foundation for how theory, frames of reference, and models guide occupation-based practice, as well as the history and development of the occupational therapy profession. The science of occupation key terms and concepts utilized in the field, current issues impacting occupational therapy, interprofessional practice, and professional ethics, values and responsibilities are discussed. The various areas of practice and specialization are also introduced.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Fall

OTE 612 Occupational Development Through the Lifespan

Prerequisite: admission to Master of Occupational Therapy program.

The focus of this course is on the skill progressions in typical and atypical development and how these sequences impact occupational performance across the lifespan; environmental and cultural influences on development are also examined. The cognitive, psychosocial and physical aspects of the person on daily function are discussed in relation to occupation-based practice. The acquisition of values, roles, habits, temporal adaptations, interests and interprofessional collaboration are explored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

OTE 615 Clinical Reasoning and Documentation

Prerequisite: OTE 610.

This course establishes the framework for documenting outcomes of occupation-based practice in an interprofessional environment, summarizes current theories and research about clinical and professional reasoning, and provides learning activities such as case studies designed to promote effective reasoning. Students will learn and apply effective documentation techniques used in the profession including electronic medical records.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

OTE 620 Psychosocial Perspectives in Occupational Therapy Practice

Prerequisite: OTE 610; and concurrent enrollment in OTE 680.

This course provides an overview of psychosocial conditions across the lifespan among various environments that impact client function in the areas of occupation, performance skills and performance patterns. Topics include, but are not limited to crisis intervention, therapeutic use of self, specific intervention strategies, group dynamics, types of groups, group protocol development, and interprofessional collaboration. Cultural and community perspectives of mental and physical health are also examined.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

OTE 624 Therapeutic Modalities

Prerequisite: OTE 610.

A study of the theory and application of various therapeutic modalities used in the treatment of many injuries, including ultrasound, diathermy, electrical stimulation, hydrotherapy, cryotherapy and thermotherapy. May be taught concurrently with ATC 324. Cannot receive credit for both OTE 624 and ATC 324.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

OTE 640 Evidence-Based Practice

Prerequisite: OTE 610.

Course will analyze the clinical reasoning process used in health care disciplines, examine the different types and levels of clinical evidence and explore the implementation of evidence-based practice skills in the client-centered and occupation-based practice. This course establishes a framework to develop interventions, promote health, well-being and community engagement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

OTE 645 Clinical Gross Anatomy

Prerequisite: admission to Master of Occupational Therapy program.

The course offers in-depth coverage of basic, applied, and clinical aspects of gross anatomy. An advanced, musculoskeletal anatomy course that emphasizes the study of functional relationships between musculature, nervous tissue, vascular, and skeletal components for the extremities and axial skeleton: Cadaver dissection laboratory experience is used to enhance understanding of three dimensional anatomical relationships for specific body regions. Students observe, discuss, teach, learn and dissect all body systems in detail. This course incorporates traditional didactic lectures, discussions, laboratory dissection, students teaching students (peer-teaching) in laboratory sessions, and assignments that rely on critical thinking. Identical with BMS 645. Cannot receive credit for both OTE 645 and BMS 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	6	Fall

OTE 646 Neuroscience

Prerequisite: OTE 645.

This course covers the foundations of neuroscience as they relate to the evaluation and treatment of occupational therapy clients. Topics include the properties of cells in the nervous system and major structures and functions of the central, peripheral, and autonomic nervous systems; sensory pathways, central processing and output mechanisms and how systems interact to influence occupational performance. Discussion of neurological diagnoses and theories for treatment is included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

OTE 650 Introduction to Biomedical Biomechanics

Prerequisite: OTE 645.

Biomechanical fundamentals and principles as they apply to the human organism; description of normal motion emphasizing orthopedic biomechanics and neuromuscular control. May be taught concurrently with BMS 450. Cannot receive credit for both OTE 650 and BMS 450.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

OTE 680 Fieldwork Level I, Part 1

Prerequisite: permission of Master of Occupational Therapy Program Director; and concurrent enrollment in OTE 620.

This course is designed to provide students familiarity with a variety of clients, diagnoses, age ranges, and contexts; and to see the roles or potential roles of occupational therapists. This is a supervised, 35-40 hour fieldwork experience that provides the opportunity to observe the occupational therapy process and interprofessional practice. This experience will focus on psychosocial issues in occupational therapy. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Spring

OTE 690 Fieldwork Level I, Part 2

Prerequisite: permission of Master of Occupational Therapy Program Director.

This course is designed to provide students with continued familiarity with a variety of clients, diagnoses, age ranges, and contexts; and to see the roles or potential roles of occupational therapists. This is a supervised, 35-40 hour fieldwork experience that provides the opportunity to observe the occupational therapy process and interprofessional practice. Must be repeated twice for a total of two hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

OTE 691 Pediatric Fieldwork Level I

Prerequisite: permission of the Master of Occupational Therapy Program Director.

This course is designed to provide students familiarity with a variety of clients, diagnoses, age ranges, and contexts and to explore the potential roles of occupational therapists within the pediatric practice setting. This is a supervised, 35-40-hour fieldwork experience that provides the opportunity to observe the occupational therapy process and interprofessional practice. The course focuses primarily on the pediatric population. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Spring

OTE 720 Conditions I: Cognitive Dysfunction

Prerequisite: OTE 620 and OTE 646.

This course provides an overview of the etiology, incidence and prevalence, signs and symptoms, course and prognosis, and medical management of common cognitive conditions impacting occupational performance. The effects of neurological conditions, disabilities, and disorders on individuals are examined within the cultural context of family, community, and society. Relationships among cognitive disorders, impairments, activity limitations, function/dysfunction, and participation restrictions are emphasized in relation to their impact upon occupation. Students begin to explore occupation-based assessment and treatment of the various conditions seen in interprofessional practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Summer

OTE 725 Environmental Adaptations and Assistive Technology

Prerequisite: admission to Master of Occupational Therapy program.

Concepts, principles, selection and application of environmental adaptations and assistive technology to improve client function across the lifespan will be examined. Domains presented include, but are not limited to vision, hearing, communication, mobility, cognition, and environmental controls, and interprofessional collaboration. Modifications and high and low technology devices used in occupation-based practice will be discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall

OTE 730 Conditions II: Physical Dysfunction

Prerequisite: OTE 720.

This course provides an overview of the etiology, incidence and prevalence, signs and symptoms, course and prognosis, and medical management of common physical conditions impacting occupational performance. The effects of physical conditions, disabilities, and disorders on individuals are examined within the cultural context of family, community, and society. Relationships among physical disorders, impairments, activity limitations, function/dysfunction, and participation restrictions are emphasized in relation to their impact upon occupation. Students begin to explore occupation-based assessment and treatment of the various conditions seen in interprofessional practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall

OTE 732 Applied Research Methods in Health Care

Prerequisite: admission to Master of Occupational Therapy program.

Research course in which students deepen their understanding and enhance their research abilities in order to contribute to the advancement of their chosen health care discipline. Course will explore topics of research design and research methods for conducting applied and clinical research projects with a focus on conducting outcomes-related research that can support clinical practices in the student's respective health care discipline.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

OTE 745 Therapeutic Skills I: Practice with Adults and Older Adults

Prerequisite: OTE 720.

Provides an overview of scientific inquiry, assessment, intervention planning and implementation of occupation-based practice with adults and older adults aged 21 and older; special consideration is given to the context of the family, community, environment and culture. The effects of selected medical conditions most commonly seen in occupational and interprofessional practice within this age group are covered. Students gain practical experience through the lab portion of the course which includes observation, evaluation, and assessment of adults and older adults.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall

OTE 746 Management and Policy in Occupational Therapy Practice

Prerequisite: OTE 615.

This course introduces the student to the role of the occupational therapist as a manager and leader within the broader interprofessional health care system. Students are introduced to management functions, including fiscal management, marketing, and human resource functions. Discussion of regulatory systems, legal considerations, reimbursement mechanisms, current health care policy and emerging issues impacting health care practitioners is provided. Supervisory issues specific to the occupational therapist are explored. Students will identify and illustrate the role of occupational therapy in current policy issues regarding services to underserved communities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

OTE 750 Therapeutic Skills II: Practice with Children and Adolescents

Prerequisite: OTE 745.

Provides an overview of scientific inquiry, assessment, intervention planning, and implementation of occupation-based practice with children and adolescents from birth to age 20; special consideration is given to the context of the family, community, environment and culture. The effects of selected medical conditions more commonly seen in occupational and interprofessional practice with this age group are covered. Students gain practical experience through the lab portion of the course which includes observation, evaluation, and assessment of children.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

OTE 760 Specialty Topics

Prerequisite: admission to Master of Occupational Therapy program.

Variable topics course. In-depth study of contemporary occupation-based practice. Each offering concerns a single topic. Topics of interest will cover areas related to prosthetics and orthotics, low vision, hand/upper extremities, splinting, and current professional issues, interprofessional collaboration, community engagement, clinical evaluation, client interventions, faculty expertise, and/or student interest or needs. Must be repeated for minimum of five hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

OTE 765 Community and Health Practice in Occupational Therapy

Prerequisite: admission to Master of Occupational Therapy program.

Coursework will focus on the science, theory and practice of occupational therapy in the promotion of health and wellness and the body's response to stress, illness or injury across the life span. An emphasis will be placed on the cultural and physical context of the community in which occupational and interprofessional healthcare practice occurs. This course integrates knowledge and skills for occupation-based practice to foster healthy development, prevent health problems, maintain optimal function, and enhance the occupational performance skills of individuals, families, and communities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Summer

OTE 770 Professional Capstone: Issues, Diversity, and Ethics

Prerequisite: OTE 732.

This course integrates elements and issues of professional socialization, the process of taking on the identity of an occupational therapist, and internalizing the norms of the profession. Students will incorporate professional ethics, context of services, and current professional and interprofessional issues, clinical reasoning, client-centered practice and evidence-based decision-making into the occupational therapy process. Clinical scenarios related to diverse populations and practice domains will be utilized to synthesize occupation-based interventions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

OTE 780 Fieldwork Level II, Part 1

Prerequisite: completion of all didactic coursework; and permission of Master of Occupational Therapy Program Director.

This course is the first half of the final practice experience in the curriculum to develop competent, entry-level, generalist occupational therapists. This supervised, 12-week fieldwork experience provides in-depth experience in delivering occupational therapy services to clients, focusing on the application of purposeful and meaningful occupation and/or research, administration and management of occupational therapy services. Students

demonstrate an ability to evaluate, treat, document and discharge clients with a variety of conditions across the lifespan and in a variety of practice areas. Professionalism, clinical reasoning skills, reflective and ethical practice, and communication with clients, significant others and professional colleagues are enhanced. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6			Summer

OTE 790 Fieldwork Level II, Part 2

Prerequisite: OTE 780; and permission of Master of Occupational Therapy Program Director.

This course is the second half of the final practice experience in the curriculum to develop competent, entry-level, generalist occupational therapists. Supervised fieldwork experience provides in-depth experience in delivering occupational therapy services to clients, focusing on the application of purposeful and meaningful occupation and/or research, administration and management of occupational therapy services. Students demonstrate an ability to evaluate, treat, document and discharge clients with a variety of conditions across the lifespan and in a variety of practice areas. Professionalism, clinical reasoning skills, reflective and ethical practice, and communication with clients, significant others and professional colleagues are enhanced. This in-depth supervised fieldwork will be in a different practice setting than Fieldwork Level II, Part 1. Students must complete a total of 12 weeks of Fieldwork Level II, Part 2 coursework in either one 12-week experience or two 6-week experiences. Must be repeated for a total of six hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-6			Fall

OTE 798 Research Project

Prerequisite: OTE 732; and permission of Master of Occupational Therapy Program Director.

In-depth scientific study of an occupation-based clinical problem of interest that culminates in a scholarly paper and formal community presentation. Must be repeated three times for a total of three hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Physical Therapy Courses

Physical Therapy (PTE) courses

PTE 707 Medical Human Anatomy

Prerequisite: admission to the program or permission of the department head of Physical Therapy.

This course offers an in-depth coverage of basic, applied, and clinical aspects of gross anatomy. Students observe, discuss, teach, learn, and dissect all body systems in detail. This course incorporates traditional didactic lectures, discussions, laboratory dissection, students teaching students in laboratory teaching sessions, and assignments that rely on critical thinking. Course will include on-site and blended components to facilitate integration of content and principles related to physical therapy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	3	9	Summer

PTE 710 Introduction to Physical Therapy

Prerequisite: admission to the program.

This course provides an overview of physical therapy, including the history of physical therapy and the APTA, and the physical therapist's professional responsibilities. This information is combined with the acquisition of skills and knowledge necessary to be successful in managing patients. The topics that are discussed in Professional Issues I, e.g., Code of Ethics, the Guidelines for Physical Therapy Documentation, and the Guidelines for Professional Conduct, are "transformed" into practical skills that are necessary to professionally interact with patients. Hence this course combines these concepts with the skills necessary to provide patient care. These skills include the assessment of vital signs, basic measurement techniques, examination of the body, ensuring patient safety, infection control, using proper body mechanics, using appropriate transfers, gait

training, and basic documentation, and patient and family education. Case studies, laboratory experiences, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Fall

PTE 711 Professional Issues I

Prerequisite: admission to the program.

This course provides an overview of physical therapy and the physical therapist's professional responsibilities. Information regarding the Code of Ethics, the Guidelines for Physical Therapy Documentation, and the Guide for Professional Conduct are essential components of this course. This course focuses on the psychological and social aspects of communication in health care and providing care and services to patients. This includes patients' rights, the psychological impact of illness, social considerations such as gender, race, culture and ethnicity. These concepts are integrated using case studies of various patient-therapist situations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Summer

PTE 712 Clinical Biomechanics for Physical Therapy

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course provides the basis for understanding human movement. Content includes study of the mechanical properties of musculoskeletal tissues (bone, muscle, cartilage, ligament and tendon). It also includes foundations to understand the physics of human movement (forces and moments, joint lever types, understanding joint forces through two-dimensional vector problems and static equilibrium equations). It also includes the study of the movement, muscle function, and dynamics of upper and lower limbs. Students study interactions in structure and neuromuscular control of the limbs as they relate to understanding normal and abnormal human movement. Case studies, laboratory experiences, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Summer

PTE 713 Embryology

Prerequisite: admission to the program.

In this course students will examine how prenatal development explains structures and functions of the human body. This course describes the major features of embryology, maturation of the fetus, changes that occur during pregnancy and childbirth. Included in this course will be discussions of birth defects and the potential cause of these defects. This course will cover the major systems of interest to physical therapy such as musculoskeletal system, cardiopulmonary system and neurological systems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Summer

PTE 714 Imaging Analysis in Physical Therapy Practice

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course emphasizes the analysis and interpretation of diagnostic images of patients with a variety of impairments or dysfunctions of the musculoskeletal, cardiopulmonary, nervous, and circulatory systems as they apply to contemporary physical therapy practice. Various imaging techniques will be incorporated into case studies which will be used to emphasize incorporation of image findings into the process of patient management. Case studies, laboratory experience, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	1	Spring

PTE 720 Neuroanatomy-Neuroscience

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course describes the gross anatomy and applied function of the central and peripheral nervous systems. Normal anatomy and function is compared and contrasted with abnormal anatomy and function due to disease or injury.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall

PTE 721 Professional Issues II

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course focuses on employment settings, legal issues regarding Physical Therapist Assistants, the structure of the American Physical Therapy Association, regulations, policies, practice acts, federal legislation, and direct access to patients. Additionally, this course focuses on the legal aspects of professional life including basic

elements of contract law, criminal law, educational law, employment law, insurance law, and business law. Students continue to develop an Individual Clinical Internship Plan with specific goals and objectives and select clinical sites for Clinical Internship I - II. Case studies and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

PTE 722 Physical Agent and Mechanical Modalities

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course describes thermal modalities (diathermy, therapeutic heat and cold, therapeutic ultrasound, low-power lasers, ultraviolet therapy) and mechanical modalities (spinal traction, intermittent compression devices, continuous passive movement devices, therapeutic soft tissue mobilization, and massage). In addition, the underlying scientific principles and clinical uses of physical agents and mechanical modalities are described. Case studies, laboratory experience, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Spring

PTE 723 Patient Management: Musculoskeletal I

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course emphasizes the management of patients with musculoskeletal dysfunctions of the appendicular and axial skeleton. Case studies are used to emphasize the process of patient management, i.e., examination, assessment, diagnosis, prognosis, treatment, analysis of functional outcomes, and re-assessment. General and specific examination and treatment techniques are included, stressing the integration of knowledge and skills. Treatment techniques include (but are not limited to) the use of soft tissue mobilization, myofascial release, therapeutic exercise, and basic joint mobilization. Case studies, laboratory experience, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall

PTE 726 Clinical Kinesiology for Physical Therapy

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course provides the basis for understanding human movement and is a continuation of Clinical Biomechanics of Physical Therapy. Content includes study of movement, muscle function and dynamics of the axial body (craniomandibular complex, spinal column, neck, trunk, and pelvis). Content also includes basic principles of neuromuscular control, especially in the context of human functions which integrate multiple body segments, namely posture and gait, applied to normal and pathological conditions. Case studies, laboratory experiences, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Fall

PTE 730 Motor Control/Motor Learning

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

In this course students will examine the framework necessary to apply current theory and research on motor control and motor learning to the practice of physical therapy. This course extends the information covered in Neuroanatomy - Neuroscience by discussing the neurophysiological basis of motor control and motor learning. Through the use of case studies and integrative experiences, students will apply principles of motor control, motor learning, and motor development to treat postural and mobility dysfunctions. Case studies, laboratory experiences, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

PTE 731 Pathophysiology/Differential Diagnosis I

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course covers pathological conditions and their implications for Physical Therapists. All major systems of the body are studied. The pathophysiological portion of the course integrates the knowledge acquired in physiology with abnormal physiology caused by pathology. Case studies are used to integrate concepts in patient management related to pathology and pathophysiology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PTE 732 Electrotherapeutic Modalities and Clinical Electrophysiology

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course describes electrotherapeutic modalities and clinical electrophysiologic testing. In addition, the underlying scientific principles and clinical uses and application of electrotherapeutic modalities and clinical electrophysiologic testing are incorporated. Major topics in this course include: electrical stimulation of muscle, electrical stimulation to control posture and movement (FES/NMES), electrical stimulation to control pain, electrical stimulation to promote tissue healing, iontophoresis, electroneuromyography, EMG, NCV, and biofeedback. Case studies, laboratory experience, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Summer

PTE 733 Patient Management: Musculoskeletal II

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course builds on the knowledge and skills acquired in Patient Management: Musculoskeletal I. This course emphasizes the management of patients with musculoskeletal dysfunctions of the appendicular and axial skeleton. Case studies are used to emphasize the process of patient management, i.e., examination, assessment, diagnosis, prognosis, treatment, analysis of functional outcomes, and re-assessment. General and specific examination and treatment techniques are included, stressing the integration of knowledge and skills. Treatment techniques include (but are not limited to) the use of soft tissue mobilization, myofascial release, therapeutic exercise, and basic joint mobilization. Case studies, laboratory experiences, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Spring

PTE 737 Clinical Internship I

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course provides an introduction to the clinical education component of the curriculum, as well as a four week, full-time clinical internship. Learning styles will be discussed, as well as how clinically-based learning may differ from classroom or laboratory experiences. Students will continue to develop their clinical internship plan and specific goals and objectives for this Clinical Internship. Students will complete a case study or present an "in-service" while on the four week internship write a short, reflective paper, and meet the requirements established by the program and the clinical facility.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Summer

PTE 740 Research Methods and Design

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

In this course students will examine the various types of research, as well as the differences, similarities, and overlaps between them. Specific topics include types of research designs (experimental and non-experimental research), formulation of research questions/hypothesis, issues on ethics, informed consent, control group, measurement, variables, bias, data collection and analysis, and validity of conclusion. Students will begin developing their research projects and acquire skills requisite for using scientific evidence for effective patient care.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

PTE 741 Pathophysiology/Differential Diagnosis II

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

In this course students will examine systems assessments necessary to screen patients for disorders and diseases that require referral to other healthcare providers. It prepares students for autonomous practice in a medical environment in which consumers will have direct access to physical therapy services. This course covers muscular, skeletal, neurological, cardiovascular, pulmonary, hematologic, gastrointestinal, renal, urological, hepatic, and endocrine diseases. Case studies, laboratory experiences, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

PTE 743 Patient Management: Neuromuscular I

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course emphasizes the management of patients (children and adults) who have neurological diagnoses. Specific pathologies to be discussed include balance and vestibular disorders, disorders of the spinal cord, genetic disorders, and neuromuscular disease. Case studies, laboratory experiences, and integrative experiences are used to emphasize the process of patient management, i.e., examination, assessment, diagnosis, prognosis, treatment, analysis of functional outcomes, and re-assessment. General and specific examination and treatment techniques are included stressing the integration of knowledge and skills.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Spring

PTE 744 Patient Management: Cardiovascular and Pulmonary Problems

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course presents an overview of cardiac, vascular, and pulmonary physical therapy. It integrates foundational information such as anatomy, physiology, exercise physiology, embryology, histology, pharmacology, pathology, and pathophysiology into a meaningful basis on which patient management strategies are based. This course introduces the student to cardiovascular and pulmonary assessments, interventions, and outcome analyses. The course includes information specific to pediatric, adolescent, adult, and geriatric patients.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Spring

PTE 747 Clinical Internship II

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course provides for continuing development of clinical skills in the form of a six week, full-time clinical internship. Students will continue to develop their clinical internship plan and specific goals and objectives for Clinical Internship II. Students will complete a case study or present an "in- service" while on the six week internship write a short, reflective paper, and meet the requirements established by the program and the clinical facility.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6			Fall

PTE 750 Research and Outcome Analysis

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course focuses on the management of data generated by research and outcome analyses. It will fully integrate the use of statistical methods, understanding the results of applying these methods, and making inferences or conclusions based upon the data analysis. It also addresses the larger scope of disseminating this information, professional responsibility to the public to generate meaningful data, and methods of critically analyzing results and conclusions drawn by others. In the latter portion of the course, students identify their research interests, choose or are assigned a research advisor and write a research project proposal.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

PTE 753 Patient Management: Neuromuscular II

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course is an extension of Patient Management: Neuromuscular I. This course emphasizes the management of patients (children and adults) who have neurological diagnoses including cerebral palsy and cerebrovascular accidents. Case studies, laboratory experiences, and integrative experiences may be used to emphasize the process of patient management, i.e., examination, assessment, diagnosis, prognosis, treatment, analysis of functional outcomes, and re-assessment. General and specific examination and treatment techniques are included stressing the integration of knowledge and skills.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Summer

PTE 754 Patient Management: Special Considerations Across the Life Span

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

In this course students will review biological, psychological, and sociocultural theories of maturation and aging of human beings applicable to the practice of physical therapy. Through case studies, laboratory experiences, and integrative experiences, students will compare and contrast the maturation and aging process of individuals with and without disabilities; will understand how health, fitness, and physical activity contribute to quality of life; and will apply principles learned to the examination, evaluation, and treatment of individuals of all ages. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Spring, Summer

PTE 756 Patient Management: Integumentary

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course integrates and builds upon information provided in prior course work. Specific topics include the prevention of skin disorders, management of closed and open wounds, lymphedema, and the use of specific interventions to facilitate wound repair and overall skin health.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Summer

PTE 757 Clinical Internship III

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course provides for clinical practice of developing skills in the form of a six week, full-time clinical internship. Students will continue to develop their clinical internship plan and specific goals and objectives for Clinical Internship III. Students will complete a case study or present an "in-service" while on the six week internship, write a short, reflective paper, and meet the requirements established by the program and the clinical facility.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6			Spring

PTE 760 Management of Research Projects

Prerequisite: admission to the program.

Application of the research process via supervised study of a selected problem culminating in completion of an extensive scholarly product. Variable content course. Course must be repeated for a total of 6-12 hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Fall, Spring, Summer

PTE 761 Contemporary Issues in Professional Practice

Prerequisite: admission to the program and successful completion of all prior course work therein.

This course focuses on some of the more specialized areas of physical therapy and emerging topics in rehabilitation. Alternative and holistic therapies are discussed, as well as their relationship and integration with patient rehabilitation. Case studies, laboratory experience, and integrative experiences may be used to emphasize the process of patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Summer

PTE 762 Medical Pharmacology

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course focuses on medical pharmacology, particularly those aspects that significantly impact the practice of Physical Therapy. Specific topics include drugs that affect the autonomic nervous system, the cardiovascular

system, the central nervous system, and the endocrine system. In addition, anti-inflammatory, antiviral, antibacterial, and chemotherapeutic drugs are discussed. Case studies augment clinical information and emphasize patient management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

PTE 763 Patient Management: Neuromuscular III

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course is an extension of Patient Management: Neuromuscular 1 and II. This course emphasizes the management of patients (children and adults) who have neurological diagnoses including cognitive disorders, encephalopathies, multiple sclerosis, Parkinson disease, and brain injuries. Case studies, laboratory experiences, and integrative experiences may be used to emphasize the process of patient management. General and specific examination and treatment techniques are included stressing the integration of knowledge and skills.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Fall

PTE 764 Patient Management: Exercise Physiology, Nutrition, and Wellness

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course describes the effects of physical activity on human performance across the life span. The effects of exercise (or lack thereof) are considered for each system in the body. Strategies for improving physical performance in a variety of settings are considered, as well as fundamental principles of good health in relation to exercise.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Fall

PTE 765 The Physical Therapist as Educator

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course focuses on educational theories and methodology relevant to the physical therapist in a variety of physical therapy settings. These topics are discussed in the context of promoting optimal health, preventing injury and illness, and promoting wellness. Upon completion of this course, the student will be able to utilize

educational concepts and theories in the design, implementation, and evaluation of learning experiences used in the education of the community, industry, patients, families, students, colleagues, and self.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Summer

PTE 767 Health Care Systems and the Physical Therapist

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course is an introduction to the various health care delivery systems in the United States, and provides a synopsis of the health care systems found in countries other than the United States. This course allows students to explore the provision of physical therapy services within the constraints of the existing health care systems, and to identify community needs, and resources.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Summer

PTE 773 Patient Management: Musculoskeletal III

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course builds on the knowledge and skills acquired in Patient Management: Musculoskeletal 1 and II. This course emphasizes the management of patients with musculoskeletal dysfunctions of the appendicular and axial skeleton. Case studies are used to emphasize the process of patient management, i.e., examination, assessment, diagnosis, prognosis, treatment, analysis of functional outcomes, and re-assessment. Sophisticated examination and manual mobilization techniques are covered in detail.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Summer

PTE 785 Histology and Tissue Biology

Prerequisite: enrollment in the program and successful completion of all prior course work therein, and permission of instructor.

Course emphasizes the structure and basic function of all the major tissues and cell types in the human body. Includes normal cell and tissue morphology and the adaptations that occur as a result of various stimuli both normal and abnormal. This is a variable content course. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

PTE 800 Advanced Topics in Geriatrics

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

In this course students gain insight into physical therapy related to the elderly population, their special needs and physiological changes, living environments, resources, etc. For an additional credit hour of this course, students are encouraged to develop further knowledge, skills, etc., with the elderly population. Based upon student interest and instructor approval, students may pursue additional in-depth study in areas such as (but not limited to): education, skill development, service-learning, investigation, psychomotor skills, psychosocial issues, healthcare system, reimbursement, etc., related to geriatrics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

PTE 801 Vestibular Rehabilitation

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course describes the anatomy and physiology of the vestibular system and an overview of various pathologies associated with patient complaints of vertigo, dizziness, and balance disorders. Principles of examination, evaluation, assessment, and rehabilitation of the patient with impairment of the vestibular system and/or impaired balance are described and performed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

PTE 802 Advanced Regional Anatomy

Prerequisite: Enrollment in the program and permission of instructor.

This is a variable content course offering in-depth coverage of basic, applied, and clinical aspects of gross anatomy of one or more of the following regions: head and neck, upper extremity, trunk, and lower extremity. Students observe, discuss, teach, learn and dissect selected body systems in detail. This course may incorporate traditional didactic lectures, problem based discussions, laboratory dissection with assignments that rely on critical thinking. Students relate anatomical structure to functional relations and correlate structure with clinical assessments and treatments. Students make oral presentations and use the library and other sources of information (such as the internet) to learn. Course may be repeated up to a maximum of 9 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

PTE 803 Advanced Topics in Musculoskeletal Physical Therapy

Prerequisite: Enrollment in the program and permission of instructor.

This is a variable content course emphasizing the management of patients with musculoskeletal dysfunction focusing on research, differential diagnosis and advanced manual examination and treatment techniques. Case studies are used to emphasize the evidence-based process of patient management, i.e., examination, assessment, diagnosis, prognosis treatment, analysis of functional outcomes, and re-assessment. Students will focus on management of musculoskeletal dysfunction relation to one or more of the following regions: the upper extremity, the pelvis and lower extremity, or the spine and sacroiliac joint. May be repeated up to a maximum of 12 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PTE 804 Advanced Topics in Pediatrics

Prerequisite: enrollment in the program and permission of instructor.

This is a variable content course designed to allow students to develop their cognitive, psychomotor or affective skills at an advanced level in the area of physical therapy for children. The course may involve readings, projects, and direct clinical experiences individually contracted between the instructor and the student. Course may be repeated up to a maximum of 9 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

PTE 871 Physical Therapy Management and Administration

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course will provide students with opportunities to develop managerial and supervisory skills in healthcare settings where physical therapy is provided. Students will apply business and leadership principles through development of a physical therapy business. Understanding of business principles is demonstrated including facility planning, determining and utilizing appropriate business structure, financial management, leadership and communication skills, risk management, legal considerations, and use of consultants. Additionally, students are

provided with opportunities to learn and apply management skills through involvement with community partners functioning in leadership positions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PTE 872 Orthotics, Prosthetics, and Assistive Technologies

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course covers limb amputations, orthotic and prosthetic devices, and splints. The use of orthoses, prostheses, and splints is fully integrated into principles of patient management. Advanced wheelchair prescriptions are discussed, as well as advanced technologies (computer technologies, etc.) that are useful in rehabilitation including occupational and industrial therapies and devices.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

PTE 873 Patient Management: Advanced Differential Diagnosis

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course focuses on managing patients using a "life-long" conceptual basis. It stresses the importance of being proactive in resolving complex issues, particularly those that impact patients for a lifetime. Critical thinking is an integral part of this course. Cost effectiveness, efficiency, long-term planning, and using the best adaptive equipment for the long-term are emphasized. The elements of patient/client management as described in The Guide to Physical Therapist Practice are used to guide the clinical decision making process. Integral to this course will be the use of case-based learning modules.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PTE 877 Clinical Internship IV

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course provides continued clinical practice of skills in the form of an eight-week, full-time clinical internship. Students will continue to develop their global clinical internship plan, while writing specific goals and objectives for Clinical Internship IV. Students will complete a case study or present an "in-service" while on the eight-week

internship, write a short, reflective paper, and meet the requirements established by the Program and the clinical facility. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
8			Fall

PTE 880 Research Seminar

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course is an extension of Management of Research Projects. Students will present their scholarly work to faculty and fellow students as a platform or poster presentation. Variable content course. Graded Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Spring

PTE 883 Patient Management: Critical Integration and Analysis

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course stresses the importance of being proactive in resolving complex issues, particularly those that impact patients for a lifetime. Cost effectiveness, efficiency, long-term planning, and using the best adaptive equipment for the long-term are emphasized. The elements of patient management as described in The Guide to Physical Therapist Practice are used to guide the clinical decision making process. Critical thinking is an integral part of this course. The course will culminate with the preparation of complex case studies of patients treated by each student while on Clinical Internship IV and V and the presentation of these case studies to student peers and faculty in a teaching seminar. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Spring

PTE 887 Clinical Internship V

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course provides clinical practice in the form of an eight-week, full-time clinical internship. Students will continue to develop their global clinical internship plan, while writing specific goals and objectives for Clinical Internship V. Students will complete a case study or present an "in-service" while on the eight-week internship, write a short reflective paper, and meet the requirements established by the program and the clinical facility.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
8			Spring

PTE 888 Clinical Internship VI

Prerequisite: enrollment in the program and successful completion of all prior course work therein.

This course provides clinical practice in the form of a six-week, full-time clinical internship. Students must meet the requirements established by the Program and the clinical faculty. After completion of Clinical Internship VI and upon their return to campus, students will enter a period of in-depth self-analysis and reflection concerning Clinical Internship VI and the entire clinical education experience.

Undergraduate Catalog

Physician Assistant Studies Courses

Physician Assistant Studies (PAS) courses

PAS 717 Medical Human Anatomy and Radiology

Prerequisite: admission to the MS in Physician Assistant Studies or permission.

Regional study of the human body. Course will include lecture and laboratory activities including cadaver dissection, study of anatomic models, computer images, X-ray, CAT scan, and MRI and ultrasound imaging. Identical with BMS 717. Cannot receive credit for both PAS 717 and BMS 717.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	3	11	Spring

PAS 753 Molecular Pathophysiology

Prerequisite: admission to the MS in Physician Assistant Studies.

Introduction to the genetic, immunologic, and microbiologic mechanisms of health and disease.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring

PAS 765 Clinical Assessment I

Prerequisite: admission to the MS in Physician Assistant Studies.

The first of a 2-semester course sequence. Introduction to effective communication and interviewing skills, techniques of physical examination utilizing a systematic anatomical approach and the recording and presentation of clinical information. Format will include lecture, hands-on laboratory exercises, small group presentations, limited patient contact and written and practical examinations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Summer

PAS 766 Clinical Assessment II

Prerequisite: admission to the MS in Physician Assistant Studies.

A continuation of Clinical Assessment I. Emphasis will be on continued development of interviewing and physical examination skills, recognizing and interpreting abnormal physical findings, developing problem lists and differential diagnoses, and refining the recording and presenting of patient evaluation data. In addition, students will learn advanced assessment techniques and perform written and practical skills examinations that incorporate the objective structured clinical exam (OSCE).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Summer

PAS 769 Behavioral Medicine

Prerequisite: admission to the MS in Physician Assistant Studies.

A biopsychosocial systems approach to the individual, family and community within the health care delivery system that includes issues germane to public health and rural medicine. A variety of topics such as growth and development, human sexuality, health promotion and disease prevention, health education, patient compliance, cultural diversity, substance abuse, family violence, child abuse and rural health issues are examined.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring

PAS 770 Professional Issues Seminar

Prerequisite: admission to the MS in Physician Assistant Studies.

Seminar format for discussion of professional and legal issues relevant to the physician assistant profession. Includes topics such as the history of the profession, health care systems, professional organizations, national certification, Missouri licensure, prescriptive privileges, and clinical ethics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Summer

PAS 775 Principles of Clinical Problem Solving

Prerequisite: admission to the MS in Physician Assistant Studies or permission.

Introduction to critical thinking skills and problem solving techniques. Incorporates problem based learning format where small groups of students under the supervision of a group leader explore the various facets of "real-life" clinical case scenarios.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring

PAS 776 Clinical Problem Solving Seminar

Prerequisite: admission to the MS in Physician Assistant Studies.

Advanced exercises in clinical problem solving in a small group format. Commonly presenting clinical problems are utilized as a means to refine students' ability to choose appropriate steps to determine a definitive diagnosis/outcome.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall

PAS 777 Introduction to Research and Clinical Epidemiology

Prerequisite: admission to the MS in Physician Assistant Studies.

Foundations of quantitative and qualitative research methodology related to the study of disease in populations. Includes issues related to study design, data collection, and methods of statistical analysis with a focus on application of these principles in the clinical setting. Will serve as the foundation for development of the clinical year research project.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

PAS 780 Pharmacotherapeutics I

Prerequisite: admission to the MS in Physician Assistant Studies.

The first in a two-course sequence to introduce the principles of pharmacology and pharmacotherapeutics for the diagnosis, prevention and treatment of disease. Emphasis will be placed on the pharmacological, pharmacokinetic and pharmacodynamic properties of drugs and drug classes used in medical practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Summer

PAS 781 Advanced Pharmacotherapeutics

Prerequisite: completion of PAS 780, or RN, or permission.

In-depth analysis of pharmacotherapeutics and the application of drugs for the diagnosis, treatment and prevention of disease. Emphasis will be placed on the rational use of drugs in the care and treatment of pediatric, adult and geriatric patients in primary care settings. Will include discussion of treatment guidelines, indications, contraindications, prescription writing, drug law, drug information resources and case studies. Identical with NUR 761. Cannot receive credit for both PAS 781 and NUR 761.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PAS 783 Clinical Practicum I

Prerequisite: admission to the MS in Physician Assistant Studies and successful completion of didactic course work.

A two week clinical experience with a minimum of 64 hours patient care under the supervision of a physician preceptor. Emphasis will be on refining interviewing, physical examination, recording and written/oral presentation skills.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	4	Summer

PAS 784 Clinical Practicum II

Prerequisite: admission to the MS in Physician Assistant Studies.

Preparative course for the clinical year which promotes professional communication skills and an understanding of pertinent clinical practice topics and issues including interprofessional disciplines, medical practice

organization, health literacy, chronic care, hospice care, and financial aspects of medical practice including billing and coding.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	4	Fall

PAS 785 Clinical Medicine I

Prerequisite: admission to the MS in Physician Assistant Studies.

The first in a two-semester course sequence. Introduction to clinical medicine through an organs systems approach that examines the pertinent anatomy, pathophysiology, diagnosis, treatment, follow-up, patient education, and prevention strategies for the various disease entities. Emphasis will be on problems frequently encountered in primary care settings. Includes lecture and discussion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	2	Summer

PAS 786 Clinical Medicine II

Prerequisite: admission to the MS in Physician Assistant Studies.

A continuation of Clinical Medicine I that emphasizes the organs systems approach to examine the pertinent anatomy, pathophysiology, diagnosis, treatment, follow-up, patient education, and prevention strategies for the various disease entities. Emphasis will be on problems frequently encountered in primary care settings. Includes lecture and discussion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6	6	2	Fall

PAS 787 Laboratory Medicine and Clinical Procedures

Prerequisite: admission to the MS in Physician Assistant Studies.

"Hands-on" laboratory format class that introduces the student to skills needed to perform diagnostic and therapeutic procedures such as performing/interpreting basic laboratory tests, phlebotomy, casting and splinting, knot tying, suturing, intravenous line insertion, aseptic technique, catheterization, and other clinical skills.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Fall

PAS 788 EKG and ACLS

Prerequisite: admission to the MS in Physician Assistant Studies.

A study of the principles and practical applications of electro-cardiography for the physician assistant, followed by an Advanced Cardiac Life Support course. Lecture, lab, interactive CD, and "mock code" skills training.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall

PAS 790 Clinical Preceptorship

Prerequisite: admission to the MS in Physician Assistant Studies and promotion from the didactic year.

Consists of a six-week structured clinical experience under the supervision of a qualified preceptor that will introduce the student to the evaluation, diagnosis, treatment, monitoring, patient education, and referral of patients for the various clinical presentations within a specific discipline. The emphasis will be on problems encountered in primary care settings. Specific cognitive, skill, and attitudinal objectives are defined for each core clinical area, including family practice/primary care, general surgery, psychiatry/behavioral medicine, internal medicine, emergency medicine, women's health, and pediatrics. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	0	40	Fall, Spring, Summer

PAS 797 Clinical Practice Issues Seminar

Prerequisite: clinical year standing in the MS in Physician Assistant Studies.

Provides a forum for topics germane to the clinical practice setting and transition to professional practice. Topics of interest will cover areas such as managed health care, ethical decision-making, pharmacological management, resume preparation, job negotiation skills, the national certification examination, etc. May be repeated for a maximum of 3 hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring, Summer

PAS 798 Research Project

Prerequisite: clinical year standing in the MS in Physician Assistant Studies.

In-depth study of a clinical problem of interest that culminates in a scholarly paper and formal presentation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Fall

Undergraduate Catalog

Psychology Courses

Gerontology (GER) courses

GER 300 Service Learning Curricular Component

Prerequisite: 30 hours and concurrent registration in a gerontology course designated as service learning offering.

An integrative learning experience which addresses the practice of citizenship and promotes an awareness of and participation in public affairs by incorporating community service with classroom instruction. Includes 40 hours on-task service to a community organization, agency or public service provider. The community service placement agency and service assignment will vary, dependent on the course topic and learning objectives. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

GER 301 The Elderly and the Media: Confronting Popular Stereotypes

Prerequisite: 30 hours.

Students will be introduced to common stereotypes held about the elderly within our society and statistics and information which prove these stereotypes to be false. Public perceptions of the elderly will be studied through the use of five commercial motion pictures and a review of four articles covering topics related to the theme of each of the films. The class will focus on how stereotypes about the elderly are both reinforced and challenged in commercial motion pictures, how stereotypes affect an older person's self-concept, and how popular ageist stereotypes shape our own views on growing older.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

GER 309 Identity and Aging in Literature and Film

Prerequisite: PSY 121 or SOC 150; and ENG 110.

Emphasizes the experience of aging as perceived from the older person's point of view and that of society. Situations in later life will be explored through the use of short stories, selected articles, and videos. The topics covered will include health, friendship and relationships, widowhood, family and intergenerational relationships, perceptions of death and dying, and finding purpose and meaning in life. Students will acquire a basic understanding of identity issues and factors that contribute to well-being in later life. Identical with PSY 309. Cannot receive credit for both GER 309 and PSY 309.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GER 351 Psychology of Adulthood and Aging

Prerequisite: PSY 121 or GER 375.

Principles and practical applications in development of the adult. Includes psychological effects of personality and intellect. Both normal and abnormal phenomena are considered. Identical with PSY 350. Cannot receive credit for both GER 351 and PSY 350.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GER 354 Gender and Sexuality in Later Life

Prerequisite: PSY 121 or SOC 150; and GST 170 or 45 hours.

A comparison of the aging experiences of men and women in later life. The relevance of gender, gender roles and sexuality to the aging process will be considered. Specific topics of analysis will include the gender gap in longevity, psychological and physical health, LGBTQ status, minority status, socioeconomic status, family relationships, and public policy issues. Identical with PSY 354. Cannot receive credit for both GER 354 and PSY 354.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GER 363 Death and Human Behavior

Prerequisite: PSY 121 or SOC 150.

An introduction to the varied aspects of death and dying. The course will focus on attitudes toward death, fears of death and dying, special needs of those who have a life threatening illness, means of helping the survivors and techniques for prolonging life. Identical with PSY 363. Cannot receive credit for both GER 363 and PSY 363.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GER 366 Families in Later Life

Prerequisite: PSY 121 or SOC 150; and CFD 155 or CFD 163 or 30 hours.

Examination of the structure and function of families in later life. Topics of interest include demographic trends impacting the structure of the family, marriage, sibling relations, parent-adult child relations, grandparenthood, widowhood, and retirement. The application of family theories and their relevance to later life families will be discussed. Identical with CFD 365, SWK 365, and PSY 366. Can only receive credit for one of following: CFD 365, GER 366, PSY 366 or SWK 365.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

GER 370 Mental Health and Aging

Prerequisite: PSY 121 or SOC 150.

Personality adjustment in old age, with emphasis both on adequate and maladjusted development. Factors influencing adjustment are considered. Both functional and organic sources of maladjustment are surveyed. Identical with PSY 370. Cannot receive credit for both GER 370 and PSY 370.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GER 375 Social Forces and Aging

Prerequisite: PSY 121 or SOC 150; and 30 hours.

Examines the aging process, demographic trends, and the social, economic, and social-psychological aspects of aging in the United States. Students will be introduced to current theories on aging in social gerontology and their application to the everyday lives of older people. Topics of interest include social attitudes toward aging, family and social bonds, work and retirement, gender issues, ethnicity and aging, living environments, and approaches to aging well. Students will learn about the role of federal, state and local agencies in meeting the needs of the elderly. Identical with SOC 375. Cannot receive credit for both GER 375 and SOC 375.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

GER 396 Directed Readings in Gerontology

Prerequisite: 6 hours of gerontology and permission.

Readings designed to supplement material introduced in previous Gerontology courses. Includes a wide selection of literature in the field. May be repeated to a total of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GER 397 Special Topics in Gerontology

Prerequisite: 6 hours of designated courses in the gerontology major.

In-depth inquiry into selected interdisciplinary topics of contemporary interest in gerontology. May be repeated to a total of 6 hours when topic changes. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GER 470 Community Resources for Older Adults

Prerequisite: GER 375.

Covers the services, programs and institutions involved in providing services to older adults in the United States, with a focus on community-based services. Typical needs, issues, concerns and desires of older persons are identified and corresponding community-based services to address these needs are discussed. Emerging issues and developments in the field of gerontology will also be discussed as they relate to community services and resources. Site visits to agencies and organizations serving older adults will enhance students' familiarity with resources to improve the quality of life and well-being of aging members in our society. Identical with SWK 470. Cannot receive credit for both GER 470 and SWK 470.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

GER 480 Policies and Older Adults

Prerequisite: GER 375.

Students will be introduced to the development and practice of social policy, on the state and federal level, and how it affects services to the older adult population. Political organizations that influence the lives of the elderly (e.g., the American Association of Retired Persons, Gray Panthers, Older Women's League) will be examined as well as government and social welfare programs (i.e., Social Security, Medicaid and Medicare). What constitutes "citizenship" and the role of a "senior citizen" will also be explored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GER 492 Directed Research

Prerequisite: GER 375 and permission of sponsoring faculty member and department head.

Allows students to gain research experience by working with an individual faculty member either as a research assistant or as a primary researcher working under faculty supervision. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring

GER 597 Special Topics in Gerontology

Prerequisite: 90 hours; and 12 hours of gerontology.

In-depth inquiry into selected interdisciplinary topics of contemporary interest in gerontology. May be repeated to a total of 6 hours when topic changes. Variable content course. May be taught concurrently with GER 697. Cannot receive credit for both GER 697 and GER 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GER 598 Supervised Practicum in Gerontology

Prerequisite: concurrent enrollment in GER 599; completion of gerontology core courses with a grade of "C" or better in each; and permission of the program coordinator.

Onsite contacts with elderly individuals through an internship at a residential or community placement approved by the coordinator. Direct supervision will be provided by qualified professionals in the field of gerontology. Students will serve 45 clock hours for each credit hour awarded. May be repeated to a total of 12 hours. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6-9			Fall, Spring

GER 599 Seminar in Gerontology

Prerequisite: concurrent enrollment in GER 598; completion of the gerontology core courses with a grade of "C" or better in each; and permission of the program coordinator.

Weekly meetings to allow students to correlate experiences in GER 598 with academic knowledge, share experiences, and broaden contacts in the field of aging. Survey of current literature in gerontology from various disciplines will be included. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GER 697 Special Topics in Gerontology

Recommended Prerequisite: 12 hours of Gerontology. In-depth inquiry into selected interdisciplinary topics of contemporary interest in gerontology. Variable content course. May be repeated to a total of 6 hours when topic changes. May be taught concurrently with GER 597. Cannot receive credit for both GER 597 and GER 697.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

Psychology (PSY) courses

PSY 101 Psychology for Personal Growth

A study of the emotional, intellectual, and interpersonal experiences of self and others in order to enhance self-understanding, to make informed choices, and to promote adjustment. Will not count toward the major or minor in psychology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 121 Introductory Psychology

General Education Course (Focus on Social and Behavioral Sciences).

An examination of how psychology enhances our understanding of human behavior; a survey of basic biological, experiential, cognitive, emotional, and sociocultural influences on behavior and self-understanding. Students must choose either to be research participants or fulfill an alternative library assignment as part of the course requirements. Honors sections are taught in a lecture/lab format.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	PSYC 100 - General Psychology.

[Access the CORE 42 portal](#)

PSY 150 Introduction to the Psychology Major

Exploration of careers, educational paths, and professional development for new psychology majors (typically, first-year students, sophomores, and some transfer students with limited coursework completed in psychology).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring, Summer

PSY 160 The Pursuit of Happiness: A Psychological Perspective

Explore the sources of our moods with an emphasis on skills for achieving healthy, happy, and productive feelings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

PSY 197 Topics in Psychology

Selected topics especially appropriate for lower division students (examples: meaning of death, preparation for marriage, and child rearing practices). May be repeated for a maximum of 4 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

PSY 200 Psychological Statistical Methods

Prerequisite: PSY 121; and completion of General Education mathematics requirement.

Principles and methods of statistics used in psychology; understanding and interpreting psychological data. Cannot receive credit toward a degree for more than one of the following courses: AGR 330, IPE 381, MTH 340, PSY 200, QBA 237, REC 328, SOC 302.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 203 Introduction to Research

Prerequisite: PSY 121; and completion of General Education mathematics requirement.

This course will provide an integrated approach to elementary research design and statistical methods. Students will review current research and develop small projects for which statistical methods will be selected and applied. This course cannot be substituted for PSY 200 and/or PSY 201 on the psychology major and will not count toward the Psychology major. This course is designed for psychology minors and will not prepare students for graduate work in Psychology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 240 Psychology of Humor

Prerequisite: PSY 121.

Introduction to psychology of humor, includes theories of humor and explorations of humor through different areas of psychology, for example cognitive, social, developmental, personality, and health psychology. Focus will be on thinking critically about humor research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 250 Analysis of Interpersonal Behavior

Prerequisite: PSY 121 and permission of instructor.

Ongoing processes of interpersonal behavior. Observation and experience as participant of a self-analytic group in the human relations laboratory.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Upon demand

PSY 300 Naturalistic Methods in Social Psychology

Prerequisite: PSY 121, and 6 additional hours of Psychology.

An alternative approach to social psychological processes. Involves text analysis, materials analysis, interviewing, and participant observation in naturally occurring, non-laboratory field settings. Focus will be on small group behavior.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 302 Experimental Psychology

Prerequisite: PSY 121 and PSY 200.

Psychological methodology; major emphasis on experimentation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

PSY 303 Stress and Tension Control

Prerequisite: PSY 121.

An examination of the nature and treatment of the stress response. Laboratory experience with several forms of relaxation training including biofeedback.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

PSY 304 Abnormal Psychology

Prerequisite: PSY 121.

Psychopathology and the systems of classification, methods of assessment, and modes of treatment from research, clinical, ethical, and cultural perspectives.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

PSY 305 Introduction to Industrial and Organizational Psychology

Prerequisite: PSY 121.

A survey of the major topics that are studied and the methods that are used in I/O psychology. The topics and methods will be viewed from a psychological perspective and will include psychological testing and personnel selection; training and development; job analysis, employee evaluation and performance appraisal; human motivation and job satisfaction; leadership, communication and group processes; organization theory and development.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 306 Learning Processes

Prerequisite: PSY 121.

A survey of the methods of classical and instrumental conditioning.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 307 Human Sexuality

Prerequisite: PSY 121.

A balanced and comprehensive perspective of the field of human sexuality. Content includes the psychological, physiological, and interpersonal variables of human sexuality.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 309 Identity and Aging in Literature and Film

Prerequisite: ENG 110 and PSY 121.

Emphasizes the experience of aging as perceived from the older person's point of view and that of society. Situations in later life will be explored through the use of short stories, selected articles, and videos. The topics covered will include health, friendship and relationships, widowhood, family and intergenerational relationships, perceptions of death and dying, and finding purpose and meaning in life. Students will acquire a basic understanding of identity issues and factors that contribute to well-being in later life. Identical with GER 309. Cannot receive credit for both PSY 309 and GER 309.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 310 Applied Psychology

Prerequisite: PSY 121.

Practical areas of application of psychology. Limited enrollment; field trips required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 311 Service Learning in Psychology

Prerequisite: 30 hours, concurrent registration in a Psychology course designated as a service learning offering.

This service component for an existing course incorporates community service with classroom instruction in psychology to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of, and participation, in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and

assignments will vary depending on the course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

PSY 315 History and Systems of Psychology

Prerequisite: PSY 121 and 6 additional hours of psychology.

Present psychological systems in the light of their historical development from ancient Greek and medieval thought.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 317 Psychology of Addictions

Prerequisite: PSY 121.

Students in the course will learn basic psychological and psychophysiological processes involved in the progression of substance use, abuse, and addiction. Topics covered will include the conduct of individual assessment, interviewing techniques, and counseling processes. This course is intended to give students an understanding of individual, motivational, and social psychological perspectives.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 320 Psychology and the Law

Prerequisite: PSY 121.

This course is a survey of psychology applied to the legal system. The course includes topics in mental health law, such as competency and insanity, as well as the psychology of law enforcement, crime, juries, eyewitness testimony, and legal socialization.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 331 Psychology of Childhood

Prerequisite: PSY 121.

This course examines major psychological issues, theories and research concerning child development. Influences on cognitive, personality and social development are analyzed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 336 Ethology

Prerequisite: PSY 121.

The study of the behavior of animals in a natural setting will be emphasized. The viewpoints of ethology, comparative psychology, behavioral ecology, and sociobiology will be used to study the behavior of animals, including humans. This course cannot be credited toward a degree if the student has taken PSY 497: Animal Behavior.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 339 Introduction to Clinical Psychology

Prerequisite: PSY 121 and PSY 304.

A survey of the field of clinical psychology from a broad conceptual and historic perspective. The course examines professional issues such as various mental health delivery systems, ethics, and graduate training. The course also presents an overview of different approaches to psychotherapy along with assessment methods commonly used in evaluation of therapy, research, and decision making in a clinical setting.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 350 Psychology of Adulthood and Aging

Prerequisite: PSY 121.

Principles and practical applications in development of the adult. Includes psychological effects of personality and intellect. Both normal and abnormal phenomena are considered. Identical with GER 351. Cannot receive credit for both PSY 350 and GER 351.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 354 Gender and Sexuality in Later Life

Prerequisite: PSY 121; and GST 170 or 45 hours.

A comparison of the aging experiences of men and women in later life. The relevance of gender, gender roles and sexuality to the aging process will be considered. Specific topics of analysis will include the gender gap in longevity, psychological and physical health, LGBTQ status, minority status, socioeconomic status, family relationships, and public policy issues. Identical with GER 354. Cannot receive credit for both GER 354 and PSY 354.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 357 Psychology of Gender

Prerequisite: PSY 121.

This course will provide an in-depth examination and survey of the research and theory on psychological gender differences and similarities. An exploration will be made of the influence of biology, social, and culture on the development of gender in a variety of areas (e.g., emotions, attitudes, relationships, aggression, mental health, physical health, stress, coping, intelligence, work and achievement).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 359 Theories of Social Psychology

Prerequisite: PSY 121 or SOC 150.

A survey of research strategies in social psychology; social perception; interpersonal attraction; attitudes and persuasion; sex differences in social behavior.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 360 Educational Psychology

Prerequisite: PSY 121.

Introduction to theory and research in educational psychology. Topics include cognitive and social development, learning, memory, cognition, intelligence, motivation, measurement, and individual differences.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 363 Death and Human Behavior

Prerequisite: PSY 121.

An introduction to the varied aspects of death and dying. The course will focus on attitudes toward death, fears of death and dying, special needs of those who have a life threatening illness, means of helping the survivors and techniques for prolonging life. Identical with GER 363. Cannot receive credit for both PSY 363 and GER 363.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 366 Families in Later Life

Prerequisite: PSY 121; and CFD 155 or CFD 163 or 30 hours.

Examination of the structure and function of families in later life. Topics of interest include demographic trends impacting the structure of the family, marriage, sibling relations, parent-adult child relations, grandparenthood, widowhood, and retirement. The application of family theories and their relevance to later life families will be discussed. Identical with CFD 365, GER 365, and SWK 365. Can only receive credit for one of following: CFD 365, GER 366, PSY 366, or SWK 365.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 370 Mental Health and Aging

Prerequisite: PSY 121.

Personality adjustment in old age, with emphasis both on adequate and maladjusted development. Factors influencing adjustment are considered. Both functional and organic sources of maladjustment are surveyed. Identical with GER 370. Cannot receive credit for both PSY 370 and GER 370.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 379 Environmental Psychology

Prerequisite: PSY 121.

An introduction to the psychological predictors, processes, and outcomes associated with individual and group decision making about sustainable living, including individual differences, motivation, social influence, self-regulation, altruism, persuasion, ethics, and emotive responses. These variables will then be applied to issues of individual and social behavior change.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 380 Development of the Student

Prerequisite: PSY 121; and either ELE 302 or SEC 302.

Life-span development, with a strong emphasis on grades K-12. Includes cognitive, physical, social, and emotional development. Coverage of developmental issues, such as divorce, child abuse, substance abuse, sexuality, and peer pressure. Also includes learning and motivation theory. Required for students seeking special education, K-9, or K-12 certification. Also will count toward any certification. May substitute for PSY 385 or PSY 390. Will not count towards the major or minor in psychology. Credit will be awarded for only one of the following: PSY 380, PSY 385, PSY 390.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Fall, Spring

PSY 385 Development of the Early Childhood and Elementary School Student

Prerequisite: PSY 121.

Life-span development, with a strong emphasis on preschool through sixth grade. Coverage of developmental issues, such as divorce, child abuse, substance abuse, and peer pressure. Also includes learning and motivation theory. Required for students seeking early childhood, early childhood-special education, or elementary education certification. PSY 380 may be taken instead of PSY 385. Will not count towards special education, K-9, K-12, middle school or secondary education certification. Will not count towards the major or minor in psychology. Credit will be awarded for only one of the following: PSY 380, PSY 385, PSY 390.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 390 Development of the Adolescent Student

Prerequisite: PSY 121 and SEC 302.

Life-span development, with a strong emphasis on the middle school and secondary education years. Includes cognitive, physical, social, and emotional development. Coverage of developmental issues, such as substances abuse, sexuality, divorce, and peer pressure. Also includes learning and motivation theory. Required for students seeking middle school or secondary education certification. PSY 380 may be taken instead of PSY 390. Will not count towards special education, K-9, K-12, early childhood, early childhood-special education or elementary education certification. Will not count towards the major or minor in psychology. Credit will be awarded for only one of the following: PSY 380, PSY 385, PSY 390.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 405 Exercise Psychology

Prerequisite: PSY 121.

An examination of the research, theory, and practical applications of the field of exercise psychology. Content includes exercise adherence, psychological effects of exercise, and motivation to continue programs. Intersession course only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

PSY 411 Psychology of Diversity

Prerequisite: senior standing; and 24 hours of Psychology.

Knowledge base, theory, research, professional ethics, workplace skills, and cultural context related to diversity. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

PSY 422 Memory and Cognition

Prerequisite: PSY 121 and 6 additional hours of psychology.

Theoretical, empirical, and practical consideration of human memory and cognition. Laboratory will focus on investigation and demonstration of various cognitive phenomena.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

PSY 424 Teaching of Psychology

Prerequisite: permission of instructor.

This course is open only to psychology majors who have completed the application and selection process for an undergraduate learning assistant in Introductory Psychology and who are available to attend training sessions prior to the beginning of semester. Students will be assisting in the teaching of Introductory Psychology by serving as undergraduate learning assistants. Experiences will include facilitating group study sessions, individually mentoring students, and gaining exposure to the skills necessary for successful teaching. Emphasis will be on learning and practicing mentoring skills, the implementation of innovative pedagogical techniques, and course development. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 441 Psychology of Adolescence

Prerequisite: PSY 121 and one additional psychology course, and junior standing.

This course examines major psychological issues, theories, and research concerning adolescent development. Influences on cognitive, personality, and social development are analyzed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 481 Human Engineering

Prerequisite: PSY 121 or 60 hours.

Focuses on systematic attempts to develop principles and data to be applied in adapting equipment, machines, work space, and environments for human use.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 486 Management and Assessment in the Middle and Secondary Classroom

Prerequisite: admission to Teacher Education Program; and PSY 360 or equivalent competencies.

Planning, constructing, using, and analyzing a variety of assessment practices and understanding uses of standardized testing in education. Covers adolescent social behavior, management theory and strategies that promote effective learning and development while minimizing disruptive behavior. Application of theory to classroom practice and everyday situations. Identical with SFR 486. Cannot receive credit for both PSY 486 and SFR 486.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

PSY 487 Behavior Problems of Childhood

Prerequisite: PSY 121 or PSY 331.

Survey of the patterns of maladjustment in childhood from infancy through early adolescence. Introduction to the concepts related to the origin, manifestation, and treatment of childhood psychopathology emphasizing a developmental approach.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 490 Preparation for Graduate School

Primarily for senior students considering graduate study in psychology and related fields. Emphasis is on career awareness and the practical activities involved in the application process.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall

PSY 493 Directed Readings in Educational Psychology

Prerequisite: PSY 121 and permission of instructor.

This course is designed for transfer students who are seeking teacher certification and who need to complete a limited number of MOSTEP standards. The course will involve inquiry into selected topics of educational psychology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

PSY 495 Senior Seminar

Prerequisite: senior standing (90 hours); and 27 hours of Psychology.

Activities to help students identify and explore postgraduate career opportunities. A major field achievement test and program evaluation will be administered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

PSY 496 Directed Readings in Psychology

Prerequisite: 10 hours of psychology and permission of department head.

Outstanding students who wish to undertake directed readings must consult with a professor of the department who specializes in the area selected, and with his or her consent present a written proposal to the head of the department for approval. Such proposals must be presented and approved before final registration for the course. Credited only on BA and BS degrees. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring

PSY 497 Advanced Topics in Psychology

Prerequisite: 9 hours of psychology.

In depth inquiry into selected topics of psychology. May be repeated to a maximum of 9 hours if topic is different. 1-3 F,S. Approved recurring course topic: Ethical Issues and Concepts. Exploration of the ethical principles and standards that guide the practice of psychology. Approved recurring course topic: Psychological Disorders in the Movies. Exploration and examination of psychological disorders in film. Approved recurring course topic: Psychology of Sexual and Intimate Relationships. Exploration of issues related to sexual and intimate relationships including techniques to enhance communication, sexual intimacy and relationships.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

PSY 498 Directed Research

Prerequisite: PSY 121 and permission of sponsoring faculty member and department head.

Allows students to gain research experience by working with an individual faculty member either as a research assistant or as a primary researcher working under faculty supervision. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring

PSY 499 Practicum in Psychology

Prerequisite: PSY 121 and 14 additional hours of psychology and permission of department head.

Offers an opportunity for the student to obtain experience through field work. Such experience need not be confined to the campus. May be repeated for a maximum of six hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring

PSY 502 Learning Theories

Prerequisite: PSY 121 and 3 additional hours of psychology.

An introduction to contemporary theories about learning and behavior, emphasizing the experimental basis of these phenomena. May be taught concurrently with PSY 602. Cannot receive credit for both PSY 602 and PSY 502.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 505 Forensic Child Psychology

Prerequisite: PSY 121.

Explores the basics of forensic psychology with emphasis on factors that affect children, how these factors are assessed and how communities intervene to reduce both child crime and child victimization. The class will involve text analysis as well as analysis of primary source readings. May be taught concurrently with PSY 604. Cannot receive credit for both PSY 604 and PSY 505.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 506 Perception

Prerequisite: PSY 121 and 3 additional hours of psychology.

Nature of perception, concept formation and role of language. May be taught concurrently with PSY 606. Cannot receive credit for both PSY 606 and PSY 506.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 508 Introduction to Applied Behavior Analysis

Prerequisite: PSY 121.

Serves as an introduction to the field of applied behavior analysis. During this course, students are introduced to content areas contained in the Behavior Analysis Certification Board Task List. This includes core concepts such as reinforcement, punishment, stimulus control, and principles of shaping. Students will be introduced to functional assessments and functional analyses. Additional topics include verbal behavior and ethical considerations for behavior analysts. May be taught concurrently with PSY 614. Cannot receive credit for both PSY 614 and PSY 508.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 510 Research in Psychology

Prerequisite: PSY 121; and PSY 200 or equivalent; and PSY 302.

Advanced course in research methodology for psychology. The course focuses on individual research projects.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall

PSY 512 Personality Theory and Systems

Prerequisite: PSY 121 and PSY 304.

Current theories of personality, research background and historical development. May be taught concurrently with PSY 612. Cannot receive credit for both PSY 612 and PSY 512.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 513 Neuropsychology

Prerequisite: PSY 121 and 3 additional hours of Psychology.

Introduction to the field of neuropsychology. Includes careers, history, behavioral changes after brain injury, assessment, and ethical considerations. May be taught concurrently with PSY 613. Cannot receive credit for both PSY 513 and PSY 613.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 514 Psychology of Child Abuse and Exploitation

Prerequisite: PSY 121 and 60 hours.

Study of forensic issues related to child abuse and exploitation. Students will gain an understanding of the forensic and psychological issues that often arise during child abuse investigations. The Child Advocacy Center, Inc. will participate in the design of the course, thus the specific forensic issues discussed will remain current and may change based on the needs of the community. May be taught concurrently with PSY 617. Cannot receive credit for both PSY 514 and PSY 617.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 519 Cognitive Development

Prerequisite: PSY 121 and PSY 331 and 3 additional hours of psychology.

Study of cognitive development in children and adolescents. Topics to be included: perception, memory, visual imagery, problem solving, language development, cognitive style, social learning theory, information processing theory, and Piaget's theory. Applications in education, child rearing, and behavior management. May be taught concurrently with PSY 619. Cannot receive credit for both PSY 619 and PSY 519.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 521 Physiological Psychology

Prerequisite: PSY 121 and 3 additional hours of psychology.

Physiological correlates underlying behavior, including sensory and response mechanisms, central nervous system. May be taught concurrently with PSY 622. Cannot receive credit for both PSY 622 and PSY 521.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 523 Psychology and Language

Recommended Prerequisite: 6 hours of Psychology. An examination into the nature of and research in human language and its relationship to psychology. Topics will include the biological bases of language, speech production and perception, word recognition, sentence processing, reading, discourse, dyslexia, grammar and the lexicon. This course will cover current theories on these topics and experimental paradigms analyzing language and psychology. May be taught concurrently with PSY 623. Cannot receive credit for both PSY 523 and PSY 623.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 524 Honors Project in Psychology

Prerequisite: PSY 121; and PSY 200 or equivalent; and PSY 302; and PSY 510, and permission of sponsoring faculty member and department head; open to Honors College students only.

Students will revise and expand their individual research project completed for PSY 510. The final project from this course must be submitted to a student conference or student journal, as well as to the Honors College as the student's Honors Project.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

PSY 525 Motivation and Emotions

Prerequisite: PSY 121 and 3 additional hours of psychology.

Psychological and physiological motives, needs, drives and instinctual mechanisms; emotional effects of these upon the organism. May be taught concurrently with PSY 625. Cannot receive credit for both PSY 625 and PSY 525.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 527 Advanced Psychological Statistical Methods

Prerequisite: introductory statistics selected from: PSY 200, 711; AGR 330; MTH 340; QBA 237; REC 328; SOC 302; or equivalent.

A review of introductory statistics and investigation of research methods in behavioral sciences that require multivariate statistical models. This course takes an applied orientation and emphasizes the use of statistical packages. Topics include: linear models, principal components analysis, discriminant analysis, multiple regression analysis, multiple regression with categorical variables, and multi-factor ANOVA. May be taught concurrently with PSY 627. Cannot receive credit for both PSY 627 and PSY 527.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 529 Psychological Tests and Measurements

Prerequisite: PSY 121; and PSY 200 or equivalent.

Theory and techniques underlying measurement of human traits and abilities. Critical analysis of intellectual, achievement, interest and personality tests, including their development, application and potential abuses. May be taught concurrently with PSY 629. Cannot receive credit for both PSY 629 and PSY 529.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 533 Psychological Issues in Religion

Prerequisite: PSY 121.

Comprehensive overview of historical background, research methods, and contemporary issues involving behavior and religious beliefs. Psychological research in the areas of religious development and cognition will be included. May be taught concurrently with PSY 633. Cannot receive credit for both PSY 633 and PSY 533.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 534 Psychology of Infancy

Prerequisite: PSY 121 and PSY 331.

Theory and research on the maturation and cognition of the human infant in the first two years, from a developmental psychometric perspective. General principles of the mental and motor assessment of the infant and interpretation will be emphasized through class demonstrations so that the student may understand the use of these procedures in interpreting development and research. May be taught concurrently with PSY 634. Cannot receive credit for both PSY 634 and PSY 534.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 535 Discipline and Social Behavior in the Classroom

Prerequisite: PSY 121; and PSY 360 or PSY 380 or PSY 385 or PSY 390.

Provides a psychological perspective of individual and social factors necessary to develop an effective eclectic approach to discipline and an understanding of social behavior in the classroom. Includes an emphasis on personal, social, and motivational development. May be taught concurrently with PSY 635. Cannot receive credit for both PSY 635 and PSY 535.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 550 Psychological Testing in Remedial Reading

Prerequisite: permission of department head.

Techniques and skills in utilizing psychological tests as they pertain to diagnosing reading disabilities and prediction of success in remedial programs. Students receive supervised practice in administration. May be taught concurrently with PSY 648. Cannot receive credit for both PSY 648 and PSY 550.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

PSY 555 Developing Sport Team Leaders

This delivers leadership, team processes, and motivation principles to help coaches develop the leadership skills of sport team athletes. This course aligns sport program goals with educational goals by utilizing athletic settings to promote skills that student-athletes can apply on sport teams and in other group settings. Coaches will learn how to set specific leadership goals with team leader-athletes and will learn concrete and constructive ways to mentor leader-athletes. Coaches will use course principles to construct a plan for developing sport team leaders and for making "team leadership" a core team value. May be taught concurrently with PSY 649. Cannot receive credit for both PSY 649 and PSY 555.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

PSY 556 Developing Sport Team Leaders Practicum

Prerequisite: PSY 555 or concurrent enrollment; and permission of instructor.

Complementing PSY 555 Developing Sport Team Leadership, this course provides a 2-credit option for students to document the application of a leadership development plan on a sport team. This course reinforces the value of leadership and leadership development on sport teams by helping to make "team leadership" a core team value. Advancing this objective, students learn to align the values of sport teams with the broader values of educational institutions. Students taking this course must provide evidence that they have permission to implement a leadership development program on an organized sport team prior to enrolling in the class (hours the student spends with the team must exceed 90 hours). May be taught concurrently with PSY 656. Cannot receive credit for both PSY 656 and PSY 556.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

PSY 557 Forensic Psychology: Child Abuse and the Law

Prerequisite: PSY 121 and 60 hours.

Study of the legal issues related to child abuse and exploitation. Students will gain an understanding of the law pertaining to child cases and how interactions with children can bolster or diminish the quality of children's memory report as seen by the judicial system. The Greene County Prosecutor's Office will participate in the design of this course, thus the specific legal issues discussed will remain current and may change based on the needs of the community. May be taught concurrently with PSY 657. Cannot receive credit for both PSY 557 and PSY 657.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 565 Psychological Effects of Dementia

Prerequisite: PSY 121 and PSY 370.

Description of dementias, with particular references to Alzheimer's Disease and with emphasis on behavioral consequences for both patient and caregiver. Directed practicum. May be taught concurrently with PSY 669. Cannot receive credit for both PSY 669 and PSY 565.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Upon demand

PSY 597 Specialized Topics in Psychology

Prerequisite: 9 hours of Psychology.

Specialized investigation into selected topics in psychology. Graduate students will be required to complete an extra project to be determined by the instructor. May be repeated to a maximum of 9 hours if topic is different. Variable content course. May be taught concurrently with PSY 695. Cannot receive credit for both PSY 695 and PSY 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PSY 602 Learning Theories

Recommended Prerequisite: PSY 121 and 3 additional hours of psychology. An introduction to contemporary theories about learning and behavior, emphasizing the experimental basis of these phenomena. May be taught concurrently with PSY 502. Cannot receive credit for both PSY 502 and PSY 602.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 604 Forensic Child Psychology

Recommended Prerequisite: PSY 121. Explores the basics of forensic psychology with emphasis on factors that affect children, how these factors are assessed and how communities intervene to reduce both child crime and child victimization. The class will involve text analysis as well as analysis of primary source readings. May be taught concurrently with PSY 505. Cannot receive credit for both PSY 505 and PSY 604.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 606 Perception

Recommended Prerequisite: PSY 121 and 3 additional hours of psychology. Nature of perception, concept formation and role of language. May be taught concurrently with PSY 506. Cannot receive credit for both PSY 506 and PSY 606.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 612 Personality Theory and Systems

Recommended Prerequisite: PSY 121 and PSY 304. Current theories of personality, research background and historical development. May be taught concurrently with PSY 512. Cannot receive credit for both PSY 512 and PSY 612.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 613 Neuropsychology

Introduction to the field of neuropsychology. Includes careers, history, behavioral changes after brain injury, assessment, and ethical considerations. May be taught concurrently with PSY 513. Cannot receive credit for both PSY 613 and PSY 513.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 614 Introduction to Applied Behavior Analysis

Serves as an introduction to the field of applied behavior analysis. During this course, students are introduced to content areas contained in the Behavior Analysis Certification Board Task List. This includes core concepts such as reinforcement, punishment, stimulus control, and principles of shaping. Students will be introduced to functional assessments and functional analyses. Additional topics include verbal behavior and ethical

considerations for behavior analysts. May be taught concurrently with PSY 508. Cannot receive credit for both PSY 614 and PSY 508.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 617 Psychology of Child Abuse and Exploitation

Study of forensic issues related to child abuse and exploitation. Students will gain an understanding of the forensic and psychological issues that often arise during child abuse investigations. The Child Advocacy Center, Inc. will participate in the design of the course, thus the specific forensic issues discussed will remain current and may change based on the needs of the community. May be taught concurrently with PSY 514. Cannot receive credit for both PSY 617 and PSY 514.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 619 Cognitive Development

Recommended Prerequisite: PSY 121 and PSY 331 and 3 additional hours of psychology. Study of cognitive development in children and adolescents. Topics to be included: perception, memory, visual imagery, problem solving, language development, cognitive style, social learning theory, information processing theory, and Piaget's theory. Applications in education, child rearing, and behavior management. May be taught concurrently with PSY 519. Cannot receive credit for both PSY 519 and PSY 619.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 622 Physiological Psychology

Recommended Prerequisite: PSY 121 and 3 additional hours of psychology. Physiological correlates underlying behavior, including sensory and response mechanisms, central nervous system. May be taught concurrently with PSY 521. Cannot receive credit for both PSY 521 and PSY 622.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 623 Psychology and Language

Recommended Prerequisite: 6 hours of Psychology. An examination into the nature of and research in human language and its relationship to psychology. Topics will include the biological bases of language, speech production and perception, word recognition, sentence processing, reading, discourse, dyslexia, grammar and the lexicon. This course will cover current theories on these topics and experimental paradigms analyzing language and psychology. May be taught concurrently with PSY 523. Cannot receive credit for both PSY 623 and PSY 523.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 625 Motivation and Emotions

Recommended Prerequisite: PSY 121 and 3 additional hours of psychology. Psychological and physiological motives, needs, drives and instinctual mechanisms; emotional effects of these upon the organism. May be taught concurrently with PSY 525. Cannot receive credit for both PSY 525 and PSY 625.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 627 Advanced Psychological Statistical Methods

Recommended Prerequisite: introductory statistics course selected from PSY 200, 711; AGR 330; ECO 308; MTH 340; QBA 237; REC 328; SOC 302; or equivalent. A review of introductory statistics and investigation of research methods in behavioral sciences that require multivariate statistical models. This course takes an applied orientation and emphasizes the use of statistical packages. Topics include: linear models, principal components analysis, discriminant analysis, multiple regression analysis, multiple regression with categorical variables, and multi-factor ANOVA. May be taught concurrently with PSY 527. Cannot receive credit for both PSY 527 and PSY 627.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 629 Psychological Tests and Measurements

Recommended Prerequisite: PSY 121 and PSY 200 or equivalent. Theory and techniques underlying measurement of human traits and abilities. Critical analysis of intellectual, achievement, interest and personality tests, including their development, application and potential abuses. May be taught concurrently with PSY 529. Cannot receive credit for both PSY 529 and PSY 629.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 633 Psychological Issues in Religion

Recommended Prerequisite: PSY 121 and REL 100. Comprehensive overview of historical background, research methods, and contemporary issues involving behavior and religious beliefs. Psychological research in the areas of religious development and cognition will be included. May be taught concurrently with PSY 533. Cannot receive credit for both PSY 533 and PSY 633.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 634 Psychology of Infancy

Recommended Prerequisite: PSY 121 and PSY 331. Theory and research on the maturation and cognition of the human infant in the first two years, from a developmental psychometric perspective. General principles of the mental and motor assessment of the infant and interpretation will be emphasized through class demonstrations so that the student may understand the use of these procedures in interpreting development and research. May be taught concurrently with PSY 534. Cannot receive credit for both PSY 634 and PSY 534.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 635 Discipline and Social Behavior in the Classroom

Recommended Prerequisite: PSY 121; and either PSY 360, PSY 380, PSY 385, or PSY 390. Provides a psychological perspective of individual and social factors necessary to develop an effective eclectic approach to discipline and an understanding of social behavior in the classroom. Includes an emphasis on personal, social, and motivational development. May be taught concurrently with PSY 535. Cannot receive credit for both PSY 535 and PSY 635.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 648 Psychological Testing in Remedial Reading

Prerequisite: permission of department head.

Techniques and skills in utilizing psychological tests as they pertain to diagnosing reading disabilities and prediction of success in remedial programs. Students receive supervised practice in administration. May be taught concurrently with PSY 550. Cannot receive credit for both PSY 550 and PSY 648.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

PSY 649 Developing Sport Team Leaders

This course delivers leadership, team processes, and motivation principles to help coaches develop the leadership skills of sport team athletes. This course aligns sport program goals with educational goals by utilizing athletic settings to promote skills that student-athletes can apply on sport teams and in other group settings. Coaches will learn how to set specific leadership goals with team leader-athletes and will learn concrete and constructive ways to mentor leader-athletes. Coaches will use course principles to construct a plan for developing sport team leaders and for making "team leadership" a core team value. May be taught concurrently with PSY 555. Cannot receive credit for both PSY 555 and PSY 649.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

PSY 656 Developing Sport Team Leaders Practicum

Prerequisite: PSY 649 or concurrent enrollment.

Complementing PSY 649 Developing Sport Team Leadership, this course provides a 2-credit option for students to document the application of a leadership development plan on a sport team. This course reinforces the value of leadership and leadership development on sport teams by helping to make "team leadership" a core team value. Advancing this objective, students learn to align the values of sport teams with the broader values of educational institutions. Students taking this course must provide evidence that they have permission to implement a leadership development program on an organized sport team prior to enrolling in the class (hours the student spends with the team must exceed 90 hours). May be taught concurrently with PSY 556. Cannot receive credit for both PSY 556 and PSY 656.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

PSY 657 Forensic Psychology: Child Abuse and the Law

Study of the legal issues related to child abuse and exploitation. Students will gain an understanding of the law pertaining to child cases and how interactions with children can bolster or diminish the quality of children's memory report as seen by the judicial system. The Greene County Prosecutor's Office will participate in the design of this course, thus the specific legal issues discussed will remain current and may change based on the needs of the community. May be taught concurrently with PSY 557. Cannot receive credit for both PSY 657 and PSY 557. Identical with CRM 657. Cannot receive credit for both PSY 657 and CRM 657.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PSY 669 Psychological Effects of Dementia

Recommended Prerequisite: PSY 121 and PSY 370. Description of dementias, with particular references to Alzheimer's Disease and with emphasis on behavioral consequences for both patient and caregiver. Directed practicum. May be taught concurrently with PSY 565. Cannot receive credit for both PSY 565 and PSY 669.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Upon demand

PSY 695 Specialized Topics in Psychology

Recommended Prerequisite: 9 hours of Psychology. Specialized investigation into selected topics in psychology. Graduate students will be required to complete an extra project to be determined by the instructor. May be repeated to a maximum of 9 hours if topic is different. Variable content course. May be taught concurrently with PSY 597. Cannot receive credit for both PSY 695 and PSY 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PSY 700 Problems of Psychology

Individual investigation into a problem or problems of concern to the student and deemed of significance by the instructor. Written report required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PSY 701 Symposium in Psychology

Specific topics selected to introduce graduate students to research and theory. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PSY 703 Human Growth and Development

Depth investigation of growth and development during elementary school years. Experimental evidence and clinical evaluations used to supplement consideration of major theories of development.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 705 Psychology of Adolescence

Depth investigation of growth and development during the adolescent period. Experimental evidence and clinical evaluation used to supplement consideration of major theories of adolescence.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 707 Psychology of the Adult

Development of intellectual functions, personality, and social psychological processes across the adult life span will be emphasized. Normal as well as abnormal phenomena unique to young, middle-aged, and elderly adults will also be considered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 708 Memory

Provides in-depth analyses of historical and current theories and associated research in higher mental cognition processing. Primary emphasis is on normal human adult functioning, although associated topics such as cognitive development, learning dysfunctions and skill enhancement will be considered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 709 Psychological Evaluation of Pre-School Children

Program involving both theory and practice in psychological evaluation of pre-school children.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 710 Psychology of Education

Orientation to the use of psychology in education.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 711 Introductory Statistics for Education and Psychology

Statistical techniques used in education and psychology; overview of scaling techniques, sampling, descriptive techniques, inferential techniques (to include t and x²), reliability and validity.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 716 Applied Psychology in Human Resource Management

A survey of the psychological principles, theory, and research related to human resource practices in organizations. Topics include job analysis, performance appraisal and criterion development, EEO compliance, individual differences measurement, selection and validation research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 718 Organizational Psychology

Recommended Prerequisite: PSY 121 and PSY 304. A survey of the psychological principles, theory, and research related to behavior in organizations. Topics include work motivation, job satisfaction and performance, leadership and group processes, organizational design and development.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 720 Individual Intelligence Testing

Prerequisite: PSY 629 or COU 701.

Analysis of individual tests of intelligence; Wechsler Scales and the Revised Stanford Binet. Students receive supervised practice in administration, scoring and interpretation of individual tests.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

PSY 721 Individual Intelligence Testing II

Prerequisite: PSY 629 or COU 701.

Analysis of individual tests of intelligence; Stanford-Binet Fourth Edition and Kaufman Assessment Battery for Children. Students will receive supervised practice in administration, scoring, and interpretation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

PSY 730 Projective Techniques

Prerequisite: COU 701 and PSY 720.

Introduction to theory of and basic underlying projective methods.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 740 Psychological Assessment

Prerequisite: admission to MS in Psychology program.

Students of clinical psychology will be introduced to the process of psychological diagnosis. They will be expected to master the administration, scoring, and interpretation of individual instruments and become acquainted with the foundations and theory and research on which they rest. In addition the course will emphasize the differential applicability of tests and assessment techniques to a wide range of referral problems and the principles of clinical inference that may be used to interpret, integrate, and communicate their diagnostic findings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 742 Practicum in Psychological Assessment

Prerequisite: PSY 740 and PSY 750 and permission of instructor.

Supervised experience in assessment, diagnoses and report-writing with clients at a community mental health facility. Site arrangements must be made by the Practicum Coordinator during the preceding semester. Consists of a one-hour seminar on campus and 4 hours at the practicum site each week. May be repeated and a minimum grade of "B" must be maintained.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

PSY 745 Statistics and Research Design

Recommended Prerequisite: introductory statistics course from PSY 200, 611; AGR 330; ECO 308; MTH 340; QBA 237; REC 328; SOC 302; or equivalent. Use of the Analysis of Variance (ANOVA) Models and Multivariate Analysis in the design and analysis of psychological experiments.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

PSY 747 Single Subject Research Design in Applied Behavior Analysis

Prerequisite: admission to Applied Behavior Analysis program or permission of instructor.

Provides instruction in the use of single subject design research methods, in both experimental and applied settings. Instruction provided in behavioral measurement via direct and indirect observation, the employment of group and individual (single-subject) time series designs, statistical approaches for within-group and single-subject design data analysis and interpretation, and use of data to evaluate interventions. The course also considers professional issues in the ethical conduct of research and practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 750 Advanced Survey of Psychology

Reinforce breadth of knowledge of psychology in the areas of Biological bases of behavior, Sensation and Perception, Memory, Cognition, Motivation, Development and Social Psychology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 751 Seminar in Methods of Research

Prerequisite: PSY 710 and PSY 711.

Investigation of research methods employed in education and psychology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 752 Research Methods

Prerequisite: PSY 745.

Provides an understanding of the research methods employed in experimental and applied settings. Includes ethical considerations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 753 Program Evaluation

Prerequisite: PSY 745.

The application of research methods to the evaluation of programs and planned change interventions in organizations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 757 Observational Methods and Functional Assessment

Prerequisite: admission to the Applied Behavior Analysis program or permission of instructor.

Recommended Prerequisite: PSY 614. Current research and best practices in the area of behavioral assessment. Topics include behavioral definitions, observational recording techniques, data analysis, functional and stimulus preference assessment methods, and issues of validity and reliability of measurement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 759 Teaching of Psychology

Must be taken prior to or concurrent with first teaching of any regular or laboratory section of any course. Preparation for teaching college courses, includes development of personal philosophies of teaching; suggestions for active student learning; maintaining student motivation; preparing assignments, in-class presentations, and exams; grading; and classroom management. Designed to help graduate students prepare for their first independent college teaching experiences.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

PSY 760 Clinical Communication Skills

Prerequisite: admission to MS in psychology.

Introduction to the nature of the helping process with emphasis on strategies of behavior change, interpersonal communication, and development of basic helping skills.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 761 Ethical and Professional Issues

Prerequisite: admission to MS in Psychology or Applied Behavior Analysis.

An exploration of ethical issues, including values, professional responsibilities, and professional ethics codes. Issues are explored both from ethical and legal perspectives. Current professional issues, such as changing modes of assessment and intervention, are examined.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 764 Group Psychotherapy

Prerequisite: permission of instructor.

An extensive analysis of the factors contributing to the development and maintenance of therapeutic groups in a variety of settings. The prevention and education uses of small groups and small group processes will be included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 765 Psychotherapy and Counseling: Theories and Techniques

Prerequisite: admission to MS in Psychology program.

Investigation of the major theoretical approaches and strategies of psychotherapy and counseling along with the techniques associated with each theory. Emphasis on theoretical bases and critical analysis of comparative research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 766 Psychopathology

Prerequisite: permission of instructor.

Focus is on the differential diagnosis of psychological disorders, the appropriate use of current diagnostic systems, and relevant research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PSY 767 Behavior Disorders of Childhood

Prerequisite: PSY 766.

Course focuses on assessment and treatment of common childhood behavior disorders. The course emphasizes 1) the study of biological, behavioral, cognitive, and systemic variables in the development of childhood behavior disorders; 2) training in multiaxial diagnostic assessment; and 3) interventions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 768 Personality and Social Development

A survey of the major theoretical and practical issues in the study of personality and social development. The course will focus on application of personality to universal human concerns.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 770 Behavioral Systems Analysis

Prerequisite: admission to the MS in Applied Behavior Analysis program or permission of instructor.

Behavioral Systems Analysis (BSA) comes from a synthesis of the fields of behavior analysis and systems analysis and can be defined as the analysis of behavior that occurs in complex and organized social

environments. This course will cover applications of BSA in order to promote behavioral solutions to socially significant practices within large social units like organizations and cultures. Applications will focus on settings such as organizations and the culture more broadly from a functional contextual perspective.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (even-numbered years)

PSY 771 Occupational Health Psychology

Prerequisite: PSY 718.

An in-depth consideration of the psychological principles, theory, research, applications and problems associated with occupational stress, safety and health. Topics include personal, organizational, work-related and social antecedents to stress, as well as the short-term and long-term responses to stress.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 772 Performance Assessment

Prerequisite: PSY 716 and PSY 745.

An in-depth consideration of theory, research, applications and problems of performance assessment in organizations. Topics include criterion development and validation, models of effectiveness, performance appraisal, methods and sources of evaluation, performance feedback, team performance measurement, and biases in assessment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 773 Human Factors

Prerequisite: PSY 751.

Provides an introduction to human factors engineering (ergonomics) primarily in the workplace. Involves emphasis on analyzing job requirements, human capabilities, human-machine interactions, and safety.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 774 Training and Development

Prerequisite: PSY 716 and PSY 718.

An in-depth consideration of theory, research, applications, and problems in the design, conduct and evaluation of training programs in organizational settings. Topics include needs assessment, theories of learning and motivation, transfer of training, and evaluation of training processes and outcomes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 776 Personnel Selection, Placement and Classification

Prerequisite: PSY 716 and PSY 745.

An in-depth consideration of the theory, research, applications, and problems in matching of individual needs, preferences, skills and abilities with the needs and preferences of organizations. Topics include job analysis, theories of human performance, test development and use, alternative selection techniques, EEO law, criterion development, and validation of selection decisions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 777 Conceptual Foundations of Applied Behavioral Science

Prerequisite: admission to Applied Behavior Analysis program or permission of instructor.

The course addresses the history of behavior analysis, philosophy of science, advanced behavioral principles and processes and their application to various content domains in the behavioral, social, and cognitive sciences (e.g., emotion, language, cognition, and culture).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 778 Group Processes

Prerequisite: PSY 718.

An in-depth consideration of theory, research, applications, and problems in group processes in organizations. Topics include models and typologies of group performance, group decision making, group social influence and

ecology, leadership, and team staffing and development.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 779 Topics in Industrial/Organizational Psychology

Prerequisite: PSY 716 and PSY 718.

Advanced study of selected topics in I/O psychology . Course requirements include extensive readings and a paper. May be repeated if different topics for a maximum of 9 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PSY 780 Social Psychology

Prerequisite: admission to the MS in Psychology program.

Advanced study of interactions and social cognition, including attitude change, person perception, and group dynamics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PSY 796 Practicum

Prerequisite: admission to the MS in Psychology or Applied Behavior Analysis program.

Offers an opportunity for the graduate student to gain additional training through field experiences in research, clinical or organizational settings. Such experience need not be confined to the campus. Variable content course. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

PSY 797 Directed Research

Prerequisite: admission to MS in Psychology or Applied Behavior Analysis program.

Offers an opportunity for the graduate student to gain additional training through guided research. Such research need not be confined to the campus. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

PSY 798 Internship

Prerequisite: PSY 796 and permission.

Supervised fieldwork in a professional psychology setting. Includes a seminar paper as a requirement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

PSY 799 Thesis

Prerequisite: admission to MS in Psychology or Applied Behavior Analysis program.

Independent research and study leading to the completion of the thesis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Gerontology

Major(s)

Gerontology (Comprehensive)

Bachelor of Science

Major requirements (48 hours):

1. Prerequisite courses: [BIO 121\(3\)](#) or [BMS 110\(3\)](#) and [111\(1\)](#); [PSY 121\(3\)](#), [SOC 150\(3\)](#). Hours will double count toward General Education requirements.
2. Core Courses: a grade of C or better is required in each course before enrolling in practicum and seminar: [GER 375](#) or [SOC 375\(3\)](#); [GER 351](#) or [PSY 350\(3\)](#); [BMS 260\(3\)](#); [GER 470](#) or [SWK 470\(3\)](#); [GER 480\(3\)](#).
3. One statistics course from: [AGR 330\(3\)](#), [MTH 340\(3\)](#), [PSY 200\(3\)](#), [QBA 237\(3\)](#), [REC 328\(3\)](#), [SOC 302\(3\)](#), or another course approved by advisor.
4. One research methods course from: [PSY 203\(3\)](#), [PSY 302\(3\)](#), [SOC 301\(3\)](#), or another course approved by advisor.
5. One communication skills course from: [COM 325\(3\)](#), [332\(3\)](#), [336\(3\)](#), [390\(3\)](#), [405\(3\)](#), [511\(3\)](#), or another course approved by advisor.
6. One health related course from: [BMS 310\(3\)](#), [COM 507\(3\)](#), [DTN 130\(3\)](#), [DTN 240\(3\)](#), [SOC 341\(3\)](#), [SOC 456\(3\)](#), or another course approved by advisor.
7. [GER 598\(9\)](#) Supervised Practicum in Gerontology; and [GER 599\(3\)](#) Seminar in Gerontology.
8. Nine additional hours of Gerontology-related electives from: [GER 300\(1-3\)](#); [GER 309](#) or [PSY 309\(3\)](#); [GER 354](#) or [PSY 354\(3\)](#); [GER 363](#) or [PSY 363\(3\)](#); [GER 366](#) or [PSY 366\(3\)](#); [GER 370](#) or [PSY 370\(3\)](#); [GER 396\(3\)](#); [GER 397\(1-3\)](#); [GER 492\(1-4\)](#). Other courses may be accepted as electives but must be approved by advisor.
9. Public Affairs Capstone Experience will be fulfilled by completion of [GER 598\(9\)](#) and [GER 599\(3\)](#).
10. Electives to complete a total of 120 hours for the degree. Students are encouraged to use these hours to complete another major or minor.

Note: PSY 101, PSY 380, PSY 385, and PSY 390 may not be used toward this requirement.

Psychology

Bachelor of Science in Education (Non-Certifiable)

No certificate to teach is issued on a psychology minor. However, students planning to teach high school psychology will find this minor valuable, as well as those planning graduate work in educational psychology, counseling, etc.

1. Required Courses (9-12 hours) from one of the following groups:

Group 1: [PSY 121\(3\)](#) and [PSY 203\(3\)](#) and [PSY 331\(3\)](#)

Group 2: [PSY 121\(3\)](#) and [PSY 200\(3\)](#) and [PSY 302\(3\)](#) and [PSY 331\(3\)](#)

2. Additional 12-15 hours in PSY courses, numbered 300 or higher, to total at least 24 hours. Note: PSY 101, PSY 380, PSY 385, and PSY 390 may not be used toward this requirement.

Accelerated graduate program in Applied Behavior Analysis

Eligible Missouri State undergraduate students may apply for admission to the Applied Behavior Analysis program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-applied-behavior-analysis.htm) (<https://graduate.missouristate.edu/Catalog/prog-applied-behavior-analysis.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/Catalog/undergraduate-students-taking-graduate-credit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Forensic Child Psychology Certificate

Forensic Child Psychology

This certificate is offered to support professionals in the fields of criminology, social work, medicine and other related specialties who must interact with children in a forensic setting (e.g., forensic child interviewers or law enforcement officers) or who are first-line service providers (e.g., teachers, counselors, social workers and nurses). Student will be trained in 1) general forensic psychology with children, 2) child abuse detection, assessment, intervention and prevention, 3) child abuse law, and 4) mandated reporting of child abuse.

Admission requirements

To be admitted students must have completed 60 hours and have a GPA of at least 3.00 and submit a personal statement explaining their reasons for seeking the certificate and how the program will meet their professional goals. Meeting these minimum requirements does not guarantee admission to the certificate.

Program requirements (12 hours)

1. [PSY 505\(3\)](#), [PSY 514\(3\)](#), [PSY 557\(3\)](#), [CFD 562\(3\)](#).
2. All candidates must satisfy the [General University Certificate Requirements](#).

Criminal Investigation Certificate

Criminal Investigation

This certificate is jointly offer by the Department of Criminology and Criminal Justice and the Department of Psychology. The certificate is designed for students interested in pursuing criminal justice careers that require investigatory skills. The curriculum covers fundamental investigative principles and strategies, the application of forensic science techniques to case solving, and motivating factors underlying criminal behavior. Students will understand how arrest procedures, rules of evidence, leads and informants, and witness interview and suspect interrogation are integrated into the criminal investigation process.

This certificate is administered by the Department of Criminology and Criminal Justice.

Admission requirements

Completion of at least 60 hours and a GPA of 2.50 or higher.

Program requirement (15 hours)

1. [CRM 314\(3\)](#), [CRM 336\(3\)](#), [CRM 382\(3\)](#).
2. Six hours from: [ANT 363\(3\)](#), [CRM 333\(3\)](#), [CRM 334\(3\)](#), [CRM 335\(3\)](#), [PSY 505\(3\)](#), [PSY 525\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of 2.50 or higher in courses used to fulfill the certificate requirements.

Undergraduate Catalog

Public Health and Sports Medicine Courses

Athletic Training (ATC) courses

ATC 220 Introduction to Sports Medicine

This course will cover various aspects of sports medicine professions and the Sports Medicine program at Missouri State. Students will have the opportunity to explore the Sports Medicine professions by completing five clinical observation hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

ATC 221 Clinical Skills in Sports Medicine

Prerequisite: ATC 220 or concurrent enrollment.

Students are introduced to many of the emergency management and clinical skills required by allied health care professionals in a variety of clinical settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Spring, Summer

ATC 222 Athletic Injuries

Prerequisite: BMS 307 or KIN 250.

Techniques, principles and theory underlying prevention and care of athletic injuries.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	1	Fall, Spring

ATC 224 Basic Athletic Training/Sports Medicine Techniques

Prerequisite: ATC 221 and BMS 307 (or concurrent enrollment with permission of program director).

Procedures, techniques, principles and theory relative to development of essential cognitive and psychomotor competencies commonly used in athletic training.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall

ATC 225 Sports Medicine Observation

Prerequisite: ATC 220.

Clinical observation hours and experience for students considering a career in a sports medicine field. Students will explore various athletic training employment settings and learn basic skills. Must be repeated to a minimum of four hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

ATC 240 Clinical Practicum I

Prerequisite: ATC 221 and permission of program director.

Supervised clinical experiences in athletic training. Emphasis on developing clinical skills required by athletic trainers. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall

ATC 241 Clinical Practicum II

Prerequisite: ATC 221 and ATC 240 and permission of program director.

Continuation of supervised clinical experiences in athletic training. Emphasis on developing and refining clinical skills required by athletic trainers. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

ATC 297 Special Topics

Prerequisite: permission of program director.

Special study of sports medicine and athletic training. Variable content course. May be repeated to a maximum of four hours. Same topic may be repeated once.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

ATC 320 Athletic Training Administration

Prerequisite: at least 75 hours towards Athletic Training major completed or at least 15 hours towards Sports Medicine minor completed; and permission of program director.

Development and administration of current theories, methods and techniques related to the organization and administration of athletic training programs. Integration of leadership behaviors into the practice and management of athletic training practice areas such as program management, budget, insurance, facility design, legal issues, global issues, and ethics in the profession of athletic training will be discussed. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ATC 324 Therapeutic Modalities

Prerequisite: BMS 308 and permission of program director.

A study of the theory and application of various therapeutic modalities used in the treatment of many injuries, including ultrasound, diathermy, electrical stimulation, hydrotherapy, cryotherapy, and thermotherapy. May be taught concurrently with OTE 624. Cannot receive credit for both ATC 324 and OTE 624.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

ATC 326 Therapeutic Interventions in Athletic Training

Prerequisite: ATC 222 or ATC 224; and BMS 308 and PSY 121.

Theoretical and practical synthesis of area often requiring instruction on the part of an athletic trainer to enhance performance opportunities for athletes and other areas of physical activity. Emphasis on subject matter and skills necessary to recognize potential problems, help in understanding the interventions, and develop techniques for referral.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

ATC 328 Lower Body Assessment

Prerequisite: ATC 221; and BMS 307 with grade of "C" or better; and BMS 450.

Content addresses observation and evaluation techniques for injuries to the lower body. Students must integrate anatomical structures to provide a basis for critical decision making in an injury management environment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall

ATC 329 Upper Body Assessment

Prerequisite: ATC 328.

Content addresses observation and evaluation techniques for injuries to the upper body. Students must integrate anatomical structures to provide a basis for critical decision making in an injury management environment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

ATC 332 Research Methods in Sports Medicine

Prerequisite: PSY 200.

Interactive study of importance and process of conducting ethical research in the sports medicine and other healthcare professions. Emphasis placed on research design, ethics, collection of data, and the dissemination of results.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

ATC 340 Clinical Practicum III

Prerequisite: ATC 241 and permission of program director.

Continuation of supervised clinical experiences in athletic training. Emphasis on developing clinical decision making skills used by athletic trainers. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall

ATC 341 Clinical Practicum IV

Prerequisite: ATC 340 and permission of program director.

Continuation of supervised clinical experiences in athletic training. Emphasis is on refining clinical decision making skills used by athletic trainers. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

ATC 344 Foundations of Rehabilitation

Prerequisite: ATC 328 and BMS 450.

Content addresses basic concepts, foundations and principles of musculoskeletal rehabilitation relating to the body. Orthopedic surgical procedures of the body common in athletic training with a focus primarily on joint and musculoskeletal structures, tissue pathology for each protocol, healing constraints, and implications for rehabilitation will also be presented.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall

ATC 354 Clinical Applications of Rehabilitation

Prerequisite: ATC 344.

Applied study of advanced principles of musculoskeletal rehabilitation. Course will focus on clinical decision making as it relates to rehabilitation progression, exercise selection, reconditioning, return to activity and other relative aspects of the rehabilitation process.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Spring

ATC 397 Special Topics

Prerequisite: permission of program director.

Special study of sports medicine and athletic training. Variable content course. May be repeated to a maximum of four hours. Same topic may be repeated once.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

ATC 413 Sports Medicine Informatics

This course will cover various aspects of health informatics and data collection, storage, retrieval, and analysis. Special focus on widely available informatic systems and their application to sports medicine care. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ATC 420 Medical Aspects of Athletic Training

Prerequisite: BMS 308 with grade of "C" or better; and 60 hours; and permission of program director.

Students are exposed to various medical specialties which contribute to an understanding of comprehensive health care program. Topics stressed include injury and illness prevention, definitive medical treatment, indications for referral, and injury rehabilitation from the perspective of health care specialists in the community.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ATC 425 Contemporary Topics in Athletic Training

Prerequisite: at least 75 hours towards Athletic Training major completed or at least 15 hours toward Sports Medicine minor completed; and permission.

Discussion of current issues and problems facing the athletic training profession.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

ATC 440 Clinical Practicum V

Prerequisite: ATC 341 and permission of program director.

Continuation of supervised clinical experiences in athletic training. Emphasis on developing critical thinking skills associated with injury rehabilitation used by athletic trainers. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall

ATC 441 Clinical Practicum VI

Prerequisite: ATC 440 and permission of program director.

Continuation of supervised clinical experiences in athletic training. Emphasis is on refining critical thinking skills associated with injury assessment, management, and rehabilitation. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

ATC 444 Applied Orthopedic Review

Prerequisite: BMS 307.

This course will cover applied human anatomy with a special focus on musculoskeletal anatomy and principles of human movement. The course will involve hands-on palpation and movement analysis activities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

ATC 497 Athletic Training Seminar

Prerequisite: ATC 221 and ATC 222; and permission of program director.

This course offers a concentration in subject matter to improve skill and knowledge in specific areas. Each workshop or seminar will be concerned with a single topic. Number of class hours is determined by length and specificity of workshop/seminar. Thirty clock hours equal one semester hour. May be repeated to a maximum of three hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

ATC 498 Research Projects in Athletic Training

Prerequisite: ATC 332 and PSY 200; and permission of program director.

This course provides an opportunity to enhance research skills within a specific topic area of athletic training. The student would conduct a research project under faculty supervision. May be repeated once to a maximum of six hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

ATC 499 Independent Study in Athletic Training

Prerequisite: ATC 221 and ATC 222; and permission of program director.

This course provides opportunities to pursue specific subject areas in athletic training. The independent study may be a reading project or a practical application of theories under faculty supervision. May be repeated to a maximum of three hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

ATC 601 Foundations of Athletic Training

Prerequisite: permission of program director.

This course will cover various aspects of the history, development, socialization and standards of practice of the athletic training profession. Key terms and concepts utilized in the field, areas of practice, roles and responsibilities, and other essential knowledge and skills for the athletic training profession will be discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Summer

ATC 602 Foundations of Therapeutic Intervention

Prerequisite: permission of program director.

This course will provide a foundation of knowledge for injury/illness evaluation and therapeutic intervention.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Summer

ATC 604 Clinical Skills in Athletic Training

Prerequisite: permission of program director.

Students are introduced to various procedures, techniques, principles and theories relative to development of injury and illness prevention and essential immediate and emergency management clinical skills required of an athletic trainer.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Summer

ATC 610 Leadership Theory and Issues in Athletic Training

This course covers an examination and application of leadership and professional theories and the attributes, behaviors, and values necessary for leadership in health professions (specifically to aspects of the practice of

athletic training).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

ATC 612 Human Movement

This course will address the neuromotor coordination and integration of human movement. Concepts of brain mapping, the visual and vestibular systems, movement, and disassociation will be addressed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall

ATC 620 Leadership Concepts in Athletic Training

This course covers an examination and application of leadership and professional theories and the attributes, behaviors, and values necessary for leadership in health professions (specially to aspects of the practice of athletic training.) The organization and function of professional associations, activities that serve the professional community and service to the public, the AT's role in healthcare delivery systems, outcome measurement, the role of evidence-based practice in the AT profession, cultural competence, and medical legal situations will also be covered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	1	Spring

ATC 622 Athletic Training Practicum I

Prerequisite: permission of program director.

This is a supervised, 16-week clinical experience designed to provide students familiarity with the athletic training profession and a variety of work settings. Emphasis will be placed on the foundational behaviors of athletic training, professional communication skills and an understanding of pertinent clinical practice topics and issues. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Fall

ATC 623 Patient Evaluation I

Prerequisite: permission of program director.

This course provides an overview of the etiology, incidence and prevalence, signs and symptoms, course and prognosis, and medical management of common conditions impacting physical activity. Content focuses on observation and evaluation techniques for injuries/impairments affecting the lower body. Students will incorporate information gained from evaluation process and assessment techniques to make a clinical diagnosis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ATC 630 Leadership Practicum

Prerequisite: ATC 610 and ATC 612.

An intensive clinical or administrative leadership experience requiring students to apply leadership knowledge and skills to real world issues. The leadership experience must also embrace the MSU public affairs mission and culminate in a meaningful response to an issue within the athletic training profession.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall

ATC 631 AT Integrated Lab I

Prerequisite: permission of program director.

Course content emphasizes the management of patients with injuries/impairments of the lower body. Students will integrate skills and knowledge of examination, assessment, diagnosis, prognosis, treatment, analysis of functional outcomes, and re-assessment to develop and manage appropriate patient plans of care. Emphasis will be placed upon using a systematic process, critical thinking, progression of techniques, and evidence based decision making.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall

ATC 632 Manual Therapy Techniques

Detailed analysis and application of manual therapy techniques for treating musculoskeletal pathologies involving the spine and upper and lower extremities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

ATC 633 Therapeutic Interventions I

Prerequisite: permission of program director.

This course will cover the theoretical and practical application of interventions (therapeutic exercise, modality devices, manual techniques) designed to enhance performance and function with an emphasis on lower extremity injuries and conditions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ATC 640 Evidence-Based Practice

Course will analyze the clinical reasoning process used in health care disciplines, examine the different types and levels of clinical evidence and explore the implementation of evidence-based practice skills into the student's health care profession/practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

ATC 653 Patient Evaluation II

Prerequisite: permission of program director.

This course provides an overview of the etiology, incidence and prevalence, signs and symptoms, course and prognosis, and medical management of common conditions impacting physical activity. Content focuses on observation and evaluation techniques for injuries/impairments affecting the upper body. Students will incorporate information gained from evaluation process and assessment techniques to make a clinical diagnosis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ATC 663 Therapeutic Interventions II

Prerequisite: permission of program director.

This course builds on the knowledge and skills acquired in Therapeutic Interventions I. This course will cover the theoretical and practical application of interventions (therapeutic exercise, modality devices, manual techniques) designed to enhance performance and function with an emphasis on lower extremity injuries and conditions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ATC 671 AT Integrated Lab II

Prerequisite: permission of program director.

Course content emphasizes the management of patients with musculoskeletal injuries/impairments of the upper body. Students will integrate skills and knowledge of examination, assessment, diagnosis, prognosis, treatment, analysis of functional outcomes, and re-assessment to develop and manage appropriate patient plans of care. Emphasis will be placed upon using a systematic process, critical thinking, progression of techniques, and evidence based decision making.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring

ATC 682 AT Practicum II

Prerequisite: Permission of program director.

This course is designed to provide students with continued familiarity with a variety of patients, diagnoses, age ranges, and situations; to see the roles of athletic trainers. This is a supervised, 16-week clinical experience that provides the opportunity to observe and apply knowledge and skills gained from didactic courses and clinical experiences. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Spring

ATC 697 Special Topics

Prerequisite: permission of program director.

Special study of sports medicine and athletic training. Variable content course. May be repeated to a maximum of three hours. Same topic may be repeated once.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

ATC 710 Seminar in Athletic Training

Prerequisite: permission of instructor.

Provides a forum for topics germane to the clinical practice settings and transition to professional practice. Topics of interest will cover areas such as performance enhancement principles, diagnostic assessment techniques, surgical procedures, pediatric athletic medicine, clinical education principles, and current professional topics. May be repeated to a maximum of two hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

ATC 711 Problem Based Practice

Prerequisite: permission of program director.

Students will be engaged in real cases that develop both problem solving strategies and disciplinary knowledge. Students will be placed in the active role of problem-solvers within situations that simulates the kind of problems faced by health care providers. Emphasis will be placed upon decision making and evidence based rationale. Must be repeated to a minimum of three hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring, Summer

ATC 713 AT Practicum III

Prerequisite: permission of program director.

This course is a structured clinical experience under the supervision of a qualified preceptor. Students are expected to develop their clinical decision making skills and apply skills and knowledge gained in didactic courses and clinical experiences. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Summer

ATC 723 Movement Pattern Assessment

Introduction of fundamental movement patterns of the body and how to assess these movement patterns. Concepts of neuromotor human development and how these relate to the learning/patterning of these fundamental movement patterns.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

ATC 724 AT Practicum IV

Prerequisite: permission of program director.

This course provides continued clinical practice in the form of an eight-week, immersive clinical practicum and an eight-week, integrated clinical practicum under the supervision of a qualified preceptor. Students are expected to continue to develop their clinical decision making skills and apply skills and knowledge gained in didactic courses and clinical experiences. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Fall

ATC 732 Applied Research Methods in Health Care

Research course in which students deepen their understanding and enhance their research abilities in order to contribute to the advancement of their chosen health care discipline. Course will explore topics of research design and research methods for conducting applied and clinical research projects with a focus on conducting outcomes-related research that can support clinical practices in the student's respective health care discipline.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ATC 733 Corrective Exercise Techniques/Movement Pattern Interventions

This course will cover the corrections of impairments and compensations to the fundamental movement patterns.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

ATC 734 Professional Development and Leadership

Prerequisite: permission of the program director.

This course introduces the student to the role of the athletic trainer as a leader within their own site, the profession, and the broader interprofessional health care system. Integration of the University's Public Affairs mission into the practice and management of fiscal management, marketing, and human resource functions. Discussion of regulatory systems, legal considerations, global issues, and ethics in the profession will be discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Fall

ATC 741 Therapeutic Interventions III

Prerequisite: permission of program director.

This course builds on the knowledge and skills acquired in Therapeutic Interventions I and II. This course will cover the theoretical and practical application of interventions with an emphasis on manual techniques and corrective exercises.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring

ATC 743 Advanced Therapeutic Interventions

Advanced concepts and evidence-based principles of rehabilitation programs. Enhancement of previously learned therapeutic exercise techniques and integration of therapeutic modalities and therapeutic exercise, including objective and functional goal setting and evaluation for appropriate progression and expedited return to activity.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

ATC 753 Pharmacology/General Medical Concepts

Prerequisite: permission of program director.

This course will expose students to various medical specialties which contribute to an understanding of comprehensive health care program. Emphasis on subject matter and skills necessary to recognize potential problems, help in understanding the interventions, and develop techniques for referral.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

ATC 773 Athletic Training Seminar

Prerequisite: permission of program director.

This course will allow students to review their previous course work, discuss current issues facing the profession, and develop personal learning plans for their future endeavors.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ATC 784 AT Practicum V

Prerequisite: permission of program director.

This course is the final clinical practicum. Students will complete both an immersive and an integrated clinical experience. Students will continue to develop their clinical decision making skills and applying skills and knowledge gained in didactic courses and clinical experiences. Students may be required to be in attendance during periods when regular university classes are not in session.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Spring

ATC 791 AT Research Project

Prerequisite: permission of program director.

In-depth scientific study of an area of interest that culminates in a scholarly paper and formal community presentation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Spring

ATC 792 Independent Study in Athletic Training

Prerequisite: permission of program director.

The course provides opportunities to pursue specific subject areas of interest in athletic training or as needs arise which are not covered by courses or content in the program. May be repeated to a maximum of three hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

ATC 797 Non-thesis Project

Prerequisite: ATC 732 and permission of project advisor.

Active participation in the ongoing research and/or clinical activities of athletic training faculty or clinical experience supervisor. Culminates in a presentation of an extensive scholarly paper. Must be repeated to a minimum of three hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

ATC 798 Special Topics

Prerequisite: permission of program director.

Special study of sports medicine and athletic training. Variable content course. May be repeated to a maximum of four hours. Same topic may be repeated once.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-2			Upon demand

ATC 799 Thesis

Prerequisite: ATC 732 and permission of research advisor.

Demonstration of the capacity for research and independent thought culminating in a thesis. Must be repeated to a minimum of six hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

Health (HLH) courses

HLH 195 Introduction to the Health Professions

Designed to familiarize students with a variety of health career opportunities, and to provide guidance in early curriculum planning and alternative career options. Identical with BMS 195. Cannot receive credit for both HLH 195 and BMS 195.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

HLH 399 Cooperative Education in the Health Sciences

Prerequisite: acceptance into the Cooperative Education Program and permission.

A supervised learning experience that integrates on-the-job training with academic credit. The student will be required to complete assigned academic work related to the area of practical experience.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

HLH 582 Motivational Interviewing for Health Professionals

Prerequisite: permission of instructor.

This is an advanced level course for students who have had an introduction into health behavior theories and are interested in working in the health field. Course content will include an exploration into the attitudes and motivations of personal health behavior and an in-depth exploration of motivational interviewing principles and applications. May be taught concurrently with HLH 682. Cannot receive credit for both HLH 582 and HLH 682.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HLH 682 Motivational Interviewing for Health Professionals

Prerequisite: permission of instructor.

This is an advanced level course for students who have had an introduction into health behavior theories and are interested in working in the health field. Course content will include an exploration into the attitudes and motivations of personal health behavior and an in-depth exploration of motivational interviewing principles and applications. May be taught concurrently with HLH 582. Cannot receive credit for both HLH 582 and HLH 682.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HLH 710 Introduction to Health Promotion and Wellness Management

This is an introductory course in which students will gain a general understanding of the health promotion and wellness management (HPWM) field. The job opportunities, history, mission, terminology, philosophy, ethical principles, organizations, concepts and foundations of HPWM will be explored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HLH 750 Programming Approaches in Wellness/Health Promotion

Organizational and administrative approaches utilized in the conduct of wellness/health promotion programs will be studied. Emphasis will be placed upon the selection, development, promotion, conduct, and evaluation of the various components of wellness/health promotion programs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HLH 752 Health Risk Identification and Management

Procedures and instrumentation utilized in the identification and assessment of risk factors associated with cardiovascular and other major life-style generated diseases and conditions will be studied. Emphasis will be placed upon the utilization of risk factor data in the conduct of a wellness/health promotion program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HLH 760 Health Promotion Planning

A culminating course in the MS in Health Promotion and Wellness Management degree program. This course will focus on the development of health promotion in the workplace: Topics discussed will include effects of health promotion, the compression of morbidity, developing awareness strategies, health assessments, theories of health behavior (self-efficacy, social learning theory, health belief model, theory of planned behavior, stages of change theory), and evaluating existing workplace health promotion programs (physical activity in the workplace, worksite nutrition programs, worksite weight management, tobacco control and cessation, and stress management). The current professional literature related to health promotion will also be reviewed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HLH 770 Seminar in Health Promotion and Wellness Management

Review of the professional literature relating to current issues in health promotion and wellness. Topics researched and discussed include health care ethics, diversity, cultural aspects, long-range planning, public relations, legal considerations, and grant-writing. Includes guided development and completion of an extensive research paper.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HLH 791 Wellness Internship

Prerequisite: permission of Health Internship Coordinator.

Supervised field experience in a health promotion or health care setting. Directly involves the student in the application of organizational skills and wellness manager skills. Student must complete a minimum number of clinical hours. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall

HLH 799 Thesis

Prerequisite: HLH 700 or equivalent; and KIN 705 or PBH 730 or equivalent; and permission of graduate coordinator of Health Promotion and Wellness Management program.

Independent research and study connected with the preparation of a thesis. May be repeated but no more than 6 hours may be counted toward degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

Interprofessional Education (IPE) courses

IPE 300 Service Learning in Health Services

Prerequisite: IPE 375 and admission to the Health Services program.

This service component of an existing course provides students with exposure to a variety of health care fields and practices, while providing a beneficial public service to the community. Students will be able to contribute in a meaningful way to the betterment of the community learning site and the clients it serves. Additionally, students will expand their experiential base and will increase their skills in critical thinking and problem solving. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

IPE 375 Introduction to Interprofessional Health Care

Prerequisite: 30 hours.

This course provides an introduction to interprofessional health care education and collaborative practice for students in health professions programs. Topics include the history of interprofessional health care education in the U.S. and internationally, philosophical and theoretical foundations, and competencies required for effective collaboration to improve health care outcomes. Students explore the roles of various health professions in collaborative patient/client, family, and community health care. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

IPE 376 Cultural Competence in Health Care

Prerequisite: Health Services major or permission.

This course explores issues and challenges that can be encountered in the health care setting working with cultural and ethnically diverse patient populations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

IPE 377 Global Issues in Health Services

Prerequisite: Health Services major or permission.

This course introduces students to the principal health systems of the world's populations, and major challenges to improving health globally. Students will explore interdisciplinary factors accounting for health patterns that impact global health, health care delivery systems worldwide, and the governmental, economic, social and political forces that influence them.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

IPE 378 Healthcare Quality Management

This course provides a survey of the basic principles and techniques of quality management in healthcare including high-reliability concepts that help organizations achieve safety, quality, and efficiency goals. The course will examine a range of topics from measuring performance to creating high-quality services that represent excellence in a healthcare organization.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

IPE 379 Interprofessional Perspectives on Population Health

Prerequisite: 30 hours.

This course examines the impact of health care access, quality of health services, individual behaviors, social environments, physical environments, biological factors, and policies and programs on population health outcomes. Emphasis will be placed on the role of the interprofessional health care team in improving the health of the public.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

IPE 381 Statistics for the Health Professions

Prerequisite: 30 hours and the General Education Quantitative Literacy requirement; and Health Services major or permission.

This course provides an introduction to statistical data analysis and interpretation, with an emphasis on techniques used in the health professions. Descriptive statistics including measures of central tendency and variability, probability, estimation, and graphing will be discussed. Students will use computer-based statistical software for hypothesis testing, including independent and repeated measures t tests, analysis of variance, correlation, regression, and non-parametric testing. Emphasis is given to interpretation using effect size, confidence intervals, power analysis, and presentation of findings using APA style. Cannot receive credit toward a degree for more than one of the following courses: AGR 330, IPE 381, MTH 340, PSY 200, QBA 237, REC 328, or SOC 302.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

IPE 382 Introduction to Health Insurance and Managed Care

Prerequisite: 30 hours; and Health Services major or permission.

This course focuses on the development of health insurance and managed care practices in the United States. Topics include the impact of managed care on health care delivery systems and reimbursement; public and private sector health insurance and benefit plans; key regulations and laws governing health care and health insurance; and current topics in health care reform. Emphasis will be placed on the impact of managed care practices on the interprofessional health care team.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

IPE 470 Foundations of Patient Safety for Health Professionals

Prerequisite: IPE 375 or concurrent enrollment.

This course provides a foundation for patient safety and health care quality improvement for students in the health professions with an emphasis on the roles of both individuals and systems. Topics include: the scope of the problem, terminology and basic concepts of safety systems, patient safety interventions, measuring and reporting safety, incident investigations, institutional responses to adverse events, communication and teamwork, and models to improve patient safety.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

IPE 475 Evidence-Based Health Care Practice

Prerequisite: IPE 375.

This course will enable students to develop the analytical and critical thinking skills necessary to assess the scientific literature, clinical guidelines, and other information resources needed to integrate evidence into practice to improve health care outcomes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

IPE 575 Collaborative Health Care Leadership

Prerequisite: 60 hours; and admitted to the Health Services degree program.

This course explores theories, models and responsibilities of leadership within an interprofessional health care context. Students apply leadership practices that support collaborative practice and synthesize prior learning to plan, implement, and evaluate a health project designed to improve patient/client health outcomes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

IPE 576 Professional Issues in Health Services

Prerequisite: 60 hours; and admitted to the Health Services degree program.

This course is designed to prepare future health care professionals to identify, critically examine, and address issues that occur in the interprofessional health care environment. Students will utilize professional ethics and evidence-based decision-making to analyze various case studies and propose possible solutions to issues identified.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

IPE 599 Health Literacy in the Human Services

This course offers an interdisciplinary approach to understanding functional health literacy and how the public's literacy skills affect interactions with health and human services professionals. Includes an examination of the data for national and international literacy levels and populations at risk for low literacy; research on health literacy; assessment tools; and practical techniques for addressing literacy issues in spoken and written communications at the practitioner and organizational levels. Identical with SWK 599; may be taught

concurrently with SWK 696 or PBH 699. May only receive credit for one of the following: IPE 599, SWK 599, SWK 696, or PBH 699.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

Public Health (PBH) courses

PBH 699 Health Literacy in the Human Services

Prerequisite: permission of instructor.

This course offers an interdisciplinary approach to understanding functional health literacy and how the public's literacy skills affect interactions with health and human services professionals. Includes an examination of the data for national and international literacy levels and populations at risk for low literacy; research on health literacy; assessment tools; and practical techniques for addressing literacy issues in spoken and written communications at the practitioner and organizational levels. Identical with SWK 696; may be taught concurrently with IPE 599, SWK 599, or SWK 696. Can only receive credit one of the following: IPE 599, SWK 599, SWK 696, or PBH 699.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PBH 710 Clinical Epidemiology

This course is an introduction to the epidemiological methods and procedures utilized in a clinical environment. The course will include the study of infectious and non-infectious disease epidemiology. Students will learn how to use basic epidemiological concepts and methods in the clinical setting in order to make better decisions regarding evidence based medicine and quality of care. Basic statistical measures used in the analysis of clinical and epidemiologic evaluations, including measures of disease frequency and measures of absolute and relative effects, will be covered. Additional topics include accessing and evaluating sources of data, qualitative and quantitative systematic reviews of literature based evidence, and meta-analyses. This course cannot be counted toward the Master of Public Health. It is designed for students in clinical fields such as nursing practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PBH 720 Epidemiology

An introduction to the epidemiological methods and procedures utilized in the study of the origin, distribution, and control of disease. It will include the study of infectious and non-infectious disease etiology, including vector control, host defenses and resistance, and investigation of disease outbreaks. Students will learn to use basic epidemiological concepts and methods for program planning, evaluation, and research. Basic statistical measures used in the analysis of clinical and epidemiologic evaluations, including measures of disease frequency and measures of absolute and relative effects, will be covered. Identical with NUR 700. Cannot receive credit for PBH 720 and NUR 700.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PBH 730 Biostatistics in Health Sciences

This course is an introduction to biostatistical methods in the context of public health and medical sciences. Major topics will include: research design and measurement, sampling, exploratory data analysis, probability and sampling distributions, hypothesis testing, contingency table analysis, nonparametric methods, correlation, linear regression, logistic regression and survival analysis. Emphasis will be on developing an understanding of these methods and drawing appropriate conclusions from analysis findings. Students will also be introduced to statistical programming packages.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PBH 735 Software Applications and Data Sources in Public Health

Prerequisite: permission of instructor.

This course will provide an overview of important software and databases that are commonly used in public health surveillance, program planning and research. Students will learn to access, analyze, and interpret morbidity and mortality data from a variety of national and statewide data sources (e.g., NHANS, BRFSS, MICA, CDC Wonder, vital statistics). Data will be analyzed descriptively using statistical software including Excel, CDC's EpiInfo, SPSS and/or SAS.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PBH 740 Health Behavior

This course examines selected theories of health behavior relevant to individual and community health promotion program planning. Students will analyze biological, psychological, sociological, and environmental influences on health behavior and evaluate strategies for health promotion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PBH 745 Environmental Health

This course will investigate and examine the relationships of environmental health problems to human health. Students will survey the major environmental issues facing developed and developing countries. Topics include water supply, air and noise pollution, sewage treatment and waste disposal, pest and pesticides, toxic waste, energy alternatives, food and drug quality assurance, population control, and environmental disease control.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PBH 756 Introduction to Public Health

This course will provide a general introduction to public health. It will discuss the history of public health; international, federal, state, and local agencies; voluntary health agencies; professional health organizations; the legislative process as it relates to public health, environmental health, health promotion, basic public health statistics and an introduction to epidemiology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PBH 758 Contemporary Issues in Public Health

In-depth consideration of pertinent issues, trends, controversy, and current research in public health.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PBH 760 Research Methods in Public Health

This course is designed to help students gain the necessary knowledge and skills for undertaking research on issues related to public health.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PBH 772 Toxicology and Hazardous Materials

A study of toxic substances and their effects in the environment and in living organisms. This course also includes a study of safety methods for identifying, monitoring, handling, processing, containing, storing, and disposing hazardous and toxic substances in the environment and workplace. Students are encouraged to have had courses in physiology, biochemistry and/or pharmacology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PBH 775 Principles and Skills of Public Health Administration

This course is designed to provide a comprehensive overview of the administrative, managerial and organizational practices of health professionals in a variety of settings. Opportunities for the development and application of administrative competencies in health education/health care settings will be provided.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PBH 778 Chronic Disease Epidemiology

This course examines problems and methods used in studying chronic diseases. Focus will be on the collection and interpretation of chronic disease data, and application of epidemiological and statistical principles pertaining to cancer, cardiovascular diseases, cerebrovascular diseases, chronic lung diseases, diabetes, musculoskeletal diseases, neurologic disorders and other chronic diseases.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PBH 781 Public Health Preparedness

This course will investigate the health risks and hazards associated with emergency situations, and the roles of public health professionals and volunteers in the preparation for and response to emergencies and disasters.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PBH 783 International Health and Infectious Disease

This course will investigate the epidemiology, impact, and control of infectious diseases in the context of the international environment. Topics will include the structure and financing of health systems in the developing world, the medical community's ability to respond to infectious disease risks, and the specific impacts of major infectious diseases with an emphasis on tuberculosis, AIDS, and malaria. This course is not a clinical course and will not address the diagnosis or treatment of disease.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PBH 785 Seminar in Public Health

Prerequisite: permission of Program Director.

Variable topics course. The study, analysis, and discussion of timely issues in public health. May be repeated for credit if topic is different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PBH 788 Public Health Practicum

The Public Health practicum is required of all students enrolled in the Professional Option of the MPH program. It will involve developing, implementing and establishing a public health intervention that includes, reflects, and integrates public health principles, theory, and practice as identified in the Masters in Public Health curriculum. All required courses must be completed in order to be eligible. Project selection must be approved by the course instructor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

PBH 790 Independent Study in Public Health

Prerequisite: permission of instructor and Program Director.

The independent study in Public Health is a carefully planned experience which allows the advanced student to investigate a clearly defined problem that will enhance their academic preparation. May be repeated for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PBH 798 Public Health Field Experience

Prerequisite: students must have successfully completed 33 hours including all public health core and other required courses and passed the core course exam.

The required field experience provides experience in program development, community relations, public education, and research. Possible sites include: official health agencies, voluntary health agencies, or community social agencies. Selection is dependent on the students' backgrounds and career expectations. Students may choose to spend their entire time in one agency, or, for shorter periods, in 2 or more agencies. The field experience can be done during the fall, spring, or summer and can be no less than 200 hours. All field experiences must be approved by the field experience faculty supervisor and the Program Director to ensure the site acceptability. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

PBH 799 Capstone Project in Public Health

Prerequisite: admission to the Master of Public Health program.

The Capstone Project provides students the opportunity to integrate knowledge gained in the classroom with real-world problems through completion of a major research, program planning, policy development, management, service delivery, or evaluation project. Some aspect of the project must be original, whether it is the topic itself, an analysis of newly collected or extant data, the reinterpretation of others' finding, or the design and completion of a community project. While student led, the project is designed in consultation with, and carried out under the guidance of, a faculty supervisor. Student must have the capstone project proposal form approved by the faculty supervisor and Program Director prior to enrollment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

Health Services

Major(s)

Health Services (Comprehensive)

Bachelor of Science

The comprehensive major in Health Services is an interdisciplinary program designed to:

- Provide allied health professionals with associate degrees or certificates opportunities for professional growth, preparation for leadership positions, and career advancement
- Provide a foundation for those who plan to enter the workforce as a non-clinical healthcare professional
- Provide a foundation for those who wish to progress into non-clinical graduate programs

Admission Requirements

Formal admission to the Health Services major requires:

1. Complete of at least 30 hours of coursework.
2. Completion of [IPE 375\(3\)](#) with a grade of "C" or better.
3. A combined (Missouri State and transfer) GPA of 2.75 or higher. Students who fail to meet GPA requirements when a minimum of 75 credit hours have been earned will not be permitted to continue in the major.

Major requirements (63-86 hours):

Major core (33 hours):

1. Specific General Education requirement: [PSY 121\(3\)](#).

2. Interprofessional Leadership Core (30 hours): [IPE 375\(3\)](#), [IPE 378\(3\)](#), [IPE 381\(3\)](#), [IPE 382\(3\)](#), [IPE 470\(3\)](#), [IPE 475\(3\)](#), [IPE 575\(3\)](#), [IPE 576\(3\)](#); [HCM 301\(3\)](#) or [HCM 303\(3\)](#); [NUR 515\(3\)](#).
3. Public Affairs Capstone Experience will be fulfilled by completion of [IPE 375\(3\)](#).

Complete one of the following options:**Clinical Services Option (30-53 hours):**

1. Completion of an accredited allied health associate degree/certificate program.
2. Professional/clinical coursework must have been completed through an accredited institution in order to be applied to the degree requirements.
3. Professional/clinical coursework will be evaluated for transfer credit on an individual basis. A maximum of 53 hours can be applied toward this degree.

Health Services Option (35-36 hours):

1. [IPE 376\(3\)](#) or [IPE 377\(3\)](#); [IPE 379\(3\)](#), [SWK 595\(3\)](#); [IPE 599\(3\)](#) or [BMS 599\(3\)](#) or [SWK 599\(3\)](#); [MGT 340\(3\)](#).
2. Complete one of the following emphasis areas:
 - a. Science reasoning emphasis: [BMS 110\(3\)](#), [BMS 111\(1\)](#), [BMS 230\(3\)](#), [BMS 307\(4\)](#), [BMS 308\(4\)](#), [DTN 240\(3\)](#), [LLT 102\(2\)](#).
 - b. Administrative services emphasis: [ACC 201\(3\)](#), [ECO 155\(3\)](#), [ECO 165\(3\)](#); [HCM 301\(3\)](#) or [HCM 303\(3\)](#); [HCM 504\(3\)](#); [ITC 200\(3\)](#), [MKT 350\(3\)](#) or [LAW 531\(3\)](#).
 - c. Human services emphasis: [COM 521\(3\)](#); [NUR 502\(3\)](#) or [SWK 502\(3\)](#); [PSY 304\(3\)](#) or [SOC 341\(3\)](#); [REL 368\(3\)](#) or [REL 378\(3\)](#); [SOC 152\(3\)](#), [SWK 219\(3\)](#); [SWK 543\(3\)](#) or [SOC 430\(3\)](#) or [ENG 570\(3\)](#).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Accelerated graduate program in Master of Public Health

Eligible Missouri State undergraduate students may apply for admission to the Master of Public Health program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate programs (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-public-health.htm\)](https://graduate.missouristate.edu/Catalog/prog-public-health.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(Registrar/Catalog/undergraduate-students-taking-graduate-credit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate certificate in Public Health

Eligible Missouri State undergraduate students may apply for admission to the Public Health graduate certificate programs and begin taking graduate course work as they complete the work for a bachelor's degree. A

maximum of 12 hours of graduate credit may be counted toward both the undergraduate degree and graduate certificate (Mixed Credit). Refer to the Graduate Catalog for specific admission requirements for following:

- [Public Health Administration](https://graduate.missouristate.edu/Catalog/prog-cert-public-health-administration.htm) (<https://graduate.missouristate.edu/Catalog/prog-cert-public-health-administration.htm>)
- [Public Health and Homeland Security](https://graduate.missouristate.edu/Catalog/prog-cert-public-health-and-homeland-security.htm) (<https://graduate.missouristate.edu/Catalog/prog-cert-public-health-and-homeland-security.htm>)
- [Public Health Core](https://graduate.missouristate.edu/Catalog/prog-cert-public-health-core.htm) (<https://graduate.missouristate.edu/Catalog/prog-cert-public-health-core.htm>)

Sports Medicine

Major(s)

Sports Medicine (Comprehensive)

Bachelor of Science

The comprehensive major in Sports Medicine is designed to:

- Provide future healthcare providers with a strong foundation of basic science knowledge and experiential understanding of healthcare.
- Provide a foundation for those who wish to progress into professional healthcare programs or the workforce.
- Provide a pathway for early admissions into the Master of Athletic Training program.

The Sports Medicine program offers two pathways for students (traditional and pre-athletic training). The pre-athletic training path positions students to be eligible to earn a Master of Athletic Training degree in as few as five years. Students interested in the pre-athletic training (AT) option, must complete the Pre-AT Interest Form. The traditional pathway allows students to explore various sports medicine and health care fields while completing a basic science education paired with specific pre-requisite courses for professional healthcare programs.

Program admission and progression for pre-athletic training pathway

Student interested in the pre-AT pathway must officially declare the major, complete the Pre-AT interest form, and meet with a program advisor. In order to successfully progress through this pathway, students are required to remain eligible for the required clinical experiences. Eligibility criteria for clinical experiences include:

- Students must earn a B or better in all ATC courses and a C- or higher in all MAT pre-admission required courses.

- Students must pass a drug test and a background check.
- Students must provide evidence of current Emergency Cardiac Care (ECC) certification at the Basic Life Support/Professional Rescuer level or beyond.
- Students must have current documentation of completed HIPAA and FERPA training on file with the department.
- Students must have documentation of current immunizations and be in good health.

Program admission and progression for traditional pathway

Students not interested in the pre-AT pathway must officially declare the major and meet with a college or program advisor to review career goals and develop their 4th year of the Sports Medicine curriculum based on their career interest and/or to strengthen their application to the MAT upon completion of the bachelor's degree.

Program requirements

Students selected for the program must complete all required coursework and clinical requirements. Those requirements include the following:

Major Requirements (53 hours):

1. Specific General Education Requirements:
 - a. [BIO 121](#)(4) or [BMS 110](#)(3) and [BMS 111](#)(1).
 - b. [CHM 116](#)(4) and [117](#)(1) or both [CHM 160](#)(4) and [CHM 161](#).
 - c. [MTH 135](#) or a higher numbered mathematics course listed in the Quantitative Literacy requirement of general education.
 - d. [PSY 121](#)(3).
 - e. [PHY 123](#)(4).
2. Related requirements: [DTN 240](#)(3), [DTN 430](#)(3), [BMS 307](#)(4), [308](#)(4), [567](#)(4); [PSY 200](#)(3); [IPE 375](#)(3), [IPE 576](#)(3).
3. Sports Medicine requirements: [ATC 220](#)(1), [221](#)(2), [225](#)(4), [332](#)(2), [413](#)(3), [444](#)(4).
4. Public Affairs Capstone Experience will be fulfilled by completion of [ATC 413](#)(3).

University level requirements:

Social Work Courses

Social Work (SWK) courses

SWK 200 Introduction to Social Work

This course is an introduction to the values, knowledge, and skills that guide the profession of social work. Examines practice interventions at the individual, family, group, organization and community levels. The fields and settings for social work practice are discussed. A grade of "C" or better is required for admission to the BSW program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SWK 213 Social Welfare Policy and Services

Prerequisite: "C" or better in SWK 200 or concurrent enrollment.

This course examines the historical development, philosophical orientation, and analysis of social welfare policy and services in the United States, as well as orienting students to the development of social work as a profession. The course focuses on the analytic and interactional strategies related to policy analysis, development, and implementation. Areas of study include domestic and global aspects of practice. A grade of "C" or better is required for admission to the BSW program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 219 Human Diversity

General Education Course (Focus on Cultural Competence).

Content and skill development pertinent to working with diverse racial, cultural, ethnic, and other populations such as persons with physical disabilities and mental illnesses. This course is designed primarily to inform and sensitize individuals for effective interventions within a heterogeneous society. A grade of "C" or better is required for admission to the BSW program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SWK 300 Service Learning in Social Work

Prerequisite: 30 hours and concurrent enrollment in SWK 213.

This service component for an existing course incorporates community service with classroom instruction to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization or human/social service agency. Approved settings will focus on populations-at-risk, diverse populations and groups that have experienced social and economic injustice. A list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

SWK 304 Professional Development and Social Work Ethics

Prerequisite: admission to the BSW program.

A critical exploration of self for the purpose of developing and demonstrating professional and ethical behavior as a change agent. This course will provide opportunities for self-reflection and personal and professional growth. The course will examine how the use of self influences ethical social work practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 307 Social Work Practice with Individuals

Prerequisite: admission to the BSW program.

Basic principles, practice theories and skill for beginning generalist practice with individuals. Integrates practice theory and intervention skills within the context of the Generalist Intervention/Problem-Solving model. The class emphasizes personal awareness, professional growth, critical thinking and skills practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 313 Social Justice

Prerequisite: admission to the BSW program; and ECO 101 or concurrent enrollment; and PLS 101.

The primary subject matter of this course is social and economic inequality in United States society. Students are introduced to the patterns and processes of social and economic inequality in its major forms: class, race/ethnicity, gender, and sexual and political orientation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 315 Social Work Practice with Groups

Prerequisite: admission to the BSW program.

Offers basic principles of group interventions with a generalist practice foundation. Contrasts groups with other forms of social work practice. Reviews skills required to conduct clinical and task groups. Emphasizes cultural diversity and ethical parameters when offering group services. (3-0) S

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

SWK 325 Human Behavior and the Social Environment I

Prerequisite: admission to the BSW program; PSY 121 and SOC 150 or concurrent enrollment in PSY 121 and SOC 150.

An introduction to the dynamics of human behavior and the effects of the social environment on the development of individuals and families.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 326 Human Behavior and the Social Environment II

Prerequisite: admission to the BSW program; and SWK 325.

Exploration of a broad systems' approach to the generalist practice of social work. Focuses on the theories that support social work practice with groups, organizations, and communities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 330 Social Work Practice with Addictions

Examinations of the problems related to substance use disorders and other addiction issues. Areas of study broadly include definitions, prevalence, etiology, policies, effects on family and society, and prevention and treatment approaches.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 365 Families in Later Life

Prerequisite: PSY 121; and CFD 155 or CFD 163 or 30 hours.

Examination of the structure and function of families in later life. Topics of interest include demographic trends impacting the structure of the family, marriage, sibling relations, parent-adult child relations, grandparenthood, widowhood, and retirement. The application of family theories and their relevance to later life families will be discussed. Identical with CFD 365, GER 366, and PSY 366. Can only receive credit for one of the following: CFD 365, GER 366, PSY 366 or SWK 365.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 370 Child Welfare Services

Develop beginning competence in assessing types and benefits of different child welfare services, (i.e., foster care, adoptions, institutionalization); examination of the impact of public policies and social work practice on children and families.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 375 Social Work Perspectives with Latino/a Communities

This course focuses on providing services to Spanish-speaking communities, with historical context for understanding current social, health, economic, political, and legal issues facing the population. Strategies for serving individuals and families through culturally and linguistically appropriate services will be presented in class. A strengths perspective will be offered to identify alternative service frameworks for addressing contemporary barriers to health and social services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 397 Special Topics

Prerequisite: permission of instructor.

Selected topics of contemporary interest in social work such as changing social welfare policy, specialized fields of social work, models of practice and future trends in social work. May be repeated to a total of 6 hours as topics change. Variable Content Course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SWK 418 Methods of Social Research in Social Work Practice

Prerequisite: admission to the BSW program; SWK 307 and SWK 326; and one of the following statistics courses: SOC 302, PSY 200, AGR 330, MTH 340, QBA 237, REC 328, or concurrent enrollment.

The application and use of the social scientific method for conducting research and applying research to social work practice including, but not limited to, single subject research design, treatment intervention evaluation, and program evaluation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 420 Social Work Practice with Families

Prerequisite: admission to the BSW program; and SWK 307 and SWK 326.

Offers basic principles of family interventions with a generalist practice foundation. Contrasts families with other forms of social work practice. Overviews skills needed to work with families. Emphasizes cultural diversity and ethical parameters when offering family services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 430 Social Work Practice in Communities and Organizations

Prerequisite: admission to the BSW program; and SWK 307 and SWK 326.

Problem assessment and practice interventions with macrosystems. Examines strategies and techniques for social work practice with organizations and communities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 470 Community Resources for Older Adults

Prerequisite: PSY 121.

Covers the services, programs and institutions involved in providing services to older adults in the United States, with a focus on community-based services. Typical needs, issues, concerns and desires of older persons are identified and corresponding community-based services to address these needs are discussed. Emerging issues and developments in the field of gerontology will also be discussed as they relate to community services and resources. Site visits to agencies and organizations serving older adults will enhance students' familiarity with resources to improve the quality of life and well-being of aging members in our society. Identical with GER 470. Cannot receive credit for both SWK 470 and GER 470.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 480 Social Work Integrative Seminar

Prerequisite: admission to the BSW program; and SWK 418 and SWK 420 and SWK 430; and concurrent enrollment in SWK 490.

In conjunction with SWK 490, this course satisfies the Public Affairs Capstone Experience. Examines student experiences, problems, and questions related to the practicum. Integrates theory, knowledge, social work values and skills from previous social work courses to prepare generalist social work practitioners. Failure to pass this course will result in failure to pass SWK 490. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 490 Practicum in Social Work

Prerequisite: admission to the BSW program; and SWK 418 and SWK 420 and SWK 430; and concurrent enrollment in SWK 480.

In conjunction with SWK 480, this course satisfies the Public Affairs Capstone Experience. An educationally directed social work practice experience with individuals, groups, families, communities and organizations in a social service agency. Students are required to complete a minimum of 400 hours. Failure to pass this course will result in failure to pass SWK 480. Graded Pass/Not Pass only. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
9	0	32	Spring

SWK 496 Directed Readings in Social Work

Prerequisite: 6 hours of social work and permission.

Readings designed to supplement material introduced in previous social work courses. Includes a wide selection from literature in the field. May be repeated to a total of 9 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SWK 502 Rural Health

Prerequisite: junior standing.

This course offers a study of health care delivery in rural communities. It includes theoretical foundations, cultural considerations and specific characteristics of rural environments and people. Local and international perspectives will be explored. This course has a community experience component. Identical with NUR 502. Cannot receive credit for both SWK 502 and NUR 502. May be taught concurrently with SWK 602. Cannot receive credit for both SWK 602 and SWK 502.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SWK 543 Non-Profit Management in the Health and Human Services

Prerequisite: junior standing and permission of instructor.

The purpose of this course is to lay a leadership and management foundation for those in social work and the human services professions from the nonprofit/social or public sectors. The history and scope of the U.S. nonprofit sector, as well as contemporary theories of nonprofit enterprise, governance and leadership, ethics, marketing, advocacy techniques, decision-making models and current ideas about possible futures for the sector will be presented. Students will leave the course with a solid understanding of nonprofit /social sector organization, and develop an understanding of his or her management style and philosophy. May be taught concurrently with SWK 643. Cannot receive credit for both SWK 543 and SWK 643.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 595 Grant Writing in the Health and Human Services

This course offers an interdisciplinary approach to understanding grant writing and how health and human service professionals can collaborate for successful proposal writing. Course will focus on practical skills needed to develop proposals, budgets, and evaluation plans. Attention will be given to preparing a competitive grant proposal. This course will cover the basics of proposals - purpose statements, background and justification, aims or objectives, personnel, time line, methods, budget, and evaluation, and how to effectively manage grants once they are funded. Grant writing is related to health and human services that stress access to and availability of resources. The needs of culturally diverse groups or communities will be discussed in this course, along with the particulars of proposals that may be most effective in meeting such needs. May be taught concurrently with SWK 644. Cannot receive credit for both SWK 595 and SWK 644.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 597 Special Topics

Prerequisite: junior standing.

Selected topic of advanced content in social work, relevant to fields of practice or practice methodologies. May be repeated to a total of 6 hours as topics change. May be taught concurrently with SWK 699. Cannot receive

credit for both SWK 699 and SWK 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SWK 599 Health Literacy in the Human Services

This course offers an interdisciplinary approach to understanding functional health literacy and how the public's literacy skills affect interactions with health and human services professionals. Includes an examination of the data for national and international literacy levels and populations at risk for low literacy; research on health literacy; assessment tools; and practical techniques for addressing literacy issues in spoken and written communications at the practitioner and organizational levels. Identical with BMS 599 and IPE 599; may be taught concurrently with SWK 696 or PBH 699. Can only receive credit for one of the following: BMS 599, IPE 599, SWK 599, SWK 696, or PBH 699.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 602 Rural Health

This course offers a study of health care delivery in rural communities. It includes theoretical foundations, cultural considerations and specific characteristics of rural environments and people. Local and international perspectives will be explored. This course has a community experience component. Identical with NUR 502. Cannot receive credit for both SWK 502 and NUR 502. May be taught concurrently with SWK 502. Cannot receive credit for both SWK 502 and SWK 602.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SWK 643 Non-Profit Management in the Health and Human Services

The purpose of this course is to lay a leadership and management foundation for those in social work and the human services professions from the nonprofit/social or public sectors. The history and scope of the U.S. nonprofit sector, as well as contemporary theories of nonprofit enterprise, governance and leadership, ethics, marketing, advocacy techniques, decision-making models and current ideas about possible futures for the sector will be presented. Students will leave the course with a solid understanding of nonprofit /social sector organization, and develop an understanding of his or her management style and philosophy. May be taught concurrently with SWK 543. Cannot receive credit for both SWK 643 and SWK 543.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 644 Grant Writing in the Health and Human Services

This course offers an interdisciplinary approach to understanding grant writing and how human service professionals can collaborate for successful proposal writing. Grant writing in the Health and Human Services will focus on practical skills needed to develop proposals, budgets, and evaluation plans. Attention will be given to preparing a competitive grant proposal. Grant writing is related to human services that stress access to and availability of resources. The needs of culturally diverse groups or communities will be discussed in this course, along with the particulars of proposals that may be most effective in meeting such needs. May be taught concurrently with SWK 595. Cannot receive credit for both SWK 595 and SWK 644.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 696 Health Literacy in the Human Services

This course offers an interdisciplinary approach to understanding functional health literacy and how the public's literacy skills affect interactions with health and human services professionals. Includes an examination of the data for national and international literacy levels and populations at risk for low literacy; research on health literacy; assessment tools; and practical techniques for addressing literacy issues in spoken and written communications at the practitioner and organizational levels. Identical with PBH 699; may be taught concurrently with SWK 599 or PBH 699. Can only receive credit for one of the following: IPE 599, SWK 599, SWK 696, or PBH 699.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 699 Special Topics

Selected topic of advanced content in social work, relevant to fields of practice or practice methodologies. May be repeated to a total of 6 hours as topics change. May be taught concurrently with SWK 597. Cannot receive credit for both SWK 597 and SWK 699.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SWK 705 Human Behavior in the Social Environment

Prerequisite: admission to MSW program.

Content on life span development and the influence of various systems on the individual.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 710 Generalist Social Work Practice with Individuals

Prerequisite: admission to MSW program.

Within a generalist framework, course provides an ethically-based, theory-driven, culturally competent approach to delivering professional social work services to individuals with varied issues and practice settings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 715 Social Welfare Policy and Services

Prerequisite: admission to MSW program or permission.

Covers the historical development, philosophical orientation, and analysis of social welfare policy and services in the United States. Examines social welfare policy in multiple areas.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 725 Generalist Social Work Practice with Families and Groups

Prerequisite: admission to MSW program.

Within a generalist framework, this course focuses on basic skills and concepts related to social work practice with groups and families. Topics include group facilitation process and tasks, contrast between non-kin groups and family sessions, and strategies for working with families.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 726 Generalist Social Work Practice with Communities and Organizations

Prerequisite: admission to MSW program.

Uses social work methods to focus on the dynamics associated with organizational and community generalist practice. This course provides a knowledge base (i.e., theory, research, and practice wisdom), values, and practice skills for the generalist social work profession. Concentration will be on social work practice occurring with organizations and communities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 730 Diversity and Social Justice

Prerequisite: admission to the MSW program or permission of department.

Using a social work strengths perspective and the ecological system theory, the course explores multiple dimensions and intersectionality of diversity, and social, economic, and environmental justice in a pluralistic and increasingly globalized society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 740 Social Work Field Practicum and Seminar I

Prerequisite: admission to MSW program; and completion of, or concurrent enrollment with, all other generalist courses.

Students integrate generalist level social work competencies with supervised experiences at a community agency. Seminar class with field supervision enhances the student's application of all previous foundation coursework with seminar assignments and activities of the field experience. Students must complete 400 hours in placement; required practicum liability insurance is included in the supplemental course fee.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-10			Spring

SWK 742 Substance Use and Social Work Practice

This course provides an opportunity for the students to understand the problems of alcohol and drug use and dependence, and the impact on individuals, families, and the broader community.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SWK 743 Management and Program Development in Human Service

Develop knowledge and skills for effective supervisors and administrators in human service organizations. Students will also learn grant proposal writing and develop an understanding of their management style and philosophy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SWK 746 Advanced Generalist Social Work Research

Prerequisite: admission to MSW program; and Advanced Standing or completion of all foundation coursework; or permission of department.

This advanced generalist course teaches advanced knowledge and skills in key social work research methods. By the end of the course, students will apply ethical research principles to research methodology, design, and analysis to make evidence-based recommendations that inform them advanced generalist social work practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 750 Social Work Practice I: Advanced Generalist Practice with Individuals

Prerequisite: admission to MSW program; and Advanced Standing or completion of all foundation coursework.

This advanced practice course provides students with theories and skills for working with individuals from an advanced generalist perspective. By the end of the course, students will demonstrate ethically based, culturally informed practice with individuals.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

SWK 754 Advanced Clinical Social Work Assessment

Prerequisite: SWK 750; and admission to MSW program.

Examines advanced topics related to individual and family-based assessment. Students deepen critical thinking as advanced generalist practitioners, learn when to use various clinical assessment tools (e.g., DSM), and develop skills in data collection, organization, and interpretation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 755 Social Work Practice II: Advanced Generalist Practice with Families

Prerequisite: SWK 750; and admission to MSW program.

This advanced practice course provides students with theories and skills for working with families from an advanced generalist perspective. By the end of the course, students will demonstrate ethically based, culturally informed practice with families.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 756 Social Work Practice III: Advanced Generalist Practice with Groups

Prerequisite: SWK 754 and SWK 755; and admission to MSW program.

This advanced practice course provides students with theories and skills for working with groups from an advanced generalist perspective. By the end of the course, students will demonstrate ethically based, culturally informed practice with groups.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 757 Social Work Practice IV: Advanced Generalist Practice with Communities and Organizations

Prerequisite: SWK 755; and admission to the MSW program.

This advanced practice course provides students with theories and skills for working with communities and organizations from an advanced generalist perspective. By the end of the course, students will demonstrate ethically based, culturally informed practice with communities and organizations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SWK 760 Advanced Policy and Social Justice

Prerequisite: SWK 750; and admission to MSW program.

Students examine policies that affect client systems, and how these policies translate into programs and delivery systems in the United States and other countries. The course expands knowledge of the interrelatedness of diversity, policy, human rights and social justice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SWK 780 Social Work Field Practicum and Seminar II

Prerequisite: admission to MSW program; and field coordinator approval; and completion of, or concurrent enrollment in, all other specialist courses.

Students integrate advanced generalist level competencies with supervised experiences at a community agency. Seminar class with field supervision enhances the student's application of all previous specialist coursework with seminar assignments and activities of the field experience. Students must complete 500 hours in placement; required practicum liability insurance is included in the supplemental course fee.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Social Work

Major(s)

Social Work (Comprehensive)

Bachelor of Social Work

Program description

The undergraduate Social Work Program at Missouri State University builds upon a liberal arts education while preparing students for the practice of Social Work, with an emphasis on the strengths perspective. Social Work is a comprehensive major consisting of 48 hours of required Social Work courses (which includes a 12-hour practicum); 18 hours of required courses from the humanities and sciences; and 6 hours of electives offered by the School of Social Work (SWK electives). Students who successfully complete general education, all general baccalaureate requirements and major requirements are awarded a Bachelor of Social Work degree.

The BSW program is available as a seated program option on the Springfield campus or a fully online program option. Both program options require a 400-hour practicum (12 credit hours) that must be completed in person in the final semester before graduation.

Prospective students must contact the Coordinator of the BSW Program to obtain information on how to be admitted into the program and be assigned an advisor. Accepted students are expected to consult with their advisor at least once a semester.

This program is accredited by the Council on Social Work Education. Additional information regarding the BSW Program may be found in the *BSW Student Handbook* available from the School of Social Work.

Eligibility to apply

Once accepted to MSU, students are eligible to apply for admission into the BSW Program when the following conditions are met:

1. Completion of a minimum of 45 hours with a combined GPA (Missouri State and transfer combined) of 2.50 or higher on a 4-point scale.
2. Completion or concurrent enrollment in the Foundations Courses for General Education except the second writing course.
3. Completion or concurrent enrollment in [SWK 200\(3\)](#), [SWK 213\(3\)](#), and [SWK 219\(3\)](#) with a minimum grade of "C". Candidates whose application is reviewed positively will not have admission to the Program until grades of "C" or better are recorded for these courses at the close of the application semester.

Admission to the Bachelor of Social Work Program

Students seeking admission to the BSW Program do so with the understanding that: (a) admission is competitive and selective and not all who apply can be accommodated; and (b) meeting the minimum standards does not guarantee a student will be admitted. The BSW committee will make a decision to admit based on a holistic picture of the completed course work and values that are consistent with the conduct of the profession and the Social Work Code of Ethics.

Students who are planning to pursue a BSW degree must complete the following steps:

1. Declare a major in the Social Work Program within the University which places the student in pre-admit status.
2. When a student is eligible to apply for admitted status, the student must submit a formal application, with accompanying forms, to the School of Social Work office. Directions for completing the packets will be included within the application packet. Applications for admission to the Program will be available online. Refer to the application packet for specific due dates because the dates can vary. Applications submitted after the deadline will not be considered. Incomplete applications may result in not being considered.
3. In the application process, students will select between the seated program option or the fully online program options. Students who choose the seated program option will attend Social Work classes on the Springfield campus. Students who choose the online program option will have all Social Work courses in an online and asynchronous format. Students may only be admitted to the BSW Program in one program option
4. Students will be notified, prior to registration, if they are admitted into the BSW Program. If the student is not admitted, the student will be responsible for meeting with his/her advisor to transition into another major.

Major requirements (72 hours):

Note: 12 hours may double count toward General Education requirements.

1. Recommended course: [SWK 300\(1\)](#).
2. Specific course requirements (other than Social Work):
 - a. [ECO 101\(3\)](#), [PLS 101\(3\)](#), [PSY 121\(3\)](#), [SOC 150\(3\)](#), [PSY 304\(3\)](#).
 - b. One statistics course from: [PSY 200\(3\)](#), [SOC 302\(3\)](#), [AGR 330\(3\)](#), [MTH 340\(3\)](#), [QBA 237\(3\)](#), [REC 328\(3\)](#).
3. [SWK 200\(3\)](#), [213\(3\)](#), [219\(3\)](#), [304\(3\)](#), [307\(3\)](#), [313\(3\)](#), [315\(3\)](#), [325\(3\)](#), [326\(3\)](#), [418\(3\)](#), [420\(3\)](#), [430\(3\)](#), [480\(3\)](#), [490\(9\)](#).
4. Six hours of Social Work electives.
5. Public Affairs Capstone Experience will be fulfilled by completion of [SWK 480\(3\)](#) and [490\(9\)](#).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Retention, progression, and graduation policies

After admission into the BSW Program, students must achieve the following for retention in the major:

1. Maintain a combined GPA (Missouri State and transfer combined) of 2.50 or higher. If a student drops below a GPA of 2.50, the student will be withdrawn from the program at the end of the semester.
2. Achieve a grade of "C" or better in all Social Work courses, which are courses with "SWK" prefix.
3. Earning a "D" grade or below in a Social Work (SWK) course will result in the inability to be admitted into the program. If a student is formally accepted in the program and earns a "D" grade in a core Social Work (SWK) course, the student must retake the course before progressing. If a student is formally accepted in the program and earns an "F" grade in a core Social Work (SWK) course, student will be dismissed from the program at the end of the semester and will need to reapply. If a student is formally accepted in the program and earns a "D" or "F" grade in an elective Social Work (SWK) course, the student must retake that course and earn a "C" or better.
4. Courses in the Social Work major may not be taken more than twice.
5. A student must earn a "Pass" grade in [SWK 490\(9\)](#). A grade below a "C" in [SWK 480\(3\)](#) and/or a "Not Pass" grade in [SWK 490\(9\)](#) means the student must reapply for admission and be readmitted to the BSW Program.
6. Students are encouraged to meet with their advisor in the School of Social Work prior to or upon entering the University and at least once a semester to ensure the proper selection and sequencing of prerequisites for the BSW Program.
7. Students must demonstrate acceptable levels of maturity, integrity, behaviors and attitudes as defined by the National Association of Social Work (NASW).
8. Once formally admitted to the program, students must complete all required Social Work courses within six years. Any student who has not completed all required Social Work courses within six years of admission will be manually withdrawn from the program at the end of the semester.

Undergraduate Catalog

Non-profit Leadership Certificate

Non-profit Leadership

This certificate is jointly offered by the Department of Sociology and Anthropology, Department of Communication, and School of Social Work. This certificate prepares students for leadership in non-profit organizations by equipping them to take management roles in these types of organizations and by learning about the nature of non-profit organizations and essential skills for administering programs at non-profit organizations. This certificate is essential for students who envision creating a non-profit organization or plan to be involved in the development or supervision of community-based programs.

This certificate is administered by the Department of Sociology and Anthropology.

Program requirements (12 hours)

1. One course in introduction to non-profit organization from: [SOC 430\(3\)](#), [SWK 543\(3\)](#).
2. One course in non-profit leadership from: [COM 436\(3\)](#), [PLS 255\(3\)](#), [SOC 492\(3\)](#).
3. Two courses in essential skills in non-profit leadership from: [ACC 201\(3\)](#), [COM 315\(3\)](#), [COM 336\(3\)](#), [COM 566\(3\)](#), [ENG 572\(3\)](#), [GER 470\(3\)](#), [GER 480\(3\)](#), [SWK 595\(3\)](#).
4. All candidates must satisfy the [General University Certificate Requirements](#).

Spanish for the Health and Human Services Certificate

Spanish for the Health and Human Services

This certificate is jointly offered by the School of Social Work and the Department of Classical and Modern Languages. The certificate is designed to improve Spanish skills and cultural competencies among health and human service students and professionals to address a growing need for bilingual service providers in southwest Missouri.

This certificate is administered by the School of Social Work.

Admission requirement

Complete SPN 312(3), Spanish Composition, with a grade of C or better or through accelerated pathway for Heritage speakers or proficiency placement exam.

Program requirements (12 hours)

1. [SPN 316\(3\)](#), [SPN 317\(3\)](#), [SWK 375\(3\)](#), [SWK 599\(3\)](#).
2. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of at least 2.50 or higher in courses used to complete the certificate requirements.

Area Studies Programs Courses

African American Studies (AAS) courses

AAS 100 Introduction to African American Studies

General Education Course (Focus on Humanities).

The course provides a multidisciplinary introduction of the many dimensions of the African American experience, including the African heritage and diaspora, slavery and freedom, African American artistic and literary expression, and the problem of racism in American society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

AAS 312 Anthropology of Gender

Prerequisite: ANT 100 or ANT 303 or permission of instructor.

Theories, concepts, and case studies relating to the cultural and social construction of gender from an anthropological perspective. Students will examine gender in relation to sexuality, fertility, child-bearing, self-identification, family, power, status, voice, hegemony/resistance, colonialism, and globalization in cultures and societies around the world. Identical with ANT 312. Cannot receive credit for both AAS 312 and ANT 312.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 323 Women in Africa

Recommended Prerequisite: HST 103 or HST 104. This course will introduce students to women's participation in Africa's history and contemporary issues. The readings cover a broad geographical range of North, West, Central and Southern Africa. The course will include five topics: Women and the Family; Women, Politics, and Economics; Religious Women; Women in Colonial Rebellion; and Women and National Revolutions. Identical with HST 323. Cannot receive credit for both AAS 323 and HST 323.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 330 Peoples and Cultures

Anthropological study of a cultural region of the world (such as the Caribbean, Latin America, or Southeastern Indians), including environment, subsistence, technology, economy, social and political organization, and religion. Identical with ANT 330. Cannot receive credit for both AAS 330 and ANT 330. Variable content course. May be repeated when topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

AAS 331 African American History I

Recommended Prerequisite: HST 121 or AAS 100. Survey of the experiences of Americans of African descent to 1865. Emphasis on African heritage; African-American contributions and institutions; slavery and quasi-freedom. Identical with HST 331. Cannot receive credit for both AAS 331 and HST 331.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 332 African American History II

Recommended Prerequisite: HST 122 or AAS 100. Continuation of AAS 331, 1865-present. Emphasis on the struggles for racial justice; protest organizations, philosophies and tactics. Identical with HST 332. Cannot receive credit for both AAS 332 and HST 332.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 333 Peoples and Cultures of Africa

An exploration of African societies (especially sub-Saharan), including family structure, gender relations, social and political organization, beliefs, economics, art, oral literature, music, dance, and other aspects of culture. Identical with ANT 332. Cannot receive credit for both AAS 333 and ANT 332.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 334 Conflict and Peace Building in Africa

Recommended Prerequisite: HST 103 or HST 104 or HST 121 or AAS 100. This course examines the historical roots, dimensions, and causes of conflict in Africa. Thematically organized to capture developments across the different regions in the continent, the course offers critical insights into the preponderance of conflict in Africa since the Cold War. In addition, the course explores the various ways through which Africans, its partners, and international organizations have fostered peace and conflict resolution in Africa over the years. Identical with HST 334. Cannot receive credit for both AAS 334 and HST 334.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 335 African Civilization

Recommended Prerequisite: HST 103 or HST 104. Historical developments in Africa from antiquity to the present. Emphasis on south Saharan Africa for the period before European contact. Topics in modern nationalism and independence. Africa in the context of world history. Identical with HST 335. Cannot receive credit for both AAS 335 and HST 335.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 336 Race and Ethnicity

This course explores the social construction of race and ethnicity. Issues of differential power between racial and ethnic groups and the economic, political, and social structures which are utilized to maintain these power differences are identified. Social movements and social policies designed to address social inequality, prejudice and discrimination are also examined. Identical with SOC 336. Cannot receive credit for both AAS 336 and SOC 336.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 338 Sources and Methods in African History

This course deals with knowledge generation, production, and dissemination about Africa and its peoples. It traces the origin, progress, and current state of scholarship on Africa and about Africans. It is about writing and understanding Africa and its history. It examines the kind of history that has been written about events in Africa. In other words, it is concerned with the study of and nature of history in Africa. Given this basic disposition, the course is a reflection on history in Africa as a discipline and the problems involved in the writing of African history globally. Identical with HST 338. Cannot receive credit for both AAS 338 and HST 338.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 339 Africa and the Wider World

Recommended Prerequisite: HST 103 or HST 104 or HST 121 or AAS 100. This course traces the history of Africa from the slave trade to independence. The course is thematically organized to capture developments across the different regions in the continent; and offers critical insights into the place of Africa in world history, especially in relations to and with global developments. As a survey course, the course offers insights into the different regions, paying particular attention to cultural, economic and political changes. Identical with HST 339. Cannot receive credit for both AAS 339 and HST 339.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 345 Enslavement in the Atlantic World

Recommended Prerequisite: HST 103 or HST 104; and HST 121 or AAS 100. This course examines various social, political, and economic developments of enslaved societies in the Americas (North, Central and South), the West Indies, and Africa from roughly the 1200s to the late-1800s with a primary focus upon the lives and roles played by people of the African Diaspora and their encounters with Europeans and Indigenous Americans. Identical with HST 345. Cannot receive credit for both AAS 345 and HST 345.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 346 African American Religious Experience

Recommended Prerequisite: REL 131. Explores the establishment and maintenance of African American religious institutions, particularly the Black Churches and their future development. Identical with REL 345. Cannot receive credit for both AAS 346 and REL 345.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 355 African American Literature

Prerequisite: ENG 110.

Survey of representative works of fiction, poetry, drama, and creative nonfiction in the context of social and cultural movements. Identical with ENG 355. Cannot receive credit for both AAS 346 and ENG 355.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

AAS 363 Introduction to African Literature

Prerequisite: ENG 110.

Survey of representative works of fiction, poetry, drama, folklore, personal narratives, and essays from various countries on the African continent written in or translated into English. Identical with ENG 363. Cannot receive credit for both AAS 363 and ENG 363.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 397 Topics in African American Studies

Prerequisite: permission.

Topics of general interest in the area of African American Studies. Examples: African Independence, Negritude, Harlem Renaissance, 1960s Civil Rights Movement, the Black Panther Party, Nation of Islam in the U.S., Afrocentricism, and African/African American Destiny. Variable content course. May be repeated to a maximum of 6 hours, provided that the topic is different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

AAS 455 African American Drama

Prerequisite: ENG 110.

Study of African American drama from the antebellum period to the present, with emphasis on the intersections of dramatic art and such social and cultural movements as abolitionism, the Harlem Renaissance, and the Black Arts Movement. Identical with ENG 455. Cannot receive credit for both AAS 455 and ENG 455.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 490 Field Experience in Anthropology

Prerequisite: permission of instructor.

Supervised group study and/or research in an off campus setting. A fee may be charged to cover travel expenses. Identical with ANT 490. Cannot receive credit for both AAS 490 and ANT 490. Variable content course. May be repeated when topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

AAS 497 Directed Reading

Prerequisite: permission.

Analysis of various topics in African American Studies not covered in regular courses. Variable content course. May be repeated to a maximum of 6 hours, provided that the topic is different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

AAS 531 African American Leaders and Movements

Prerequisite: 50 hours.

Study of African American leaders and movements in the United States, with emphasis on the period since World War II. Identical with HST 531. Cannot receive credit for both AAS 531 and HST 531.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

AAS 550 Modern African Politics

Prerequisite: PLS 101.

Recommended Prerequisite: 50 hours. A comparative study of the political and economic systems of contemporary Africa with emphasis on sub-Saharan Africa. Ideologies and strategies pursued by selected African governments are covered, including an assessment of contemporary economic, political, and strategic ties within the region and internationally. The class will emphasize such areas as Mauritania, Senegal, Kenya, Somalia, Nigeria, and South Africa. Identical with PLS 550. Cannot receive credit for both AAS 550 and PLS 550.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

Disability Studies (DAS) courses

DAS 100 Introduction to Disability Studies

This course provides a multidisciplinary introduction to the many dimensions of Disability Studies, including the history, social, cultural, political, legal, and economic perspectives on disability in American society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DAS 397 Topics in Disability Studies

Prerequisite: DAS 100 and permission.

Topics of general interest in the area of Disability Studies. Examples: disability cultures, disability rights movement, deaf culture, disability and the law. Variable content course. May be repeated as topics change to a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

DAS 497 Directed Readings

Prerequisite: permission.

Analysis of various topics in Disability Studies not covered in regular courses. May be repeated for a maximum of 6 hours, provided that the topic is different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

Gender Studies (GST) courses

GST 170 Sex, Gender, and Self

An introduction to Gender Studies that explores the influence that ideas about sex, gender, and gender roles have on women and men, both as individuals and as social beings. Using new research on gender in many disciplines, it examines representations of male and female experiences, and historical and social constructions of women's and men's roles.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GST 315 The Economics of Gender

Prerequisite: ECO 165.

This course teaches students to analyze the economic decisions made by both males and females in two main areas: the labor market and the household. Specific areas of inquiry include the following: the family as an economic unit, gender differences in labor force participation, occupational gender segregation, explanations for gender earnings differentials and efforts to reduce such differentials, gender earnings discrimination, and international gender issues. Identical with ECO 315. Cannot receive credit for both GST 315 and ECO 315.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GST 326 Feminist Theories of Social Order

Prerequisite: SOC 150 or GST 170.

This course offers an introductory survey of feminist theories within a sociological framework. Students will read and discuss significant classical and contemporary feminist writings on how social life is organized, maintained

or changed. The feminist literature has led to the emergence of diverse theoretical frameworks analyzing historical and contemporary, macro and micro, public and private, local and global issues and concerns. The feminist paradigm, like many other paradigms, is inclusive of many disciplines. The sociological writings within this paradigm provide a wealth of materials on alternative views of social organization, order and conflict.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GST 400 Gender in Global Community

Prerequisite: SOC 150 or GST 170.

This course will explore the effects of an integrated global community on gender; how global trends are gender-based in terms of labor market participation, resource allocation, family regulations, health care, crime, war and regional politics. Students will discuss how events and policies in one part of the globe affect gender relations in another region. May be taught concurrently with SOC 600. Cannot receive credit for both GST 400 and SOC 600.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

GST 497 Special Topics in Gender Studies

Prerequisite: permission.

In-depth inquiry into selected topics of Gender Studies. May be repeated to a maximum of 6 hours if the topic is different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

Ozarks Studies (OZK) courses

OZK 150 Introduction to Ozarks Studies

This course provides a multidisciplinary introduction to the study of the Ozarks region and its inhabitants, including Ozarks history and geography, regional folk culture and traditions, and current issues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

OZK 300 Topics in Ozarks Studies

In-depth inquiry into topics in Ozarks Studies. May be repeated to a maximum of six hours if the topic is different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

Administration of the minor

Courses must be approved by the faculty of the African and African American Studies Committee for inclusion in the minor. It is recommended that AAS 100 be taken prior to all other courses in the minor. A student cannot take more than six hours in a particular discipline (course code) to complete the minor; exceptions must have the permission of the administrator. A student can petition to apply a variable content/special topics course to the minor, with the approval of the administrator.

Requirements

1. [AAS 100\(3\)](#).
2. 15 hours from the following areas with at least three hours from each area:
 - a. Historical Foundations: [AAS 331\(3\)](#) or [HST 331\(3\)](#); [AAS 332\(3\)](#) or [HST 332\(3\)](#); [AAS 338\(3\)](#) or [HST 338\(3\)](#); [AAS 345\(3\)](#) or [HST 345\(3\)](#).

- b. Pan-African Background and Perspectives: [AAS 323\(3\)](#) or [HST 323\(3\)](#); [AAS 330\(3\)*](#) or [ANT 330\(3\)*](#); [AAS 333\(3\)](#) or [ANT 332\(3\)](#); [AAS 335\(3\)](#) or [HST 335\(3\)](#); [AAS 339\(3\)](#) or [HST 339\(3\)](#); [AAS 363\(3\)](#) or [ENG 363\(3\)](#); [AAS 490\(3\)*](#) or [ANT 490\(3\)*](#); [AAS 550\(3\)](#) or [PLS 550\(3\)](#).
- c. Arts and Humanities: [AAS 355\(3\)](#) or [ENG 355\(3\)](#); [AAS 455\(3\)](#) or [ENG 455\(3\)](#); [ART 273\(3\)](#), [ART 486\(3\)](#), [ART 488\(3\)*](#).
- d. Politics and Society: [AAS 312\(3\)*](#) or [ANT 312\(3\)*](#); [AAS 334\(3\)](#) or [HST 334\(3\)](#); [AAS 336\(3\)](#) or [SOC 336\(3\)](#); [AAS 346\(3\)](#) or [REL 345\(3\)](#); [AAS 531\(3\)](#) or [HST 531\(3\)](#); [CRM 415\(3\)](#); [SWK 219\(3\)](#).

*when applicable

3. Attain a minimum GPA of 2.50 in all courses counted toward the minor.

Note: With the administrator's permission, a student may use AAS 397, AAS 497, and REL 397 to satisfy any of the above requirements except for the AAS 100 requirements.

Administration of the program

Courses must be approved by the faculty of the Diversity Studies Committee for inclusion in the minor.

The Diversity Studies minor is an interdisciplinary program of study allowing students to develop a broad understanding of the components of diversity in society, which include race and ethnicity, culture, gender, sexuality, religion, language, social class, and aging and disability. This minor is of relevance to any career that involves diverse populations of people, such as business, industry, education, social welfare, health and medicine.

1. Introduction to Diversity: [ANT 100\(3\)](#) or [EDC 345\(3\)](#) or [SWK 219\(3\)](#).
2. Three courses from the following six content areas with three different course codes to total nine hours:
 - a. Race and Ethnicity: [AAS 100\(3\)](#), [ANT 365\(3\)](#), [SOC 336\(3\)](#).
 - b. Culture: [ANT 303\(3\)](#), [GBL 250\(3\)](#), [SOC 150\(3\)](#).
 - c. Gender and Sexuality: [GST 170\(3\)](#), [PSY 307\(3\)](#), [SOC 337\(3\)](#).

- d. Religion: [REL 100\(3\)](#), [REL 131\(3\)](#), [REL 210\(3\)](#); [REL 390](#) or [SOC 390\(3\)](#).
- e. Communication: [ANT 306\(3\)](#), [COM 260\(3\)](#).
- f. Aging and Disability: [DAS 100\(3\)](#), [GER 375\(3\)](#), [PSY 304\(3\)](#), [SOC 375\(3\)](#).
3. Six additional hours from:
- a. Race and Ethnicity: [CRM 415\(3\)](#), [ENG 354\(3\)](#), [ENG 355\(3\)](#), [HST 331\(3\)](#), [HST 332\(3\)](#).

Administration of the program

Latin America is a fascinating, vibrant region. It is home to some major economies, plentiful natural resources, a vast population and diverse cultures. It is a region of great significance to the United States with regard to economic exchange, immigration, national security and many other issues. The Latin American, Caribbean, and Hispanic Studies Minor seeks to enrich students' knowledge of this important region. It emphasizes critical and interdisciplinary thinking about crucial issues facing the region and helps students develop proficiency in Spanish or Portuguese. Students who earn this minor will acquire skills useful for a variety of careers including, diplomacy, business, translation, health and educational services, and academia.

Permanent courses in the minor program must be approved by the faculty of the Latin American, Caribbean, and Hispanic Studies Committee.

Student can petition to apply to the minor any content-relevant course that has a substantive focus on Latin America, the Caribbean, or Hispanics in the United States, such as Education Abroad courses or individualized courses.

To fulfill the program, students must:

1. Complete six hours of a Latin American language: Portuguese ([PTG 101](#), [102](#), [201](#), [202](#)) or Spanish ([SPN 101](#), [102](#), [103](#), [201](#), [202](#), [203](#)).
2. Complete 12 hours from the following areas including at least three hours from at least two of the following areas, and no more than six hours from any one category:
 - a. Historical Studies: [HST 350\(3\)](#), [HST 395\(3\)](#), [HST 397\(3\)*](#), [HST 587\(3\)](#), [HST 588\(3\)](#).
 - b. Geography and Politics: [GRY 305\(3\)*](#), [PLS 338\(3\)*](#), [PLS 548\(3\)](#).
 - c. Art, Culture, Religion, and Society: [ANT 330\(3\)*](#), [ART 273\(3\)](#), [ART 485\(3\)](#), [ART 487\(3\)](#), [ART 488\(3\)](#) or [MST 488\(3\)](#), [ART 496\(3\)*](#), [REL 397\(3\)*](#), [SOC 336\(3\)](#).
 - d. Language and Literature: [ENG 354\(3\)*](#), [ENG 362\(3\)*](#); [PTG 297\(3\)*](#), [SPN 297\(3\)*](#), [SPN 314\(3\)](#), [SPN 320\(3\)](#), [SPN 325\(3\)](#), [SPN 326\(3\)](#), [SPN 415\(3\)](#), [SPN 460\(3\)](#).

*When applicable. Students must petition to apply this variable content/special topic course to the minor, upon approval of the administrator. A maximum of three hours for each of these variable content/special courses may be used.

Administration of the program

Courses must be approved by the faculty of the Native American Studies Committee for inclusion in the minor.

The Native American Studies Program is an interdisciplinary minor course of study allowing students to concentrate on the history, arts, and cultures of native peoples of the Americas. The minor in Native American Studies offers a multidisciplinary exploration of the history, arts, and cultures of the first Americans, past and present. It can be an excellent complement to many majors, including art, history, and anthropology. The knowledge provided will be valuable if not essential in any career that involves working with Native Americans in business, social services, public administration, or health and medicine. The minor will also stimulate awareness and appreciation of the ethnic and cultural diversity of the United States, which is an increasing concern in the workforce and society today, as well as the importance of cultural heritage.

1. Complete 18 hours from the following courses and from at least three disciplines (course codes), with no more than nine hours from any one discipline. [ANT 325\(3\)](#), [ANT 330\(3\)*](#), [ANT 351\(3\)*](#), [ANT 360\(3\)](#), [ANT](#)

Bachelor of Music Education
Bachelor of Science
Bachelor of Science in Education (non-certifiable)
Bachelor of Science in Nursing
Bachelor of Social Work

Administration of the program

Elective courses must be approved by the faculty of the Ozarks Studies Committee for inclusion in the minor.

The Ozarks Studies Program is an interdisciplinary minor course of study allowing students to concentrate on the geography, history, literature, and cultures of the Ozarks. The minor provides students with an understanding and appreciation of the environment and cultures of the Ozarks region, past and present. It will stimulate awareness of the region's contrasts with and similarities to other American geographical and cultural regions as well as an appreciation for the region's place within the greater United States. This knowledge and experience is valuable in a number of contexts. For students from the Ozarks region, the minor in Ozarks Studies serves as an extended study of personal and regional heritage. For students who will remain in the region for work and careers, the minor offers an invaluable primer for understanding regional heritage, cultures, and the natural environment. For all students the minor provides a solid academic exercise in comparative regional study.

The minor includes OZK 150 and HST 375, plus at least 12 hours of additional coursework for a minimum of 18 hours. It is recommended that OZK 150 be taken prior to other required and elective courses in the minor.

A student can take no more than six hours in a particular discipline to complete the minor; exceptions must have the permission of the Administrator. A student can petition to apply to the minor variable content/special topics courses that focus on the Ozarks, with the approval of the Administration. These include: ANT 397, BIO 597, PLS 497, REL 397, and SOC 397.

1. [OZK 150\(3\)](#), [HST 375\(3\)](#).
2. 12 additional hours from: [ANT 397\(3\)*](#); [BIO 564\(2\)](#), [BIO 597\(3\)*](#), [ENG 385\(3\)](#), [ENG 386\(3\)](#), [GRY 301\(3\)](#); [GRY 310\(3\)](#) or [REC 320\(3\)](#); [OZK 300\(3\)*](#), [PLS 497\(3\)*](#), [SOC 397\(3\)*](#).

General Information

The criminology program at Missouri State University provides a solid foundation for the study of the nature, causes and control of criminal behavior through academic courses, internship opportunities and community partnerships. The undergraduate criminology program focuses on finding solutions to problems and issues in criminal justice, while the graduate program provides students with the tools for evaluating criminal justice initiatives. Overall, the programs strive to create a healthy balance between academic analysis and technical education needed for a successful career in the field.

Criminology and Criminal Justice Courses

Criminology (CRM) courses

CRM 210 Introduction to the American Criminal Justice System

Prerequisite: 12 hours.

General Education Course (Focus on Public Issues).

This course provides an overview of the American criminal justice system, and examines its functions, problems, and potential solutions. Students explore citizen rights and responsibilities relevant to the fair and equal distribution of justice and examine how communities can be strengthened to aid crime prevention.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	CRJS 101 - Introduction to Criminal Justice.

[Access the CORE 42 portal](#)

CRM 215 Criminology and Criminal Justice Field Exploration

Acquaint students with the types of opportunities available in the field of criminology and criminal justice including required credentials, career preparation, and the job search process. Expose students to training

regimens, routine practices, and daily challenges within criminal justice agencies. May be repeated up to 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

CRM 220 Criminology

General Education Course (Focus on Social and Behavioral Sciences).

This course examines the nature and various dimensions of criminality through the lens of the social and behavioral sciences. Historical and contemporary explanations of crime rooted in a range of biological, psychological, and sociological perspectives are explored as well as their implications for individuals, social systems, and organizations. Students will learn how various institutions have experimented with and adopted crime-reduction policies and practices over time.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

CRM 250 Policing

This course examines the history, structure and function of law enforcement as a means of addressing behavior which violates the law. Problems faced by law enforcement and solutions to those problems are also discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 260 Criminal Law and the Courts

This course examines the basic principles, processes, and structures found in adult criminal courts in the United States and Missouri. The course also examines the nature and development of criminal law from the Common Law to its current state nationwide, with an emphasis on current Missouri criminal law.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 270 Institutional and Community-Based Corrections

A course designed to critically examine the various social control responses to delinquent and criminal behavior. Includes the history, philosophies, and practices of American corrections and an evaluation of the advantages and disadvantages of each societal/correctional response. Problems in the field of corrections and related solutions are also examined.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 300 Service Learning in Criminology

Prerequisite: 30 hours and concurrent registration in a Criminology course designated as service learning offering.

An integrative learning experience which addresses the practice of citizenship and promotes an awareness of and participation in public affairs by incorporating community service with classroom instruction. Includes 40 hours on-task service to a community organization, agency or public service provider. The community service placement agency and service assignment will vary, dependent on the disciplinary course topic and learning objectives. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

CRM 301 Movies, Media and Crime

This course explores the relationship between various forms of mass media as they impact public attitudes and social policies regarding crime and the justice system. Students will have the opportunity to view major film productions and critically evaluate the depiction of victims, offenders, and the criminal justice system in the media. Solutions to problems created by the media are also discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 303 Capital Punishment

Students explore the history of the death penalty as well as its current use in the United States. Methods of execution and their impact upon executioners, death penalty jurors, and the families of both the executed and their victim's family members are analyzed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 306 Criminal Profiles: Who Did It?

This course is designed to introduce students to the major concepts used in the practice of criminal profiling. Students will get an overview of how to identify and analyze crime and offender characteristics and their relationship with criminal motive and behavior.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 307 Life Behind Bars: Got Time?

This course highlights the dynamics of interaction that take place between inmates and staff in a correctional setting. Students will examine the various deprivations inmates face during incarceration, and their methods for compensation through developing networks of interactions that focus on the illegal trade of goods and services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 308 To Shoot or Not To Shoot: Ethical Dilemmas in Criminal Justice

This course examines the nature and meaning of ethical behavior within the context of the criminal justice system. Students will identify the various ethical dilemmas faced by law enforcement, courtroom and correctional practitioners, as well as examine their own views of right and wrong.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 309 Bad Girls: An Introduction to Aggressive and Delinquent Females

"Bad girls" of society have developed a reputation for their increasingly aggressive behaviors. This course will discuss and investigate the unique characteristics, distinct traits and needs of the female delinquent. Effective approaches for working with this population will also be explored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 310 Investigating Motive in Hate Crime and Terrorism

The purpose of this course is to critically examine the motives behind hate crime, domestic terrorism, and foreign terrorism. Course will explore both the various types of motives as well as methods of using our understanding of motive to prevent acts of violence and disruption. Attention will be given to psychological, economic, and social factors which contribute to a hate crime or terrorism mindset.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 312 Legalization of Marijuana

This course is designed to provide students with an understanding of the history of marijuana laws and to provide an understanding of current state and federal laws regarding marijuana. Students will explore the impact of legalization of marijuana and the impact it has had in states that have legalized marijuana.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 313 Prison Violence and Disorder

This course examines the nature, extent, and causes of prison violence. It explores the psychological, environmental, cultural, and organizational factors that contribute to various forms of violence and disorder in prisons. Special emphasis is placed on identifying solutions for correctional policy and practice to reduce incidents of assault, riots, and gang disturbances in prisons.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 314 Forensic Science

With particular emphasis on the study of forensic science (science within the framework of the American legal system), this course evaluates various types of evidence left behind at the crime scene, the technology and protocols used to collect and evaluate each piece of evidence, the weight/value each piece of evidence should be assigned within the investigation, as well as the qualifications and scope (range of expertise) each testifying expert must provide.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 315 College Campus Crime

This course is designed to provide students with an overview of the criminal offenses and victimization on college campuses. Students will explore the extent and types of offenses, offenders, and victims. Students will also become aware of the ways that college campuses prevent and respond to offenses and the challenges faced by crime victims.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 316 Post-Conviction Justice Clinic

Prerequisite: CRM 314.

This course provides hands-on, real world experience to students charged with re-investigating cases of currently incarcerated defendants seeking post-conviction relief and making claims of actual innocence to the Midwest Innocence Project (University of Missouri-Kansas City School of Law). With particular emphasis on the examination of forensic evidence, students will evaluate various aspects of each case, ultimately creating a detailed and science-based report of their findings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 317 Peacemaking Criminology

Drawing upon critical theories, social justice, and human rights, a peacemaking approach to criminology is focused on crime prevention, power balancing, and reconciliation. This course will provide an introduction to the peacemaking criminology perspective as it is applied in domestic and global justice contexts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 318 Immigration and Crime

In this course students will explore the impact of immigration, legal and illegal, on the U.S. crime rate, as well as ways in which our criminal justice system interfaces with, and impacts, immigrants and immigrant communities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 319 Queer Criminology

In this course students will explore issues related to LGBTQI individuals and the criminal justice system. Topics include LGBTQI inmates in prisons, the victimization of LGBTQI individuals, perceptions of law enforcement in the LGBTQI community, and domestic violence in same-sex and polyamorous relationships.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 321 Disability in the American Criminal Justice System

In this course, students will examine how people living with physical, sensory, cognitive, and psychiatric disabilities interact with the American criminal justice system.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 323 Introduction to Developmental and Life-Course Criminology

This course provides an overview of the developmental and life-course perspective within criminology. How the factors which influence crime and delinquency change over the course of one's life is explored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Spring

CRM 325 Domestic Violence

This course is designed as an introduction to the study of domestic violence. Students will develop an understanding of theories and typologies of offenders and victims of intimate partner abuse, types of abuse, and

occurrence of abuse. The social causes and consequences of domestic violence are examined as well as the criminal justice response to domestic violence.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 326 Far-Right Terrorism and Violence in America

This course will introduce and familiarize students with the far-right extremist movement in America. Students will learn about the groups and individuals that are involved in the domestic far-right extremist movement. While most groups and individuals involved in this movement are non-violent, students will learn about not only why some members of this movement participate in violence, but also the types of violent activities in which they participate.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Spring

CRM 327 Animal Rights and Environmental Terrorism and Violence in America

This course will introduce students to the animal rights and environmental extremist movements in America. They will learn about the main groups and individuals involved in this movement. Even though the majority of those involved in this movement are non-violent, this course will explore not only reasons why these groups and individuals may choose to participate in violence, but also the types of violence employed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Summer

CRM 328 Jihadist Terrorism and Violence in America

This course will examine the threat that jihadist extremists pose to America. While international groups receive the most attention from scholars, those that operate in America also pose a threat to society. This threat will be examined from both a group and individual perspective. Additionally, the types of violence these groups and individuals employ will also be examined.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall

CRM 330 Juvenile Justice

Prerequisite: CRM 210.

This course reviews the topic of juvenile delinquency, with primary focus on a review of the history, extent and significance of delinquency and traces the emergence and effectiveness of the juvenile justice system as a societal response to juvenile offenders.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 332 Seminar on Violence

Acts of violence and violent predators will be explored through this course. Research on criminal violence will be offered with theoretical explanations. Crimes emphasized through the course material will include homicide, assault, robbery, rape and hate crime. Family, workplace, schools and gang violence will also be examined.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 333 Sex Offenses

This course examines sexual offenses, including the crimes and the criminals, with an emphasis on definitions, motives, theories and explanations. A variety of sex crimes will be discussed with perspectives being offered about the crimes, offenders, victims and criminal justice system with relation to this type of behavior. Fetishes and paraphilias will be explored through the investigation into sexual offending cycles.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 334 Homicide

Homicide is a phenomenon that impacts our society at alarming rates. This course is designed to examine this type of criminal violence through definitions, statistics, research, rates, types, and theoretical explanations. Students will be exposed to a variety of readings and required to complete independent investigations into incidents of homicide throughout the semester. Material covered throughout the course will greatly enhance the student's knowledge base regarding the act of murder.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 335 Criminal Typologies

Prerequisite: CRM 210.

This course is designed to examine the nature and extent of criminal behavior. Students will explore patterns of offender behavior including crimes against the person, interpersonal violence, property crimes, white collar and organized crime, public order crimes and political crimes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 336 Criminal Psychology

This course is designed to provide students with an in-depth analysis of principles and theories of delinquent and criminal behavior from a psychological perspective. Developmental, biological, and behavioral/cognitive risk and protective factors as well as the process of psychological conditioning that can lead to the commission of violent criminal acts will be explored.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 340 Research Methods in Criminology and Criminal Justice

Prerequisite: 60 hours; CRM 210 and CRM 250 and CRM 260 and CRM 270; and CRM 220 or concurrently enrollment in CRM 220.

An overview of research design as applied to research on crime and justice. Topics include hypothesis formulation, sampling techniques, reliability and validity, survey construction, field observation, and evaluation research. May be taught concurrently with CRM 641. Cannot receive credit for both CRM 340 and CRM 641.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 341 Introduction to Criminal Justice Data

In this course, students will engage in a variety of activities designed to hone their data analysis and data management skills. Students will be exposed to key foundational elements of quantitative and qualitative analyses necessary to develop proficiencies to become consumers of and contributors to research. Students will learn to understand the fundamentals of different types of data, organizing and displaying data as well as interpreting basic statistical tests and hypotheses.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 351 Trafficking of Humans, Drugs, and Guns

This course examines rapidly changing issues such as drug trafficking, human trafficking, and illegal arms trading that are major areas of concern for law enforcement, politicians, and policy makers, and an increasingly important area of research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 355 Current Issues in Policing

Prerequisite: CRM 210 and CRM 250 and CRM 260 and CRM 270.

This course addresses a selection of contemporary issues and controversies facing police officers and law enforcement agencies. Topics covered may include, but are not limited to, problem-oriented and community policing, police use of force, racial profiling, leadership in law enforcement, and police corruption.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 356 Conflict, Communication, and Stress in Criminal Justice Professions

This course will provide students interested in criminal justice professions with needed information and skills regarding effective communication, conflict resolution, and occupational stress. Current research will be examined, skill building will be emphasized, and solutions will be explored and evaluated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer, Fall (even-numbered years)

CRM 357 Police Use of Force

In this course students will examine diverse viewpoints concerning police presence and use-of-force in urban communities, as well as the difference between necessary and excessive force. Students will explore perceptions and current research, as well as evaluate possible solutions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 358 Policing Protest

In this course, students will examine the legal boundaries, officer practices, and social factors that impact interactions between law enforcement and protestors in the United States.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 365 Criminal Procedure

Prerequisite: CRM 210 and CRM 250 and CRM 260 and CRM 270.

This course critically examines the constitutional and other legal controls placed on the government's ability to collect evidence to be used in criminal proceedings. Special attention is given to Supreme Court decisions related to the issues of privacy, detention, arrest, searches, seizures, interrogations, confessions, wiretapping and eavesdropping, right to counsel, and protections against self-incrimination. Issues of officer liability are also addressed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 375 Current Issues in Corrections

Prerequisite: CRM 210 and CRM 250 and CRM 260 and CRM 270.

This course addresses a selection of contemporary issues and controversies facing corrections officers and corrections agencies. Topics covered may include, but are not limited to, inmate-staff relations, inmate subculture, management issues, and reentry issues

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 376 Restorative Justice

The purpose of this course is to introduce students to the principles, values, and practices of restorative justice in a range of contexts related to the field of criminal justice. Students will explore the restorative philosophy through reading, research, reflective writing, and group discussion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (odd-numbered years)

CRM 377 Inmate Voices: Examining the Effects of Incarceration

In this course students will attempt to reach beyond assumptions and expectations about the incarcerated by exploring the experiences and perceptions of prison inmates as expressed through their own writings. This course will deepen students' understanding of the effects and experience of incarceration on inmates, as well as their children, families, communities, and prison staff.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CRM 380 Criminal Justice Organizations and Management

Prerequisite: CRM 210 and CRM 250 and CRM 260 and CRM 270.

This course provides an overview of organizational theory and administrative behavior in criminal justice agencies, and exposes students to the latest research and practices in criminal justice management and organizations. Effects of leadership decision-making, court cases, personnel policies, budgeting, and planning on the justice system are analyzed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 381 Crime Prevention

Students will be introduced to the theories and constructs of crime prevention and reduction. Techniques and policies currently being used will be evaluated. Strategies and case studies under Primary Prevention, Secondary Prevention and Tertiary Prevention will be evaluated. Innovative community programs will be highlighted through case study examination.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 382 Criminal Investigation

This course introduces students to the methods and practices involved in criminal investigations. Topics include but are not limited to rules of arrest and evidence, investigative leads and informants, interviews and interrogations, and strategies for solving various types of crimes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 383 Serial Killers

This course will educate and enlighten the student about serial killers, including, but not limited to identification, descriptions, motives, theories and typologies. Notorious serial killers from the United States and other countries will be discussed. Each student will learn the numerous definitions of serial killing with accordance to the research available and input from the FBI. Students will also become familiar with root causes of serial killing and explore the patterns of serial killing. Upon conclusion of the course, students will be able to define applicable terminology, comprehend and discuss serial killing, and to apply the concepts learned throughout the course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 390 Active Shooter Events

Active shooter events in the United States have become a more prevalent problem in recent years. To combat this type of attack, officers are now receiving standardized training, both tactical and medical, that allows them to make entry as soon as possible. This course will examine these active shooter events in detail by discussing the attacks as a whole as well as analyzing specific cases.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 392 Sports and Crime

This course will offer students the opportunity to critically review, analyze, and evaluate the realm of sports (broadly defined) from a criminological perspective. This course is specifically designed to explore crime, controversy, and conflict in the realm of sports in our society. Students will critically examine the role of crime and sports, including NCAA violation, cheating, criminal athletes, sports organizational crime, and gambling. Students should attain an in-depth and critical understanding of the various economic, individual, societal, and organizational harms that occur at the intersection of sports and crime.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 395 Hostage Negotiations

Hostage negotiations involve a number of different techniques and responses. This course will cover crisis negotiations by discussing the events that led to the creation of national hostage negotiation teams, looking at the types of situations and people negotiators respond to, and analyzing case studies of hostage events.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CRM 396 Directed Readings in Criminology

Prerequisite: CRM 210 and permission of instructor.

Readings designed to introduce students to new material or to supplement material introduced in previous departmental courses. May be repeated to total of 6 hours if topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CRM 397 Special Topics in Criminology

A variable topic course offering an overview of one or more issues related to criminology. May be repeated when topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CRM 400 Conservation Law Enforcement

Conservation law enforcement and conservation officers occupy an important, yet often overlooked segment of the criminal justice system. The role and duties of conservation officers is unique among law enforcement. While conservation officers perform similar duties to traditional law enforcement officers such as order maintenance and law enforcement, the scope of those duties differs in several respects. This course will explore those differences through examining conservation law enforcement from a local, national and international perspective. Additionally, this course will examine the unique role of conservation officers within the larger criminal justice system, and within the smaller law enforcement community.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CRM 401 Wildlife Criminology

This course will examine wildlife crimes from a global criminological perspective. Poaching and the illegal trafficking of wildlife has become a massive form of crime both at the local level and globally. This has led to the near loss of many species around the world. Wildlife crime has significant ecological, economic, social, and security costs at all levels of government in many countries. Issues related to wildlife criminology will be analyzed and discussed with a specific emphasis on theory, ethics, and prevention.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 410 Women in Criminal Justice

Prerequisite: CRM 210 or permission of instructor.

Using theoretical guidance, students will explore the way that women's roles in the justice system - as offenders, victims, citizens, and workers - reflect their position in the wider society. Students will develop an understanding of theories explaining female offending and how the criminal justice system responds to illegal acts committed by women and girls as well as women's victimization and the criminal justice system response to their victimization. Students will examine the experiences of women working within the criminal justice system.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CRM 415 Difference and Diversity in Criminology

Prerequisite: CRM 210 and CRM 250 and CRM 260 and CRM 270.

Students will examine how identities, such as race, class, and gender, impact criminal offending, victimization, and professionalism in the criminal justice system. Students will be encouraged to develop a deeper understanding of cultural competency and will conduct academic research in an effort to develop an understanding of the social and criminal justice related factors that create challenges to achieving cultural diversity and the ethical treatment of diverse groups.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 420 Comparative Criminal Justice Systems

Recommended Prerequisite: 45 hours. A comparative and historical study of the origins of law, crime rates, and the structure and operation of the criminal justice system in the United States as compared to other western and eastern nations. Included is the study of criminal and juvenile law, police, courts and the corrections system.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 425 Wrongful Convictions

Recommended Prerequisite: CRM 210 and 45 hours. This course is designed to provide students with an overview of criminal procedures leading to the wrongful conviction of alleged offenders. This will include an overview of the extent of wrongful convictions in the United States as well as the primary contributing factors of wrongful conviction. Students will also be exposed to potential policy changes and laws that have been made or suggested to reduce the incidence of wrongful convictions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 430 Victimless Crime

Recommended Prerequisite: CRM 210 and 45 hours. A sociological examination of attempts to legally control private behavior covering both historical and contemporary examples such as prostitution, drug use, homosexuality, and abortion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 435 Evidence

Recommended Prerequisite: 45 hours. This course critically examines the laws and rules of evidence at trial. Common law rules and the Federal Rules of Evidence are discussed, along with leading court cases.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 440 Foundations of Homeland Defense and Security

This course provides an overview of homeland security and defense undertaken in the United States since September 11, 2001. The course provides students with the generally accepted knowledge required of homeland security professionals.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 441 Fundamentals of Terrorism

This course provides an introductory overview of the challenges, perspectives and issues related to terrorism from both an international and a domestic perspective. Topics such as causes of terrorism, terrorist typologies, ideologies, tactics and strategies will be covered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CRM 445 Victimology

Recommended Prerequisite: 45 hours. This course examines the characteristics of crime victimization as it relates to the various components of the criminal justice system. Students will develop a better understanding of the contextual relationship between victims and offenders, as well as the role of police, courts and corrections in the dynamics of crime victimization, as well as the physical, emotional and financial impact of crime.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 475 Community Corrections

Recommended Prerequisite: 45 hours. This course focuses on describing and evaluating the policies and initiatives used to monitor and treat criminal offenders sanctioned to community supervision. Community-based correctional programs and practices given special attention include probation and parole, work release, halfway houses, residential treatment centers, and diversionary programs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 477 Geographic and Spatial Analysis of Crime

Recommended Prerequisite: 45 hours. This course will provide an in-depth look at the history of our efforts to describe, understand, and respond to concentrations of crime across place and time. From early efforts in the 1800s to the most current research utilizing sophisticated computerized crime mapping, the questions of where, when, and why crime is most prevalent will be examined with a focus on how high-risk places and times can be addressed and prevented.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 480 The Gang Phenomenon

Recommended Prerequisite: 45 hours. In this course students explore the history of the gang phenomenon, the variety and types of gangs, reasons why gangs form, their structure, the functions they serve for their members and the social policies which have been developed to deal with gangs. Solutions to the gang phenomenon are also investigated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CRM 485 Drug Abuse and Criminal Justice

Recommended Prerequisite: 45 hours. This course will provide a comprehensive overview of the abuse of drugs in American society. In doing so, course will: 1) examine current U.S. drug abuse trends and patterns, 2) review the history of drug abuse in this country and the legislative attempts to control such abuse, 3) consider the various correlates and causes of drug abuse, 4) explore the physiological, psychological and sociological effects of several more commonly abused drugs, 5) discuss the connections between drug abuse and crime, and 6) critically review and evaluate current philosophies, policies and practices designed to control drug abuse in America.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 490 Internship in Criminology

Prerequisite: Criminology and Criminal Justice major, completion of 18 hours in the major program, and permission of instructor.

Faculty supervised experience in an agency related to issues of crime and justice. Students are expected to work 40 hours in the agency for each credit hour. Students must submit applications for CRM 490 no later than March 15 for subsequent summer (when offered) and fall enrollment, and October 1 for subsequent spring enrollment. May be repeated to a total of six hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Fall, Spring

CRM 495 Criminal Justice Ethics

Recommended Prerequisite: CRM 210 and 45 hours. This course will address ethical issues in the criminal justice system at both the theoretical and applied levels. Students will examine critical issues encountered by victims, offenders, and practitioners within the criminal justice system. Emphasis will be placed on ethical dilemmas in the police, court, and correction systems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 496 Senior Seminar in Criminology and Criminal Justice

Prerequisite: CRM 340; and Criminology and Criminal Justice major; and senior standing with 95 hours.

Recommended Prerequisite: CRM 415. Students in this course examine ethical leadership and decision-making in criminal justice professions, explore career opportunities in criminal justice, and prepare for their transition out of the undergraduate program. Students also complete the department's exit exam, student exit survey, and a senior capstone paper that integrates knowledge and skills acquired throughout their major coursework. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 497 Special Issues in Criminology

Recommended Prerequisite: 45 hours. A variable topic course offering an in-depth analysis of one or more issues related to Criminology. May be repeated to a total of 6 hours when topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CRM 580 Cybercrime

This course will provide the student with an overview of cybercrime and the offenders who commit the offense. It will explore the various types of cybercrime including internet pornography, harassment, fraud, and hacking. Legal issues regarding cybercrime will also be discussed. Methods of combatting cybercrime and assisting the victims of cybercrime will be presented.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 597 Special Topics and Issues in Criminal Justice

Recommended Prerequisite: CRM 210 and 60 hours. A variable topic course examining issues of crime, its causes, as well as social and political responses to crime by various institutions including government, media, law enforcement, the courts, and corrections. Variable content course. May be repeated for a total of 6 hours if the topic changes. May be taught concurrently with CRM 697. Cannot receive credit for both CRM 697 and CRM 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CRM 641 Research Methods in Criminology and Criminal Justice

An overview of research design as applied to research on crime and justice. Topics include hypothesis formulation, sampling techniques, reliability and validity, survey construction, field observation, and evaluation research. May be taught concurrently with CRM 340. Cannot receive credit for both CRM 641 and CRM 340.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 657 Forensic Psychology: Child Abuse and the Law

Study of the legal issues related to child abuse and exploitation. Students will gain an understanding of the law pertaining to child cases and how interactions with children can bolster or diminish the quality of children's memory report as seen by the judicial system. The Greene County Prosecutor's Office will participate in the design of this course, thus the specific legal issues discussed will remain current and may change based on the needs of the community. Identical with PSY 657. Cannot receive credit for both CRM 657 and PSY 657.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 697 Special Topics and Issues in Criminal Justice

Prerequisite: permission of instructor.

A variable topic course examining issues of crime, its causes, as well as social and political responses to crime by various institutions including government, media, law enforcement, the courts, and corrections. Variable content course. May be repeated for a total of 6 hours if the topic changes. May be taught concurrently with CRM 597. Cannot receive credit for both CRM 597 and CRM 697 unless topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CRM 701 Criminal Justice Policy

Prerequisite: admission to the MS in Criminology and Criminal Justice; or Criminal Justice Leadership and Management certificate program; or Master of Professional Studies program with the Criminal Justice option.

This course takes a critical look at the construction, implementation, evaluation, and justification of a wide range of criminal justice policies and programs. Significant attention is given to methodological processes in determining policy and program effectiveness.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CRM 705 Applied Research in Criminal Justice

Prerequisite: admission to the MS in Criminology and Criminal Justice program and successful completion of an undergraduate or graduate research methods course.

This course provides students with the background and skills necessary to conduct sound and ethical research in their professional fields and successfully navigate through academic research relevant to guiding and

improving criminal justice policy and practice. The capstone requirement consists of a mini-research proposal.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CRM 715 Leadership and Management in Criminal Justice

Prerequisite: admission to the MS in Criminology and Criminal Justice; or Criminal Justice Leadership and Management certificate program; or Master of Professional Studies program with the Criminal Justice option.

This course familiarizes students with theories, issues, and innovations related to leadership and management in criminal justice settings. Students are exposed to techniques aimed at enhancing leadership and management capabilities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CRM 720 Crime Theory and Policy

Prerequisite: admission to the MS in Criminology and Criminal Justice; or Crime Prevention certificate program; or Master of Professional Studies program with the Criminal Justice option.

This course surveys various classical and contemporary theories of lawbreaking. The relationship between criminological theory and justice system policy is emphasized. A position paper on a theoretically-driven policy is required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CRM 728 The Ethics of Justice

The emphasis for this course is on ethical leadership and decision-making in the criminal justice system. Students will use the knowledge they've gained over their academic careers to critically analyze and discuss topics in criminology and criminal justice. The course will begin by examining ethical systems that can be used to justify and direct ethical judgement. Following this, ethical issues in policing, courts, corrections, and social science research will be discussed and debated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 730 Juvenile Justice

This course aims to stimulate and facilitate critical and reflective thought regarding the legitimacy and effectiveness of juvenile justice policy and practice in the United States. Students analyze the mission and goals of juvenile justice systems, organizational design and managerial and staff roles, contemporary policies and programs, and methods of performance evaluation in juvenile agencies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 740 Foundations of Homeland Defense and Security

This course provides an overview of homeland security and defense undertaken in the United States since September 11, 2001. The course provides students with the generally accepted knowledge required of homeland security professionals.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 741 Cybercrime and Cyber terrorism

This course provides an in depth analysis of differences between cyber terrorism and cybercrime and the motivations that drive cyber criminals and terrorists. It also examines emerging strategies used by law enforcement and the private sector to respond to cyber attacks.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer, Upon demand

CRM 745 Topics in Homeland Defense and Security

A comprehensive and integrated homeland security and defense strategy must also include the full range of elected officials, first responders, the human, animal and plant health communities, business and our citizens. This course will examine the application, progress and problems of the development and implementation of a homeland security/defense strategy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 746 Global Criminology

This course explores how the traditional field of criminology is being transformed by forces of globalization.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 747 Policing Terrorism

This course examines the role of law enforcement in counter terrorism efforts in the United States. It explores law enforcement responses to terrorism from a critical, best-practices perspective and addresses controversial strategies employed by enforcement agencies responding to terrorism within the context of a democratic government.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 750 Contemporary Issues in Policing

This course is a critical examination of contemporary issues in policing and considers the role of police, theories related to policing, police operations and strategies, public views about police, and outcomes of policing in the U.S.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 751 Applied Evidence-Based Practice in Policing

This course examines the merits and limitations of research-informed policies and techniques utilized by law enforcement agencies to increase public safety and reduce crime. Topics will include hot spot policing, broken windows policing, CPTED, modern technological applications, focused deterrence strategies, predictive policing, problem-oriented policing, community policing, and other relevant evidence-based practices in policing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CRM 765 Legal Issues in Criminal Justice

This course introduces the student to the role of law and courts in the criminal justice system, with a particular focus on the relationship of the law to police investigatory procedures. Particular emphasis is placed on the role of the United States Supreme Court in interpreting the Fourth, Fifth, and Sixth Amendments. Current legal issues in criminal justice will also be examined.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 770 Correctional Theory and Practice

This course examines social control responses to lawbreakers including the exploration of classical and contemporary theories and philosophies that have guided American correctional policy, both institutional and community based. Management implications related to policy are addressed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 771 Contemporary Issues in Community Corrections

This course examines modern issues, problems, and practices facing the community corrections profession. A special emphasis is placed on exploring the challenges of interacting with specific types of offender populations, including mental health, substance abuse, and domestic violence offenders, in community and treatment contexts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CRM 772 Applied Evidence-Based Practices in Community Corrections

This course reviews a range of research-informed policies, programs, and practices delivered to offenders in correctional settings to improve supervision and reduce recidivism. In addition to coverage of the relevant literatures, the course emphasizes hands-on applications of evidence-based practices through a variety of active-learning exercise.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CRM 773 Offender Thinking and Decision-making

This course explores how criminal offenders process and prioritize information when they encounter opportunities to violate supervision conditions and commit crime. Beliefs, values, and attitudes used to rationalize criminal behavior are also examined.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CRM 777 Crime Prevention in the Modern Age

This course will be a survey of crime prevention methods and the theories associated with them. Particular emphasis will be placed on deterrence and routine activities. Students will use such theories to analyze past and present methods for crime prevention and the reasons behind their successes or failures. Research and policies for crime prevention will also be examined for both public and private industries.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 780 Gangs and Gang Policy

This course explores the nature and scope of street gangs and critically analyzes gang-control policies and programs. A variety of gang-related issues are discussed, including the problems inherent in defining the term "gang," the historical development and organizational structure of gangs, and gang origination, persistence, desistence, prevalence, and migration. In addition, proposed solutions to gang problems are analyzed by examining such policies and programs as gang databases, gang prosecution units, gang enhancement statues, and civil injunctions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 785 U.S. Drug Control Policy

This course provides a historical overview of the formulation, implementation and evaluation of U.S. drug control policy. The focus is on critically reviewing the cultural, social and political forces that have shaped our nation's drug control policies and assessing the research that has been conducted to evaluate the effects of such policies. Topics to be examined include prohibition, interdiction, eradication, legalization, law enforcement and military responses, effects on the criminal justice system, treatment, education and prevention.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CRM 790 Graduate Practicum in Criminology

Prerequisite: permission of instructor.

Faculty supervised experience in a criminology-related agency. Students are expected to work 45 hours in the agency for each credit hour. The practicum includes academic reflection on work experience at the agency. May be repeated for up to 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

CRM 796 Independent Study in Criminology and Criminal Justice

Prerequisite: admission to the MS in Criminology and Criminal Justice or the Master of Professional Studies program with the Criminal Justice option; and permission of instructor.

Faculty supervised independent research directed by a member of the department graduate faculty. May be repeated to a maximum of six hours when the topic varies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

CRM 797 Policy Analysis Capstone

Prerequisite: completion of 27 hours in the MS in Criminology and Criminal Justice program, including the completion or concurrent enrollment in CRM 701, CRM 705, CRM 715 and CRM 720; and permission of a graduate faculty member.

This capstone experience requires an in-depth analysis of a specific criminal justice policy with an emphasis on demonstrating an understanding of the policy (including its historical background and current applications), specifying strengths and weaknesses, and offering suggestions for future research and improvement of the policy. This course should be taken the last semester of coursework.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 798 Thesis I

Prerequisite: completion of or concurrent enrollment in CRM 701, CRM 705, CRM 715, and CRM 720; and permission of graduate thesis committee following the successful defense of an initial concept paper.

This phase of the thesis process requires the completion and successful defense of a thesis prospectus, including statement of the problem, literature review, and methodology sections.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CRM 799 Thesis II

Prerequisite: completion of or concurrent enrollment in CRM 701, CRM 705, CRM 715 and CRM 720; and approval of thesis prospectus by the student's thesis committee.

This phase of the thesis process calls for the collection, analysis, and interpretation of data and the development of final conclusions and implications. The final product must be successfully defended in front of the thesis committee.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

Criminal Courts Certificate

Criminal Courts

The certificate is designed for students interested in pursuing criminal justice careers that involve the court system, such as court reporters, docket clerks, court clerks, legal assistants, paralegals, prosecutors, public defenders, judges, bailiffs, case administrators, victim advocates, and court administrators. The curriculum provides an in-depth look into the basic principles, processes, personnel, and structures found in courts in the United States and Missouri. Students will also examine the U.S. Supreme Court and its landmark decisions related to courts, such as right to counsel, right to a speedy trial, and right to confront witnesses in court. Students will also critically examine the laws and rules of evidence used at trial, particularly the Federal Rules of Evidence, and learn how to create a cohesive trial strategy in court.

Program requirements (15 hours)

1. [CRM 260\(3\)](#), [365\(3\)](#), [435\(3\)](#).
2. Six hours from: [CRM 316\(3\)](#), [376\(3\)](#), [396\(3\)](#), [397\(3\)](#), [425\(3\)](#); [PSY 557\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of 2.50 or higher in courses used to fulfill the certificate requirements.

Criminal Investigation Certificate

Criminal Investigation

This certificate is jointly offer by the Department of Criminology and Criminal Justice and the Department of Psychology. The certificate is designed for students interested in pursuing criminal justice careers that require investigatory skills. The curriculum covers fundamental investigative principles and strategies, the application of forensic science techniques to case solving, and motivating factors underlying criminal behavior. Students will understand how arrest procedures, rules of evidence, leads and informants, and witness interview and suspect interrogation are integrated into the criminal investigation process.

This certificate is administered by the Department of Criminology and Criminal Justice.

Admission requirements

Completion of at least 60 hours and a GPA of 2.50 or higher.

Program requirement (15 hours)

1. [CRM 314\(3\)](#), [CRM 336\(3\)](#), [CRM 382\(3\)](#).
2. Six hours from: [ANT 363\(3\)](#), [CRM 333\(3\)](#), [CRM 334\(3\)](#), [CRM 335\(3\)](#), [PSY 505\(3\)](#), [PSY 525\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of 2.50 or higher in courses used to fulfill the certificate requirements.

Terrorism and National Security Certificate

Terrorism and National Security

This certificate is jointly offered by the Department of Criminology and Criminal Justice and the Department of Political Science. The certificate is designed to provide students interested in careers related to counterterrorism and national defense with a critical understanding of causes of terrorist activity, recruitment and organizational strategies, and policies and practices aimed at strengthening homeland security. Students are exposed to a range of current issues from both national and global perspectives.

This certificate is administered by the Department of Criminology and Criminal Justice

Admission requirements

Completion of at least 60 hours and a GPA of 2.50 or higher.

Program requirements (15 hours)

1. National Defense requirement: [PLS 301\(3\)](#) or [CRM 440\(3\)](#).
2. National Terrorism requirement: [CRM 326\(1\)](#) and [CRM 327\(1\)](#) and [CRM 328\(1\)](#).
3. Global Terrorism requirement: [PLS 546\(3\)](#) or [HST 504\(3\)](#).
4. Six hours from: [CRM 332\(3\)](#), [CRM 580\(3\)](#), [HST 334\(3\)](#), [PLS 443\(3\)](#).
5. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of 2.50 or higher in courses used to fulfill the certificate requirements.

Defense and Strategic Studies Courses

Defense and Strategic Studies (DSS) courses

DSS 601 Seminar on Nuclear Strategy and Arms Control

This seminar examines the development of U.S. nuclear deterrence theory and policy. The seminar will study the strategic nuclear balance, including specific problems and programs, and the strategic doctrine, concepts, and objectives of the nuclear powers. Nuclear arms control, including the processes of decision making and negotiating, will be examined, with an emphasis on comparing theory and practice.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DSS 630 International Law and Global Security

This is a survey course designed to introduce students to the core principles and defining features of the international legal system, and to the changing role of international law in contemporary national and global security. Emphasis will be placed on the applicability of international law to armed conflict, counterterrorism, and containing the spread of weapons of mass destruction.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

DSS 631 International Negotiations

This course combines the basics of negotiation theory and the examination of select international negotiation case studies with three practical "hands-on" negotiation exercises. It will explore various techniques for diagnosing the structure of a negotiation and identifying potential barriers to agreement. Case studies considered include: Negotiation of 1994 Framework Agreement with North Korea, George Mitchell's mediation in Northern Ireland resulting in the Good Friday Accords, the secret Oslo discussions leading to Israeli recognition of the PLO, The Louisiana Purchase, the Congress of Vienna, the Panama Canal negotiations, and the Egyptian-Israeli Armistice. The course is conducted as a series of interactive seminars including three simulated negotiations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 632 Seminar on International Security Affairs

Examines international and regional security problems and policies from both a regional and global perspective. It treats strategies and security problems from a broader viewpoint than the Seminar on Strategy and Arms Control, covering national interests, alliance relationships, intervention, regional threats, and the security problems of other states, including China and Russia.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DSS 633 Analysis of International Security Politics

This course deals with the methods and techniques of collecting and assessing information for use in the study of international security politics, problems, and policies. It explores the measures of relative power among nations and the manner in which such power or lack of it shapes the capability of a nation effectively to act in the international sphere.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 634 The Geopolitics of Conflict and Accommodation

The application of the techniques and understanding lent by the geography to the illumination of the physical and social environment in which politics, strategy, and war take place. The relationship among geography, strategy, and politics is studied through the examination of both historical and contemporary circumstances where geography has intruded on politics or politics on geography. Students will be introduced to the

geopolitical concepts of sea power, land power and air power, and these concepts will be critiqued in light of recent technological changes in warfare.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 700 Strategy and U.S. Defense Policy

This course provides an examination of the basic concepts and issues of strategy, deterrence, defense, and arms control, and an overview of American defense policies, programs, and problems since World War II. Comparative strategic concepts, policies, and objectives are covered. Proliferation and measures of counter-proliferation, including arms control are examined on an introductory basis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DSS 702 Seminar on Regional Security Problems

This seminar provides an advanced and in-depth analysis of selected contemporary regional security problems outside of Western Europe. It focuses on a few critical conflict situations, analyzes threats to regional and to U.S. interests, and examines alternative strategic policies and actions, including military force requirements, for the states involved.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 703 Science, Technology, and Defense Policy

This course will cover four broad topics important to advanced work in DSS: basic principles and applications of defense science and technology; such as nuclear weapons effects, ballistic missiles, and strategic defenses; the influence of science and technology on defense programs and policies; the role of the scientific and technical community in defense policy; and current issues of defense science and technology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

DSS 704 Arms Control: Theory and Practice

An examination of contending arms control theories and concepts as tested by postwar and contemporary experience, bilateral and multilateral. There will be in-depth analysis of American and Russian approaches to arms control, as well as consideration of the arms control policies of other states. The course will study scientific and technical problems in arms control, including those of R and D, testing, production, and deployment; arms negotiations, and issues in verification and compliance.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DSS 705 NATO Security Issues

After an examination of the history of NATO policies, defense policies, and security issues, emphasis will be placed on analysis of current NATO security problems and options, including specific military defense alternatives. The individual security policies of the U.S., UK, FRG, and France will be studied, along with problems on the northern and southern flanks, and policies for outside-NATO-area security problems. Literature on the future of NATO would be included.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

DSS 706 Russian Military Strategy

The first part of this seminar will review and study Soviet military policy, doctrine, strategy, and programs from the 1950s through the 1980s. It will consider problems of identifying, interpreting, and analyzing Soviet strategic policies and programs - in essence, problems of U.S. intelligence and threat assessment. The second part of the seminar will extend this study to Post-USSR Russia and current directions of Russian strategic policy both for territories of the former USSR and beyond. Particular emphasis will be placed on military reform, continuity and change in military policy, and the status and role of the Russian military forces.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 707 Seminar on Congress, National Security, and Weapons of Mass Destruction

Advanced research, study, and analysis of defense programs, policies, and the policy and budget processes, both within the Congress and the Department of Defense. Included also will be the comparative analysis of

various studies, analyses, and critiques of U.S. defense programs and plans, and of regional and global WMD capabilities. Department of Defense administration and organization will also be studied.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DSS 708 Seminar on Contemporary Security Issues in Russia

This seminar addresses on an advanced level current developments in Russia and other states of the former Soviet Union as they bear on issues of national and international security and on U.S. security policy-making. The approach will combine analysis of internal developments related to military power and policy, and of evolving international policies, with strategic and geopolitical analysis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 709 Seminar on Space Policy and Security

This course examines the extent to which spacepower doctrine, concepts, and operations influence national security strategy and international security. It identifies key space policy issues facing the United States and places them in the larger context of technological advances and a changing international strategic environment. The course will briefly examine the historical and policy foundations for the U.S. and international space programs and activities, including space policy evolution and international space law and treaties. It will then address current issues facing U.S. space programs, including efforts to reorganize national security space activities, and current international efforts to develop "rules of the road" for space activities. The course will also address strategic choices facing other nations in space capabilities, including continued dependence on U.S., European, and Russian space capabilities, developing indigenous space programs, and reliance on commercial space capabilities. Conflicts over dual-use technologies, such as space launch, remote sensing, satellite navigation, and communications, will be examined for their implications for such topics as spectrum management, and more broadly, for international security. Students will have an opportunity to apply insights gained from their readings and class discussion in a future wargame that includes both space and terrestrial crises and involves student team of players.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 710 Seminar on International Terrorism and Security

This seminar will attempt to define and examine security issues related to terrorism and low-intensity conflict today. The origins of modern terrorism will be explored and terrorism will be put in the context of a strategy to

achieve political ends. Case studies of terrorism in various regions, e.g., the Middle East, Europe and the United States, will show some of the current empirical evidence of global terrorist activities. The impact terrorism has on liberal societies and their ability to defend themselves will be examined in the context of counterterrorism strategies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 711 The Rise of the United States to Preeminence

This course will discuss the political development of the United States and its rise to great power, and then superpower status. Students will study a number of major U.S. wars and the political circumstances surrounding those conflicts. The course will address why the United States successfully developed into a world power and how its grand strategy changed over time. It will ask what lessons today's strategists can draw from the experiences of their predecessors.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 712 American National Security Policy

This course evaluates the major actors and components of American national security policy. America's traditional national interests are studied--accenting World War II, the Cold War, and the present day. The course also addresses the circumstances of major foreign policy crises, such as the Cuban Missile Crisis, and the causes of successful and unsuccessful American interventions during the Cold War and after. Additionally, it considers America's foreign and defense policy in the post-Cold War world, and particular emphasis is placed on American policies toward other great powers such as China, Japan, and Russia, as well as in contemporary foreign and defense policy crises such as the war on terrorism.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 713 Intelligence, Counterintelligence, and Covert Action

This course examines the role of intelligence and counterintelligence in the formulation and execution of state national security policies in democratic governments, and the impact of intelligence operations on international relations. The intelligence process is examined including the problems and opportunities associated with targeting or the tasking of intelligence agencies, the media of intelligence collection, the difficulties of analysis and evaluation, and counterintelligence. Additionally, covert action and paramilitary activities are studied with emphasis on the manner by which successes and failures have influenced military and foreign policy outcomes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DSS 714 Seminar on Strategic Thought

There is a rich literature on strategy and warfare, and even the oldest surviving works on strategy are arguably relevant to contemporary political leaders. This course will examine the ideas of strategic thinkers who lived in historical periods ranging from the ancient world to the present. Students will read works by (and in some cases, about) such figures as Sun Tzu, Niccolo Machiavelli, Napoleon Bonaparte, Baron Antoine Henri de Jomini, Carl von Clausewitz, Thucydides, Thomas Schelling, and Herman Kahn. Students will discuss how these thinkers have influenced strategic studies, and how military-strategic thought has developed over time.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 715 Grand Strategy

This seminar examines the role of grand strategy in international security. Emphasis is placed on the nature and role of grand strategy, and the major systemic and domestic factors that influence grand strategy. The nature of grand strategy will be introduced historically, and the grand strategies of the major world powers prior to and during World Wars I and II, the Cold War, and post-Cold War period, will be studied.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 716 Understanding Military Operations

This seminar delineates selected past, current, and future sea, air, space, and land conflicts into their constituent parts in order to examine the interaction of political objectives and military doctrine. It will specifically seek to explore how the political objectives and military doctrine influence technological development and military innovation. To meet these objectives, the seminar will examine a variety of international political and doctrinal problems that have had a major impact on American national security policy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DSS 717 Small Wars, Imperial Conflicts, and Guerrilla Warfare

This seminar examines some of the many forms of warfare that differ from "symmetrical" conflicts between great powers, with special attention to how great powers fight such wars and why they succeed or fail in bringing them to a satisfactory conclusion. Students will read a variety of literature written by authors such as C. E. Calwell, Victor Davis Hanson, and Colin Gray, as well as insurgents such as Che Guevara. The class will include a number of historical case studies, with an emphasis on the nineteenth, twentieth, and twenty-first centuries.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 718 Causes of War

This seminar explores the causes of warfare through the lens of human evolution, psychological approaches, economic system, ideology, and the international system, with the intention of understanding the strengths and limitations of each level of analysis. From that foundation, the seminar applies each level of analysis to the study of the origins of particularly significant wars: the Peloponnesian, Crimean, Seven Years', Korean, and Vietnam Wars, as well as World War I and World War II.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 719 Strategic Culture

Provides an introduction to using strategic culture as an analytical approach to understanding the cultural, religious, historical, and leadership sources of state and non-state actor behavior, with special reference to issues related to weapons of mass destruction. The concept of strategic culture captures domestic sources of state behavior, and offers an alternative or supplemental explanatory framework to the prevailing realist and constructionist theories of international relations. Examines the cultural context for applying theories of deterrence and dissuasion, and will involve a survey of thinking and analysis on strategic culture, from both theoretical and policy perspectives, as well as an exposure to the framework and methodology of strategic cultural analysis. Several key strategic cultures will serve as case studies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DSS 720 Internship Training in DSS Policy

Prerequisite: permission of instructor and acceptance by employer.

Internship experience and training in defense and arms control policy making with a U.S. Government department or agency, a Washington, D.C., based defense policy research institute, or institution of comparable professional experience, including preparation of a written report or research paper based upon the internship. May be repeated to a maximum of 6 hours toward degree. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-6			Fall, Spring, Summer

DSS 721 Missile Defense, Proliferation and Contemporary Warfare

Examines the role of missile defense in the national security policies, programs, and military doctrines of the United States. Emphasis on exploring the evolution of missile defense within the broader context of contemporary American deterrence and defense policy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DSS 722 Emerging Strategic Challenges

For the purpose of this seminar, strategic challenges are defined as those emerging trends or security threats--political, economic, or military--that could fundamentally alter the present pattern of interstate relations or the core principles of U.S. foreign and defense policy. Examples include a possible cascade of proliferation resulting in 20 or 30 nuclear-armed states, a single terrorist with a nuclear weapon, or a resurgent Russia or ascendant China rising to a level of a peer competitor of the United States. Seminar reading and discussions will focus on: 1) Examining the causes, effects, and responses to these potential strategic challenges, especially the spread of weapons of mass destruction to state and non-state actors, both terrorists and enablers such as the A.Q. Kahn network; 2) Assessing assumptions, policies and capabilities for dealing with these challenges and how the concept of dissuasion, deterrence, and defense must adapt to the new security environment; and 3) Exploring how best to hedge against strategic uncertainties and how best to shape the future of the nuclear enterprise to promote the expansion of nuclear energy globally while reducing the risks of proliferation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

DSS 723 Counterproliferation

Explores the challenges posed by nuclear and biological weapons in the hands of state and non-state actors. Students will investigate why various actors pursue these weapons, why some give them up, why others refuse

to give them up, and the assorted instruments of national power that may be employed in the development of a national strategy to combat these weapons. Students will consider both the national security and homeland security aspects of these challenges. The subject matter will provide a vehicle for refining critical analytical skills; both verbal and written. The course will stress the refinement of each student's analytical and problem solving abilities as part of their development as national security strategists.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 724 Leadership in National Security Policy

Addresses the issue of national security policy leadership. Students will investigate the critical topics, including the components of good leadership, and the consequences of leadership failures. Speakers from the national security community will participate in order to explain the leadership challenges they faced in their careers. The subject matter will provide a vehicle for refining student leadership skills as part of their development as national security strategists.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

DSS 725 Seminar on Instruments of State Power

Instruments of state power encompass a broad range of tools--diplomatic, economic, intelligence, scientific and military--at the disposal of the state in the formulation and implementation of national security policy. Understanding the foundations, applications, and integration of these instruments is essential for the successful practitioner or scholar of security affairs. This seminar will focus on the individual instruments of U.S. power and their interrelationships in the conduct of foreign and defense policy. The class will employ case studies to assess the role of these instruments and the success and failure of their application.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

DSS 726 Chinese Military Power

This course focuses on the rising military power of China (its motivation and implications), Chinese objectives in Asia and their relationship to its military buildup, the impact of the Chinese military buildup on the military and deterrence requirements of the United States and our Asia Allies, the prospect and outcome of a military confrontation between China and Taiwan, including potential involvement of the United States and, in light of the potentially catastrophic consequences of a major war in the Far East, issues relating to the deterrence of

China. The focus of the course will be on relatively recent developments--1990 to the present because of the dramatic shift in Chinese military capabilities, doctrine and objectives during this period.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 727 Chemical and Biological Warfare: Global and Community Perspectives

This course will help the student develop a global perspective on factors that may lead to the development and deployment of weapons of mass destruction, specifically the chemical and biological warfare agents. The introduction will consist of a history of the use of chemical and biological warfare, both on the traditional and the asymmetric battle fields. The biology and toxicology of the agents will be presented at a basic level sufficient to understand the development of use of countermeasures. Community preparedness in the form of immunizations, prophylaxis, and facility hardening will be addressed, followed by presentations on community risk analysis, response planning and decontamination of personnel and facilities. Class discussions will include (1) the role different national agencies (DoD, Homeland Security, state governments, etc.) play in protecting the populace (2) the effectiveness of recent homeland security efforts toward protecting communities from the effects of chemical and biological warfare agents (3) and global developments in religion and politics which impact the potential use of chemical and biological warfare, including globalism and jihadism.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

DSS 728 Terrorism: Advanced Research Topics

Prerequisite: DSS 710 and permission of instructor.

An intense, research-based exploration of terrorism problems, patterns, and trends as these confront societies and governments in key regions of the globe, especially North America, Latin America, Western Europe and the Maghreb.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 737 Advanced Studies in Chemical and Biological Warfare

Prerequisite: DSS 727.

This course builds on elements of DSS 727, Chemical and Biological Warfare: Global and Community Perspectives. The purpose of the course is to allow the student an opportunity to delve more deeply into a specific aspect of the field that is of great interest to the student. Subjects that were covered in the earlier course that might be considered for in-depth review include decontamination, pertinent treaties and conventions, weapons monitoring, dangers presented by industrial chemicals, and historical analysis of the use of chemical/biological weapons. Additional topics that might be considered are the natural epidemiology of diseases like tularemia, plague or anthrax, or risk assessments for potential chemical/biological weapons used by specific nations or sub-national groups. Each student will choose a separate subject to explore.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 740 Ethics of Weapons of Mass Destruction

This seminar examines the wide-ranging moral issues associated with weapons of mass destruction (WMD). It highlights the key moral dilemmas associated with the decision to develop, acquire, maintain, employ, or dispose of WMD. It situates WMD moral discourse in the context of both standard ethical paradigms pertaining to the conduct of individuals in society as well as those paradigms associated with the regulation of violence in armed conflict, in both their theoretical and practical dimensions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 794 Active In Research

Students who have completed all course work and are only working on their research component may register for this course. The course is assessed a \$600 supplemental course fee and allows the following: access to the library including online services, access to computer services and Missouri State email, and scheduled meetings and access to DSS professors. Course is for zero credit hours and is graded "P" (pass) or "W" (student discontinues participation in the course and is dropped from the course).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
0	0	0	Fall, Spring, Summer

DSS 795 Seminar: CWMD Graduate Fellows Colloquium

Prerequisite: permission of instructor and active US security clearance.

This is the capstone course of the National Defense University (NDU) CWMD Fellowship Program. Its purpose is to provide (NDU) CWMD Fellows occasion to: interact with other CWMD Fellows at the classified level; reflect

upon and synthesize broad themes encountered in program course work; appreciate the complexities associated with DoD's CWMD challenges in an interagency context; and acquire unique professional tools that will facilitate their success as CWMD practitioners in the United States government.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

DSS 796 Directed Reading and Research in Defense and Strategic Studies

Prerequisite: permission of instructor.

Individually tailored directed readings or research for bibliographical purposes; for improvement of research skills; for the purposes of a broader background of knowledge (e.g., in areas not covered by seminars, such as classical writings on strategy, and on the art of warfare historically or in the American experience); for more depth in selected areas of specialization; and/or to help meet the non-thesis MS degree research requirement. May be repeated to a maximum of 9 hours toward degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-9			Fall, Spring, Summer

DSS 797 Special Topics

Special topics may be offered as specific important issues, which are not adequately covered by regular seminars, arise; when Distinguished Guest seminars and work-shops can be planned ahead of time; or when visiting faculty wish to offer specialized courses not in the curriculum. May be repeated to a maximum of 6 hours, as topics change.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-6			Upon demand

DSS 798 Seminar on Contemporary Defense Issues

This seminar will address important contemporary defense and international security issues and may be offered to develop areas of study that are insufficiently covered by regular seminars, or when distinguished guest faculty or speakers wish to offer a specialized seminar not provided by the curriculum. May be repeated to a maximum of 6 hours, as topics change.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

DSS 799 Thesis

Prerequisite: completion of DSS course requirements for MS degree (30 hours minimum).

Independent research and study connected with preparation of thesis. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Fall, Spring, Summer

DSS 801 Advanced Nuclear Strategy, Deterrence and Arms Control

It is always safer and cheaper to deter a war rather than to wage war. However, as a practitioner of strategy, one must understand the theory of deterrence before one can begin to apply a strategy of deterrence. Today's strategists are working in a dynamic and multipolar environment. They will need to devise various and flexible approaches of deterrence across the strategic spectrum; adapting to diverse opponents, threats, and milieus. This course explores deterrence theory, doctrine, strategy, and application across a spectrum of environments. It provides students with a practitioner's perspective of nuclear deterrence and cross-domain deterrence in the 21st century and enhances their knowledge of deterrence theory and application from the nation-state perspective. Finally, this course will expose students to [national] grand strategy development as well as deterrence theory methodology and application in various domains and environments to include nuclear deterrence, deterrence in space and cyberspace, and deterrence of rogue states and terrorist organizations. This course will explore these and other issues related to deterrence and national security in the 21st century. It is meant to present the complex topic of "deterrence theory." Students are encouraged to consider the spectrum of alternative points of view reviewed in the course material. The first block will introduce the basics of deterrence and the concept of nuclear deterrence. The second block will explore 21st century deterrence methods through the kaleidoscope of threats and environments to include nuclear, outer space, cyberspace, terrorism, conventional forces, and diplomacy. In the final block, students will apply 21st century deterrence theory by crafting and presenting a short opinion paper, gaming deterrence and escalation control strategy, and garnering the perspective of deterrence thinkers and doers. During this course, students will gain and demonstrate an understanding of: 1) the Ends-Ways-Means of nation-state deterrence strategy; 2) the characteristics and methods of deterrence across the operational spectrum; 3) the evolution of nuclear deterrence and the strategic triad; 4) the methods and potential impact of adversary deterrence, how deterrence can fail, and the consequences of deterrence failure.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

DSS 832 Advanced Survey and Writing in International Security Affairs

This is a required course for doctoral students. It is strongly recommended that doctoral students take DSS 832 during their first or second semester in the doctoral program. This course provides an overview of developments in the realm of international security since the end of the Cold War. It seeks to equip the students with an understanding of key issues in contemporary international security and enhance their ability to analyze these issues using various theoretical and empirical tools. It also seeks to strengthen student writing and briefing skills, with a particular focus on the particular style of professional writing and briefing most useful for students intending to advance their careers in government service or other professional positions in the field. This doctoral-level course will review key issues in contemporary international relations, including: the causes of war; the return of great power competition since the end of the Cold War; security issues in regional theaters, including Asia, Europe, the Middle East and South America; efforts to combat weapons of mass destruction, terrorism and proliferation; arms control, etc. Students will have an opportunity to practice and perfect their analytic and writing skills in these subject areas. In dedicated "Writing Skills Seminars," the writing instructor will review best practices and highlight skills that can help students to become more efficient and effective writers and briefers. These seminars will cover the most common formats and key components of written communications and briefings on national-security issues. The writing instructor also will offer 1:1 writing tutorials to each student, dedicated to improving early drafts of their course papers. A key goal of the writing and briefing portions of the course are to help students strengthen their writing and briefing skills prior to undertaking their Professional Doctoral Capstone Project.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

DSS 896 Doctoral Capstone Project: Advanced Tutorial Course on Deterrence Theory and Policy

This course is intended for doctoral students. It is an advanced tutorial that involves, reading, research and writing with a selected professor. The purpose of the course is to help guide and prepare the doctoral student throughout the process of the student's Professional Doctoral Capstone Project, from its beginning to the final presentation before the student's Doctoral Committee. This course is individually tailored by the doctoral student and a selected professor for this purpose. It is the responsibility of the student to request that a particular professor serve in this capacity; DSS will not select the professor for the student. The selected professor and student will agree on the specific national security issue to be addressed by the student, and they will work together to the completion of the Doctoral Capstone Project over the course of two semesters of DSS 896. The selected professor will serve as the Chairperson of the student's three-person Doctoral Committee. DSS 896 will be repeated twice, for a minimum and maximum of 6 hours credit toward meeting the doctoral degree requirements. It is strongly recommended that doctoral students take DSS 896 during the final two semesters of their doctoral program, and that the student request the participation of the professor during the prior semester.

Economics Courses

Economics (ECO) courses

ECO 101 Economics of Social Issues

Prerequisite: 12 hours.

General Education Course (Focus on Public Issues).

This course focuses on understanding and analyzing major contemporary social issues such as globalization, pollution, poverty, income distribution, taxes, social security, the appropriate role of government, etc. Students will be introduced to the basic tools of economics so that they can develop a general framework within which a variety of political, social and economic issues can be analyzed. Issues will be discussed from a national, regional and local perspective.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Upon demand	ECON 100 - Introduction to Economics.

[Access the CORE 42 portal](#)

ECO 155 Principles of Macroeconomics

General Education Course (Focus on Social and Behavioral Sciences).

This course prepares the student to understand the economic structure of the United States and its place in the world economy, to interpret common economic measures, to understand the processes of governmental fiscal

and monetary policies, and to evaluate individual decision-making from an economic perspective.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	ECON 101 - Introduction to Macroeconomics.

[Access the CORE 42 portal](#)

ECO 165 Principles of Microeconomics

General Education Course (Focus on Social and Behavioral Sciences).

Basic principles of economics with a particular emphasis on the nature and application of those bearing on decision making within a household, firm or industry; including consideration of problems respecting the composition and pricing of the national output, distribution of income, pricing and output of factors of production and foreign trade.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	ECON 102 - Introduction to Microeconomics.

[Access the CORE 42 portal](#)

ECO 300 Service Learning In Economics

Prerequisite: 30 hours, concurrent registration in an Economics course designated as a service learning offering.

This service component for an existing course incorporates community service with classroom instruction in Economics to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

ECO 302 Economic Analysis for Investors

Prerequisite: ECO 155 or ECO 165, and completion of mathematics general education requirement.

This course examines economic principles used by investors and financial reporters. Concepts are drawn from several fields of economics including microeconomics, macroeconomics, money and banking, labor economics, and international economics. Students will participate in a stock market game, make in-class presentations and conduct internet research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 304 Behavioral Economics

Prerequisite: ECO 165.

This course serves as an introduction to behavioral economics. Behavioral economics uses more psychological and biological foundations than traditional neoclassical economics. The course explains why individuals often systematically deviate from neoclassical predictions and utilizes alternative models that more accurately describe human behavior.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ECO 305 Money and Banking

Prerequisite: ECO 155.

Nature and functions of money, a survey of the operation and development of the banking system in the U.S.; introduction to monetary theory and policy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 310 Labor Economics

Prerequisite: ECO 155 and ECO 165.

Factors determining the market for labor; examination of the economic effects of trade unions; recent trends in the labor force and the labor share of national income.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 314 Game Theory

Prerequisite: ECO 165.

This course serves as an introduction to game theory, the study of strategy. The field has applications in economics, business, military strategy, political science, sports, biology, and poker. Possible topics include games vs. decisions, dominance, Nash equilibrium, and others.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 315 The Economics of Gender

Prerequisite: ECO 165.

This course teaches students to analyze the economic decisions made by both males and females in two main areas: the labor market and the household. Specific areas of inquiry include the following: the family as an economic unit, gender differences in labor force participation, occupational gender segregation, explanations for gender earnings differentials and efforts to reduce such differentials, gender earnings discrimination, and international gender issues. Identical with GST 315. Cannot receive credit for both ECO 315 and GST 315.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 316 Sports and Entertainment Economics

Prerequisite: ECO 165.

Microeconomic tools used to examine a wide variety of topics pertaining to the sports and entertainment industry such as monopoly and monopsony market structure, labor market issues including free agency and salary caps, and public policy concerns involving the impacts of sports and entertainment on the economy. Also includes an examination of the economics of various forms of media and entertainment including movies, cable, music, amusement parks, and casinos.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 320 American Economic History

Prerequisite: ECO 155 or ECO 165; HST 121 or HST 122.

An examination of economic conditions and policies in America's past. Selected events are analyzed using principles drawn from economic theory, including: U.S. economic development, the origins of antitrust policy, and the New Deal.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 345 Asian Economies

This course addresses the rise to significance of the Asia-Pacific region in the world economy. This region of the world is typified by a delicate balance between governments and business interests, which accounts for their diverse development trajectories. This course will study how these countries have transformed themselves from peasant societies into industrial powerhouses and how they have continued to achieve growth rates several times higher than the advanced nations of the West over a period of time.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 346 International Economic Development

Prerequisite: ECO 155 and ECO 165.

Theory of economic growth and development, with emphasis on developing economies and the techniques for understanding and promoting development.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 365 Intermediate Microeconomics

Prerequisite: ECO 165 and completion of mathematics general education requirement.

Maximizing behavior of households and firms; theory of price and output determination under various market structures; distribution theory; introduction to general equilibrium analysis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 385 Intermediate Macroeconomics

Prerequisite: ECO 155 and completion of mathematics general education requirement.

The study of macroeconomic theory and policy. Models are developed which provide a framework for the discussion of macroeconomic issues and the policy choices decision makers face.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ECO 396 Directed Readings in Economics

Prerequisite: QBA 237 or equivalent; and ECO 365 and ECO 385; and 75 hours.

Readings and written reports in the area of particular interest to the student with the consent and guidance of the instructor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

ECO 397 Studies in Economics

Specific subject matter will change from semester to semester, depending on the interests of professors and students. Variable content course. May be repeated to a maximum of 6 hours, as course topics change.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

ECO 399 Cooperative Education in Economics

Prerequisite: acceptance into the Cooperative Education Program, 12 hours of economics and permission of the department head.

To enable qualified students to apply theoretical constructs and analytical techniques in a supervised work environment. This course cannot be credited toward a major in economics if the student has completed a total of three or more credits in either ECO 396, or cooperative education in another discipline.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

ECO 409 Applied Econometrics

Prerequisite: QBA 237 or equivalent.

Students will learn simple regression and multiple regression analysis. Additional topics include model building, cross sectional and time series analysis, as well as related topics. Students will be required to engage in original research using the principles taught in the class and to write their research into a research paper. Public Affairs Capstone Experience course. May be taught concurrently with ECO 609. Cannot receive credit for both ECO 409 and ECO 609.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 425 Industrial Organization

Prerequisite: ECO 165 and completion of mathematics general education requirement.

Theory and public policy concerning the structure, conduct and performance of U.S. industries. Primary emphasis is on oligopolies and monopolies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 435 The Economic Analysis of Law

Prerequisite: ECO 165.

Microeconomic theory is used to analyze the law and legal procedures. Although one purpose of the law is to resolve disputes between individuals, this course will focus on analyzing the incentives that the law gives rational individuals. Economic models are applied to four basic areas of law: property, contract, tort (accident), and criminal law. In addition, economic models are applied to the formation of the law and to legal institutions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 450 Urban and Regional Economics

Prerequisite: ECO 165.

Study of economic forces determining the location of businesses and consumers, and the size, shape, and changes in market areas/cities/land use. Also, application of techniques of economic impact analysis to location decisions. May be taught concurrently with ECO 650. Cannot receive credit for both ECO 450 and ECO 650.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 456 Comparative Economic Systems

Prerequisite: ECO 155.

This course examines the differing institutions of national economies. Students examine economic systems in various countries, past and present. The focus is on strategies countries use to compete globally, promote economic growth and development, provide for the public good, and protect various national interests in an increasingly global environment. Students also examine the ongoing evolution economic systems around the world, especially with regard to balancing the roles played by markets and governments in the economy. May be taught concurrently with ECO 656. Cannot receive credit for both ECO 456 and ECO 656.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ECO 473 Mathematical Methods for Economics I

Prerequisite: ECO 155 and ECO 165.

Recommended Prerequisite: ECO 365; and MTH 261 or equivalent. Development and application of mathematical techniques to economics. May be taught concurrently with ECO 673. Cannot receive credit for both ECO 473 and ECO 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 475 Managerial Economics

Prerequisite: ECO 155 and ECO 165.

Application of economic analysis to decision making in business management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 492 Program Assessment

Prerequisite: permission.

Recommended Prerequisite: senior standing. Required assessment of undergraduate economics program. All students majoring in economics are required to enroll in this course during their senior year and complete the Test of Understanding of College Economics (TUCE), an assessment survey, and an exit interview. The focus is on program assessment and development rather than on individual student evaluation. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
0			Fall, Spring, Summer

ECO 504 Health Care Economics

Prerequisite: ECO 165.

A basic study of the economics of the health care market. Microeconomic theory is applied to the analysis of health care issues. Attention will be given to empirical studies of health care economics. Identical with HCM 504. Cannot receive credit for both ECO 504 and HCM 504. May be taught concurrently with ECO 604. Cannot receive credit for both ECO 604 and ECO 504.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 508 Intermediate Econometrics

Prerequisite: ECO 409.

Examination of the principles of economic model construction and the econometric techniques used in estimation of behavioral relationships. May be taught concurrently with ECO 611. Cannot receive credit for both ECO 508 and ECO 611.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 515 Public Sector Economics

Prerequisite: ECO 155, ECO 165, and completion of mathematics general education requirement.

Allocation and distribution functions of the public sector of the economy; theories of taxation and public expenditure; shifting and incidences of taxes, local-state federal finance. May be taught concurrently with ECO 615. Cannot receive credit for both ECO 615 and ECO 515.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 520 History of Economic Thought

Prerequisite: ECO 155 and ECO 165.

Development of economic theory. May be taught concurrently with ECO 620. Cannot receive credit for both ECO 620 and ECO 520.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 540 Economics of the Environment

Prerequisite: ECO 165.

The course applies economic concepts and analysis to environmental issues such as pollution and natural resource management. Economic concepts and analysis used in the course will include supply and demand, cost benefit analysis, and the role of incentives. May be taught concurrently with ECO 640. Cannot receive credit for both ECO 640 and ECO 540.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 565 International Economics

Prerequisite: ECO 155 and ECO 165.

Recommended Prerequisite: QBA 237 or equivalent. Introduction to the key concepts of international trade and finance with a focus on the fundamental theories of international economics. Topics include the gains from and the patterns of international trade, protectionism, exchange rate determination and government policy intervention. May be taught concurrently with ECO 665. Cannot receive credit for both ECO 665 and ECO 565.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ECO 585 Mathematical Methods for Economics II

Prerequisite: ECO 365 and ECO 473; and 60 hours (ECO 473 may be waived if familiarity with calculus-based optimization techniques can be established).

Unconstrained and constrained optimization; applications of the envelope theorem and duality to standard economic models, including utility maximization, profit maximization and expenditure/cost minimization. May be taught concurrently with ECO 685. Cannot receive credit for both ECO 685 and ECO 585.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 586 Business Cycles and Forecasting

Prerequisite: ECO 385.

Fluctuations in the level of economic activity; an examination of the basic principles and techniques of economic forecasting. May be taught concurrently with ECO 686. Cannot receive credit for both ECO 686 and ECO 586.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 590 Senior Research Seminar

Prerequisite: ECO 365 and ECO 385 and ECO 409; and 90 hours.

A seminar course requiring the completion of assignments which develop and refine economic research skills. A combination of papers and class presentations will be used to assess student achievement. May be taught concurrently with ECO 690. Cannot receive credit for both ECO 590 and ECO 690.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ECO 599 Directed Research in Economics

Prerequisite: ECO 365; and ECO 385 or ECO 610; and ECO 409.

The student is expected to conduct research in a selected topic in economics and to produce a written report. May be taught concurrently with ECO 699. Cannot receive credit for both ECO 699 and ECO 599.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

ECO 600 Fundamentals of Economics

Prerequisite: College of Business majors must receive permission from a director of a College of Business graduate program.

An accelerated course dealing with the fundamentals of micro- and macroeconomic theory, designed for graduate students who have not completed undergraduate principles of economics. This course will not be counted in the hours required for a College of Business graduate degree. May be taught concurrently with ECO 500. Cannot receive credit for both ECO 500 and ECO 600.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 604 Health Care Economics

Recommended Prerequisite: ECO 165. A basic study of the economics of the health care market. Microeconomic theory is applied to the analysis of health care issues. Attention will be given to empirical studies of health care economics. Identical with HCM 604. Cannot receive credit for both ECO 604 and HCM 604. May be taught concurrently with ECO 504. Cannot receive credit for both ECO 504 and ECO 604.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 609 Applied Econometrics

Prerequisite: QBA 600 or equivalent.

Students will learn simple regression and multiple regression analysis. Additional topics include model building, cross sectional and time series analysis, as well as related topics. Students will be required to engage in original research using the principles taught in the class and to write their research into a research paper. May be taught concurrently with ECO 409. Cannot receive credit for both ECO 609 and ECO 409.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 611 Intermediate Econometrics

Recommended Prerequisite: ECO 409. Examination of the principles of economic model construction and the econometric techniques used in estimation of behavioral relationships. May be taught concurrently with ECO 508. Cannot receive credit for both ECO 508 and ECO 611.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 615 Public Sector Economics

Recommended Prerequisite: ECO 155 and ECO 165; and completion of mathematics general education requirement. Allocation and distribution functions of the public sector of the economy; theories of taxation and public expenditure; shifting and incidences of taxes, local-state federal finance. May be taught concurrently with ECO 515. Cannot receive credit for both ECO 515 and ECO 615.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 620 History of Economic Thought

Recommended Prerequisite: ECO 155 and ECO 165. Development of economic theory. May be taught concurrently with ECO 520. Cannot receive credit for both ECO 520 and ECO 620.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 640 Economics of the Environment

Recommended Prerequisite: ECO 165. The course applies economic concepts and analysis to environmental issues such as pollution and natural resource management. Economic concepts and analysis used in the course will include supply and demand, cost benefit analysis, and the role of incentives. May be taught concurrently with ECO 540. Cannot receive credit for both ECO 540 and ECO 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 650 Urban and Regional Economics

Recommended Prerequisite: ECO 165 or ECO 600. Study of economic forces determining the location of businesses and consumers, and the size, shape, and changes in market areas/cities/land use. Also, application of techniques of economic impact analysis to location decisions. May be taught concurrently with ECO 450. Cannot receive credit for both ECO 450 and ECO 650.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 656 Comparative Economics Systems

Prerequisite: ECO 155.

This course examines the differing institutions of national economies. Students examine economic systems in various countries, past and present. The focus is on strategies countries use to compete globally, promote economic growth and development, provide for the public good, and protect various national interests in an increasingly global environment. Students also examine the ongoing evolution economic systems around the world, especially with regard to balancing the roles played by markets and governments in the economy. May be taught concurrently with ECO 456. Cannot receive credit for both ECO 456 and ECO 656.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ECO 665 International Economics

Recommended Prerequisite: QBA 237 or equivalent. Introduction to the key concepts of international trade and finance with a focus on the fundamental theories of international economics. Topics include the gains from and the patterns of international trade, protectionism, exchange rate determination and government policy intervention. May be taught concurrently with ECO 565. Cannot receive credit for both ECO 665 and ECO 565.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ECO 673 Mathematical Methods for Economics I

Prerequisite: ECO 155 and ECO 165.

Recommended Prerequisite: ECO 365; and MTH 261 or equivalent. Development and application of mathematical techniques to economics. May be taught concurrently with ECO 473. Cannot receive credit for both ECO 473 and ECO 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ECO 685 Mathematical Methods for Economics II

Recommended Prerequisite: ECO 365; and ECO 473 or familiarity with calculus-based optimization techniques. Unconstrained and constrained optimization; applications of the envelope theorem and duality to standard economic models, including utility maximization, profit maximization and expenditure/cost minimization. May be taught concurrently with ECO 585. Cannot receive credit for both ECO 585 and ECO 685.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 686 Business Cycles and Forecasting

Recommended Prerequisite: ECO 385. Fluctuations in the level of economic activity; an examination of the basic principles and techniques of economic forecasting. May be taught concurrently with ECO 586. Cannot receive credit for both ECO 586 and ECO 686.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 690 Seminar in Economics

Prerequisite: ECO 609 and ECO 710.

A seminar course requiring the completion of assignments which develop and refine economic research skills. A combination of papers and class presentations will be used to assess student achievement. Primarily for graduate students in their final year of study. May be taught concurrently with ECO 590. Cannot receive credit for both ECO 690 and ECO 590.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 699 Directed Research in Economics

Recommended Prerequisite: ECO 365; and ECO 385 or ECO 710; and ECO 409. The student is expected to conduct research in a selected topic in economics and to produce a written report. May be taught concurrently with ECO 599. Cannot receive credit for both ECO 599 and ECO 699.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

ECO 710 Micro- and Macroeconomic Analysis

Prerequisite: ECO 600 or equivalent.

An intermediate to advanced study of selected topics in microeconomic and macroeconomic analysis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ECO 721 International Political Economy

A general introduction to the politics of international economic relations, with a special emphasis on the extent, causes, and consequences of globalization. Covers such topics as trade, investment, aid, global warming, international institutions, and the political roots of economic development. Identical with PLS 721. Cannot receive credit for both ECO 721 and PLS 721.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ECO 730 Money and Credit Markets

Recommended Prerequisite: ECO 305. Role performed by the Federal Reserve System, financial intermediaries, non-financial businesses, the public, and the foreign sector in developing and maintaining money and credit flows.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

Major Requirements (30 hours):

Note: Three hours may double count toward General Education requirements.

1. [ECO 155\(3\)](#), [165\(3\)](#), [365\(3\)](#), [385\(3\)](#), [409\(3\)](#), [492\(0\)](#).
2. One of the following statistics courses: [AGR 330\(3\)](#), [MTH 340\(3\)](#), [PSY 200\(3\)](#), [QBA 237\(3\)](#), [REC 328\(3\)](#), or [SOC 302\(3\)](#).
3. 12 additional hours in Economics.
4. Public Affairs Capstone Experience will be fulfilled by completion of [ECO 409\(3\)](#).
5. Minor required (or second major).
6. [Specific Bachelor of Arts Degree Requirements](#)

University level requirements:

1. [General Education Program and Requirements](#)
 2. [General Baccalaureate Degree Requirements](#)
-

Economics (Non-Comprehensive) (BS)

Bachelor of Science

Major requirements (36 hours):

Note: Three hours may double count toward General Education requirements.

1. [ECO 155\(3\)](#), [165\(3\)](#), [365\(3\)](#), [385\(3\)](#), [409\(3\)](#), [492\(0\)](#).
2. One of the following statistics courses: [AGR 330\(3\)](#), [MTH 340\(3\)](#), [PSY 200\(3\)](#), [QBA 237\(3\)](#), [REC 328\(3\)](#), or [SOC 302\(3\)](#).
3. 18 additional hours in Economics.
4. Public Affairs Capstone Experience will be fulfilled by completion of [ECO 409\(3\)](#).
5. Minor required (or second major).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Economics (Comprehensive)

Bachelor of Science

Major requirements (54 hours):

Note: Three hours may double count toward General Education requirements.

1. [ECO 155\(3\)](#), [165\(3\)](#), [365\(3\)](#), [385\(3\)](#), [409\(3\)](#), [492\(0\)](#).
2. One of the following statistics courses: [AGR 330\(3\)](#), [MTH 340\(3\)](#), [PSY 200\(3\)](#), [QBA 237\(3\)](#), [REC 328\(3\)](#), or [SOC 302\(3\)](#).
3. 18 additional hours in Economics.
4. 18 hours in satisfaction of Plan A or B:
 - a. Plan A: Concentration of at least 18 hours in any discipline in which a major is offered
 - b. Plan B: Concentration of at least nine hours in each of two disciplines in which a major is offered
5. The 18 hour block in Plan A and each nine hour block in Plan B must satisfy the following additional restrictions:
 - a. The courses within a block must all have the same course code (prefix).
 - b. At least two thirds of the credit hours in each block must be from upper division courses.
 - c. Transfer credit may only be used if the relevant course has been determined to be equivalent to a specific MSU course (and not to an unspecified elective).
6. Public Affairs Capstone Experience will be fulfilled by completion of [ECO 409\(3\)](#).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

All majors wishing to pursue careers in either Business or Public Administration/Government, or wishing to pursue Graduate Study in Economics or attend Law School are encouraged (but not required) to choose electives from the following relevant set of courses:

- **Business Orientation Track.** Courses are: [ECO 305\(3\)](#), [310\(3\)](#), [425\(3\)](#), [450\(3\)](#), [475\(3\)](#), [565\(3\)](#); [ACC 201\(3\)](#); [BUS 135\(3\)](#); [FIN 380\(3\)](#); [LAW 231\(3\)](#); [MGT 286\(3\)](#), [MGT 320\(3\)](#) or [MGT 340\(3\)](#); [MKT 150\(3\)](#) or [MKT 350\(3\)](#)
- **Public Administration/Government Orientation Track.** Courses are: [ACC 201\(3\)](#); [ECO 310\(3\)](#), [425\(3\)](#), [450\(3\)](#), [504\(3\)](#), [515\(3\)](#), [540\(3\)](#); [PLN 371\(3\)](#), [PLS 255\(3\)](#), [PLS 573\(3\)](#), [PLS 576\(3\)](#)
- **Graduate School Orientation Track.** Courses are: [ECO 305\(3\)](#), [425\(3\)](#), [473\(3\)](#), [515\(3\)](#), [565\(3\)](#), [585\(3\)](#); [MTH 261\(5\)](#), [280\(5\)](#), [302\(3\)](#), [315\(3\)](#)
- **Law School Orientation Track.** Courses are: [ECO 425\(3\)](#), [435\(3\)](#), [473\(3\)](#), [515\(3\)](#), [540\(3\)](#), [565\(3\)](#); [ENG 310\(3\)](#); [HST 517\(3\)](#); [LAW 231\(3\)](#); [PHI 305\(3\)](#); [PLS 515\(3\)](#), [517\(3\)](#)

Minor(s)

Economics

Bachelor of Arts

Bachelor of Science

Bachelor of Science in Education (Non-Certifiable)

1. [ECO 155\(3\)](#), [165\(3\)](#).
2. Additional hours in economics to total at least 18 hours. One of the following statistics courses may be used toward this minor: [AGR 330\(3\)](#), [MTH 340\(3\)](#), [PSY 200\(3\)](#), [QBA 237\(3\)](#), [REC 328\(3\)](#), or [SOC 302\(3\)](#).

The Modern Global Economy Certificate

The Modern Global Economy

This certificate is designed for students who aspire to have careers—with government, business, or NGOs—related to the global economy. It is meant to give students a solid foundation in economic theory and provide skills for the economic analysis of major issues and policy challenges related to the global economy.

Program requirements (12 hours)

1. Two courses from: [ECO 346\(3\)](#), [456\(3\)](#), [565\(3\)](#).
2. Two additional courses from the following options to total 12 hours in the certificate:
 - a. Any international education abroad course listed or cross-listed with economics, typically [ECO 397](#).
 - b. One of the following General Education courses may count: [GRY 100\(3\)](#), [HST 104\(3\)](#), [REL 210\(3\)](#).
 - c. [MGT 447\(3\)](#), [PLS 232\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a grade of C or better in all courses used to fulfill the certificate requirements.

HST 121 Survey of the History of the United States to 1877

General Education Course (Focus on Constitutions of U.S.

and Missouri and American History and Institutions). MOTR number HIST 101 - American History I. Formation of the United States and its civilization from the Age of Discovery through the Reconstruction Era, with emphasis on the influence of the Frontier and the Native American, European and African heritages; the constitutional development of the federal government; the evolution of the nation's economic system, social fabric and diplomatic experiences.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HST 122 Survey of the History of the United States since 1877

General Education Course (Focus on Constitutions of U.S.

and Missouri and American History and Institutions). MOTR number HIST 102 - American History II. Modernization of the United States and its role in world affairs from the late 19th Century to the present, with emphasis on industrialization and urbanization and their impact on socioeconomic and international developments.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HST 210 Writing II: Historical Inquiry

Prerequisite: ENG 110 and 30 hours.

General Education Course (Focus on Written Communication and Integrative and Applied Learning).

Introduction to historical research and writing. Meets Writing II requirement for a major in history. This course emphasizes the techniques of conducting a thorough literature search, the analysis of primary and secondary materials, and instruction and practice in historical writing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HST 300 Service Learning in History

Prerequisite: 30 hours, concurrent registration in a History course designated as a service learning offering and permission of department head.

This service component for an existing course incorporates community service with classroom instruction in History to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

HST 312 History of American Baseball

Survey of the history of baseball in the United States from the early nineteenth century to the present. Focus is on the commercialization of the game, the development of labor-management relations, and the manner in which class, race, and gender have shaped participation in the sport.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 313 American Cultural History

An introduction to the major issues, themes and methods of American cultural history. This course will explore multiple vantage points and interdisciplinary approaches to understanding American cultural history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 314 American Expansion and Empire

Recommended Prerequisite: HST 121 or HST 122. This course surveys the territorial, economic, cultural, and political expansion of the United States from the founding of the country through the 20th century. Topics include the ideology, methods, and effects of expansion, with particular attention on the cultural interactions that resulted from expansion and the ways in which expansion affected American culture and Society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 315 Military History of the United States

Recommended Prerequisite: HST 121 or 122. American Military History from the colonial period to the present; its relation to the national development in war and peace.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HST 323 Women in Africa

Recommended Prerequisite: HST 103 or 104. This course will introduce students to women's participation in Africa's history and contemporary issues. The readings cover a broad geographical range of North, West, Central and Southern Africa. The course will include five topics: Women and the Family; Women, Politics, and Economics; Religious Women; Women in Colonial Rebellion; and Women and National Revolutions. Identical with AAS 323. Cannot receive credit for both HST 323 and AAS 323.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 324 Women in American History

A survey of the role of American women from the colonial era to the present. Topics include women's historical roles in work, family, politics, sexuality and culture.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 329 The Automobile in American Life

Recommended Prerequisite: HST 122. Examines the impact of the automobile on American society during the twentieth century. Topics include the manufacture, marketing and maintenance of automobiles, the transformation of rural and urban life, the decline of transit and the impact of the automobile on social life.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 330 Business and Society, Colonial Times to Present

Recommended Prerequisite: HST 121 or 122. The main focus of this course is the development of the firm and its relationship to the economic, social, and legal environment within which businesses have operated. Special emphasis is placed on how the firm shaped and was shaped by American society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 331 African American History I

Recommended Prerequisite: HST 121 or AAS 100. Survey of the experiences of Americans of African descent to 1865. Emphasis on African heritage; African-American contributions and institutions; slavery and quasi-freedom. Identical with AAS 331. Cannot receive credit for both HST 331 and AAS 331.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 332 African American History II

Recommended Prerequisite: HST 122 or AAS 100. Continuation of HST 331, 1865-present. Emphasis on the struggles for racial justice; protest organizations, philosophies and tactics. Identical with AAS 332. Cannot receive credit for both HST 332 and AAS 332.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 334 Conflict and Peace Building in Africa

Recommended Prerequisite: HST 103 or HST 104 or HST 121 or AAS 100. This course examines the historical roots, dimensions, and causes of conflict in Africa. Thematically organized to capture developments across the different regions in the continent, the course offers critical insights into the preponderance of conflict in Africa since the Cold War. In addition, the course explores the various ways through which Africans, its partners, and international organizations have fostered peace and conflict resolution in Africa over the years. Identical with AAS 334. Cannot receive credit for both HST 334 and AAS 334.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 335 African Civilization

Recommended Prerequisite: HST 103 or 104. Historical developments in Africa from antiquity to the present. Emphasis on south Saharan Africa for the period before European contact. Topics in modern nationalism and independence. Africa in the context of world history. Identical with AAS 335. Cannot receive credit for both HST 335 and AAS 335.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 338 Sources and Methods in African History

This course deals with knowledge generation, production, and dissemination about Africa and its peoples. It traces the origin, progress, and current state of scholarship on Africa and about Africans. It is about writing and understanding Africa and its history. It examines the kind of history that has been written about events in Africa. In other words, it is concerned with the study of and nature of history in Africa. Given this basic disposition, the course is a reflection on history in Africa as a discipline and the problems involved in the writing of African history globally. Identical with AAS 338. Cannot receive credit for both HST 338 and AAS 338.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 339 Africa and the Wider World

Recommended Prerequisite: HST 103 or HST 104 or HST 121 or AAS 100. This course traces the history of Africa from the slave trade to independence. The course is thematically organized to capture developments across the different regions in the continent; and offers critical insights into the place of Africa in world history, especially in relations to and with global developments. As a survey course, the course offers insights into the different regions, paying particular attention to cultural, economic and political changes. Identical with AAS 339. Cannot receive credit for both HST 339 and AAS 339.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 340 Industrialization in Global Perspective

Recommended Prerequisite: HST 122. This course looks at origins and spread of industrialization as a global phenomena beginning with the preindustrial wave of global expansion that began around 1450 and continuing up to the present. It blends broad synthetic treatments with detailed case studies to trace the development and spread of industrial technology across cultures. Although the perspective is global most of the geographic concentration is on Britain, the U.S., Japan, and more recently, China.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 343 Ancient Rome

Recommended Prerequisite: HST 103. Roman civilization to the downfall of the Empire. Broad social, economic, technological and cultural developments. The problems of the decline of ancient civilization.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 345 Enslavement in the Atlantic World

Recommended Prerequisite: HST 103 and HST 104; and HST 121 or AAS 100. This course examines various social, political, and economic developments of slave societies in the Americas (North, Central and South), the West Indies, and Africa from roughly the 1200s to the late-1800s with a primary focus upon the lives and roles played by people of the African Diaspora and their encounters with Europeans and Indigenous Americans. Identical with AAS 345. Cannot receive credit for both HST 345 and AAS 345.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 350 Latin American Civilization

Foundations of Ibero-American civilization including the Amer-Indian, Iberian and African background; Emphasis on the origins of institutions and problems which affect the region as a whole.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 351 History of Europe to 1650

This course explores the broad contours of European history from the first peopling of the continent to the seventeenth century with special emphasis on long-term political, social and economic developments.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 352 Crisis in the Late Middle Ages

Recommended Prerequisite: HST 103. This course covers the Great Famine, the arrival of the Black Death, conflicts between England and France during the Hundred Years War, and spiritual crises such as the Avignon Papacy and the Great Schism. It focuses on the ways in which moments of crisis could lead to a restructuring of the medieval world (e.g., the destabilization of the nobility, growth of social mobility for peasants and workers, and rapid technological innovation following the Black Death), and the ways in which large-scale changes were experienced by individual men and women living at the time.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 353 History of Europe in the 19th Century, 1815-1918

Recommended Prerequisite: HST 104. Forces unleashed by the French Revolution and other movements, including liberalism, reaction, nationalism, industrialization and imperialism. May be taught concurrently with HST 553. Cannot receive credit for both HST 353 and 553.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 354 History of Europe, 1715-Present

Prerequisite: HST 104.

This course surveys the major themes of European history from the 18th century to the present. Topics will include the Enlightenment, the French Revolution and the Napoleonic Empire, industrialization and its consequences, nationalism and imperialism during the "Long 19th Century" the "World Wars" of the 20th century, and the evolving social, political, and cultural dynamics of modern and contemporary Europe.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 355 Contemporary Europe: 1918 to the Present

Recommended Prerequisite: HST 104. Europe between the wars, the coming of World War II, European problems since 1945.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 356 Nazi Germany

Recommended Prerequisite: HST 104. This course has been envisioned as a multi-disciplinary course, dealing with the complex and often controversial aspects of Nazi rule. The course begins chronologically with the examination of the crisis in Weimar Democracy and the Nazi seizure of power. Then it discusses the transformation of German society under Nazi rule; the fate of youth organizations, schools, universities and churches; the impact of Nazism on popular and high cultures; Nazi social policy; war on racial and ethnic minorities and homosexuals. The third part deals with Nazi foreign policy; the Second World War; the genocide of Eastern Europeans; the Holocaust, and the collapse of the Third Reich. At the final meeting, students discuss the memory of the Third Reich.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 360 Britain, 55 B.C.-1688

Recommended Prerequisite: HST 103. Impact of European invasions on social structure, social cohesion and demography; feudalism and its decline; emergence of early modern England in Tudor and Stuart periods; Civil War and the Glorious Revolution.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 361 Britain, 1688-Present

Recommended Prerequisite: HST 103 or 104. Transition from pre-industrial to industrial society; tenacity of aristocratic power and influence; growth of the welfare state; economic and international decline.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 362 Modern Latin American History: From Independence to Present

This course is the second course in the Latin American Civilization sequence covering the history of Modern Latin American from the wars of independence in the early nineteenth century until the present. The class will explore the racial, class, and gender hierarchies that emerged out of the region's postcolonial past, and their impact on Latin American people's lives. The course will conclude with an examination of twenty-first-century Latin American cultural, political and social issues. Major themes and topics include democracy, dictatorship, revolution, religion, and the importance of race, class, and gender in the history of the region.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 364 History of Women in Latin America

This course assesses the continuities and changes in the lives of Latin American women through the lens of gender. The course themes will examine concepts that have structured Latin American beliefs about gender including honor and shame, and machismo and marianismo, and examine issues of gender relations, sexuality, and political involvement. This course will examine the history of women in Latin America from the colonial through the modern periods. Other topics will include how women participated in and were influenced by political, economic, and social change, and representations of women in art, music, literature, and recent films.

HST 369 Ancient Civilizations of the Mediterranean and Middle East

Recommended Prerequisite: HST 103. This course introduces students to the histories of the Ancient Near (aka Middle) East, Egypt, Greece, and Rome. It begins with the origins of civilization, and ends with the fall of the Roman Empire and the rise of Islam in the Middle East (c. 4,000 B.C.E. - 650 C.E.). It pays special attention to the diverse political systems of the ancient world, including divine kingship in ancient Egypt and the Near East, the Athenian democracy, the Roman Republic, and the emperors of the Roman Empire. Additionally, students will have the opportunity to learn about select social, cultural, and religious topics, such as the rise of monotheistic religions, the influence of particular artistic traditions, or the role of underrepresented groups (e.g. women, slaves) in the ancient world.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

HST 370 Religions, Cultures, and Empires of the Middle East and North Africa, 570 CE to 1798 CE

Recommended Prerequisite: HST 103 and/or HST 104. This course introduces students to the history of the Middle East and North Africa from the rise of Islam in the seventh century to the beginnings of European economic, military, and political penetration of the region in the late eighteenth century. The course pays special attention to the development of the Islamic tradition, rise and fall of various regional empires, and the social, cultural, and political transformations that took place over the course of this extended historical era.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 371 History of the Modern Middle East and North Africa, 1750 CE to 1991 CE

Recommended Prerequisite: HST 104. This course provides students with an overview of the broad social, economic, and political trends that have shaped the Middle East and North Africa from the end of the eighteenth century to the contemporary era. This course pays particular attention to the growing influence of Europe (and later the United States) on the Middle Eastern societies as well as the efforts engaged in by Middle Eastern governments and political organizations to adapt to a rapidly changing global order.

3	3	0	Upon demand

HST 375 The Ozarks in American History

Recommended Prerequisite: HST 121 or 122. The Ozarks as an historic American region. Historical geography of the Ozarks. The Old Ozarks Frontier; the Modern Ozarks; the Cosmopolitan Ozarks; the New Ozarks Frontier. Relation of the Ozarks to major themes in U.S. History.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 380 Premodern East Asia

A comparative historical treatment of the countries of East Asia--China, Japan, and Korea--from earliest times to 1600.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HST 381 Modern East Asia

A comparative historical treatment of the countries of East Asia--China, Japan, and Korea--from 1600 to the present.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 382 Asia Pacific War

How did a seventeen year old Indonesian perceive the Japanese occupation? How did that experience differ from a Thai college student? This course will investigate the societies of occupied East and Southeast Asia from 1931-1945 from the perspective of those who experienced it directly. Memoirs, oral histories, visual material, and military reports will be used to understand the perceptions, motivations, and mentalities that drove collective and individual action, and situate that action within the framework of violence. Students will gain a deeper understanding of the cultures involved in the Asia Pacific War, and develop critical skills through analysis of specific issues in class discussion, written exercises and essays. Major course themes: the nature of violence; engaging opposing perspectives in debates about major issues; understanding prevailing theses about those debates.

HST 383 A Global History of the Inquisition, 1478-1834: The Holy Office in Europe, Asia, and the Americas

This course closely examines the history of the Spanish and Portuguese Inquisitions from their establishment in the last fifteenth/early sixteenth centuries to their abolition in the early nineteenth century. The Inquisition was set up in both Spain and Portugal to systematically hunt down heretics and eradicate from Catholic society any form of heretical beliefs. The various groups persecuted by the inquisitorial tribunals in Spain and Portugal's world empires included, amongst others, crypto-Jews, crypto-Muslims, Protestants, bigamists, homosexuals, dissenting intellectuals and witches. This course will examine the actual historical institutions behind the modern myths of the Spanish and Portuguese Inquisitions; their organization, their modus operandi and their evolution during their more than three centuries of existence both in the Iberian Peninsula and in the Spanish and Portuguese World empires. Topics covered include the history of the Inquisition in Spain and the Spanish Americas, including the existence of the Spanish Inquisition in the early colonial Latin American territories as well as its spread into the colonial North American territories of the Florida, Texas, Louisiana, Arkansas, Missouri, New Mexico and the Californias; the topics will also include an examination of the history of the Inquisition in Spain and Portugal's Asian colonies such as the Philippines, India (Goa) and China (Macao).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 384 History of Piracy in the Americas, 1492-1820

This course examines the history of piracy in the Americas from the point of European contact to the early nineteenth century, a period historians roughly designate as the "early modern." The early modern period was an age marked by new ideas in science, medicine, and religion, by advances in shipbuilding, mining, and artillery manufacture, but also a time of endemic religious conflicts, expansive empires, and wars. In terms of overseas trade and conquest, Spain and Portugal were at the forefront throughout much of this period, and their successes in the Americas and elsewhere led their northern neighbors, particularly the French, English, and Dutch, to cast covetous eyes upon slow-moving, inbound treasure ships. These predators and the prey they seized upon are the primary subject of this course. The course will cover the social history of pirate bands as well as the history of the Transatlantic Treasure fleets and the Spanish Empire's defensive networks. A final examination of the course will focus on the long term consequences, economic and otherwise, that piracy entailed for its mostly Spanish victims.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Summer

HST 388 The Second World War

Prerequisite: HST 104.

This course examines the causes, the major events, and the consequences of the Second World War from a global perspective, meaning that both the European and Asian/Pacific theaters will be covered. Although the significant military campaigns and battles of the war are addressed, this is not intended to be a military history course. Rather, the emphasis will be on the Second World War as the transformative event of the 20th century politically, culturally, socially, economically, and morally, addressing: the ideological agenda of the "Axis Powers" before and during the war; the significance of the home front in the context of "total war"; propaganda and the role of media; human rights and war crimes; and the evolving ways in which the war has been remembered and represented the war in the U.S., Europe, and Asia since 1945.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 390 Introduction to Historiography

Prerequisite: 9 hours of history.

The study of the philosophy, methods, and practice of history as a field of scholarly inquiry. Students are also required to take the Major Field Achievement Test.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 392 European History Primary Source Seminar

Prerequisite: HST 210.

This is a variable content, writing-intensive seminar in European history. Students will be introduced to methods of primary source analysis and historical writing and prepare a seminar paper based on primary sources on a focused topic in European history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 393 United States History Primary Source Seminar

Prerequisite: HST 210.

This is a variable content, writing-intensive seminar in United States history. Students will be introduced to methods of primary source analysis and historical writing and prepare a seminar paper based on primary sources on a focused topic in United States history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 394 World History Primary Source Seminar

Prerequisite: HST 210.

This is a variable content, writing-intensive seminar in world history. Students will be introduced to methods of primary source analysis and historical writing and prepare a seminar paper based on primary sources on a focused topic in world history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 395 Spanish Conquest and Colonization in the Americas, 1492-1700

This course is intended to introduce students to several topics relating to the conquest and colonization of the region now known as Latin America. These topics and the historical literature surrounding them are essential in understanding the development of both colonial Latin America and the history of the colonial United States. The topics will include examinations of the conquest and colonization of each region of Latin America (from the U.S. Southwest, Mexico, the Andean Region, and lesser known frontiers). Within each topic or section of the course, we will begin with a selection of some of the modern secondary historical literature on the subject, and then we will consider the actual primary documents and sources upon which these histories were written.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 397 Special Topics in History

Recommended Prerequisite: 3 hours of history. A variable content, variable credit course. Specific subject matter will change from term to term, depending upon the interests of professor and student. May be repeated, as topics change, to a maximum of 6 credit hours. Variable content course.

3	3	0	Upon demand

HST 516 American Religious History

Prerequisite: 50 hours.

Impact of religious thought and religious leaders on the history of the United States. May be taught concurrently with HST 616. Cannot receive credit for both HST 516 and HST 616.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 517 Legal and Constitutional History of the United States

Prerequisite: 50 hours.

The origins of American constitutionalism, The Philadelphia Convention, the historical context of the changes in the law, in the Constitution, and in the courts since 1789, and the development of the law profession and legal education. May be taught concurrently with HST 617. Cannot receive credit for both HST 617 and HST 517.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 518 Colonial America

Prerequisite: 50 hours.

Character, development and modification of the English Empire in North America. May be taught concurrently with HST 618. Cannot receive credit for both HST 618 and HST 518.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 519 The American Revolution

Prerequisite: 50 hours.

Origins of the Revolution, War of Independence, and the society, government, and economy of the Revolutionary and Confederation eras. May be taught concurrently with HST 619. Cannot receive credit for both HST 619 and HST 519.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 521 Early American Republic

Prerequisite: 50 hours.

Study of America, 1780s-1840s. Topics will include the development of constitutional government and federalism, mix of republican ideology and capitalism, causes and results of the War of 1812, first and second political party systems, social reform, and economic development. May be taught concurrently with HST 621. Cannot receive credit for both HST 621 and HST 521.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 523 Nineteenth Century America

Prerequisite: 50 hours.

Emphasis upon how the ideas and values that constituted the original meaning of America (namely, the republicanism of the American Revolution) were transformed in response to the Commercial and Industrial Revolutions of nineteenth century America, producing two major crises of the century: the Civil War and Populist Revolt. Included is the transition of the United States from an agrarian society of economically and politically independent farmers to a depersonalized industrial nation of largely dependent salaried employees and wage earners. May be taught concurrently with HST 623. Cannot receive credit for both HST 623 and HST 523.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 524 Civil War and Reconstruction

Prerequisite: 50 hours.

The sectional conflict, the Civil War, and Reconstruction examined from political, military, social, and economic perspectives, with emphasis on differing historical interpretations of the causes of the war, the South's defeat, and the limits of Reconstruction. May be taught concurrently with HST 624. Cannot receive credit for both HST 624 and HST 524.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 525 Gilded Age/Progressive Era America, 1865-1920

Prerequisite: 50 hours.

Political, economic, social and intellectual development of the United States from the end of the Civil War through World War I and its aftermath. May be taught concurrently with HST 625. Cannot receive credit for both HST 625 and HST 525.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 528 U.S. History Since 1945

Prerequisite: 50 hours.

The Cold War, politics from Truman through the Reagan presidency; the social conflict of the 1960s; the civil rights movement; the Great Society; Vietnam; and the Reagan revolution. May be taught concurrently with HST 628. Cannot receive credit for both HST 628 and HST 528.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 529 Plagues and Pandemics

Prerequisite: 50 hours.

This is a history of disease, especially epidemic disease, in western and world history. The first half of the course looks at disease from ancient times to the last half of the 19th century. The second half concentrates on the period from about 1890 to the present. The focus in the first half is on how people understood disease and how this shaped treatments. The second half focuses on the fundamental changes to disease pools brought about by

the creation of thick global networks, increasing urbanization, and dramatic population increases. In terms of treatment, the focus will shift toward the development of germ theory, public health, and scientific medicine. May be taught concurrently with HST 629. Cannot receive credit for both HST 529 and HST 629.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 531 African American Leaders and Movements

Prerequisite: 50 hours.

Study of African American leaders and movements in the United States, with emphasis on the period since World War II. Identical with AAS 531. Cannot receive credit for both HST 531 and AAS 531. May be taught concurrently with HST 631. Cannot receive credit for both HST 631 and HST 531.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 532 History of Ancient Egypt

Recommended Prerequisite: HST 103. History of ancient Egypt from its unification in approximately 3200 BCE through 500 CE. Foundation of this course is the political history of ancient Egypt, but special attention is paid to particular social history topics, such as the origins of monotheism during the Amarna Period, interactions with the outside world (especially with the ancient Near East, Nubia, and Classical Greece and Rome) and varied topics relating to daily life (e.g. early medicine and science, education, personal piety). A particular emphasis is placed on primary sources in translation and archaeological evidence. May be taught concurrently with HST 632. Cannot receive credit for both HST 532 and HST 632.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 536 History of Missouri

Prerequisite: 50 hours.

Economic, social, political and constitutional history of the state; role played by Missouri in national affairs. May be taught concurrently with HST 636. Cannot receive credit for both HST 636 and HST 536.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 537 History of the American West

Prerequisite: 50 hours.

Westward movement in America as history and myth; influence of the West on American society and character. May be taught concurrently with HST 637. Cannot receive credit for both HST 637 and HST 537.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 538 History of the American South, 1607-Present

Prerequisite: 50 hours.

Development of the South's social, economic and intellectual distinctiveness, with an emphasis on slavery, the plantation system, sectional conflict, modernization, Populism, disfranchisement, segregation, Dixie Demagogues and the Civil Rights Movement. May be taught concurrently with HST 638. Cannot receive credit for both HST 638 and HST 538.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 541 The Ancient Near East to 1200 BCE

Prerequisite: 50 hours.

Sumerians, Babylonians, Egyptians and Hittites; special reference to Hebrew scripture. Interrelationships among ancient civilizations; readings from original sources in English translation. May be taught concurrently with HST 641. Cannot receive credit for both HST 641 and HST 541.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HST 542 Ancient Israel

Prerequisite: 50 hours.

History of Israel to the end of the Persian period with special reference to the Canaanites, Mycenaeans, Philistines, Phoenicians, Assyrians, Chaldeans, and Persians. May be taught concurrently with HST 642. Cannot receive credit for both HST 642 and HST 542.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 543 History of the Arab-Israeli Conflict

Prerequisite: 50 hours.

The Arab-Israeli conflict in its historical and contemporary terms. The course covers three periods: The first period examines the roots of Arab and Jewish historical/biblical claims to Palestine before 1939. The second period from 1939 to 1982 analyzes the causes and effects of the Arab-Israeli wars. The third period from 1982 to 1991 covers the Israeli invasion of Lebanon, the Palestinian uprising (Intifada), and the peace process. May be taught concurrently with HST 643. Cannot receive credit for both HST 643 and HST 543.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 544 Women in Islam

Prerequisite: 50 hours.

This course examines the complexities of Middle Eastern culture through the lens of gender, focusing on women in Islamic society. Course will examine and critique current scholarly and journalistic literature (largely by Muslim women), films and documentaries, and current events in order to better understand current social, political, and economic developments in the Middle East. Special emphasis is on Egypt and Iran, which have enjoyed the lion's share of academic and legal attention. While the focus is on the modern Middle East, coverage also includes a historical review of scriptural roots and socio-political structures from the Middle Ages until today. The course has been designed as a quasi-seminar, where students meet in round-table fashion and discuss together readings that have been prepared in advance, in combination with lecture. May be taught concurrently with HST 644. Cannot receive credit for both HST 544 and HST 644.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 545 Medieval Europe

Prerequisite: 50 hours.

Recommended Prerequisite: HST 103. History of Medieval France, Germany, and the Papacy from the 5th Century to the 16th Century. May be taught concurrently with HST 645. Cannot receive credit for both HST 545 and HST 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HST 548 The Renaissance

Prerequisite: 50 hours.

Recommended Prerequisite: HST 103. Europe from about 1320 to about 1550, in the transition period from Medieval civilization to Modern Civilization; history of ideas and culture. May be taught concurrently with HST 648. Cannot receive credit for both HST 648 and HST 548.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 549 The Reformation

Prerequisite: 50 hours.

Early modern period of European history, 1500-1648. Religious controversy, religious wars, growth of the secular state. May be taught concurrently with HST 649. Cannot receive credit for both HST 649 and HST 549.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 551 The French Revolution and the Napoleonic Era

Prerequisite: 50 hours.

Causes and phases of the Revolution in France; the expansion of the Revolution; rise and downfall of Napoleon. May be taught concurrently with HST 651. Cannot receive credit for both HST 651 and HST 551.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 553 History of Europe in the 19th Century, 1815-1918

Prerequisite: 50 hours.

Forces unleashed by the French Revolution and other movements, including liberalism, reaction, nationalism, industrialization, and imperialism. May be taught concurrently with HST 353. Cannot receive credit for both HST 353 and 553. May be taught concurrently with HST 653. Cannot receive credit for both HST 653 and HST 553.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 555 Europe in the 20th Century

Prerequisite: 50 hours.

History of Europe from the First World War. Topics will include the persistence of war and violence in contemporary European history, the evolution of the state and economy during eras of crisis and growth, and the transformation of European society and culture across the 20th century. May be taught concurrently with HST 655. Cannot receive credit for both HST 555 and HST 655.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 559 Germany, 1815-Present

Prerequisite: 50 hours.

The unification process, the German Empire, Weimar Republic, Third Reich, Germany as a European Great Power. May be taught concurrently with HST 659. Cannot receive credit for both HST 659 and HST 559.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 562 Communism in Eastern Europe, 1917-1990

Prerequisite: 50 hours.

This course examines the emergence, development and demise of communist regimes in Eastern Europe. Conceived as a multi-disciplinary class, the course will look at a wide range of topics including, but not limited to, the creation of the police state, economic and social developments and the position of intellectuals, women and young people in communist societies, the "velvet revolutions" and the collapse of the system in the late 1980s.

Special emphasis will be placed on culture, including literature and film as vehicles of protest against oppression.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 563 History of Fascism

Prerequisite: 50 hours.

This course deals mainly with interwar fascist movements and regimes in Europe and examines such relevant questions as the intellectual origins of fascism; paramilitary violence after WWI; charismatic leadership; state terrorism; fascist art and propaganda; social policy; imperialism and war and genocide. It also examines the history of Right radical, fascist and post-fascist movement and regimes in Europe, Latin America (Argentina, Chile, Brazil and Peru), United States, South Africa, the Middle East (Egypt, Syria and Iraq) and Africa (Ghana, Nigeria, Congo, Uganda) after 1945. May be taught concurrently with HST 663. Cannot receive credit for both HST 563 and HST 663.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 564 History of the Holocaust

Prerequisite: 50 hours.

Envisioned as a multi-disciplinary class, this course examines the complex history of the Holocaust during the Second World War. It discusses such important topics as the life of Jewish communities in Germany and Eastern Europe before 1933; Jewish emancipation; the rise of political anti-Semitism; Hitler and the creation of the Third Reich; discrimination against racial outsiders and "asocials"; the life of Jews in Nazi Germany; the "twisted road to Auschwitz"; the historical debates on the origins of the genocide; the social and psychological make-up of the perpetrators; the role of bystanders both in Germany and other parts of Europe; Jewish resistance and finally the memory of the Holocaust in Germany, Israel, United States and Eastern Europe. May be taught concurrently with HST 664. Cannot receive credit for both HST 564 and HST 664.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 566 Victorian and Edwardian England

Prerequisite: 50 hours.

This course will examine the impact of industrialization; wealth, poverty and the rise of class; reform movements; origins of the welfare state; emergence of the Labour party, and the slow eclipse of aristocratic power and influence. May be taught concurrently with HST 666. Cannot receive credit for both HST 666 and HST 566.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 571 China in the Twentieth Century

Prerequisite: 50 hours.

An intensive study of the transformation of China from a Confucian, Feudal state to a Communist world power. May be taught concurrently with HST 671. Cannot receive credit for both HST 671 and HST 571.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 572 Gender and Sexuality in Modern East Asia

This course explores the formation, institutionalization, and ongoing negotiation of gendered discourses and practices in China, Japan, and Korea from the late imperial period until the present. Drawing on a range of sources, including literature, images, and films, students will analyze the ways in which changing conceptions of gender and sexuality have informed the legal system, medicine, political movements, and economic formations in East Asia, among others. May be taught concurrently with HST 672. Cannot receive credit for both HST 572 and HST 672.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 573 History and Archaeology of the Middle East

Recommended Prerequisite: HST 103. Archaeology as a tool for historical inquiry is the focus of this course. In this course students will become familiar with the problems and methods of the discipline as they related to the larger questions of Middle Eastern history, including migration and settlement, the impact of war, land use and ecological issues, religion and identity, transformations of the traditional Middle Eastern household, and the relations between local society and the state. Topics covered in lectures and students' projects include the use of textual sources, palaeography, and other methodological challenges; historic preservation and heritage management; legal issues and the politics of archaeology; and museum work. Case studies in the course chronologically range from ancient to Ottoman-era sites, but the focus of the course is the medieval era (Byzantine, Crusader, Islamic). A series of lectures, hands-on work with the Jordan study collection, and

documentaries will expose the student to the wide range of disciplines pulled into the service of archaeology and different methodologies. Special emphasis is placed on current fieldwork at Tall Hisban in Jordan and the Northern Jordan Project. Enrollment in this course is strongly encouraged for students interested in joining the Jordan Archaeology Field School as an Education Abroad opportunity in the summers. May be taught concurrently with HST 673. Cannot receive credit for both HST 573 and HST 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 574 Jordan Archaeology Education Abroad

Prerequisite: permission of instructor.

Recommended Prerequisite: HST 103 and HST 573. This course is a formal archaeological field school--with field, lab, and classroom components--held on-site in Jordan as an Education Abroad opportunity in the summers. The field school provides hands-on training in archaeological excavation and post-season object analysis techniques; students will also participate in several projects related to site presentation, architectural preservation, and community outreach that are running concurrently with the project. The field school rotates between the Tall Hisban excavations and the Northern Jordan Project (NJP), held at each site in alternative summers. Excursions to sites of archaeological, historical, religious, and cultural interest are organized on weekends. Students attending the field school are strongly encouraged to take HST 573 beforehand. The program, depending on the research objectives that year, will run 3-6 weeks. May be taught concurrently with HST 674. Cannot receive credit for both HST 574 and HST 674.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Summer

HST 587 Mexico from Colony to Nation

Prerequisite: 50 hours.

Mexican history from the colonial period to the Revolution of 1910. May be taught concurrently with HST 682. Cannot receive credit for both HST 682 and HST 587.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 588 Twentieth-Century Mexico

Prerequisite: 50 hours.

Mexico from the Revolution of 1910 to the present, emphasizing Mexico's influence upon the Cuban Nicaraguan and other revolutions; its role as a member of the Middle American Community and of Latin America at large. May be taught concurrently with HST 688. Cannot receive credit for both HST 688 and HST 588.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 597 Topics in History

Prerequisite: 50 hours.

The topics studied will change from term to term depending on the interests of professors and students. May be repeated as topics change. Variable content course. May be taught concurrently with HST 697. Cannot receive credit for both HST 697 and HST 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

HST 598 Senior Seminar in History

Prerequisite: HST 390; and Writing II or concurrent enrollment; and 90 hours.

Concentrated study of a sharply focused topic and the preparation of a bachelor's paper based on primary research. Course content varies each semester. Required for the BA in History. This course is strongly recommended for anyone considering graduate school. Graduating seniors are given enrollment priority. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 599 Internship in Public History

Prerequisite: 60 hours and permission of the department head and host institution.

Supervised and approved work in a public or private agency which manages a museum, archive, or historic sites. One credit hour is awarded for each 40 hours of service. May be repeated for credit but only 3 hours may be counted towards the BA, BSEd, or MA major in History. May be taught concurrently with HST 698. Cannot receive credit for both HST 698 and HST 599.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

HST 609 Indian History

History of Indian/White relations, federal Indian policy, and Indian accommodation to European introductions and eventual American dominance from the beginning of contact with Europeans to the present. May be taught concurrently with HST 509. Cannot receive credit for both HST 509 and HST 609.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HST 611 The Plains Indians

History and culture of Plains Indians from the pre-Columbian period to the end of the frontier era near the turn of the last century, including the impact of the European invasion. May be taught concurrently with HST 510. Cannot receive credit for both HST 510 and HST 611.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 614 17th-19th Century British Atlantic

Study of the British Empire in the 17th-19th century Atlantic World. Topics will include the Enlightenment; mercantilism and free-trade economics; migration, including the American Revolution Loyalist diaspora; the rise and fall of privateering, the Sugar Interest, and the Atlantic slave trade; slavery abolition and post-emancipation society in the West Indies; and Canadian confederation and home rule. May be taught concurrently with HST 514. Cannot receive credit for both HST 614 and HST 514.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 615 American Environmental History

Survey of humankind's relationship with nature and the environment in what is now the United States from pre-Columbian times to the present. Will especially focus on the impact of American development on the

environment, the impact of the environment on the development of the United States, and the significance of the many different ideas and images concerning nature and the environment throughout American history. May be taught concurrently with HST 515. Cannot receive credit for both HST 515 and HST 615.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 616 American Religious History

Impact of religious thought and religious leaders on the history of the United States. May be taught concurrently with HST 516. Cannot receive credit for both HST 516 and HST 616.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 617 Legal and Constitutional History of the United States

The origins of American constitutionalism, The Philadelphia Convention, the historical context of the changes in the law, in the Constitution, and in the courts since 1789, and the development of the law profession and legal education. May be taught concurrently with HST 517. Cannot receive credit for both HST 517 and HST 617.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 618 Colonial America

Character, development and modification of the English Empire in North America. May be taught concurrently with HST 518. Cannot receive credit for both HST 518 and HST 618.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 619 The American Revolution

Origins of the Revolution, War of Independence, and the society, government, and economy of the Revolutionary and Confederation eras. May be taught concurrently with HST 519. Cannot receive credit for both HST 519 and

HST 619.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 621 Early American Republic

Study of America, 1780s-1840s. Topics will include the development of constitutional government and federalism, mix of republican ideology and capitalism, causes and results of the War of 1812, first and second political party systems, social reform, and economic development. May be taught concurrently with HST 521. Cannot receive credit for both HST 521 and HST 621.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 623 Nineteenth Century America

Emphasis upon how the ideas and values that constituted the original meaning of America (namely, the republicanism of the American Revolution) were transformed in response to the Commercial and Industrial Revolutions of nineteenth century America, producing two major crises of the century: the Civil War and Populist Revolt. Included is the transition of the United States from an agrarian society of economically and politically independent farmers to a depersonalized industrial nation of largely dependent salaried employees and wage earners. May be taught concurrently with HST 523. Cannot receive credit for both HST 523 and HST 623.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 624 Civil War and Reconstruction

The sectional conflict, the Civil War, and Reconstruction examined from political, military, social, and economic perspectives, with emphasis on differing historical interpretations of the causes of the war, the South's defeat, and the limits of Reconstruction. May be taught concurrently with HST 524. Cannot receive credit for both HST 524 and HST 624.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 625 Gilded Age/Progressive Era America, 1865-1920

Political, economic, social and intellectual development of the United States from the end of the Civil War through World War I and its aftermath. May be taught concurrently with HST 525. Cannot receive credit for both HST 525 and HST 625.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 628 U.S. History Since 1945

The Cold War, politics from Truman through the Reagan presidency; the social conflict of the 1960s; the civil rights movement; the Great Society; Vietnam; and the Reagan revolution. May be taught concurrently with HST 528. Cannot receive credit for both HST 528 and HST 628.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 629 Plagues and Pandemics

This is a history of disease, especially epidemic disease, in western and world history. The first half of the course looks at disease from ancient times to the last half of the 19th century. The second half concentrates on the period from about 1890 to the present. The focus in the first half is on how people understood disease and how this shaped treatments. The second half focuses on the fundamental changes to disease pools brought about by the creation of thick global networks, increasing urbanization, and dramatic population increases. In terms of treatment, the focus will shift toward the development of germ theory, public health, and scientific medicine. May be taught concurrently with HST 529. Cannot receive credit for both HST 629 and HST 529.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 631 African American Leaders and Movements

Study of African American leaders and movements in the United States, with emphasis on the period since World War II. May be taught concurrently with HST 531. Cannot receive credit for both HST 531 and HST 631.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 632 History of Ancient Egypt

History of ancient Egypt from its unification in approximately 3200 BCE through 500 CE. Foundation of this course is the political history of ancient Egypt, but special attention is paid to particular social history topics, such as the origins of monotheism during the Amarna Period, interactions with the outside world (especially with the ancient Near East, Nubia, and Classical Greece and Rome) and varied topics relating to daily life (e.g. early medicine and science, education, personal piety). A particular emphasis is placed on primary sources in translation and archaeological evidence. May be taught concurrently with HST 532. Cannot receive credit for both HST 632 and HST 532.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 636 History of Missouri

Economic, social, political and constitutional history of the state; role played by Missouri in national affairs. May be taught concurrently with HST 536. Cannot receive credit for both HST 536 and HST 636.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 637 History of the American West

Westward movement in America as history and myth; influence of the West on American society and character. May be taught concurrently with HST 537. Cannot receive credit for both HST 537 and HST 637.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 638 History of the American South, 1607-Present

Development of the South's social, economic and intellectual distinctiveness, with an emphasis on slavery, the plantation system, sectional conflict, modernization, Populism, disfranchisement, segregation, Dixie Demagogues and the Civil Rights Movement. May be taught concurrently with HST 538. Cannot receive credit for both HST 538 and HST 638.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 641 The Ancient Near East to 1200 BCE

Sumerians, Babylonians, Egyptians and Hittites; special reference to Hebrew scripture. Interrelationships among ancient civilizations; readings from original sources in English translation. May be taught concurrently with HST 541. Cannot receive credit for both HST 541 and HST 641.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HST 642 Ancient Israel

History of Israel to the end of the Persian period with special reference to the Canaanites, Mycenaeans, Philistines, Phoenicians, Assyrians, Chaldeans, and Persians. May be taught concurrently with HST 542. Cannot receive credit for both HST 542 and HST 642.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 643 History of the Arab-Israeli Conflict

The Arab-Israeli conflict in its historical and contemporary terms. The course covers three periods: The first period examines the roots of Arab and Jewish historical/biblical claims to Palestine before 1939. The second period from 1939 to 1982 analyzes the causes and effects of the Arab-Israeli wars. The third period from 1982 to 1991 covers the Israeli invasion of Lebanon, the Palestinian uprising (Intifada), and the peace process. May be taught concurrently with HST 543. Cannot receive credit for both HST 543 and HST 643.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 644 Women in Islam

This course examines the complexities of Middle Eastern culture through the lens of gender, focusing on women in Islamic society. Course will examine and critique current scholarly and journalistic literature (largely by Muslim women), films and documentaries, and current events in order to better understand current social, political, and economic developments in the Middle East. Special emphasis is on Egypt and Iran, which have enjoyed the lion's share of academic and legal attention. While the focus is on the modern Middle East, coverage also includes a historical review of scriptural roots and socio-political structures from the Middle Ages until today. The course has been designed as a quasi-seminar, where students meet in round-table fashion and discuss together readings that have been prepared in advance, in combination with lecture. May be taught concurrently with HST 544. Cannot receive credit for both HST 644 and HST 544.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 645 Medieval Europe

History of Medieval France, Germany, and the Papacy from the 5th Century to the 16th Century. May be taught concurrently with HST 545. Cannot receive credit for both HST 545 and HST 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HST 648 The Renaissance

Europe from about 1320 to about 1550, in the transition period from Medieval civilization to Modern Civilization; history of ideas and culture. May be taught concurrently with HST 548. Cannot receive credit for both HST 548 and HST 648.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 649 The Reformation

Early modern period of European history, 1500-1648. Religious controversy, religious wars, growth of the secular state. May be taught concurrently with HST 549. Cannot receive credit for both HST 549 and HST 649.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 651 The French Revolution and the Napoleonic Era

Causes and phases of the Revolution in France; the expansion of the Revolution; rise and downfall of Napoleon. May be taught concurrently with HST 551. Cannot receive credit for both HST 551 and HST 651.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 653 History of Europe in the 19th Century, 1815-1918

Forces unleashed by the French Revolution and other movements, including liberalism, reaction, nationalism, industrialization, and imperialism. May be taught concurrently with HST 553. Cannot receive credit for both HST 553 and HST 653.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 655 Europe in the 20th Century

History of Europe from the First World War. Topics will include the persistence of war and violence in contemporary European history, the evolution of the state and economy during eras of crisis and growth, and the transformation of European society and culture across the 20th century. May be taught concurrently with HST 555. Cannot receive credit for both HST 655 and HST 555.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 659 Germany, 1815-Present

The unification process, the German Empire, Weimar Republic, Third Reich, Germany as a European Great Power. May be taught concurrently with HST 559. Cannot receive credit for both HST 559 and HST 659.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 663 History of Fascism

This course deals mainly with interwar fascist movements and regimes in Europe and examines such relevant questions as the intellectual origins of fascism; paramilitary violence after WWI; charismatic leadership; state terrorism; fascist art and propaganda; social policy; imperialism and war and genocide. It also examines the history of Right radical, fascist and post-fascist movement and regimes in Europe, Latin America (Argentina, Chile, Brazil and Peru), United States, South Africa, the Middle East (Egypt, Syria and Iraq) and Africa (Ghana, Nigeria, Congo, Uganda) after 1945. May be taught concurrently with HST 563. Cannot receive credit for both HST 663 and HST 563.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 664 History of the Holocaust

Envisioned as a multi-disciplinary class, this course examines the complex history of the Holocaust during the Second World War. It discusses such important topics as the life of Jewish communities in Germany and Eastern Europe before 1933; Jewish emancipation; the rise of political anti-Semitism; Hitler and the creation of the Third Reich; discrimination against racial outsiders and "asocials"; the life of Jews in Nazi Germany; the "twisted road to Auschwitz"; the historical debates on the origins of the genocide; the social and psychological make-up of the perpetrators; the role of bystanders both in Germany and other parts of Europe; Jewish resistance and finally the memory of the Holocaust in Germany, Israel, United States and Eastern Europe. May be taught concurrently with HST 564. Cannot receive credit for both HST 664 and HST 564.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 666 Victorian and Edwardian England

This course will examine the impact of industrialization; wealth, poverty and the rise of class; reform movements; origins of the welfare state; emergence of the Labour party, and the slow eclipse of aristocratic power and influence. May be taught concurrently with HST 566. Cannot receive credit for both HST 566 and HST 666.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 671 China in the Twentieth Century

An intensive study of the transformation of China from a Confucian, Feudal state to a Communist world power. May be taught concurrently with HST 571. Cannot receive credit for both HST 571 and HST 671.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 672 Gender and Sexuality in Modern East Asia

This course explores the formation, institutionalization, and ongoing negotiation of gendered discourses and practices in China, Japan, and Korea from the late imperial period until the present. Drawing on a range of sources, including literature, images, and films, students will analyze the ways in which changing conceptions of gender and sexuality have informed the legal system, medicine, political movements, and economic formations in East Asia, among others. May be taught concurrently with HST 572. Cannot receive credit for both HST 672 and HST 572.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 673 History and Archaeology of the Middle East

Archaeology as a tool for historical inquiry is the focus of this course. In this course students will become familiar with the problems and methods of the discipline as they related to the larger questions of Middle Eastern history, including migration and settlement, the impact of war, land use and ecological issues, religion and identity, transformations of the traditional Middle Eastern household, and the relations between local society and the state. Topics covered in lectures and students' projects include the use of textual sources, palaeography, and other methodological challenges; historic preservation and heritage management; legal issues and the politics of archaeology; and museum work. Case studies in the course chronologically range from ancient to Ottoman-era sites, but the focus of the course is the medieval era (Byzantine, Crusader, Islamic). A series of lectures, hands-on work with the Jordan study collection, and documentaries will expose the student to the wide range of disciplines pulled into the service of archaeology and different methodologies. Special emphasis is placed on current fieldwork at Tall Hisban in Jordan and the Northern Jordan Project. Enrollment in this course is strongly encouraged for students interested in joining the Jordan Archaeology Field School as an Education Abroad opportunity in the summers. HST 682 Mexico from Colony to Nation

Mexican history from the colonial period to the Revolution of 1910. May be taught concurrently with HST 587. Cannot receive credit for both HST 587 and HST 682.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 688 Twentieth-Century Mexico

Mexico from the Revolution of 1910 to the present, emphasizing Mexico's influence upon the Cuban Nicaraguan and other revolutions; its role as a member of the Middle American Community and of Latin America at large. May be taught concurrently with HST 588. Cannot receive credit for both HST 588 and HST 688.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 697 Topics in History

The topics studied will change from term to term depending on the interests of professors and students. May be repeated as topics change. Variable Content Course. May be taught concurrently with HST 597. Cannot receive credit for both HST 597 and HST 697.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

HST 698 Internship in Public History

Prerequisite: permission of department head.

Supervised and approved work in a public or private agency which manages a museum, archive, or historic sites. One credit hour is awarded for each 40 hours of service. May be repeated for credit but only 3 hours may be counted towards the MA major in History. May be taught concurrently with HST 599. Cannot receive credit for both HST 599 and HST 698.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

HST 701 Historiography and Historical Method

Various philosophies of history and theories concerning method, purpose and meaning of history; problems of research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HST 702 Secondary School Curriculum for the Social Studies

Foundation course in the development and organization of the secondary school curriculum with an emphasis toward issues within social studies curriculum. This course meets the MSED degree requirements for social studies or history majors only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 710 Ancient History Research Seminar

Prerequisite: HST 701.

A seminar in ancient history, providing a study in depth of a chosen topic as well as the historiography of the topic for the graduate student. May be repeated once for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 720 American History Readings Seminar

Recommended Prerequisite: HST 701. Readings in chosen periods and topics in American History for the graduate student. May be repeated once for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 724 American Empire Readings Seminar

Recommended Prerequisite: HST 701. This readings course introduces the graduate student to the history of American Empire, examining the ideological, political, economic, and social aspects of American expansion from colonial times to the present. The course also explores how diverse groups participated in and reacted to expansion, including the roles of race, gender, class, and religion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 725 The Upland South Readings Seminar

Recommended Prerequisite: HST 701. Readings in the history of the Upland South (the Ozarks and Appalachia) for the graduate student.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 730 American History Research Seminar

Prerequisite: HST 701.

In-depth study of a chosen topic as well as the historiography of the topic for graduate students.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 740 European History Readings Seminar

Recommended Prerequisite: HST 701. Readings in chosen periods and topics in European history for the graduate student. May be repeated once for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 750 European History Research Seminar

Prerequisite: HST 701.

In-depth study of a chosen topic as well as the historiography of the topic for the graduate student. May be repeated for credit with department consent.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 760 Latin American History Readings Seminar

Recommended Prerequisite: HST 701. Readings in chosen periods and topics in Iberian and Latin American history for the graduate student. May be repeated once for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 770 Ancient History Readings Seminar

Recommended Prerequisite: HST 701. Readings in chosen periods and topics in Ancient history for graduate student. May be repeated once for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 775 Middle East History Readings Seminar

Recommended Prerequisite: HST 701. This proseminar in the Middle East introduces students to the historiography of the medieval Middle East (defined as the Arab heartland, Persia, and Anatolia), familiarizing them with the range of primary and secondary sources available for study, methodological approaches to using them, and the most important debates in modern scholarship generated by them. Through seminar discussions and debates based on intensive reading, students learn and practice historical method, tailored to this field. Among the topics covered in this course are the nature (and pitfalls) of medieval Arabic texts; how archives are

created; the development of medieval Islamic historiography by contemporary Muslim and modern historians; the problematic of medieval political theory in the Arab, Persian, and Turkish worlds; the development of classical Islamic institutions; alternative state forms and how they developed; the impact of developments in the Middle East for world history; and the transition in this region to the modern era.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 780 World History Research Seminar

Prerequisite: HST 701.

In-depth study, in African, East Asian, Latin American, or Middle Eastern history, of a chosen topic as well as the historiography of the topic for the graduate student. May be repeated up to 6 hours for credit with departmental consent.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HST 783 Women's History Primary Source Seminar

Recommended Prerequisite: HST 701. Students will study seminal primary and secondary sources relating to women's history, discussing and analyzing their content, origins, and context in order to understand their application to the research, writing, and teaching of history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 784 The American Revolution Primary Source Seminar

Recommended Prerequisite: HST 701. Students will study seminal primary and secondary sources relating to the American Revolution, discussing and analyzing their content, origins, and context in order to understand their application to the research, writing, and teaching of history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 785 The Civil War in Missouri Primary Source Seminar

Recommended Prerequisite: HST 701. Students will study seminal primary and secondary sources relating to the Civil War in Missouri, discussing and analyzing their content, origins, and context in order to understand their application to the research, writing, and teaching of history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 786 American Social History Primary Source Seminar

Recommended Prerequisite: HST 701. Students will study seminal primary and secondary sources relating to American social history, discussing and analyzing their content, origins, and context in order to understand their application to the research, writing, and teaching of history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 787 American Education Primary Source Seminar

Recommended Prerequisite: HST 701. Students will study seminal primary and secondary sources relating to American education, discussing and analyzing their content, origins, and context in order to understand their application to the research, writing, and teaching of history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 790 World History Readings Seminar

Recommended Prerequisite: HST 701. Readings in chosen periods and topics in world history, comparative history, or a study involving at least two global areas such as diaspora studies. May be repeated up to 9 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 792 World History Primary Source Seminar

Recommended Prerequisite: HST 701. Students will study seminal primary and secondary sources related to world history, discussing and analyzing their content, origins, and context in order to understand their application to the research, writing and teaching of history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HST 796 Readings in History

Prerequisite: permission of supervising professor and permission of department head.

Arranged program of readings for the individual student directed by a professor of the graduate faculty. May be repeated once for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

HST 799 Thesis

Prerequisite: permission of Director of History Graduate Program.

Independent research and study connected with preparation of thesis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Bachelor of Arts

Major requirements (39 hours):

Note: Six hours may double count toward General Education requirements.

1. Core requirements (18 hours):
 - a. [HST 121\(3\)](#) and [122\(3\)](#).
 - b. One course from: [HST 392\(3\)](#), [393\(3\)](#), [394\(3\)](#).
 - c. [HST 210\(3\)](#), [390\(3\)](#), [598\(3\)](#).
2. Six hours from two of the following areas:
 - a. Africa: [HST 323\(3\)](#), [334\(3\)](#), [335\(3\)](#), [338\(3\)](#), [339\(3\)](#), [532\(3\)](#).
 - b. Asia: [HST 380\(3\)](#), [381\(3\)](#), [382\(3\)](#), [571\(3\)](#).
 - c. Latin America: [HST 350\(3\)](#), [383\(3\)](#), [384\(3\)](#), [395\(3\)](#), [587\(3\)](#), [588\(3\)](#).
 - d. Middle East: [HST 370\(3\)](#), [371\(3\)](#), [541\(3\)](#), [542\(3\)](#), [543\(3\)](#), [573\(3\)](#), [574\(3\)](#).
 - e. Interregional and cross-regional: [HST 340\(3\)](#), [345\(3\)](#), [369\(3\)](#), [383\(3\)](#), [384\(3\)](#), [395\(3\)](#), [504\(3\)](#), [514\(3\)](#), [529\(3\)](#), [541\(3\)](#), [563\(3\)](#).
3. Three hours in European history: [HST 343\(3\)](#), [351\(3\)](#), [352\(3\)](#), [353\(3\)](#), [355\(3\)](#), [356\(3\)](#), [360\(3\)](#), [361\(3\)](#), [545\(3\)](#), [548\(3\)](#), [549\(3\)](#), [559\(3\)](#), [562\(3\)](#), [566\(3\)](#).
4. Three hours in United States history: [HST 312\(3\)](#), [313\(3\)](#), [314\(3\)](#), [315\(3\)](#), [324\(3\)](#), [329\(3\)](#), [331\(3\)](#), [332\(3\)](#), [375\(3\)](#), [509\(3\)](#), [517\(3\)](#), [518\(3\)](#), [519\(3\)](#), [521\(3\)](#), [523\(3\)](#), [524\(3\)](#), [525\(3\)](#), [528\(3\)](#), [531\(3\)](#), [536\(3\)](#), [537\(3\)](#), [538\(3\)](#).
5. Nine additional hours of upper division history courses: [HST 312\(3\)](#), [313\(3\)](#), [314\(3\)](#), [315\(3\)](#), [323\(3\)](#), [324\(3\)](#), [329\(3\)](#), [331\(3\)](#), [332\(3\)](#), [334\(3\)](#), [335\(3\)](#), [338\(3\)](#), [339\(3\)](#), [340\(3\)](#), [343\(3\)](#), [345\(3\)](#), [350\(3\)](#), [351\(3\)](#), [352\(3\)](#), [353\(3\)](#), [355\(3\)](#), [356\(3\)](#), [360\(3\)](#), [361\(3\)](#), [369\(3\)](#), [370\(3\)](#), [371\(3\)](#), [375\(3\)](#), [380\(3\)](#), [381\(3\)](#), [382\(3\)](#), [383\(3\)](#), [384\(3\)](#), [395\(3\)](#), [397\(3\)](#), [496\(3\)](#), [504\(3\)](#), [509\(3\)](#), [514\(3\)](#), [517\(3\)](#), [518\(3\)](#), [519\(3\)](#), [521\(3\)](#), [523\(3\)](#), [524\(3\)](#), [525\(3\)](#), [528\(3\)](#), [529\(3\)](#),

[531\(3\)](#), [532\(3\)](#), [536\(3\)](#), [537\(3\)](#), [538\(3\)](#), [541\(3\)](#), [542\(3\)](#), [543\(3\)](#), [545\(3\)](#), [548\(3\)](#), [549\(3\)](#), [559\(3\)](#), [562\(3\)](#), [563\(3\)](#),
[564\(3\)](#), [566\(3\)](#), [571\(3\)](#), [573\(3\)](#), [574\(3\)](#), [587\(3\)](#), [588\(3\)](#), [597\(3\)](#), [599\(3\)](#).

6. Of courses in numbered items 2, 3, 4, and 5 above:
- At least two must be pre-modern history courses: [HST 313\(3\)](#), [315\(3\)](#), [323\(3\)](#), [324\(3\)](#), [331\(3\)](#), [335\(3\)](#), [338\(3\)](#), [340\(3\)](#), [343\(3\)](#), [345\(3\)](#), [350\(3\)](#), [351\(3\)](#), [352\(3\)](#), [360\(3\)](#), [369\(3\)](#), [370\(3\)](#), [380\(3\)](#), [383\(3\)](#), [384\(3\)](#), [395\(3\)](#), [509\(3\)](#), [514\(3\)](#), [517\(3\)](#), [518\(3\)](#), [532\(3\)](#), [538\(3\)](#), [541\(3\)](#), [542\(3\)](#), [545\(3\)](#), [548\(3\)](#), [549\(3\)](#), [573\(3\)](#), [574\(3\)](#), [587\(3\)](#).
 - At least two must be modern history courses: [HST 312\(3\)](#), [313\(3\)](#), [314\(3\)](#), [315\(3\)](#), [323\(3\)](#), [324\(3\)](#), [329\(3\)](#), [331\(3\)](#), [332\(3\)](#), [334\(3\)](#), [335\(3\)](#), [338\(3\)](#), [339\(3\)](#), [340\(3\)](#), [350\(3\)](#), [353\(3\)](#), [355\(3\)](#), [356\(3\)](#), [361\(3\)](#), [370\(3\)](#), [371\(3\)](#), [375\(3\)](#), [381\(3\)](#), [382\(3\)](#), [383\(3\)](#), [384\(3\)](#), [395\(3\)](#), [504\(3\)](#), [509\(3\)](#), [514\(3\)](#), [517\(3\)](#), [519\(3\)](#), [521\(3\)](#), [523\(3\)](#), [524\(3\)](#), [525\(3\)](#), [528\(3\)](#), [531\(3\)](#), [536\(3\)](#), [537\(3\)](#), [538\(3\)](#), [543\(3\)](#), [559\(3\)](#), [562\(3\)](#), [563\(3\)](#), [564\(3\)](#), [566\(3\)](#), [571\(3\)](#), [587\(3\)](#), [588\(3\)](#).
 - At least one must be a 500 level American History course: [HST 510\(3\)](#), [514\(3\)](#), [517\(3\)](#), [518\(3\)](#), [519\(3\)](#), [521\(3\)](#), [523\(3\)](#), [524\(3\)](#), [525\(3\)](#), [528\(3\)](#), [531\(3\)](#), [536\(3\)](#), [537\(3\)](#), [538\(3\)](#).
 - At least one must be a 500 level World History course: [HST 504\(3\)](#), [529\(3\)](#), [532\(3\)](#), [541\(3\)](#), [542\(3\)](#), [543\(3\)](#), [545\(3\)](#), [548\(3\)](#), [549\(3\)](#), [551\(3\)](#), [553\(3\)](#), [559\(3\)](#), [562\(3\)](#), [563\(3\)](#), [566\(3\)](#), [571\(3\)](#), [573\(3\)](#), [574\(3\)](#), [587\(3\)](#), [588\(3\)](#).
7. Public Affairs Capstone Experience will be fulfilled by completion of [HST 598\(3\)](#).
8. Minor required (or second major).

 Bachelor of Science
 Bachelor of Social Work

1. [HST 103\(3\)](#) or [104\(3\)](#); [HST 121\(3\)](#) or [122\(3\)](#).
2. One of the following: [HST 323\(3\)](#), [335\(3\)](#), [350\(3\)](#), [370\(3\)](#), [371\(3\)](#), [380\(3\)](#), [381\(3\)](#), [541\(3\)](#), [542\(3\)](#), [543\(3\)](#), [544\(3\)](#), [571\(3\)](#), [573\(3\)](#), [574\(3\)](#), [587\(3\)](#).
3. Nine additional hours in history to total at least 18 hours.

History

Bachelor of Science in Education (Non-Certifiable)

1. [HST 103\(3\)](#) or [104\(3\)](#).
2. [HST 121\(3\)](#) or [122\(3\)](#).
3. One survey course in African, Asian, Latin American or Middle East civilization: [HST 323\(3\)](#), [335\(3\)](#), [350\(3\)](#), [370\(3\)](#), [371\(3\)](#), [380\(3\)](#), [381\(3\)](#).
4. One course in U.S. History: [HST 313\(3\)](#), [314\(3\)](#), [315\(3\)](#), [324\(3\)](#), [329\(3\)](#), [330\(3\)](#), [331\(3\)](#), [332\(3\)](#), [340\(3\)](#), [345\(3\)](#), [375\(3\)](#), [509\(3\)](#), [510\(3\)](#), [515\(3\)](#), [516\(3\)](#), [517\(3\)](#), [518\(3\)](#), [519\(3\)](#), [521\(3\)](#), [523\(3\)](#), [524\(3\)](#), [525\(3\)](#), [528\(3\)](#), [531\(3\)](#), [536\(3\)](#), [537\(3\)](#), [538\(3\)](#).
5. One course in Ancient or European History: [HST 340\(3\)](#), [343\(3\)](#), [353\(3\)](#), [355\(3\)](#), [356\(3\)](#), [360\(3\)](#), [361\(3\)](#), [369\(3\)](#), [541\(3\)](#), [542\(3\)](#), [545\(3\)](#), [548\(3\)](#), [549\(3\)](#), [551\(3\)](#), [553\(3\)](#), [559\(3\)](#), [562\(3\)](#), [563\(3\)](#), [564\(3\)](#), [566\(3\)](#).
6. Three hours of HST elective at the 200 level or above.
7. Two of the following: [ANT 100\(3\)](#), [PLS 101\(3\)](#), [ECO 155\(3\)](#), [GRY 100\(3\)](#), [SOC 150\(3\)](#).
8. Three hours of courses at the 200 level or above in one of the following areas: ANT, PLS, ECO, GRY, SOC.

Accelerated graduate Program in History

Eligible Missouri State undergraduate students may apply for admission to the History program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of nine hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-history.htm) (<https://graduate.missouristate.edu/Catalog/prog-history.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

History Education

Major(s)

History

Bachelor of Science in Education (Certifiable grades 9-12)

Major requirements (57 hours):

Note: 21 hours may double count toward General Education requirements.

1. [HST 103\(3\)](#), [104\(3\)](#), [121\(3\)](#), [122\(3\)](#), [390\(3\)](#).
2. Six hours in African, Asian, Latin American and/or Middle East civilization: [HST 323\(3\)](#), [334\(3\)](#), [335\(3\)](#), [338\(3\)](#), [339\(3\)](#), [350\(3\)](#), [370\(3\)](#), [371\(3\)](#), [380\(3\)](#), [381\(3\)](#), [382\(3\)](#), [532\(3\)](#), [542\(3\)](#), [543\(3\)](#), [571\(3\)](#), [573\(3\)](#), [574\(3\)](#), [587\(3\)](#), [588\(3\)](#), and variable topics courses when they cover one of these regions.
3. Six hours in U.S. History: [HST 312\(3\)](#), [313\(3\)](#), [314\(3\)](#), [315\(3\)](#), [324\(3\)](#), [329\(3\)](#), [331\(3\)](#), [332\(3\)](#), [340\(3\)](#), [375\(3\)](#), [509\(3\)](#), [517\(3\)](#), [518\(3\)](#), [519\(3\)](#), [521\(3\)](#), [523\(3\)](#), [524\(3\)](#), [525\(3\)](#), [528\(3\)](#), [531\(3\)](#), [536\(3\)](#), [537\(3\)](#), [538\(3\)](#), and variable topics courses when they cover U.S. history.
4. Three hours in European history: [HST 343\(3\)](#), [351\(3\)](#), [352\(3\)](#), [353\(3\)](#), [355\(3\)](#), [356\(3\)](#), [360\(3\)](#), [361\(3\)](#), [545\(3\)](#), [548\(3\)](#), [549\(3\)](#), [559\(3\)](#), [562\(3\)](#), [564\(3\)](#), [566\(3\)](#), and variable topics courses when they cover European history.
5. Three hours in World Interregional and Cross-Regional: [HST 340\(3\)](#), [344\(3\)](#), [345\(3\)](#), [369\(3\)](#), [383\(3\)](#), [384\(3\)](#), [395\(3\)](#), [504\(3\)](#), [514\(3\)](#), [529\(3\)](#), [541\(3\)](#), [563\(3\)](#), and variable topics courses when they cover a related field.
6. Of courses in numbered items 2, 3, 4, and 5 above, at least two must be at the 500 level: [HST 504\(3\)](#), [509\(3\)](#), [514\(3\)](#), [517\(3\)](#), [518\(3\)](#), [519\(3\)](#), [521\(3\)](#), [523\(3\)](#), [524\(3\)](#), [525\(3\)](#), [528\(3\)](#), [529\(3\)](#), [531\(3\)](#), [532\(3\)](#), [536\(3\)](#), [537\(3\)](#), [538\(3\)](#), [541\(3\)](#), [542\(3\)](#), [543\(3\)](#), [545\(3\)](#), [548\(3\)](#), [549\(3\)](#), [559\(3\)](#), [562\(3\)](#), [563\(3\)](#), [564\(3\)](#), [566\(3\)](#), [571\(3\)](#), [573\(3\)](#), [574\(3\)](#), [587\(3\)](#), [588\(3\)](#).
7. In addition, a major in history to be certifiable must complete [ANT100\(3\)](#), [ECO 155\(3\)](#), [GRY 100\(3\)](#), [SOC 150\(3\)](#), [PSY 121\(3\)](#), [PLS 101\(3\)](#), and either [PLS 205\(3\)](#) or [PLS 232\(3\)](#).

8. Three additional hours from: [ANT](#), [ECO](#), [GRY](#), [PLS](#), [PSY](#), [REL 100\(3\)](#), [131\(3\)](#), [210\(3\)](#), [390\(3\)](#); and [SOC](#). Note: PSY 380, 385, or 390 cannot be used toward this requirement.
9. Public Affairs Capstone Experience will be fulfilled by completion of [HST 418\(4\)](#).
10. Attain at least a 3.00 combined GPA (Missouri State and transfer) in the social science area (major field of study) which includes all courses listed above.

Professional Education Requirements (39 hours):

Note: A grade of "C" or better in each course is required for state certification.

1. Teaching methods and supervised teaching (16 hours): [HST 418\(4\)](#), [422\(10\)](#), [423\(2\)](#).
2. Additional [Professional Education Required Core and Competencies](#) (23 hours).
3. Satisfy History program requirement of a minimum major GPA of 2.75 and a combined GPA (Missouri State and transfer) of 2.75 as a part of admission to teacher education.
4. Satisfy History program requirement of a minimum major GPA of 3.00 and a combined GPA (Missouri State and transfer) of 2.75 as a part of approval for supervised teaching.
5. This program also requires compliance with the [Teacher Education Program](#) requirements for eligibility to enroll in Professional Education courses; admission to and continuance in the Teacher Education Program; approval for supervised teaching; and recommendation for certification which includes following GPA requirements. All GPA requirements include both Missouri State and transfer grades.
 - a. at least a 2.75 GPA on all course work attempted at all colleges attended.
 - b. at least a 3.00 GPA in the certificate subject area (major field of study) which includes all courses listed under major requirements.
 - c. at least a 3.00 GPA in any additional certificate subject area.
 - d. at least a 3.00 GPA in the professional education courses which includes all courses in number 1 and 2; and no grade lower than a "C" in all professional education courses.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Accelerated graduate Program in History

Eligible Missouri State undergraduate students may apply for admission to the History program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of nine hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-history.htm) (<https://graduate.missouristate.edu/Catalog/prog-history.htm>) for specific admission requirements.

General information

Since 1952 the Military Science program (Army ROTC) has prepared college men and women for commissions as Second Lieutenants in the United States Army, the Army National Guard, and the Army Reserves. The ROTC program is divided into two elective courses; the Basic Course and the Advanced Course. Basic Course classes are open to all students. They each provide academic credit hours and may fulfill elective credit in any program. Students who enroll in Basic Course classes receive leadership, management, and confidence-building instruction which will be of great value in any career field they enter. Enrollment in the Advanced Course classes is restricted to students who meet departmental criteria and who willingly accept a commission as an Army officer with a military service obligation. Military Science Courses

Military Science (MIL) courses

MIL 101 Introduction to Military Science

This course focuses on Army organization, customs and courtesies, leadership and basic pistol and rifle marksmanship. Students will get the opportunity to handle, learn the maintenance and proper way to fire, both civilian and U.S. Army small arms weapons as well as spend one-two weeks learning Army rappelling techniques

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

MIL 102 Introduction to Basic Military Skills

This course builds on the foundational skills and techniques taught in MIL 101; military map reading and land navigation, pistol marksmanship, rappelling and additional leadership skills.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

MIL 125 Leadership Fitness

Prerequisite: permission of the instructor.

Development of individual fitness and acquire the skills necessary to lead group fitness training. May be repeated for a total of 3 hours, but only one credit hour may be used to satisfy the Physical Well-Being requirement in General Education for students completing general education requirements in effect prior to fall 1997.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	3	Upon demand

MIL 211 Basic Military Skills and Techniques

Prerequisite: MIL 101 and MIL 102 or permission.

This course is designed for students who desire accelerated instruction on rifle marksmanship, rappelling, communications, map reading (to include the compass), patrolling and tactics. The student will be required to attend a laboratory on Thursdays if a contracted cadet. Students who are contracted are required to meet Army appearance standards.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	1	Fall

MIL 212 Military Fundamentals Practicum

Prerequisite: permission.

The class is designed for the military science students who desire accelerated instruction on rifle marksmanship, communications, map reading (to include the compass), and patrolling. The student will be required to wear a military uniform and meet Army appearance standards.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	1	Spring

MIL 220 Basic Military Science Fundamentals

Prerequisite: permission.

Organization and mission of ROTC; the role of the U.S. Army in American history and the application of the principles of war; leadership theory and practice; introduction to military operations and basic tactics; instruction in marksmanship, land navigation and communication.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2-5			Summer

MIL 225 Basic Military Science Practicum

Prerequisite: permission.

A 6-week course conducted at Fort Knox, KY. The training is rugged and intensive with emphasis placed on leadership application, practical work and physical conditioning. Training will be conducted six days a week out-of-doors and requires active participation by all students. Enrolled students receive compensation for travel, lodging and food.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5			Fall, Summer

MIL 301 Military Leadership and Operations

Prerequisite: permission.

Introduction to small unit tactics; principles of military leadership, to include theory, responsibilities, techniques, and practice; branches of the U.S. Army, oral presentation techniques and practice. One field trip is required. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	1	Fall

MIL 302 Military Skill Building

Prerequisite: permission.

Small unit tactics; applied military leadership (builds on knowledge gained in MIL 301) with special emphasis on the junior leader's duties and responsibilities. Two field trips are required. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	1	Spring

MIL 325 Advanced Military Science Practicum

A prerequisite to receive a commission in the U.S. Army through R.O.T.C. and for MIL Science 411 and 412. The 5-week course is conducted at Fort Lewis, Washington. The instruction, training and evaluation focuses on the professional development issues required to become an Army Officer. The primary focus is on evaluating the student's leadership potential through this mentally and physically demanding camp. The training and evaluation is conducted seven days a week for five weeks and requires active participation by all students. The student is placed in leadership positions which require him/her to lead up to 120 fellow students for extended periods of time. Enrolled students receive compensation for travel, lodging and food.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	5	0	Fall, Summer

MIL 411 Military Qualification Skills for the Advanced Cadet

Prerequisite: permission.

Ethics and professionalism of the military officer; Army command staff functions; oral presentation techniques and practice; military leadership at junior officer level; world change and military obligations. One field trip is required. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	1	Fall

MIL 412 Transition from Cadet to Lieutenant

Prerequisite: permission.

Military justice system; army supply and logistics procedures and responsibilities; officer management system; obligations and responsibilities of a military officer; military leadership at junior officer level. Two field trips are required. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	1	Spring

MIL 496 Readings/Research in Military Science

Prerequisite: permission.

Planned readings and research on subjects in or related to Military Science. May be repeated for a total of 3 hours. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Philosophy Courses

Philosophy (PHI) courses

PHI 105 Critical Thinking

Prerequisite: 12 hours.

General Education Course (Focus on Public Issues).

This course develops intellectual self-awareness by teaching the canons and skills of critical reasoning. Deductive and inductive reasoning, the application of logic to a variety of significant issues, and the relation between language and argumentation will be studied.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	PHIL 101 - Introduction to Logic.

[Access the CORE 42 portal](#)

PHI 110 Introduction to Philosophy

General Education Course (Focus on Humanities).

This course explores various ways of understanding the human self and its relation to the world. Through a consideration of what can be known, what is worth valuing, what reality is, and how human communities should be composed and regulated, the course deals with central themes that arise from the human quest for deeper self-understanding.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	PHIL 100 - Introduction to Philosophy.

[Access the CORE 42 portal](#)

PHI 115 Ethics and Contemporary Issues

Prerequisite: 12 hours.

General Education Course (Focus on Public Issues).

This course examines ethical principles and theories in relation to contemporary moral issues (e.g. euthanasia, capital punishment, economic justice, environmental issues, world hunger). Through a consideration of ideals of justice and human dignity, as well as concepts of rights and responsibilities, it also explores the moral requirements for community and justified political order.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	PHIL 102 - Introduction to Ethics.

[Access the CORE 42 portal](#)

PHI 120 Professional and Business Ethics

This course surveys ethical theories and applies them to current professional and business decision-making.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 197 Perspectives in Philosophy

A variable content course designed to explore the philosophical significance of issues of cultural, social or individual importance. Students should consult the registration schedule to determine the topic to be covered in a given semester. The course may be repeated to a maximum of 6 hours as topics change.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PHI 300 Philosophical Ideas in Literature

Selected works of Western literature in light of their relation to historical trends in philosophy and philosophical speculation in the areas of metaphysics, epistemology, value theory, social and political philosophy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 301 Service Learning in Philosophy

Prerequisite: 30 hours and permission, and concurrent registration in a Philosophy course designated as a service learning offering.

This service component for an existing course incorporates community service with classroom instruction in philosophy to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

PHI 302 Environmental Ethics

This course critically examines various philosophical viewpoints that bear upon ethical issues concerning the environment. Among the questions examined are the following: Must concern for the environment revolve around human concerns? Do animals have rights? Does nature have intrinsic value that must be respected regardless of effects upon humans? What is the relative importance of aesthetic or economic values to environmental questions? Do we have obligations to protect resources for future generations?

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 305 Elements of Symbolic Logic

An introduction to the use of symbolic techniques to represent and evaluate arguments from everyday usage. There is an emphasis upon the student's development of an understanding of the methods and concepts of present day logic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PHI 306 History of Western Philosophy: Ancient

Historical study of ancient philosophy based on the reading of representative writings of major philosophers.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PHI 310 History of Western Philosophy: Modern

A survey of the major philosophies of the modern period in the Western World, 1550 to 1850, including the work of philosophers who stand in the traditions of Continental rationalism, British empiricism, and German idealism.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 312 Contemporary Continental Philosophy

An examination of contemporary European philosophical thought including significant writings from important individual philosophers and from major movements of the period, such as Existentialism, Phenomenology, Frankfurt School, Structuralism and/or Deconstruction.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 313 Bioethics

An introduction to central ethical questions that arise in the area of bioethics, and to the resources various ethical theories offer for resolving those questions. In addition to a brief overview of contemporary moral theory, the course will discuss issues such as euthanasia, informed consent, proxy decision making, experimental research on humans and health care allocation. Specific cases will be discussed and analyzed throughout the semester. May be taught concurrently with PHI 613. Cannot receive credit for both PHI 313 and PHI 613.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 314 Asian Philosophy

This course compares and evaluates the major philosophies of the Eastern world. It treats selected topics from Indian, Chinese, and Japanese philosophies and examines the basic ideas that underlie the religious and moral viewpoints of these traditions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 315 Philosophy of Religion

The philosophy of religion is the application of philosophical reflection to the concepts and theses of religion. Accordingly, this course ranges over a variety of issues, which may include the existence of the divine, the nature of the divine, modes of knowing the divine, the theological significance of evil in the world, the relationship between the divine and morality, and survival after death.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 319 Feminist Philosophy

This course examines the major strands of feminist philosophy. It focuses in particular on how issues of gender affect ethical theories and theories of knowledge.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 320 Aesthetics

Representative philosophical theories concerning the nature of aesthetic value; the bases of judgments in the arts and literature. Primarily intended for upper division students concentrating in the fine arts, literature or philosophy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PHI 330 Introduction to Political Theory

Prerequisite: PLS 101.

An introduction to the study of political theory by examining the central questions that animate our attempt to understand and secure the "good life." These concerns include: the nature and significance of politics; the origin and character of legitimate authority; and the meaning of freedom, the value of citizenship, and the education in virtue and in rights that are necessary to both individual liberty and civic greatness. Bringing insights from classical and modern texts to bear on these fundamental questions of public life, we aim to articulate and defend our own understanding of the ethical obligations and responsibilities that citizens owe to one another. Identical with PLS 330. Cannot receive credit for both PHI 330 and PLS 330.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PHI 331 Philosophy of Psychology

A survey of prominent theories in the philosophy of mind and theoretical psychology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (odd-numbered years)

PHI 336 Knowledge and Reality: Contemporary Approaches

This course will investigate questions involving knowledge and reality, focusing on philosophers who wrote at some time from the latter half of the 19th century up to the present day. The questions will typically be from among the following: What is "knowing"? How are claims to be justified to count as knowledge? Do different types of knowledge require a single type of justification, or do they have different types? Does science have a privileged role in knowing what's real? If so, what is it about science that provides for this? Is reality given or is it constructed/constituted in some way? If the latter, how is this done? Do any of these play a role in that construction/constitution: brain-structure, perception, concepts and conceptual schemes, language, power

relations, human activity? What are the basic features of reality? Physical stuff, time, natural kinds, laws of nature, power, events, history, possible worlds? Are common and/or philosophical ways of thinking about the world "metaphysical", as many have claimed? What exactly is meant by "metaphysical".

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 340 Philosophy of Law

This course is an introduction to the philosophy of law through a study of some of its major issues. Questions to be considered in the course may include "Is an unjust law no law at all?," "How robust is our obligation to follow the law, and what grounds that obligation?," "What is the purpose of law?," "Do we have natural rights?," "Is paternalism justified?," and "How do we justify legal punishment?"

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 342 Global Ethics

As the planet becomes increasingly interconnected, and increasingly burdened by a burgeoning population, issues of global ethics have taken on a heightened urgency. This course examines competing perspectives on a variety of ethical issues with global dimensions, such as human rights, world hunger and poverty, overpopulation, sweatshops, immigration, nationalism, war, terrorism, genocide, and global warming. Students should emerge better prepared to act as global citizens capable of nuanced moral reasoning.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 345 Theories of Ethics

This course examines various theories of ethics. Topics may include the rationality and objectivity of morality, the meaning of moral language, and the nature of and differences between deontological, utilitarian, sentimentalist, and virtue theories.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 350 Philosophy and Public Affairs

Addresses three elements of MSU's public affairs mission, with a special focus on the ethical leadership aspect. Dividing the concept, the course will begin with discussion of the "ethical" prong, examining several traditional approaches to character information and ethical decision-making. Moving to the leadership prong, students will look at issues of justice and communication. Synthesizing the two, the course will conclude with examination of how one exhibits ethical leadership in relationships with friends and family, and in the work environment, and in the global sphere. Discussion of these relationships will be connected to the elements of cultural competence and community engagement. Throughout, the focus will be on the role of influence, integrity, and individual responsibility and obligations in the practice of ethical leadership. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 397 Seminar in Philosophy

Research in selected topics in philosophy. May focus on ideas of one or more thinkers, a philosophic issue or a branch of philosophy. May be repeated for credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

PHI 496 Philosophy Tutorial

Prerequisite: permission of department head.

Individual conference course for students with specialized interests in particular areas of philosophy not covered in regular courses. Includes independent research, progress reports and term papers. Enrollment requires advance agreement on topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2-4			Upon demand

PHI 596 Selected Topics in Philosophy

Prerequisite: permission of department head.

Individual conference course for graduate students with specialized interests in particular areas of philosophy not covered in regular courses. May include independent research, progress reports and term papers. Enrollment requires advance agreement on topic. May be taught concurrently with PHI 696. Cannot receive credit for both PHI 696 and PHI 596.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2-4			Upon demand

PHI 613 Bioethics

An introduction to central ethical questions that arise in the area of bioethics, and to the resources various ethical theories offer for resolving those questions. In addition to a brief overview of contemporary moral theory, the course will discuss issues such as euthanasia, informed consent, proxy decision making, experimental research on humans and health care allocation. Specific cases will be discussed and analyzed throughout the semester. May be taught concurrently with PHI 313. Cannot receive credit for both PHI 313 and PHI 613.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHI 696 Selected Topics in Philosophy

Prerequisite: permission of department head.

Individual conference course for graduate students with specialized interests in particular areas of philosophy not covered in regular courses. May include independent research, progress reports and term papers. Enrollment requires advance agreement on topic. May be taught concurrently with PHI 596. Cannot receive credit for both PHI 596 and PHI 696.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2-4			Upon demand

Political Science Courses

Political Science (PLS) courses

PLS 101 American Democracy and Citizenship

General Education Course (Focus on Constitutions of US and Missouri and American History and Institutions).

This course familiarizes students with the institutions and constitutional framework of the United States and Missouri. The course emphasis is on the values, rights, and responsibilities that shape the public decision making of active and informed citizens and influence contemporary public affairs in a democratic society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	POSC 101 - American Government.

[Access the CORE 42 portal](#)

PLS 102 Introduction to American Public Policy

Prerequisite: PLS 101.

This course deals with the process of policy formulation and with the historical development of specific public policies in such fields as economics, foreign affairs, education, business and labor, social welfare, criminal justice, health and environment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PLS 205 Comparative Politics

Prerequisite: PLS 101.

A course that engages in cross-national comparative analysis to explore fundamental political issues, such as regime type, democratization, constitutional design, political violence, ethnic conflict, and natural resource governance.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	POSC 202 - Introduction to Comparative Politics.

[Access the CORE 42 portal](#)

PLS 232 International Relations

Prerequisite: PLS 101.

Conflict and cooperation in the nation-state system. Theories on international organization, power politics, regional integration, nationalism, war. Problems of developing areas such as Africa, Latin America and Southeast Asia.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	POSC 201 - International Relations.

[Access the CORE 42 portal](#)

PLS 255 Public Administration

Prerequisite: PLS 101.

This course provides a general survey of public administration. The overarching theme is how to make government agencies efficient, effective, and accountable. The topics include American administrative

organization, activities, budget process, human resources management, policy implementation, and regulations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PLS 300 Service Learning in Political Science

Prerequisite: 30 hours; and concurrent registration in a Political Science course designated as a service learning offering; and permission.

This service component for an existing course incorporates community service with classroom instruction in Political Science to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

PLS 301 U.S. National Security

This class examines American national security from the cultural, institutional and policy perspectives. It will pay close attention to those enduring factors that shape American defense policies as well as exploring developments that have modified America's approach to security. Moreover, in addition to studying the structure and operation of today's policymaking process, the course will investigate the way the process has evolved in the past fifty years and will analyze the way key policies are produced and implemented by the U.S. government. Finally, reflecting changes in the world and in the field of national security studies, the course will cover not only the traditional concerns of national security (e.g., creation and use of military force for physical security of the territorial-state), but also the definition and achievement of individual and global security in the face of non-military problems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 315 Federalism and Intergovernmental Relations

Prerequisite: PLS 101.

Nature of American Federalism and the dynamics of intergovernmental relationships; the course examines the role of the national and the state governments in intergovernmental relations as well as the state, local, interstate and interlocal relations. Issues of federal grants, fiscal outlook of cities, problems of inner cities, and metropolitan governments are also discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 316 Political Parties, Elections and Interest Groups

Prerequisite: PLS 101.

A survey of the nature, evolution and functions of parties, elections and interest groups in the United States. An emphasis will be placed on the role played by these institutions in linking citizens to the public policy process.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 317 American Political Behavior

Prerequisite: PLS 101.

An examination of various approaches to analyzing mass and elite political behavior in the United States. An emphasis will be placed on survey research, public opinion, political socialization, political psychology and voting behavior.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (even-numbered years)

PLS 319 Women in Politics

Prerequisite: PLS 101.

A course that examines why women engage in political action and how the broader socio-economic and institutional context shapes their involvement and impact.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

PLS 330 Introduction to Political Theory

Prerequisite: PLS 101.

An introduction to the study of political theory by examining the central questions that animate our attempt to understand and secure the "good life." These concerns include: the nature and significance of politics; the origin and character of legitimate authority; and the meaning of freedom, the value of citizenship, and the education in virtue and in rights that are necessary to both individual liberty and civic greatness. Bringing insights from classical and modern texts to bear on these fundamental questions of public life, we aim to articulate and defend our own understanding of the ethical obligations and responsibilities that citizens owe to one another. Identical with PHI 330. Cannot receive credit for both PLS 330 and PHI 330.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PLS 333 Model United Nations

Prerequisite: permission.

This course is designed to provide an opportunity for in-depth role playing that leads to a better understanding of the United Nations and other regional and international organizations. Course work includes the study of current events, important international disagreements, key international conventions, and the protocol and procedures of UN diplomacy. Students will prepare for participation in the American Model United Nations conference and other international organization simulations as representatives of Missouri State University.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (odd-numbered years)

PLS 338 Politics of Less Developed Countries

This course offers a road introduction to the politics of poorer, or "less developed" countries, a category that includes about three-quarters of the world's sovereign states and the vast majority of the global population. It focuses on such issues as democratization, economic development and ethnic and religious conflict. Students will also learn about the politics of a number of individual countries in Africa, Asia and Latin America.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (even-numbered years)

PLS 343 Post-Soviet Politics

Prerequisite: PLS 101.

The politics and governments of the former Soviet Union, its Marxist-Leninist ideology, and the dominant role of the Communist Party will be used to illustrate the dramatic changes having taken place since 1991. Political and economic reforms introduced by Gorbachev will be highlighted, and reasons for the Soviet Union's subsequent collapse and the establishment of Russia and other Independent States of the former Soviet Union will be discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 351 Municipal Government and Administration

Prerequisite: PLS 101.

A study of the structures and functions of city governments with emphasis on their relations to the state, their legal positions as municipal corporations and the management of municipal services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 355 Emergencies, Disasters and Catastrophes

This survey course is designed to examine the wide range of public safety-related incidents from the daily emergencies handled by local government through disasters on the state levels to catastrophes on the national and international levels. The students will examine how these terms are defined, the role of public safety agencies (governmental, NPA and private) and how these incidents occurred and are managed. Students will be familiarized with various public safety services provided by municipal, state, and federal agencies. They will explore, via lectures, discussions, videos and readings, the provision of services, the role of public safety managers, municipal managers and elected officials.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 397 Mini Course in Political Issues

Prerequisite: permission of instructor.

A course upon a single topic of current interest; subject will vary from semester to semester and from section to section depending upon student interest and faculty availability. May be repeated for credit to a maximum of 3 hours. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

PLS 413 The American Executive

Prerequisite: PLS 101.

Changing powers and functions of the executive branches of the national and state governments of the United States in the 20th Century; constitutional, administrative and political problems involved.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 414 The Legislative Process

Prerequisite: PLS 101.

Theory, principles, procedures and problems of the legislative process in democratic societies; operation of American state and national legislatures.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (odd-numbered years)

PLS 419 The Judicial Process

Prerequisite: PLS 101.

Sources and nature of law; historical, sociological and philosophical approaches to legal theory. Role of the judiciary as an aspect of the study of political behavior; policy significance and consequences of what judges do and how they do it. Illustrated by case study in selected areas of American constitutional law.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (even-numbered years)

PLS 437 International Organizations and Law

Prerequisite: PLS 101.

A study of the role of international organizations, both governmental and non-governmental, in regional and global international politics. A comparison of international organizations and other political institutions. A casebook and lecture examination of the principal elements of international law. A topical approach to governing principle will introduce current problems and define probable trends.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

PLS 439 Playing Games with the World

A course designed to explore theories and paradigms of international relations via popular culture, simulations and games. May be taught concurrently with PLS 639. Cannot receive credit for both PLS 439 and PLS 639.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

PLS 443 Nationalisms and Islamisms of the Middle East

This is an introductory course on selected ideologies of the Middle East in seminar form; it presupposes only basic knowledge of the region as well as previous exposure to comparative politics. The course surveys the historical and political trajectories of selected nationalisms and Islamist ideologies in the Middle East: Pan-Arabism, various Arab territorial nationalisms, Zionisms, Turkish nationalisms, Kurdish nationalisms and various strains of Islamism. May be taught concurrently with PLS 649. Cannot receive credit for both PLS 443 and PLS 649.

3-6			Upon demand

PLS 495 Senior Honors Project in Political Science

Prerequisite: permission.

An individualized research project in a selected field of political science or public administration. The project will involve the preparation of a project proposal in cooperation with an appropriate faculty member serving as project advisor who will approve it along with the Head of the Political Science Department and Director of the Honors College. Variable Content Course. May be repeated to maximum of 6 hours total credit.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

PLS 496 Independent Study in Political Science

Prerequisite: permission.

Recommended Prerequisite: 2.50 GPA; and junior or senior standing. Students should consult with a professor of the department who specializes in the subject and with the professor's consent present a written proposal to the department head for final approval. Proposals should be presented for approval before final registration for the term in which the independent study is to be done. Only one approved independent study program may be taken in any semester. A maximum of 6 semester hours of credit in PLS 496 may be counted on a major in Political Science and 3 semester hours of credit on a minor in Political Science or Public Administration. Written work will be required in PLS 496 in addition to reading assignments and/or research activities.

PLS 550 Modern African Politics

Prerequisite: PLS 101.

Recommended Prerequisite: 50 hours. A comparative study of the political and economic systems of contemporary Africa with emphasis on sub-Saharan Africa. Ideologies and strategies pursued by selected African governments are covered, including an assessment of contemporary economic, political, and strategic ties within the region and internationally. The class will emphasize such areas as Mauritania, Senegal, Kenya, Somalia, Nigeria, and South Africa. Identical with AAS 550. Cannot receive credit for both PLS 550 and ASS 550. May be taught concurrently with PLS 650. Cannot receive credit for both PLS 650 and PLS 550.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 555 Public Policy for a Global Environment

Prerequisite: PLS 101.

Recommended Prerequisite: 50 hours. Course examines how environmental policy is made in the United States and the international community. The course covers the institutions and groups that participate in making environmental policy and the process by which it is made. Domestic and international issues and problems explored include clean air, clean water, pesticides, risk assessment and management, toxic and hazardous substances, public lands, the greenhouse effect, and stratospheric ozone depletion. May be taught concurrently with PLS 685. Cannot receive credit for both PLS 685 and PLS 555.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 561 Ancient Political Thought

Prerequisite: PLS 101.

Recommended Prerequisite: 50 hours. An introduction to the study of political theory by examining the contributions of classical political theorists and their successors up to the age of the Renaissance. Includes Socrates, Thucydides, Plato, Aristotle, the Epicureans, Cynics and Stoics, Cicero and the Roman Lawyers, early Hebrew and Christian political thought, Augustine and Aquinas.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (odd-numbered years)

PLS 563 Modern Political Theory

Prerequisite: PLS 101.

Recommended Prerequisite: 50 hours. The revolution in ideals brought by the nation-state, modern science, and the industrial revolution. Includes Machiavelli, More, Luther, Calvin, Hobbes, Locke, Rousseau, Bentham, J.S. Mill, Weber, Kant and Hegel.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (odd-numbered years)

PLS 565 Contemporary Political Ideologies

Prerequisite: PLS 101.

Recommended Prerequisite: 50 hours. A systematic study of the major competing ideologies of the 19th and 20th Centuries, including conservatism, liberalism, nationalism, Marxism, democratic socialism, fascism and national socialism, and others. Special emphasis is placed on the historical sources philosophical foundations and argumentative structure of these influential ideologies. May be taught concurrently with PLS 642. Cannot receive credit for both PLS 642 and PLS 565.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

PLS 567 American Political Thought

Prerequisite: PLS 101.

Recommended Prerequisite: 50 hours. Political ideas in American institutional and historical development. An examination of the relations between American thought and political structures and processes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 569 Foreign Policies of the Middle Eastern States

This course focuses on the foreign policies of selected Middle Eastern states and non-state actors. The course will refer to various paradigms of international relations, so a previous course in international relations (especially an introductory or theory course) is highly recommended. Concerns of this course will include to what extent we can view the states of the Middle East of rational actors, the role of individual decision makers, unintended policy results, and the need to balance domestic and external policy imperatives. The central pedagogic concern revolves around understanding how and why various Middle Eastern state choose the policies they do. May be taught concurrently with PLS 669. Cannot receive credit for both PLS 569 and PLS 669.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

PLS 573 Policy Analysis

Prerequisite: PLS 101.

Recommended Prerequisite: 50 hours. A study of the major qualitative and quantitative techniques in public policy analysis. The course will examine diverse processes of public policy formulation, and analyze various

public policy alternatives. Each student will complete an empirical research project. May be taught concurrently with PLS 673. Cannot receive credit for both PLS 673 and PLS 573.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 576 Quantitative Methods of Political Science and Public Policy

Prerequisite: PLS 101.

Recommended Prerequisite: 50 hours. Introduction to the use of standard computer programs (especially SPSS) for the analysis and interpretation of political and social data. Covers analysis of nominal and ordinal data, descriptive and inferential statistics, hypothesis testing, correlation, linear and multiple regression. There will be a critical review of the applications of these techniques to the analysis of political science and public policy research questions, including ethical issues associated with quantitative research. May be taught concurrently with PLS 676. Cannot receive credit for both PLS 676 and PLS 576.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PLS 635 American Foreign Policy

The course explores the various governmental institutions and societal forces which shape American foreign policy. The major emphasis is on American foreign policy since World War Two. Current issues in American foreign policy are discussed in light of contemporary theoretical and methodological approaches. May be taught concurrently with PLS 535. Cannot receive credit for both PLS 535 and PLS 635.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 639 Playing Games with the World

A course designed to explore theories and paradigms of international relations via popular culture, simulations and games. May be taught concurrently with PLS 439. Cannot receive credit for both PLS 639 and PLS 439.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

PLS 642 Contemporary Political Ideologies

A systematic study of the major competing ideologies of the 19th and 20th Centuries, including conservatism, liberalism, nationalism, Marxism, democratic socialism, fascism and national socialism, and others. Special emphasis is placed on the historical sources philosophical foundations and argumentative structure of these influential ideologies. May be taught concurrently with PLS 565. Cannot receive credit for both PLS 565 and PLS 642.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

PLS 644 Government and Politics of the Middle East

Political systems, processes and problems of the Middle East, considered both regionally and in the perspective of separate nation-states, from the beginning of the modern period about 1800 to the present. May be taught concurrently with PLS 544. Cannot receive credit for both PLS 544 and PLS 644.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 645 Asian Politics

A comparative study of the political and economic systems of contemporary Asia with emphasis on Japan, Korea, mainland China and Taiwan. Ideologies and strategies pursued by selected Asian governments are covered. Includes an assessment of contemporary economic, political and security issues in the region. America's economic, political and strategic ties with the region are also explored. May be taught concurrently with PLS 545. Cannot receive credit for both PLS 545 and PLS 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 646 Political Violence and Terrorism

The systematic study of political violence in its different forms. The course content is structured along a continuum, ranging from small scale violence to mass violence-assassinations, terrorism by sub-national and transnational organizations, state terror and genocide. May be taught concurrently with PLS 546. Cannot receive credit for both PLS 546 and PLS 646.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 647 Politics of the European Union and Its Members

This course will focus on the historical evolution of the European Union (EU) since the 1950s, the ongoing integration process within the organization (vertical integration), and its enlargement beyond the present members (horizontal integration). It will also address the EU's position in global and regional politics, its links to the United States, and the development of international governmental organizations. May be taught concurrently with PLS 547. Cannot receive credit for both PLS 547 and PLS 647.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 648 Latin American Politics

Broad introduction to the politics of Latin America. Although it will offer substantial historical background, the emphasis of the course will be on recent decades. To familiarize the student with some of the major general issues facing Latin America while also giving them a taste of its tremendous diversity. The course is structured around four basic topics: economic development, democratization, guerrilla movements and revolution, and drug trafficking. In the process of discussing these topics, various countries will be explored such as Brazil, Chile, Colombia, Cuba, Guatemala, and Mexico. A recurring theme will be the relationship between the United States and Latin America. May be taught concurrently with PLS 548. Cannot receive credit for both PLS 548 and PLS 648.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 649 Nationalisms and Islamisms of the Middle East

This is an introductory course on selected ideologies of the Middle East in seminar form; it presupposes only basic knowledge of the region as well as previous exposure to comparative politics. The course surveys the historical and political trajectories of selected nationalisms and Islamist ideologies in the Middle East: Pan-Arabism, various Arab territorial nationalisms, Zionisms, Turkish nationalisms, Kurdish nationalisms and various strains of Islamism. May be taught concurrently with PLS 443. Cannot receive credit for both PLS 649 and PLS 443.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (even-numbered years)

PLS 650 Modern African Politics

A comparative study of the political and economic systems of contemporary Africa with emphasis on sub-Saharan Africa. Ideologies and strategies pursued by selected African governments are covered, including an assessment of contemporary economic, political, and strategic ties within the region and internationally. The class will emphasize such areas as Mauritania, Senegal, Kenya, Somalia, Nigeria, and South Africa. May be taught concurrently with PLS 550. Cannot receive credit for both PLS 550 and PLS 650.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 651 Administrative Law

A study of administrative agencies in their rule making and adjudicatory functions; administrative procedures including hearings and the judicial review thereof; legislative committee operations and their relation to the agencies. After several lecture type presentations by the instructor on the above topics, each student will be expected to present an oral and written review of some area of administrative law which requires further development through agency regulation and/or judicial review.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 669 Foreign Policies of the Middle Eastern States

This course focuses on the foreign policies of selected Middle Eastern states and non-state actors. The course will refer to various paradigms of international relations, so a previous course in international relations (especially an introductory or theory course) is highly recommended. Concerns of this course will include to what extent we can view the states of the Middle East of rational actors, the role of individual decision makers, unintended policy results, and the need to balance domestic and external policy imperatives. The central pedagogic concern revolves around understanding how and why various Middle Eastern state choose the policies they do. May be taught concurrently with PLS 569. Cannot receive credit for both PLS 569 and PLS 669.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

PLS 673 Policy Analysis

A study of the major qualitative and quantitative techniques in public policy analysis. The course will examine diverse processes of public policy formulation, and analyze various public policy alternatives. Each student will complete an empirical research project. May be taught concurrently with PLS 573. Cannot receive credit for both PLS 573 and PLS 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 676 Quantitative Methods of Political Science and Public Policy

Introduction to the use of standard computer programs (especially SPSS) for the analysis and interpretation of political and social data. Covers analysis of nominal and ordinal data, descriptive and inferential statistics, hypothesis testing, correlation, linear and multiple regression. There will be a critical review of the applications of these techniques to the analysis of political science and public policy research questions, including ethical issues associated with quantitative research. May be taught concurrently with PLS 576. Cannot receive credit for both PLS 576 and PLS 676.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PLS 685 Public Policy for a Global Environment

Course examines how environmental policy is made in the United States and the international community. The course covers the institutions and groups that participate in making environmental policy and the process by which it is made. Domestic and international issues and problems explored include clean air, clean water, pesticides, risk assessment and management, toxic and hazardous substances, public lands, the greenhouse effect, and stratospheric ozone depletion. May be taught concurrently with PLS 555. Cannot receive credit for both PLS 555 and PLS 685.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 705 Seminar in Comparative Politics

A survey of the main theoretical and methodological debates in the field of Comparative Politics. Topics may include the roots of authoritarianism and democracy, the effects of constitutional design, the causes of ethnic

conflict, the interaction between religion and political institutions, the origins of social policy regime variation, and the impact of natural resource wealth on the state, among others.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 713 Seminar in Foreign Policy Decisionmaking

An examination of the factors that shape foreign policy decisionmaking, especially as they have evolved in the 20th century in the United States. In addition to an examination of the governmental institutions and societal forces that influence policy, students will critically analyze decisionmaking models that have been developed to explain how and why foreign policy decisions are made.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 715 Comparative Public Administration

The course will review the literature on the study of comparative public administration. The body of the course will focus on substantive public management issues in a variety of countries. Students will be expected to understand the rationale for the subfield, its development, and develop the skills needed to conduct scientific analysis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 717 Multidisciplinary Approaches to Homeland Security

Examines the full spectrum of both homeland security and defense activities, the diverse responsibilities of the primary stakeholders, and current policies and practical efforts to develop and integrate homeland security and defense efforts nationwide.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 719 Strategic Planning and Organizational Imperatives in Homeland Security

The attainment of homeland security goals is dependent on comprehensive planning and organization to integrate and mobilize all levels of government and private sector responses. This course critically analyzes these efforts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 721 International Political Economy

A general introduction to the politics of international economic relations, with a special emphasis on the extent, causes, and consequences of globalization. Covers such topics as trade, investment, aid, global warming, international institutions, and the political roots of economic development. Identical with ECO 721. Cannot receive credit for both PLS 721 and ECO 721.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 732 International Relations in Theory and Practice

An examination of the principal paradigms and approaches in the study of international relations as they have evolved, particularly in the 20th century, and their usefulness for understanding the practice of global affairs. Students will familiarize themselves with both theoretical and substantive aspects of international relations and global affairs. Completion of a major research project focusing on an issue or region and analyzing it from a theoretical perspective is required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 737 Seminar in International Organizations

A study of the historical development and theoretical foundations of international organizations. Readings and research will emphasize recent issues and developments in both regional and global aspects in the organization of the international system.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 752 Public Personnel Management

Intensive examination of the management of personnel focused directly on the public sector at the federal, state, and local levels. The course will explore the development, structure, and procedures of the public service. Issues of public personnel management to be examined include: perspectives on the public service, merit and patronage systems, labor relations, civil service reform, anti-discriminatory policies, and productivity and accountability.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 753 Management Techniques and Organizational Behavior

A core lecture course designed to familiarize the student with the development of managerial skills through MBO, decision making theory, strategy implementation, change theory and development administration, problem solving, coordination within the organization, communication techniques and effecting productivity. Emphasis will be placed upon the applicability of management and organizational theory to the public sector.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 754 Seminar in Health Policy

Politics of health policy formulation and planning. A study of participants in policy formulation, role of the different levels of government, issues and problems in health care planning, interrelationship of agencies involved, Medicare, Medicaid, national health insurance.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 756 Budgeting and Financial Management for State and Local Government

This course examines theories, practices, and issues of public budgeting and financial management. It covers a wide range of topics, including public budget institutions and techniques, revenue sources, tax strategies, revenue forecasts, public debt and bond issuance, intergovernmental fiscal relations, and basic categories of state and local expenditures.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 757 Topics Seminar in Public Policy and Administration

Topics course. The specific topics will change from semester to semester. May be repeated as topics change.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PLS 759 Seminar in Administrative Management and Organizational Theory

This course provides an overview of the major theories that explain the function and operation of organizations, with particular emphasis on the role and context of the public sector. Topics include systems theory, organizational culture, organizational design and structure, and the operation of politics and power within organizations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 760 Management of Intergovernmental Relations

The course is designed to familiarize students with the nature and scope of intergovernmental relations and how they impact issues such as fiscal management, grantsmanship, public policy formulation, public program monitoring and administration.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 761 Management of Nonprofit Organizations

This course provides a general survey of nonprofit organizations. It will examine the historical, legal, ethical, and social environments in which nonprofit organizations operate. It will also discuss various aspects of nonprofit organization management, ranging from managing people and money to managing public relations and trust. The course will integrate theoretical and practical aspects of nonprofit management.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (odd-numbered years)

PLS 762 Public Policy and Program Evaluation

The course is designed to familiarize students with the nature and role of evaluation in the policy process. Topics will include the various types of evaluation, evaluation methods, evaluability assessment, program monitoring, impact assessment, process assessment, utilization of evaluation findings, and the politics of evaluation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (odd-numbered years)

PLS 763 The Policy Process

This course is designed to explore how public policy is made at all levels of government in the United States. Approximately two-thirds of the course will focus on the policy process; the remainder will concentrate on two or three major policy issues. Students will do an extended paper on a policy issue applying the concepts from the first part of the course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 771 Seminar in Public Administration

This course is designed as the foundation course for the Master of Public Administration program. Topics covered include the development of public administration as a field of inquiry, political, social, economic, and legal processes and institutions, the policy process, and values and ethics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 772 Introduction to Public Safety Services

This course introduces students to the current principles and practices of public safety services from the theoretical and practitioner's perspective. Course will cover how services are provided, management challenges, the levels of emergencies and disaster operations, preparedness, recovery and mitigation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLS 773 Hazard Analysis, Mitigation, and Preparedness

This course focuses on crucial actions taken in preparing the emergencies. All public safety agency work begins with a thorough analysis of the hazards faced whether they are from natural causes or manmade. The course will introduce students to various methods for conducting the hazard analysis regardless of whether for law enforcement, fire service, emergency medical services or 9-1-1. The class examines various methods to mitigate the occurrences of those incidents and how public safety agencies can prepare themselves and the public for when they occur.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 774 Municipal Planning and Zoning

The purpose of this course is for students to gain a working knowledge of the legal nature, the administration, and the politics of major land-use regulatory powers exercised by local government. Municipal planning and zoning controls emphasized in this course are zoning codes, subdivision review, site plan review, building codes, and the exercise of eminent domain. Course will assess how combinations of these practices may be utilized in comprehensive growth management strategies, as well as in the negotiations for, and the implementation of, agreements for individual planned unit developments and for annexations of land to municipalities. Course will also relate these powers to urban planning practices including strategic and comprehensive planning.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 775 Economic Development for Local and State Governments

The purpose of this course is to familiarize students with the local, state and national contexts in which local economies operate to provide them with a background for developing successful economic strategies at the

local level. Upon completion of the course, students should have a better understanding of how these issues are being addressed in governments around Missouri and throughout the United States. The goal is to better prepare future managers for their first local government jobs that will often carry the title of administrator in a small, rural community.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PLS 776 Local Public Service Delivery

This course prepares students to provide management and guidance to various local government services such as public works, police, fire, parks, utilities, and human services. It covers issues of governance which enable various government and non-for-profit groups to cooperate in the delivery of these services. The focus is on management in medium and small-sized municipalities in both rural and urban settings. Extensive use of guest lectures and site visits are essential components of this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

PLS 777 Local Government and Politics and Administration

This course familiarizes students with a broad array of local government issues, structures, management concerns, and politics. Interwoven throughout the course is a discussion of the roles that professional administration and local politics play in everyday local government operations. The major focus will be on the decision making process of professional administrators as they attempt to bring both efficiency and effectiveness to local government.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (odd-numbered years)

PLS 778 Ethics and Leadership in the Public Sector

This course examines the role and impact of leadership in public organizations, with particular focus on the ethical dimensions of leadership behavior. The course provides an overview of the knowledge, theory, and skills regarding leadership and professional ethics. Topics include charismatic and transformational leadership, leadership styles, the role of the leader in creating ethical climates and building effective ethical cultures, organizational change strategies, and motivation strategies. Also covered are the ethical codes, standards, and practices promulgated by the American Society for Public Administration (ASPA) and the International City Management Association (ICMA).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLS 780 Independent Study in Political Science

Prerequisite: permission of instructor.

Carefully planned independent study designed on an individual basis for the advanced student who wishes to investigate a well defined problem not dealt with adequately by standard courses. Normally, a student may take PLS 780 only once to fulfill the requirements of the non-thesis option or as part of the cognate field if pursuing the thesis option.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring

PLS 781 In-Service Training in Public Administration

Prerequisite: permission of Master of Public Administration Program Director.

Supervised field work in an approved local, state, or national governmental agency including preparation of an acceptable formal report.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PLS 782 Internship/Practicum in International Field

Prerequisite: permission of program director.

Supervised field work in a federal government agency, international governmental/non-governmental organization, multinational corporation, or equivalent. The course requirements include a formal report on the internship/practicum and evaluation by the supervisor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PLS 797 Special Topics in Global Affairs

Prerequisite: permission of instructor.

The specific topics will change from semester to semester, and will include subjects such as international humanitarian law, comparative foreign policy, global Islamic movements, and globalization. Variable content course. May be repeated as topics change.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PLS 799 Thesis

Prerequisite: permission of Master of Global Studies or Master of Public Administration Program Director and department head.

Independent research and study connected with preparation of thesis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Major(s)

Political Science (Non-Comprehensive) (BA)

Bachelor of Arts

Major requirements (39 hours):

Note: Three hours may double toward General Education requirements.

1. Core Requirements* (21 hours):
 - a. [PLS 101\(3\)](#), [205\(3\)](#), [232\(3\)](#), [255\(3\)](#); [PLS 330\(3\)](#) or [PHI 330\(3\)](#); [PLS 492\(0\)](#).
 - b. One course from: [PLS 316\(3\)](#), [317\(3\)](#), [413\(3\)](#), [414\(3\)](#).
 - c. One course from: [PLS 515\(3\)](#), [517\(3\)](#), [520\(3\)](#).
2. Public Affairs Capstone Experience. Three hours from the following list. Course cannot count toward both the 24 hour core requirement and the Capstone requirement. [PLS 413\(3\)](#), [414\(3\)](#), [437\(3\)](#), [439\(3\)](#), [443\(3\)](#), [493\(3\)](#), [494\(3\)](#), [495\(3\)](#), [496\(3\)](#), [498\(3\)](#), [515\(3\)](#), [517\(3\)](#), [520\(3\)](#), [535\(3\)](#), [544\(3\)](#), [545\(3\)](#), [546\(3\)](#), [547\(3\)](#), [548\(3\)](#), [550\(3\)](#), [555\(3\)](#), [561\(3\)](#), [563\(3\)](#), [565\(3\)](#), [567\(3\)](#), [569\(3\)](#), [573\(3\)](#), [576\(3\)](#). [PLS 497](#) may be approved by the department.
3. 15 hours of electives from at least three of the following subfields:**
 - a. American Government and Politics: [PLS 316\(3\)](#), [317\(3\)](#), [413\(3\)](#), [414\(3\)](#).
 - b. International Politics: [PLS 301\(3\)](#), [333\(3\)](#), [437\(3\)](#), [439\(3\)](#), [535\(3\)](#), [547\(3\)](#).
 - c. Comparative Governments and Politics: [PLS 319\(3\)](#), [338\(3\)](#), [343\(3\)](#), [443\(3\)](#), [544\(3\)](#), [545\(3\)](#), [546\(3\)](#), [548\(3\)](#), [550\(3\)](#).
 - d. Public Administration: [PLS 102\(3\)](#), [315\(3\)](#), [351\(3\)](#), [355\(3\)](#), [498\(3\)](#), [555\(3\)](#), [573\(3\)](#).
 - e. Political Theory: [PLS 561\(3\)](#), [563\(3\)](#), [565\(3\)](#), [567\(3\)](#).
 - f. Public Law: [CRM 260\(3\)](#); [PLS 419\(3\)](#), [515\(3\)](#), [517\(3\)](#), [520\(3\)](#).

*Courses counted toward core requirements and Public Affairs Capstone will not also count toward elective requirements.

***Note: PLS 493, 494, 495, 496, 497 will be assigned to fields according to topic. No more than six hours will be counted toward the major from PLS 493, 494, 498. PLS 576 will also be used to complete the remaining hours of electives provided that student has one course from at least three of the subfields.*

Accelerated graduate program in Global Studies

Eligible Missouri State undergraduate students may apply for admission to the Master of Global Studies program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-global-studies.htm) (<https://graduate.missouristate.edu/Catalog/prog-global-studies.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Public Administration

Eligible Missouri State undergraduate students majoring in political science may apply for preliminary acceptance into the Master of Public Administration program after admission requirements for the accelerated graduate program have been satisfied. If accepted, a maximum of 12 hours may be counted toward both the undergraduate and graduate degrees (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/catalog/PolSci.htm) (<https://graduate.missouristate.edu/catalog/PolSci.htm>) for program details.

For courses to be designated as Mixed Credit, the graduate advisor, undergraduate department head, and Graduate College dean must approve by signing the Permission for Mixed Credit form. This form must be provided to the Office of the Registrar in Carrington Hall 320 no later than the end of the Change of Schedule Period for the semester. Refer to the [Mixed Credit website](#) ([/Registrar/mixedcredit.htm](#)) for procedures.

Terrorism and National Security Certificate

Terrorism and National Security

This certificate is jointly offered by the Department of Criminology and Criminal Justice and the Department of Political Science. The certificate is designed to provide students interested in careers related to counterterrorism and national defense with a critical understanding of causes of terrorist activity, recruitment and organizational strategies, and policies and practices aimed at strengthening homeland security. Students are exposed to a range of current issues from both national and global perspectives.

This certificate is administered by the Department of Criminology and Criminal Justice

Admission requirements

Completion of at least 60 hours and a GPA of 2.50 or higher.

Program requirements (15 hours)

1. National Defense requirement: [PLS 301\(3\)](#) or [CRM 440\(3\)](#).
2. National Terrorism requirement: [CRM 326\(1\)](#) and [CRM 327\(1\)](#) and [CRM 328\(1\)](#).
3. Global Terrorism requirement: [PLS 546\(3\)](#) or [HST 504\(3\)](#).
4. Six hours from: [CRM 332\(3\)](#), [CRM 580\(3\)](#), [HST 334\(3\)](#), [PLS 443\(3\)](#).
5. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of 2.50 or higher in courses used to fulfill the certificate requirements.

Religious Studies Courses

Religion (REL) courses

REL 100 Introduction to Religion

General Education Course (Focus on Cultural Competence).

Investigates what religion is and does, compares culturally diverse religious ideas and practices. This course explores how religion influences the relationship between individual and community by examining religious ethical systems, and providing community engagement opportunities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	RELG 100 - World Religion.

[Access the CORE 42 portal](#)

REL 101 Old Testament/Hebrew Bible

General Education Course (Focus on Humanities).

Explores the religion, life experiences, cultures, thoughts, and history of the ancient Israelites as found in their literature and artifacts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
--------------	-----------------------	-------------------	-------------------	---------------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	RELG 101O - Religious Texts-Old Testament.

[Access the CORE 42 portal](#)

REL 102 New Testament

General Education Course (Focus on Humanities).

An introduction to early Christian literature and the persons and movements that produced it in their Jewish and Greco-Roman contexts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	RELG 101N - Religious Texts-New Testament.

[Access the CORE 42 portal](#)

REL 131 Religion in America

General Education Course (Focus on Social and Behavioral Sciences).

A historical survey of different religious groups in America and their contributions to American identity and values. Includes the connections between religious affiliation and race, ethnicity, gender, politics, the media, and other aspects of U.S. society and culture.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REL 200 Religion in the News

Increases students' awareness of the presence and relevance of religion in current events and examines the influence of the news media on shaping public awareness and opinion of religion-related issues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

REL 210 Paths of World Religions

General Education Course (Focus on Cultural Competence).

A global survey of religious movements, including Hinduism, Buddhism, Taoism, Confucianism, Judaism, Christianity, and Islam. Students will learn how these religions have affected individual and cultural identities in history and in the contemporary world.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	RELG 100 - World Religion.

[Access the CORE 42 portal](#)

REL 312 The Hebrew Prophets

Recommended Prerequisite: REL 101. A survey of the prophetic literature of ancient Israel in its social and historical contexts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 315 Native American Religions

Recommended Prerequisite: REL 131. A survey of historical and contemporary Native American cultures and spiritualities, including Native responses to European contact and colonization.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 319 The Bible and Film

This movie-viewing course enables students to compare and to contrast films reflecting on biblical stories and themes. Films are viewed and grouped according to biblical stories, books, and themes and change each semester.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 320 Jesus of Nazareth

Recommended Prerequisite: REL 102. Jesus as presented in the canonical gospels and other early sources with attention given to literary and historical issues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

REL 321 Paul

Recommended Prerequisite: REL 102. An introduction to the historical Paul and scholarly interpretation of his writings.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

REL 322 Romans

Recommended Prerequisite: REL 102. Scholarly analysis of Paul's most influential writing with attention given to important historical and contemporary interpretations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 323 Apocalypses

Prerequisite: REL 101 or REL 102.

A historical and socio-rhetorical analysis of ancient Jewish and Christian apocalyptic movements and literature with some attention to modern examples. Canonical texts such as Daniel and Revelation will be examined in the context of numerous extra-canonical Jewish and Christian apocalypses.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 325 Dead Sea Scrolls

Explores the Dead Sea Scrolls, along with the archaeological excavations of nearby ruins. This course will introduce students to Second Temple Judaism, which has significant implications for the study of the Hebrew Bible, Rabbinic Judaism, and early Christianity and the New Testament.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 327 Religions of the Ancient Near East

Students will encounter the texts and monuments, ceremonies and rituals, and the religious assumptions of Egypt, Mesopotamia, Ugarit, and ancient Israel. Comparisons will be used to highlight the distinctive features of each religious system, with the goal of understanding the particularity and integrity of each tradition in the cradle of civilization.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 330 Judaism

A survey of the history and religion of the Jewish peoples, including the Holocaust, the State of Israel, and modern Jewish movements.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 332 Modern Religious Thought

Examines ways modernity impacted philosophy of religion in Europe and North America in the twentieth century. Major movements studied may include: Existentialism (Nietzsche, Kierkegaard, Tillich); Process Thought (Whitehead); Feminism (Ruether, Daly); Deconstruction (Derrida, Caputo); and African American thought (King, Cone).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 338 Death, Dying, and Afterlife

This course approaches death from religious, cultural, and historical perspectives. It surveys understandings of the afterlife in several religions, studies how people have prepared to die, and looks at the rituals that people have devised for burying their dead. Students learn how people have relied on religion to make death more understandable and tolerable.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 340 Christianity

Surveys Christian history from the second century to the present, exploring how past events have led to the development of contemporary churches, denominations, beliefs, and practices. Major topics: Eastern Christianity, Medieval Christendom, the Protestant Reformation, the Enlightenment, and global Christianity in the twenty-first century.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 341 C. S. Lewis

An analysis of a selection of Lewis's works of fiction and apologetics. Student will interpret these works in their historical, theological, philosophical, literary and cultural contexts. They will also read and discuss critiques of and challenges to Lewis's ideas.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 342 Catholicism

The Catholic Church is perhaps the oldest continuing institution in the world, influencing over a billion people since its beginnings in the first centuries after Jesus. This course has three main emphases: 1) an immersion in the best Catholicism has to offer—that is, the lives of its saints and its art; 2) an introduction to contemporary Catholicism, including its ongoing controversies; 3) a field experience. By the end of the semester, students should not only have knowledge about Catholicism, but also understand how the institution and its people have helped to shape western civilization.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 344 New Religious Movements

Often negatively designated by outsiders as "cults", New Religious Movements continue to emerge at a rapid rate. This course examines the histories, structures, beliefs, and impacts of such groups as the Church of Jesus Christ of Latter-day Saints, Nation of Islam, Scientology, Raelians, and others.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 345 African American Religious Experience

Recommended Prerequisite: REL 131. Explores the establishment and maintenance of African American religious institutions, particularly the Black Churches and their future development. Identical with AAS 346. Cannot receive credit for both REL 345 and AAS 346.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 346 Sexuality and American Religion

Recommended Prerequisite: REL 131. Examines historical and contemporary beliefs about sexuality as reflected in sexual practices and experiences, such as celibacy, marital and extra-marital sex, and homosexuality, in American Protestantism, Catholicism, Judaism, Islam, and Native American cultures. Also, the ways American social culture and religious attitudes about sexuality have influenced each other.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 347 Suffering and Meaning

An exploration of religious approaches to suffering, death and the making of meaning in life. Students will survey the complex history of western responses to the "problem of evil" in the Bible, literature, theology, and philosophy of religion by reading texts from Augustine to Derrida.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 348 Religion, Spirituality, and Health

This course explores the religious history of American hospitals, healing practices in American religions, debates about religiosity and health outcomes, the medical uses of yoga and Eastern meditation, and the heightened attention to spirituality in the health professions. Course content will be related to local health care providers and religious communities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 350 Islam

Origin, expansion, and continuity of Islam, including pre-Islamic influences, Muhammad, Qur'an and Tradition (hadith), sects, ritual and law, community and worldview, prayer and mysticism.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 353 Muslims and Christians

A historical survey of Muslim-Christian relations from the 7th century CE to the present day. Along with the study of important events between the two traditions, students will read primary sources in which Muslim and Christian thinkers come to terms with the religion of the other. The course covers major points of debate and commonality between the two traditions, as well as the prospects for Muslim-Christian dialogue and coexistence today.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 355 Buddhism

Recommended Prerequisite: REL 210. A broad survey of the diverse patterns and expressions of Buddhist life throughout history. Studies will examine the beliefs, practices, and values that have existed among adherents of Theravada, Mahayana, and Vajrayana Buddhism. Course materials will be drawn from Asian and Western cultures.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 357 Religions of China and Japan

Recommended Prerequisite: REL 210. An historical survey of the major religions from East Asia, with particular emphasis given to their doctrines, practices, and institutions. The course will focus on Confucianism, Daoism, Buddhism, and Shinto. Some consideration will also be given to Korean religious traditions, religion in contemporary East Asia, and popular religious traditions. Important themes include cultural adaptation and religious competition in East Asian religious history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 358 Yoga and Meditation

An examination of the history, philosophy, and practice of various yoga and meditation traditions from India and China. Emphasis will be given to Hindu, Buddhist, and Daoist systems that were developed for mental concentration, spiritual liberation, and immortality, among other religious aims. After surveying the development of yoga and meditation in Asia, the course will explore their uses in popular culture and health care in modern American society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 360 Hinduism

Recommended Prerequisite: REL 210. An historical and thematic survey of the religions of India from the Vedic period to the present day.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 362 Jesus and the Parable Tradition

A survey of extant parables in Greek, Jewish, Gnostic, Synoptic and Patristic traditions, and an examination of the history of methods in the interpretation of the Parables of Jesus. In the light of this study the student will read and interpret selected parables of Jesus.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 368 Body and Health in American Religions

From debates over immunization to religious dieting cultures, this course explores how diverse religions have shaped human bodies in sickness and health in North America. Students will analyze, debate, and evaluate how religious thought and practice have interacted with medical advancements, social and cultural changes, and recurring ethical questions in the American context in the human pursuit to understand and change the body and its health.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 370 Women and Religion

Exploration of women's roles in Christianity and other religions. Alienation from places of power has had profound implications for the personal, social, political, economic, and religious aspects of women's existence. Course will examine patterns of religious domination of women and explore possibilities for transformation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

REL 375 Religion and Science Fiction

Where do we come from? Where are we going? What does it mean to be human? What is reality? While religions typically provide answers to these fundamental questions in our lives, science fiction has also probed them in creative and radical ways. This course will explore the various relationships between religion and science fiction as they have appeared in movies, books, and actual cults (such as Scientology and the Raelians) from the so-called "Golden Age" of sci-fi to the present day.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 378 Religion and Healing in Modern America

An exploration of the relationship between folk, faith and biomedical healing, the course is a cross-cultural exploration of the story of religion and healing in America from the beginning of the twentieth century to the present. Using a chronological approach, students will examine historical interactions between a diversity of health-related worldviews and religious worldviews, from Pentecostalism to immigrant faiths, scientific challenges as well as alternative healing, African-American and also women's traditions, divine healing and the traditions of world religions in modern America.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 385 Religious Studies Service Learning

Prerequisite: 30 hours, concurrent registration in a Religious Studies course designated as a service learning offering.

Designed to provide a learning environment for research and reflection on the meaning of public and community service, this course is intended to strengthen human communities by modeling an ethos of service and integrating service into the Religious Studies curriculum. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

REL 390 Religion in Society

Examines the relationship between religion and its social context. Students will explore the social nature of individual religious institutions. The relationship between religion and modernity will be studied. The course will pay special attention to the role of religion in American society, as well as the religious dimensions of class, gender, region, and race/ethnicity. Identical with SOC 390. Cannot receive credit for both REL 390 and SOC 390.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 397 Religious Studies Topics

Recommended Prerequisite: 3 hours in Religious Studies. Selected topics of general interest in Religious Studies. Examples: Introduction to Archaeology and the Bible, Women in the Bible, Dead Sea Scrolls, the Holocaust, C. S. Lewis, Food and American Religion. May be repeated, as topics change, to a maximum of 9 hours. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

REL 399 Independent Study

Prerequisite: 9 hours in Religious Studies and permission of instructor.

Independent study of a Religious Studies topic related to student's major or special interest. Before registering for the course, student and instructor must sign an agreement that details the course requirements. May be repeated to a total of 6 hours. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

REL 499 Internship in Religious Studies

Prerequisite: Religious Studies major or minor and permission of instructor.

Supervised work experience in order to pursue a special interest in a professional setting where the student utilizes knowledge and skills acquire in the Religious Studies major or minor. May be repeated for a total of 6 hours, but no more than 3 hours may be counted toward the Religious Studies major or minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

REL 510 Topics in Biblical Studies

Prerequisite: 50 hours.

Recommended Prerequisite: REL 101 or REL 102. Advanced study of canonical and non-canonical texts and related subjects. Examples: Genesis, The Social World of Ancient Israel, Dead Sea Scrolls, Historical Jesus, Acts as History and Literature, Revelation and Apocalyptic Literature. Variable content course. May be repeated, as topics change, to a maximum of 9 hours. May be taught concurrently with REL 615. Cannot receive credit for both REL 615 and REL 510 for the same topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 530 Topics in Religion and Culture

Prerequisite: 50 hours.

Recommended Prerequisite: REL 100 or REL 131. Explores advanced issues in the study of religion as a component of cultural life including issues of gender, race, and ethnicity. Examples of topics: Religion and Politics; Religion, Media, and Popular Culture; Religion and Visual Culture; American Religious Communities; Lived Religion; Bible Belt Religion; Food and Religion; Women and Religion. Variable content course. May be repeated, as topics change, to a maximum of 9 hours. May be taught concurrently with REL 635. Cannot receive credit for both REL 635 and REL 530 for the same topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 540 Topics in the Religions of Asia

Prerequisite: 50 hours.

Recommended Prerequisite: REL 210. Studies of advanced topics in the comparative religions of Asia or in the history of a particular religious tradition. Topics may include material ranging from ancient history to the present day. Examples: Colonialism, Religion and Culture, Yoga, Fundamentalism. Variable content course. May be repeated, as topics change, to a maximum of 9 hours. May be taught concurrently with REL 645. Cannot receive credit for both REL 645 and REL 540 for the same topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 550 Topics in Religions of Europe and the Middle East

Prerequisite: 50 hours.

Recommended Prerequisite: REL 330, REL 340, or REL 350. Selected topics of advanced content in Judaism, Christianity, and/or Islam. Examples: Jewish Mysticism; Jewish Philosophy; The Spirituality of Martin Luther and John Calvin; Women in the History of Christianity; Islamic Law and Ethics; Sufism. Variable content course. May be repeated, as topics change, to a maximum of 9 hours. May be taught concurrently with REL 655. Cannot receive credit for both REL 550 and REL 655 for the same topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

REL 570 Archaeology and the Bible

Prerequisite: 50 hours.

Recommended prerequisite: REL 101 or REL 102. Archaeological discoveries in their relation to the literary, cultural, and religious background of the Bible. Methods and objectives of archaeological research, including a brief history of Near Eastern archaeology. May be taught concurrently with REL 675. Cannot receive credit for both REL 675 and REL 570.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 580 Theories of Religion

Prerequisite: 60 hours and permission.

This required course for majors surveys influential theories of religion from the Enlightenment to the present and includes their relationship to public affairs. Students will write a major research paper involving theoretical perspectives learned in the course. May be taught concurrently with REL 685. Cannot receive credit for both REL 685 and REL 580. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

REL 615 Topics in Biblical Studies

Recommended Prerequisite: REL 101 or REL 102. Advanced study of canonical and non-canonical texts and related subjects. Examples: Genesis, The Social World of Ancient Israel, Dead Sea Scrolls, Historical Jesus, Acts as History and Literature, Revelation and Apocalyptic Literature. Variable content course. May be repeated, as topics change, to a maximum of 9 hours. May be taught concurrently with REL 510. Cannot receive credit for both REL 615 and REL 510 for the same topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 635 Topics in Religion and Culture

Recommended Prerequisite: REL 100 or REL 131. Explores advanced issues in the study of religion as a component of cultural life including issues of gender, race, and ethnicity. Examples of topics: Religion and Politics; Religion, Media, and Popular Culture; Religion and Visual Culture; American Religious Communities; Lived Religion; Bible Belt Religion; Food and Religion; Women and Religion. Variable content course. May be repeated, as topics change, to a maximum of 9 hours. May be taught concurrently with REL 530. Cannot receive credit for both REL 530 and REL 635 for the same topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 645 Topics in Religions of Asia

Recommended Prerequisite: REL 210. Studies of advanced topics in the comparative religions of Asia or in the history of a particular religious tradition. Topics may include material ranging from ancient history to the present day. Examples: Colonialism, Religion and Culture, Yoga, Fundamentalism. Variable content course. May be repeated, as topics change, to a maximum of 9 hours. May be taught concurrently with REL 540. Cannot receive credit for both REL 540 and REL 645 for the same topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 655 Topics in Religions of Europe and the Middle East

Recommended Prerequisite: REL 330, REL 340, or REL 350. Selected topics of advanced content in Judaism, Christianity, and/or Islam. Examples: Jewish Mysticism; Jewish Philosophy; The Spirituality of Martin Luther and John Calvin; Women in the History of Christianity; Islamic Law and Ethics; Sufism. Variable content course. May be repeated, as topics change, to a maximum of 9 hours. May be taught concurrently with REL 550. Cannot receive credit for both REL 655 and REL 550 for the same topic.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

REL 675 Archaeology and the Bible

Recommended Prerequisite: REL 101 or REL 102. Archaeological discoveries in their relation to the literary, cultural, and religious background of the Bible. Methods and objectives of archaeological research, including a brief history of Near Eastern archaeology. May be taught concurrently with REL 570. Cannot receive credit for both REL 570 and REL 675.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 685 Theories of Religion

Prerequisite: permission of department head.

This required course for graduate students surveys influential theories of religion from the Enlightenment to the present. Students will write a major research paper involving theoretical perspectives learned in the course. May be taught concurrently with REL 580. Cannot receive credit for both REL 580 and REL 685.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

REL 711 Seminar in Religions of Asia

This seminar will examine a specific topic or tradition within Asian religions. Students can expect to do focused reading, discussion, and research on a particular subject related to the Hindu, Buddhist, Islamic, and/or other traditions of Asia. Historical and contemporary material, along with critiques of scholarship in the field, may be considered. May be repeated once if topic is different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 731 Seminar in Biblical Studies

Recommended Prerequisite: REL 730. This seminar examines a specific topic within the history and literature of the Hebrew Bible/Old Testament and/or New Testament. Students can expect to do focused reading, discussion, and research on a particular historical, literary, and/or methodological issue pertaining to the topic. Variable content course. May be repeated once if topic is different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 751 Seminar in Religions of Europe and the Middle East

Detailed study of selected persons, authors, movements, and eras in the history of Judaism, Christianity, Islam, or other religions of Europe and the Middle East. Variable content course. May be repeated once if topic is different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 771 Seminar in Religion and Culture

Recommended Prerequisite: REL 770. A seminar applying various perspectives to individual religious practice and religious institutions in selected Western and non-Western societies. May be repeated once if topic is

different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

REL 796 Readings in Religious Studies

Prerequisite: recommendation of the Religious Studies general graduate advisor and permission of instructor.

Arranged program of readings for the individual student directed by a member of the graduate faculty. Before enrolling in the course, student and instructor must sign an agreement that details the course requirements. Variable content course. May be repeated, when topics varies, to a maximum of 9 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

REL 799 Thesis

Prerequisite: recommendation of the Religious Studies general graduate advisor and permission of student's thesis advisor.

The student will prepare an in-depth thesis on a clearly-defined topic within his or her area of specialization. Before enrolling in the course, student and thesis advisor must sign an agreement that details the course requirements. May be repeated to a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

Interfaith Engagement Certificate

Interfaith Engagement

This certificate is jointly offered by the Department of Religious Studies and the Department of Communication and is designed to equip students to participate in interfaith activities and to increase their cultural competence with religious diversity. The program will assist students in developing the knowledge base and communication skills to engage people with different orientations in and around religion. Students who complete this certificate will acquire a background to work with religious diversity in settings in the United States and across the globe.

This certificate is administered by the Department of Religious Studies.

Program requirements (16 hours)

1. Required Core Courses (select two courses with two different course codes - 6 hours):
 - a. [COM 205\(3\)*](#) or [COM 260\(3\)*](#).
 - b. [REL 100\(3\)*](#) or [REL 210\(3\)*](#).
2. One course in Communication Skills: [COM 205\(3\)*](#), [COM 260\(3\)*](#), [COM 326\(3\)](#), [COM 332\(3\)](#), [COM 336\(3\)](#), [COM 511\(3\)](#), [COM 513\(3\)](#).
3. One course in Human Experience: [REL 100\(3\)*](#), [REL 332\(3\)](#), [REL 338\(3\)](#), [REL 346\(3\)](#), [REL 347\(3\)](#), [REL 368\(3\)](#), [REL 370\(3\)](#), [REL 378\(3\)](#), [PSY 533\(3\)](#).
4. One course in Religious Diversity: [REL 131\(3\)](#), [REL 210\(3\)*](#), [REL 330\(3\)](#), [REL 340\(3\)](#), [REL 342\(3\)](#), [REL 344\(3\)](#), [REL 350\(3\)](#), [REL 353\(3\)](#), [REL 355\(3\)](#), [REL 357\(3\)](#), [REL 360\(3\)](#).
5. Engaged Learning Experience (1 hour): [REL 399](#) Independent Study or another approved course. Students in this program select a one-credit hour course that engages them in interfaith activities outside of the classroom. The director of the certificate program will assist the student in identifying an appropriate engaged interfaith project that is consistent with the aims of the certificate. The program offers a variety of engaged learning experiences through campus and community partners. Service-Learning courses may be used to count for this requirement, subject to approval by the program director. Students may also propose their own engaged learning experience, which is subject to approval by the director of the certificate program. To request permission to enroll in the required independent study course, REL 399 or an appropriate alternative, contact the Director of the Undergraduate Certificate in Interfaith Engagement.

6. All candidates must satisfy the [General University Certificate Requirements](#).

*Courses may only apply to one area of the certificate program.

Completion requirement

Attain a GPA of 2.50 or higher in the courses used to complete the certificate requirements.

Medical Humanities Certificate

Medical Humanities

This certificate is jointly offered by the Department of Religious Studies and the Department of Sociology and Anthropology. The certificate provides a cross-disciplinary study of cultural and personal engagement with illness and health. The program offers social, historical, rhetorical, and artistic approaches to urgent questions of bodily experience that are often limited to scientific medical paradigms. The certificate will assist students in a variety of disciplines to develop skills for empathizing with the experiences of others, interpreting personal challenges and tragedies in life stories, understanding ethical dilemmas and notions of moral responsibility, and evaluating complex arguments about the practice and costs of health care in contemporary society. Such diverse perspectives will greatly enrich courses of study in health-related fields as well as any fields of critical inquiry into human cultures and communities.

This certificate is administered by the Department of Religious Studies.

Program requirements (12 hours)

1. Four courses from the following but no more than two with the same course code: [ANT 515\(3\)](#), [ECO 504\(3\)](#), [ENG 563\(3\)](#), [ENG 570\(3\)](#); [GER 309\(3\)](#) or [PSY 309\(3\)](#); [GER 363\(3\)](#) or [PSY 363\(3\)](#); [GER 370\(3\)](#) or [PSY 370\(3\)](#); [HST 529\(3\)](#), [IPE 376\(3\)](#), [IPE 377\(3\)](#), [LLT 321\(3\)](#), [PHI 313\(3\)](#), [REL 338\(3\)](#), [REL 347\(3\)](#), [REL 348\(3\)](#), [REL 358\(3\)](#), [REL 368\(3\)](#), [REL 378\(3\)](#), [SOC 341\(3\)](#), [SOC 375\(3\)](#).
2. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of at least 2.50 or higher in courses used to complete the certificate requirements.

Sociology and Anthropology Courses

Anthropology (ANT) courses

ANT 100 World Cultures

General Education Course (Focus on Cultural Competence).

An exploration of cultural differences throughout the world, with emphasis on nonwestern societies, from the perspective of cultural anthropology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	ANTH 201 - Cultural Anthropology.

[Access the CORE 42 portal](#)

ANT 125 Exploring Our Human Ancestry

General Education Course (Focus on Social and Behavioral Sciences).

This course explores what it means to be human by tracing our biological and cultural roots. Topics include the evolutionary process; our place among the living primates; fossil and archaeological evidence of human ancestors; and the origins of language, society, and culture.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	ANTH 101 - General Anthropology.

[Access the CORE 42 portal](#)

ANT 303 Cultural Anthropology

The comparative study of human society and culture, focusing on theories of culture and cultural institutions and ethnographic and cross-cultural methods of research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	ANTH 201 - Cultural Anthropology.

[Access the CORE 42 portal](#)

ANT 304 Biological Anthropology

An examination of biological aspects of humanity from comparative and evolutionary perspectives. Topics include evolutionary theory, the origin and evolution of nonhuman primates and humans, primate behavior, biological variation among human populations, and anatomical and physiological influences on behavior.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

ANT 305 Introduction to Archaeology

An introduction to the goals, methods, theories, issues, and ethics of archaeology-the study of cultures in the past from the remains they left behind. Topics will include archaeological survey, excavation, dating techniques, artifact analysis, conservation, and cultural adaptation and change.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

ANT 306 Linguistic Anthropology

This course is an introduction to the field of linguistic anthropology, with special emphasis on language as a basic component of human culture. Subjects include the humanness of language, the study of linguistic structure, description and analysis of languages, origins of human speech, the history of languages and writing, the use of language in social relations, and the relationship among language, thought, and culture.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ANT 309 Service Learning in Anthropology

Prerequisite: 30 hours and concurrent registration in an anthropology course designated as a service learning offering.

An integrative learning experience which addresses the practice of citizenship and promotes an awareness of and participation in public affairs by incorporating community service with classroom instruction. Includes 40 hours on-task service to a community organization, agency or public sector provider. The community service placement agency and service assignment will vary, dependent on the disciplinary course topic and learning objectives. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

ANT 312 Anthropology of Gender

Prerequisite: ANT 100 or ANT 303 or permission of instructor.

Theories, concepts, and case studies relating to the cultural and social construction of gender from an anthropological perspective. Students will examine gender in relation to sexuality, fertility, child-bearing, self-identification, family, power, status, voice, hegemony/resistance, colonialism, and globalization in cultures and societies around the world. Identical with AAS 312. Cannot receive credit for both ANT 312 and AAS 312.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 314 Environmental Anthropology

Prerequisite: ANT 100 or ANT 303.

An introduction to the anthropological study of the dynamic relationship between humans and their environment. Students will learn how belief systems, political ideologies and religions around the world have

shaped human-environment relationships.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 315 Anthropology of Globalization

Prerequisite: ANT 100 or ANT 303 or permission of instructor.

This course critically examines the interconnected modern world using theories, methods, case studies, and concepts developed in cultural anthropology. Students will explore how economic exchanges, new media, human migration, knowledge flows, and other dimensions of globalization are variously experienced in diverse parts of the world by tracing global structures of power and mobility.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 316 Ends of Life

Prerequisite: ANT 100 or ANT 303 or permission of instructor.

This course explores the social, cultural, and biological nature of human personhood in the context of death and dying. Students will examine anthropological literature that seeks to explain and interpret the tremendous cross-cultural variation in mortuary rituals and funerary behavior, the cultural construction of death, mourning and bereavement, and medical and ethical issues relating to death and dying. Students will also examine a variety of ways that U.S. society deals with death and dying today.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 320 Ethnography

Prerequisite: ANT 100 or ANT 303.

In this course students will read, critique, and compare selected ethnographic accounts of societies around the world and explore ways in which anthropologists have written about and interpreted cultures.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 325 North American Indian Cultures

Prerequisite: ANT 100 or ANT 303.

A survey and comparison of Native American societies and cultures in North America (north of Mexico), including their ecology, subsistence, technology, social organization, politics, and religion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 326 Plains Indian Cultures

This course examines the origins, development, and traditional cultures of Native American groups in the North American Plains region. Topics will include the prehistoric record, historical influences, material culture, subsistence, languages, social organization, trade, law and social control, warfare and alliances, art and religion.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 330 Peoples and Cultures

Anthropological study of a cultural region of the world (such as the Caribbean, Latin America, or Southeastern Indians), including environment, subsistence, technology, economy, social and political organization, and religion. Identical with AAS 330. Cannot receive credit for both ANT 330 and AAS 330. Variable content course. May be repeated when topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

ANT 332 Peoples and Cultures of Africa

An exploration of African societies (especially sub-Saharan), including family structure, gender relations, social and political organization, beliefs, economics, art, oral literature, music, dance, and other aspects of culture. Identical with AAS 333. Cannot receive credit for both ANT 332 and AAS 333.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 334 Peoples and Cultures of Japan

An anthropological survey of the culture and cultural development of the peoples of Japan, from prehistory to the present, including cultural ideology and ethos, social organization, major cultural principles, customs, religion, technology, material culture, and the arts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 336 Peoples and Cultures of Latin America

An overview of the peoples and cultures of Latin America. Explores culture, politics, economics, race, ethnicity, religion, gender, health, popular culture, social movements, environmental issues, and historical developments in Latin America from an anthropological perspective.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 340 Archaeology of Complex Societies

Prerequisite: ANT 305 or permission of instructor.

A detailed consideration of the archaeological study of complex societies, emphasizing the origins and development of social forms and institutions of the modern world such as social inequality, urbanism, and nation-states and empires. Case studies may be selected from Africa, Asia, Europe, North America, and South America.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 342 Hunters and Gatherers

Prerequisite: 30 hours or permission of instructor.

Explores past and present hunter-gatherer (non-agricultural) societies through all subfields of anthropology, especially cultural anthropology and archaeology. Topics include subsistence, technology, gender, social organization, religion, environmental sustainability, the cultural sustainability of contemporary hunter-gatherers, popular stereotypes, and the history of anthropological approaches to hunter-gatherers. Uses case studies from diverse regions such as Australia, Africa, Asia, Europe, and the Americas.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 345 Historical Archaeology

Prerequisite: ANT 305.

Historical archaeology investigates the emergence of the modern world over the past ca. 500 years through the study of the material traces of human behavior, in conjunction with the study of written and oral records. This course provides an in-depth introduction to the field of historical archaeology including its methods, theoretical approaches, debates, and applications. Key topics include the historical archaeology of colonialism, slavery, class, gender, ethnicity, consumerism, capitalism, and industrialization. By the end of the course, students will understand how archaeologists recover, analyze, and interpret historical artifacts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 351 Field Archaeology

Prerequisite: ANT 125 or ANT 305; and permission.

Field experience in the techniques, methods and theories of reconnaissance and excavation of archaeological sites. May be repeated to a maximum of nine hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3-6			Upon demand

ANT 355 Environmental Archaeology

Prerequisite: ANT 305 or BIO 122 or GLG 110 or GLG 171 or GRY 108 or GRY 142.

This course focuses on the archaeological study of human interactions with the environment over long periods of time and in multiple settings. It will emphasize both the methods scientists in multiple disciplines use to reconstruct past environments and the conceptual frameworks that are relevant to understanding how people acted on and reacted to the changing world around them. As a holistic and diachronic study of the socio-natural system, environmental archaeology can provide unique perspectives on today's ecological challenges.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 360 North American Archaeology

Prerequisite: ANT 305.

Americanist archaeology is distinctive as a set of theoretical and methodological orientations. This course illustrates those orientations through archaeological case studies of initial human migrations, hunting-and-gathering societies, the formation of more complex polities, and European colonialism in North America. The multiple contexts of archaeological research and its impacts on living people are also considered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 361 Research Methods in Biological Anthropology

Prerequisite: ANT 304 or concurrent enrollment.

A survey of techniques and materials used in biological anthropology. Course will cover the main areas of biological anthropology with a focus on hands-on learning activities in the realms of evolutionary theory, basic human genetics, primatology, human evolution, and forensic anthropology. Students will use the departmental collection of bones and fossil casts to become familiar with skeletal remains and the variability that exists in human and nonhuman primate populations, past and present.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 363 Survey of Forensic Anthropology

A survey of the scope of forensic anthropology, which deals with identification and interpretation of human skeletal remains in medico-legal contexts. Included in this course are both theoretical and practical components. Topics to be discussed include the history and ethics of forensic anthropology, forensic investigation, influence of activity and disease on bone, and human rights applications. Practical aspects cover identification of bones and features of the human skeleton; techniques for determining age, sex, stature and race, and distinguishing human from nonhuman skeletal remains.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 365 Human Variation

Prerequisite: ANT 304, or BIO 101 and 111, or BIO 121, or BMS 100 and 101, or BMS 110 and 111.

An examination of ways in which humans have adapted both genetically and physiologically to a wide variety of environments and how these adaptations have produced the biological variation seen in contemporary human populations. Major topics will include historical and current approaches to classifying human groups, human growth and development, adaptation and acclimatization to specialized environments, genetic disease, and tracing lineages through DNA analysis. It will also explore recent studies relating human biology to social constructs such as gender, race, ethnicity, and intelligence.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 370 The Living Primates

Prerequisite: ANT 304 or BIO 122 or PSY 336.

An introduction to the human species' closest relatives, the nonhuman primates (prosimians, monkeys, and apes); their taxonomy, distribution, morphology, ecology, evolution, behavior, and conservation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 375 Human Evolution

Prerequisite: ANT 304 or BIO 122.

An exploration into the evolution of the human species, through examination of fossil and molecular evidence.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 380 Language and Culture

Prerequisite: ANT 306 or ENG 296.

Advanced study in linguistic anthropology on topics such as ethnographies of speaking, ethnolinguistics, language change and historical linguistics. Variable content course. May be repeated when topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ANT 390 Native American Code Talkers

This course explores the use of Native American languages in U.S. military service during World War I and World War II. The cultural background of code talkers, their recruitment, use in combat situations and post war experiences will be examined, along with their unique status in Native American cultures and recent efforts to document and recognize them.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

ANT 395 History of Anthropological Theory

Prerequisite: ANT 303 and 60 hours.

This course traces the development of anthropology and anthropological theory, with emphasis on the major theorists and schools of thought in the twentieth century. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

ANT 397 Special Topics

Selected topics such as primitive technology, cultural ecology and behavioral evolution. Variable content course. May be repeated to a maximum of nine hours when topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

ANT 490 Field Experience in Anthropology

Prerequisite: permission of instructor.

Supervised group study and/or research in an off campus setting. A fee may be charged to cover travel expenses. Identical with AAS 490. Cannot receive credit for both ANT 490 and AAS 490. Variable content course. May be repeated when topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

ANT 499 Internship in Anthropology

Prerequisite: 18 hours of ANT and permission of instructor.

This independent study course provides an opportunity to earn academic credit for supervised work experience related to anthropology with an approved business, industry, organization, or government agency. May be repeated to a maximum of six hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

ANT 500 Applied Cultural Anthropology

Prerequisite: ANT 303 and 60 hours.

An introduction to the field of applied anthropology, which is the application of anthropological methods, theories, and knowledge to the problems of society. Applied anthropology is the fastest growing field of anthropology today because it provides a basis for many careers. Course will examine the role of cultural anthropologists in areas such as foreign aid and development projects, migrant and refuge services, disasters and humanitarian assistance, human rights issues, business and industry, health and medicine, tourism, environmental protection, fisheries management, the military, and cultural preservation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 505 Ethnohistory

Prerequisite: ANT 303 and 60 hours.

The use of documents, maps, photos, recordings, oral histories, artifacts, folklore, linguistics, and ethnography to reconstruct the culture history of a social or ethnic group, particularly historically marginalized peoples such as Native Americans.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 511 Ethnographic Field Methods

Prerequisite: ANT 303 and 60 hours.

Ethnographic methods and techniques in the study of culture, with emphasis on participant-observation, interviewing, note-taking and management, data analysis, and ethics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ANT 514 Anthropology of Development

Prerequisite: ANT 303 and 60 hours.

This course examines theories, concepts, underlying assumptions, and case studies about aid and other assistance to developing nations. It will consider the various meanings given to development by residents of particular regions, as well as those of aid workers, policy makers, private industries, non-governmental and non-profit organizations, and government officials. The course will examine how development projects and policies in areas such as public health and food systems are experienced in daily life in urban and rural areas in Africa, Latin American, and Asia. Students will develop critical thinking skills about the role of culture in the complex and diverse world of international aid.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 515 Medical Anthropology

An examination of health, illness and healing from an applied anthropological perspective, Medical anthropology is one of the largest fields in the discipline of anthropology today, and one that has obvious applications. Topics may include: evolutionary perspectives on illness, the cultural construction of illness, cross-cultural variations in illness and healing, ethnomedical beliefs and practices, shamanism and other forms of symbolic healing, ethnobotany, and relations between biomedicine and ethnomedicine.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 516 Anthropology of Tourism

Prerequisite: ANT 303 and 45 hours.

Tourism is a huge, powerful, and problematic industry that is having profound effects on peoples and cultures around the globe today, particularly in societies traditionally studied by anthropologists. The anthropological study of tourism seeks to understand the motives and experiences of the tourist, the relationships between "hosts" and "guests", and the impacts of the industry on communities, cultures, and identities. This course pays particular attention to ethnic, cultural, and heritage tourism and to "best practices" that promote sustainable community development as well as social justice and cultural preservation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 525 North American Indians Today

Prerequisite: 60 hours.

Recommended Prerequisite: ANT 325. Focuses on major developments in North American Indian life in the 20th and 21st centuries, including cultural, social, economic, political, environmental, and legal issues that affect Native Americans today.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 545 Cultural Resource Management

Prerequisite: 60 hours.

An examination of laws and regulations pertaining to the preservation of American history and culture and the professional management and preservation of ethnic, historic, and prehistoric cultural resources. May be taught concurrently with ANT 645. Cannot receive credit for both ANT 545 and ANT 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ANT 550 Advanced Methods in Archaeology

Prerequisite: ANT 305 and 60 hours.

Advanced study and practice in methods and techniques employed in archaeology such as lithic, ceramic, and faunal analysis. Variable content course. May be repeated when topic changes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

ANT 555 Archaeological Theory

Prerequisite: ANT 305 and 60 hours.

A comprehensive and in-depth examination of theoretical issues and perspectives concerning the practice of archaeology and the interpretation of archaeological remains.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 596 Directed Readings in Anthropology

Prerequisite: 6 hours of ANT and permission of instructor.

Readings designed to supplement material introduced in previous anthropology courses. Includes a wide selection of literature in the field. May be repeated to a maximum of six hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

ANT 598 Seminar in Anthropology

Prerequisite: 60 hours including 3 hours of Anthropology.

A detailed investigation and analysis of a specialized or advanced topic of interest to anthropology (e.g., Upper Paleolithic art, the evolution of human behavior, ethnographies of religion). May be repeated when topic changes. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

ANT 599 Directed Research in Anthropology

Prerequisite: 9 hours in Anthropology and permission of instructor.

Individual or group research involving supervised collection and analysis of cultural data. May be repeated to a maximum of nine hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

ANT 645 Cultural Resource Management

An examination of laws and regulations pertaining to the preservation of American history and culture and the professional management and preservation of ethnic, historic, and prehistoric cultural resources. May be taught concurrently with ANT 545. Cannot receive credit for both ANT 645 and ANT 545.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

ANT 795 Directed Readings in Anthropology

Prerequisite: permission of instructor.

Supervised readings in preparation for a practicum or thesis project.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

Sociology (SOC) courses

SOC 150 Introduction to Society

General Education Course (Focus on Social and Behavioral Sciences).

The study of society including its structure and operation from the perspective of sociology. The course focuses on ways society is constructed by people and, in turn, on the ways society shapes people. This general education course supplies students with a community as well as global, multicultural understanding of society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	SOCI 101 - General Sociology.

[Access the CORE 42 portal](#)

SOC 152 Social Problems in the Community

Prerequisite: 12 hours.

General Education Course (Focus on Public Issues).

Sociological perspectives on contemporary social issues and problems in American society that are faced by today's communities. A public sociology focus is addressed in this course. This general education course will

allow students to recognize the importance of contributing their knowledge and experiences to help resolve social problems in their own community and the broader society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	SOCI 201 - Social Problems.

[Access the CORE 42 portal](#)

SOC 300 Service Learning Curricular Component

Prerequisite: 30 hours and concurrent registration in a Sociology course designated as service learning offering.

An integrative learning experience which addresses the practice of citizenship and promotes an awareness of and participation in public affairs by incorporating community service with classroom instruction. Includes 40 hours on-task service to a community organization, agency or public service provider. The community service placement agency and service assignment will vary, dependent on the disciplinary course topic and learning objectives. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

SOC 301 Research Methodology

Methods of collecting and analyzing data including survey, interviewing and observation techniques, scaling and sampling designs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SOC 302 Statistics for Social Research

A first course in statistics for students whose college and career paths require knowledge of the fundamentals of the collection, analysis and interpretation of data. Topics include the presentation of interpretation of univariate and bivariate data using graphical and numerical methods, probability, discrete and continuous probability distributions, linear regression, statistical inference, confidence intervals and hypothesis testing. Emphasis is placed on the development of statistical thinking and the use of technology. Cannot receive credit toward a degree for more than one of the following courses: AGR 330, IPE 381, MTH 340, PSY 200, QBA 237, REC 328, SOC 302.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SOC 305 Population, Society, and Public Policy

This course provides an introduction to the field of demography with an emphasis on demographic techniques, population processes of fertility, mortality, migration, and the impact of population change on society and public policy. Topics of interest will include analysis of population size, characteristics, and growth/decline; overpopulation and sustainability; population aging, cohorts, and generations; changes to the family (fertility, marriage, divorce, and cohabitation); myths and realities surrounding immigration; and the role of public policy in addressing population issues.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SOC 309 Work, Industry, and Society

The industrialization of society and its impact on formal and informal organization, management philosophies, worker attitudes and labor relations. Current trends affecting the work place are examined.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 310 Social Deviance

An historical survey of the explanations of deviant behavior. Emphasis will focus on the structure of norms and rules, their diversity, and their role in identifying deviance.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 311 Sociology of Sexuality

This course studies a wide range of sexual phenomena from a sociological perspective. Sociologists know that sex does not happen in a vacuum. To the contrary, sex is tied up with history, culture, politics, and power. Though we like to believe that our sexual behavior is a private experience untouched by society, sexual desire and

sexual activity are in fact structured by social interactions. We can see this in the way that sexuality, sexual practice, and sexual identity are not static concepts, but rather are fluid and different throughout time and space.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (even-numbered years), Spring (even-numbered years)

SOC 315 The Family

The family as a social institution; its adjustment to modern social conditions; personality adjustments in marriage.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 316 Urban Sociology

The rise and development of urban settlements (cities), their ecology, problems, and an examination of urbanism as a way of life generated in cities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SOC 318 Sociology of Love and Courtship

This course will explore love, romance, desire, courtship, and intimate relationships in the modern world. We will examine some of the cultural, structural, and historical conditions that shape one of the most profound sets of human experiences: those associated with love and relationships.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SOC 319 Environmental Sociology

This course examines the causes and consequences of environmental problems, environmental movements, impacts of technological change, environmental policy and the state, environmental values, attitudes, and

behaviors. Specific topics will vary, but may include resource scarcity, toxics, overconsumption, agricultural production, and more.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 320 Political Sociology

Introduces students to a sociological analysis of political organization forms and their relations with other elements of social life. Students examine the concept of power and the intersection of personality, social structure, and politics. The course also emphasizes how social inequality between groups (e.g. race, class, and gender, etc.) influences politics and elaborates major social trends affecting the political process including how various social forces work to change political policies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 325 Introduction to Sociological Theory

Prerequisite: SOC 150.

A survey of the development of sociological theory with emphasis upon the social and historical influences shaping the thought of classical theorists.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SOC 332 Juvenile Delinquency

This course examines the topic of juvenile delinquency from a sociological perspective. Emphasis is placed on measuring and explaining the occurrence of delinquency in the United States. The course also takes a critical look at societal responses to the delinquency problem, including the juvenile justice system.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 336 Race and Ethnicity

This course explores the social construction of race and ethnicity. Issues of differential power between racial and ethnic groups and the economic, political, and social structures which are utilized to maintain these power differences are identified. Social movements and social policies designed to address social inequality, prejudice and discrimination are also examined. Identical with AAS 336. Cannot receive credit for both SOC 336 and AAS 336.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 337 Sociology of Gender

This course focuses on gender differences, patterns, and inequalities. It analyzes the social construction of gender, femininities and masculinities, gender socialization, and how gender intersects with race, class, and sexuality. Specific attention is paid to the significance of gender in interaction, culture, and social institutions, including work, politics, media, and the family.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 341 Medical Sociology

An analysis of the ecological, sociopsychological and cultural aspects of health and illness, both physical and mental, and of the social organization of health care services and of health professions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SOC 357 Sociology of Sport

Investigation and analysis of the relationship between sport and society; the development and changing nature of sport as an institution; role of sport in modern society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 360 The Individual in Society

This course explores how self understanding emerges in a social context and is inseparable from that context. It examines the symbolic basis of communication, traces the interdependency of self and other awareness, and probes the social organization of human experience.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 375 Social Forces and Aging

Prerequisite: sophomore standing.

This course examines the aging process, demographic trends, and the social, economic, and social-psychological aspects of aging in the United States. Students will be introduced to current theories on aging in social gerontology and their application to the everyday lives of older people. Topics of interest include social attitudes toward aging, family and social bonds, work and retirement, gender issues, ethnicity and aging, living environments, and approaches to aging well. Students will learn about the role of federal, state and local agencies in meeting the needs of the elderly. Identical with GER 375. Cannot receive credit for both GER 375 and SOC 375.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 380 Sociology of Law

The interaction of law and society from a sociological perspective with emphasis upon legal institutions as instruments of social control. The impact of social values on the development of the legal order and the reciprocal influence of the law on social behavior.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

SOC 384 Social Movements

The study of collective attempts to implement social change in society. Specific groups studied will vary, but may include the civil rights, feminist, political, religious, environmental and health movements.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SOC 390 Religion in Society

Examines the relationship between religion and its social context. Students will explore the social nature of individual religious institutions. The relationship between religion and modernity will be studied. The course will pay special attention to the role of religion in American society, as well as the religious dimensions of class, gender, region, and race/ethnicity. Identical with REL 390. Cannot receive credit for both SOC 390 and REL 390. May be taught concurrently with SOC 790. Cannot receive credit for both SOC 390 and SOC 790.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 397 Special Topics

Selected topics of contemporary interest in Sociology. May be repeated to a total of 6 hours when the topic changes. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SOC 398 Public Sociology and Community Studies

Prerequisite: SOC 150 and Sociology major or minor.

Explores how Public Sociology is practiced and connected to the local community. Provides conceptual tools for analyzing communities and creates a foundation for meaningful community engagement. Each section will apply sociological theories and methods to a specific community issue or problem.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

SOC 403 Special Topics in Social Research

Prerequisite: SOC 301.

This course provides instruction and applied experience in a particular research method such as: survey design, program evaluation, interview/focus groups, field method, quantitative analysis, etc. Variable content course. May be repeated to a total of six hours when the topic changes. No more than six hours may be applied to the Sociology major.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SOC 420 Social Inequality

Prerequisite: SOC 150.

An analysis of the structure, sources, and consequences of social inequality and the dimensions along which it may be observed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SOC 430 The Nonprofit Sector and Civil Society

This course is a broad exploration of the nonprofit organizational environment and how it relates to civil society. It explores the wide variety of organizations within the nonprofit sector, such as nonprofit and voluntary organizations, non-governmental organizations, philanthropic foundations, and civil society institutions. It reviews theories explaining the development of the nonprofit sector in relation to business and government. It combines a theoretical/conceptual approach with practical applications and local community examples. Nonprofits are explored at local (Springfield), national, and global levels.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

SOC 456 Food in Society

This course examines how procuring food impacts societal organization and is a catalyst for social change. The basic premise of this course is that understanding how a society feeds itself will reveal many sociological insights such as the distribution of wealth and power and the health of individuals and communities.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

SOC 470 Practicum in Applied Sociological Research

Prerequisite: SOC 301 and SOC 302 and SOC 325 and permission of instructor.

Group experience in designing and carrying out an applied community research project. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	4	Upon demand

SOC 492 Leadership and Professional Development

Prerequisite: senior standing.

All students majoring in Sociology are required to enroll in this course during their senior year. This course serves as the Public Affairs Capstone Experience for the Sociology major. The course has three focus areas: 1) career or graduate school preparation for upcoming graduates; 2) leadership concepts and applications; and 3) an individualized, community-based, applied experience in community service, career preparation, or research. In addition, students will complete several program-specific assessments of learning outcomes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Fall, Spring

SOC 497 Special Topics

Prerequisite: 9 hours sociology and permission of instructor.

Selected topics in substantive areas in sociology such as theory, methodology, social organization, social psychology, demography, criminology and family. Offered when resources and demand allow. May be repeated to a total of 6 hours when topic changes. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SOC 499 Internship in Applied Sociology

Prerequisite: 18 hours in Sociology and permission of instructor.

Supervised work experience in business, industry, governmental, institutional and/or agency settings where sociological skills are utilized. One credit hour for each 35 clock hours on the job. No more than six hours internship credit may be applied to the Sociology major.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

SOC 596 Directed Readings in Sociology

Prerequisite: permission of instructor.

Readings designed to supplement material introduced in previous Sociology courses. Includes a wide selection from literature in the field. May be repeated to a total of 9 hours, but no more than 6 hours may be applied to the sociology major. May be taught concurrently with SOC 697. Cannot receive credit for both SOC 697 and SOC 596.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SOC 599 Sociological Research

Prerequisite: SOC 150 and SOC 301 and SOC 302 and SOC 325 and permission of instructor.

Independent and/or group work in research methodology, data manipulation and presentation in selected fields of sociology. May be repeated to total of 9 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

SOC 697 Directed Readings in Sociology

Prerequisite: permission of instructor.

Readings designed to supplement material introduced in previous Sociology courses. Includes a wide selection from literature in the field. May be repeated to a total of 9 hours, but no more than 6 hours may be applied to the sociology major. May be taught concurrently with SOC 596. Cannot receive credit for both SOC 596 and SOC 697.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

Archaeology Certificate

Archaeology

Archaeology is the study of past human cultures through their material remains. Beyond studying the past, archaeology involves a concern for the management of archaeological sites, the interpretation of cultural heritage, and the ethics of preserving and presenting the human past. Students who complete this certificate will gain hands-on knowledge of archaeological field and/or laboratory methods, become familiar with theories used to interpret the archaeological record, and learn about the importance of archaeology for understanding past societies and contributing to contemporary societies. These skills and knowledge are advantageous for a range of careers including archaeology, cultural resource management, applied anthropology, natural resource management, museum work, and public history.

Program requirements (12 hours)

1. Required core: [ANT 305\(3\)](#); and [ANT 351\(3\)](#) or [550\(3\)](#).
2. Six additional hours from the following. The Archaeology certificate advisor may approve substitution of relevant coursework not listed here. [ANT 340\(3\)](#), [345\(3\)](#), [351\(3\)*](#), [355\(3\)](#), [360\(3\)](#), [505\(3\)](#), [545\(3\)](#), [550\(3\)*](#), [555\(3\)](#); [ANT 397\(3\)**](#), [499\(3\)**](#), [598\(3\)**](#).

*Variable content courses repeatable for credit towards the certificate if the content differs.

**When applicable, as determined by the Archaeology certificate advisor.

3. All candidates must satisfy the [General University Certificate Requirements](#).

Program restrictions

Students may not declare or earn both a certificate and a minor in Archaeology. No more than six hours may be used towards completion of both the Archaeology Certificate and another degree program.

Undergraduate Catalog

Cultural Anthropology Certificate

Cultural Anthropology

This certificate prepares students to work in an increasingly global and diverse workplace. It exposes students to fundamental concepts in cultural anthropology, strengthening their ability to understand, appreciate, and work with people from diverse cultures. Students must take an introduction to cultural anthropology and three substantive courses in the field.

Program requirements (12 hours)

1. Core course: [ANT 303\(3\)](#).
2. Three courses from the following for a total of nine hours: [ANT 100\(3\)](#), [306\(3\)](#), [312\(3\)](#), [314\(3\)](#), [315\(3\)](#), [316\(3\)](#), [320\(3\)](#), [325\(3\)](#), [326\(3\)](#), [332\(3\)](#), [334\(3\)](#), [336\(3\)](#), [380\(3\)](#), [395\(3\)](#), [397\(1-3\)*](#), [490\(1-6\)](#), [499\(1-6\)*](#), [500\(3\)](#), [505\(3\)](#), [511\(3\)](#), [514\(3\)](#), [515\(3\)](#), [516\(3\)](#), [525\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

*When relevant as determined by certificate coordinator or advisor.

Diversity in the United States Certificate

Diversity in the United States

This certificate is designed to provide students with course work and experiences to enhance the student's cultural competence and increase understanding issues of diversity and inclusion. This will also assist in providing the background students will need to live and work in a diverse workforce and society. In keeping with the university's public affairs mission the certificate seeks to equip students for greater cultural consciousness in the workplace and in the community. It is especially designed for students who will work in diverse environments associated with human resources, corporations or non-profits, and sales and marketing with a focus on issues of domestic diversity as experienced in the United States as evidenced in the title. Students completing this program will have a better understanding of the nature of social diversity and issues that people from diverse backgrounds experience.

Admission requirements

Completion of at least 30 hours and a GPA of 2.50 or higher.

Program requirements (12 hours)

1. Four courses from: [AAS 100\(3\)](#), [ANT 525\(3\)](#), [COM 512\(3\)](#), [CRM 410\(3\)](#), [CRM 415\(3\)](#), [DAS 100\(3\)](#), [GST 170\(3\)](#), [HST 324\(3\)](#), [HST 331\(3\)](#), [HST 332\(3\)](#), [REL 346\(3\)](#), [REL 370\(3\)](#), [SOC 336\(3\)](#), [SOC 337\(3\)](#).
2. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirements

Attain a C or better in all courses used to fulfill the certificate requirements. No more than two courses can be taken with the same course code.

Family and Juvenile Support Services Certificate

Family and Juvenile Support Services

This certificate is jointly offered by the Department of Sociology and Anthropology, Department of Childhood Education and Family Development, and Department of Criminology and Criminal Justice. It is designed to provide students with the specialized training for working with families in legal contexts especially in the area of delinquency. Students who complete this certificate will better understand the nature of modern families and adolescents and the issues they deal with related to juvenile delinquency.

This certificate is administered by the Department of Sociology and Anthropology.

Admission requirements

Completion of at least 60 hours and a GPA of 2.50 or higher.

Program requirements (12 hours)

1. One course on introduction to families from: [CFD 163\(3\)](#), [CFD 361\(3\)](#), [SOC 315\(3\)](#).
2. One course on youth/adolescent studies from: [CFD 505\(3\)](#), [CFD 557\(3\)](#), [PSY 441\(3\)](#).
3. One course on delinquency from: [CRM 330\(3\)](#), [SOC 332\(3\)](#).
4. One elective course from: [CFD 562\(3\)](#), [CRM 325\(3\)](#), [SOC 310\(3\)](#), [SWK 370\(3\)](#).
5. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of 2.50 or higher for all courses used to fulfill the certificate requirements.

Linguistics

Minor(s)

Linguistics

Bachelor of Arts

This minor is an interdisciplinary program jointly offered by the College of Arts and Letters and Department of Sociology and Anthropology.

1. [ENG 296\(3\)](#) or [ANT 306\(3\)](#).
2. 12 hours from: [ANT 380\(3\)*](#), [CSD 209\(3\)](#), [CSD 210\(2\)](#), [CSD 312\(3\)](#), [ENG 390\(3\)](#), [ENG 491\(3\)](#), [ENG 494\(3\)](#), [ENG 590\(3\)](#), [ENG 592\(3\)](#), [ENG 593\(3\)*](#), [ENG 595\(3\)](#), [FRN 324\(3\)](#), [PSY 523\(3\)](#), [SPN 324\(3\)](#), [SPN 524\(3\)](#). Other courses may be substituted with approval of committee. No more than 12 hours of the 15-hour minor may be taken from any one department.
*Variable content course; up to nine hours may be applied to the minor when the topic changes.
3. No more than three hours of the minor may also count for a major requirement.

Linguistics

Bachelor of Science

Bachelor of Science in Education (Non-Certifiable)

This minor is an interdisciplinary program jointly offered by the College of Arts and Letters and Department of Sociology and Anthropology.

1. [ENG 296\(3\)](#) or [ANT 306\(3\)](#).
2. 12 hours from: [ANT 380\(3\)*](#), [CSD 209\(3\)](#), [CSD 210\(2\)](#), [CSD 312\(3\)](#), [ENG 390\(3\)](#), [ENG 491\(3\)](#), [ENG 494\(3\)](#), [ENG 590\(3\)](#), [ENG 592\(3\)](#), [ENG 593\(3\)*](#), [ENG 595\(3\)](#), [FRN 324\(3\)](#), [PSY 523\(3\)](#), [SPN 324\(3\)](#), [SPN 524\(3\)](#). Other

courses may be substituted with approval of committee.

*Variable content course; up to nine hours may be applied to the minor when the topic changes.

3. At least six hours of a foreign language (including American Sign Language). A student may take three hours each of two different languages. No more than 12 hours of the 21-hour minor (except for foreign language) may be taken from any one department.
4. No more than three hours of the minor (except for foreign language) may also count for a major requirement.

Medical Humanities Certificate

Medical Humanities

This certificate is jointly offered by the Department of Religious Studies and the Department of Sociology and Anthropology. The certificate provides a cross-disciplinary study of cultural and personal engagement with illness and health. The program offers social, historical, rhetorical, and artistic approaches to urgent questions of bodily experience that are often limited to scientific medical paradigms. The certificate will assist students in a variety of disciplines to develop skills for empathizing with the experiences of others, interpreting personal challenges and tragedies in life stories, understanding ethical dilemmas and notions of moral responsibility, and evaluating complex arguments about the practice and costs of health care in contemporary society. Such diverse perspectives will greatly enrich courses of study in health-related fields as well as any fields of critical inquiry into human cultures and communities.

This certificate is administered by the Department of Religious Studies.

Program requirements (12 hours)

1. Four courses from the following but no more than two with the same course code: [ANT 515\(3\)](#), [ECO 504\(3\)](#), [ENG 563\(3\)](#), [ENG 570\(3\)](#); [GER 309\(3\)](#) or [PSY 309\(3\)](#); [GER 363\(3\)](#) or [PSY 363\(3\)](#); [GER 370\(3\)](#) or [PSY 370\(3\)](#); [HST 529\(3\)](#), [IPE 376\(3\)](#), [IPE 377\(3\)](#), [LLT 321\(3\)](#), [PHI 313\(3\)](#), [REL 338\(3\)](#), [REL 347\(3\)](#), [REL 348\(3\)](#), [REL 358\(3\)](#), [REL 368\(3\)](#), [REL 378\(3\)](#), [SOC 341\(3\)](#), [SOC 375\(3\)](#).
2. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of at least 2.50 or higher in courses used to complete the certificate requirements.

Non-profit Leadership Certificate

Non-profit Leadership

This certificate is jointly offered by the Department of Sociology and Anthropology, Department of Communication, and School of Social Work. This certificate prepares students for leadership in non-profit organizations by equipping them to take management roles in these types of organizations and by learning about the nature of non-profit organizations and essential skills for administering programs at non-profit organizations. This certificate is essential for students who envision creating a non-profit organization or plan to be involved in the development or supervision of community-based programs.

This certificate is administered by the Department of Sociology and Anthropology.

Program requirements (12 hours)

1. One course in introduction to non-profit organization from: [SOC 430\(3\)](#), [SWK 543\(3\)](#).
2. One course in non-profit leadership from: [COM 436\(3\)](#), [PLS 255\(3\)](#), [SOC 492\(3\)](#).
3. Two courses in essential skills in non-profit leadership from: [ACC 201\(3\)](#), [COM 315\(3\)](#), [COM 336\(3\)](#), [COM 566\(3\)](#), [ENG 572\(3\)](#), [GER 470\(3\)](#), [GER 480\(3\)](#), [SWK 595\(3\)](#).

(<mailto:cnas@missouristate.edu>)

Eligible Missouri State undergraduate students in a major in the College of Natural and Applied Sciences may apply for preliminary acceptance into the Master of Natural and Applied Science program after admission requirements for the accelerated master's option have been satisfied. If accepted, a maximum of 12 credit hours from approved graduate-level courses may be counted toward both the graduate and undergraduate degrees (Mixed Credit). This option offers an opportunity for CNAS majors whose goals, academic capabilities, and career planning include graduate work, to complete the requirements for the master's degree in less time than would otherwise be possible. Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm) (<https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm>) for more information.

For courses to be designated as Mixed Credit, the graduate advisor, undergraduate department head, and Graduate College dean must approve by signing the Permission for Mixed Credit form. This form must be provided to the Office of the Registrar in Carrington Hall 320 no later than the end of the Change of Schedule Period for the semester.

Undergraduate Catalog

Natural and Applied Sciences Courses

Science Education (SCI) courses

SCI 214 Introduction to Science Teaching in the 21st Century

Prerequisite: completion of eight hours of science courses.

The course is an introduction to science teaching and to the field of science. Topics in the course include the nature of science, scientific inquiry and research in the sciences. The students will explore how scientists conduct research and how teachers and students conduct research in classrooms. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall

SCI 314 Techniques and Technology in Science Laboratory Teaching

Prerequisite: SCI 214 and SEC 302; and one laboratory courses in each science discipline: BIO, CHM, PHY, GLG or GRY.

Instruction will focus on safe and effective uses of laboratory techniques and technology to teach science. The course will emphasize the potential of the science laboratory as a vehicle to promote student understanding of science and scientific inquiry. Pre-service teachers will have opportunities to familiarize themselves with laboratory equipment and techniques they will use to teach science in middle or high schools. Field trips to local schools will be required. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

SCI 404 Teaching of Middle School Natural Science

Prerequisite: BIO 205 and CHM 116 and 117 and PHY 101 and GRY 240; EDC 350 or concurrent enrollment; and admission to Teacher Education Program; RDG 318 and MID 421 are recommended.

Integration of current science learning theories and standards into practical classroom experiences for students of diverse backgrounds and abilities. Students will learn to design and teach science through various inquiry pedagogical approaches. A 15 hour practicum is required. Field trips are required. Portfolio checkpoint 2 is partially addressed through assignments in this course. Credited only on BSEd degree. A grade of "C" or better is required in this course in order to take MID 493 or MID 494. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

SCI 414 Teaching of Secondary School Natural Science

Prerequisite: admission to the Teacher Education Program; SCI 214 and SCI 314; completion of 20 hours in the primary science field; minimum of one required course in BIO, CHM, PHY, GLG or GRY; EDC 350 or concurrent enrollment; RDG 474 is recommended.

Integration of current science learning theories and standards into practical classroom experiences for students of diverse backgrounds and abilities. Students will learn to design and teach science through various inquiry pedagogical approaches. Students will learn to assess content knowledge achievement through formal and informal techniques. Practical classroom management will be emphasized. A 15 hour practicum is required. Field trips are required. Portfolio checkpoint 2 is partially addressed through assignments in this course. Credited only on BSEd. A grade of "C" or better is required in this course in order to take SCI 493 and SCI 494. Cannot be taken Pass/Not Pass. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

SCI 493 Supervised Teaching (Secondary Science)

Prerequisite: SCI 414; a grade of "C" or better in all professional education courses; current pre-professional liability insurance; and approval for supervised teaching; and concurrent enrollment in SCI 494.

Student observes, then teaches science under the direction of the cooperating teacher and the university supervisor. Student participates in school-related activities appropriate to the assignment and attends all

required meetings. In order to receive a grade in this course, the student's professional portfolio must meet or exceed final criteria. Course will not count toward the major GPA. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6			Fall, Spring

SCI 494 Supervised Teaching (Secondary Science)

Prerequisite: concurrent enrollment in SCI 493.

Student observes, then teaches under the direction of the cooperating teacher and the university supervisor. Student participates in school-related activities appropriate to the assignment and attends all required meetings. In order to receive a grade in this course, the student's professional portfolio must meet or exceed final criteria. Course will not count toward the major GPA. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6			Fall, Spring

SCI 499 Clinical Experience in Teaching II

Prerequisite: EDC 199; and admitted to Teacher Education Program; and grades of "C" or better in all professional education courses; and completion of portfolio checkpoints 1 and 2; and current pre-professional liability insurance; and program approval.

This course is designed to meet HB 1711 for student's experience as a Teacher's Aide or Assistant Rule (Rule 5 CSR 80-805.040), to that of conventional student teachers within the same program. It is also designed to support completion of additional clinical requirements within that program including: seminars and workshops, required meetings, school related activities appropriate to the assignment, demonstrated mastery of the MoSPE standards and completion and overall assessment of a Professional Preparation Portfolio. This course is credited only on BSEd or appropriate masters-level certification programs. Can only receive credit for one of the following: AGE 499, AGT 499, ART 469, COM 493, ECE 499, ELE 499, ENG 434, FCS 498, HST 499, KIN 498, MCL 491, MID 499, MTH 496, MUS 499, SCI 499, SEC 499, SPE 499, THE 493.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Fall, Spring

SCI 505 Intellectual Foundations of Science and Technology

Prerequisite: 70 hours including 8 hours of natural science.

An historical and philosophical examination of the origins and the development of science and technology. The differences between science and technology, their interrelationships in modern times, and the impact of each of

these on society will be considered. May be taught concurrently with SCI 605. Cannot receive credit for both SCI 605 and SCI 505.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SCI 580 Topics in Science Education

Prerequisite: 70 hours.

A variable content course for offering selected topics of interest to science teachers in the elementary, middle, or secondary schools; or in college classrooms. May be repeated up to 6 hours when the topic varies. No more than 6 hours may be counted toward a degree. May be taught concurrently with SCI 685. Cannot receive credit for both SCI 685 and SCI 580.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

SCI 605 Intellectual Foundations of Science and Technology

An historical and philosophical examination of the origins and the development of science and technology. The differences between science and technology, their interrelationships in modern times, and the impact of each of these on society will be considered. May be taught concurrently with SCI 505. Cannot receive credit for both SCI 505 and SCI 605.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

SCI 662 Teaching Science Using Technology in the Classroom and Laboratory

Prerequisite: SCI 784.

In this course, students will experience hands-on uses of technology in the science classroom and science teaching laboratory. Instruction will focus on safe and effective uses of laboratory techniques and technology to teach science. The course will emphasize the potential of the science laboratory as a vehicle to promote student understanding of science and scientific inquiry. There is a special emphasis on using technology and online resources to supplement instruction in the science classroom. This includes, but not limited to, the use of probes, various software simulations and modeling programs along with internet access to databases and other appropriate websites showing simulations, etc. that support the learning environment in science.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Summer

SCI 685 Topics in Science Education

A variable content course for offering selected topics of interest to science teachers in the elementary, middle, or secondary schools; or in college classrooms. May be repeated up to 6 hours when the topic varies. No more than 6 hours may be counted toward a degree. May be taught concurrently with SCI 580. Cannot receive credit for both SCI 685 and SCI 580.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

SCI 780 Advanced Topics in Science Education

Prerequisite: 12 hours of graduate coursework.

A variable content course for offering selected topics of interest to science teachers in the elementary, middle, or secondary schools; or in college classrooms. May be repeated up to 6 hours when the topic varies. Maximum of 6 hours may be counted toward degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

SCI 783 Internship in Teaching Secondary Science I

Prerequisites: SFR 797; passed the Missouri Content Assessment exam in the primary science emphasis area; and current pre-professional liability insurance. Introduction to the fundamental skills necessary to become a confident well rounded science teacher in the high school setting. This course emphasizes integration of current science learning theories and standards into classroom experiences. Students learn to design and teach science through various inquiry pedagogical approaches. Students learn to assess content knowledge achievement through formal and informal techniques. Practical classroom management will be emphasized. During the 75 hour practicum experience, students observe classroom teachers and teach science under the direction of a cooperating teacher and the university supervisor. Students participate in school-related activities and attend all required meetings. Students complete an on-going seminar through face-to-face meetings or synchronous online communication.

3	1	4	Fall

SCI 784 Internship in Teaching Secondary Science II

Prerequisite: SCI 783; passed the Missouri Content Assessment exam in the primary science emphasis area; and current pre-professional liability insurance.

This course is a professional internship for science teacher education candidates. The teacher candidate is assigned to a school district with a cooperating teacher and is expected to observe, tutor, teach and reflect upon the results of these activities. As a reflective practitioner, the teacher candidate alters the practice or consciously continues. Teacher candidates will also demonstrate mastery of the all MTS quality indicators that comprise the student teaching evaluations. In addition to becoming a reflective practitioner, teacher candidates are expected to meet the needs of individuals with diverse learning needs and provide students with an appropriate multicultural perspective. Students participate in school-related activities and attend all required meetings. Students complete an on-going seminar through face-to-face meetings or synchronous online communication.

Biology Courses

Biology (BIO) courses

BIO 100 Biological Science for Educators

Prerequisite: open only to Early Childhood, Elementary, Middle School, and Special Education majors.

General Education Course (Focus on Life Sciences).

An introduction to the unifying principles of biology and the processes of scientific investigation using an inquiry approach. Laboratory experiences model inquiry teaching methods appropriate for use in early childhood, elementary, and middle school science lessons. Cannot count towards a major or minor in biology. Students receiving credit towards graduation for BIO 100 cannot also receive credit for BIO 101 or BIO 111.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	3	3	Fall, Spring	BIOL 100LT - Essentials in Biology with Lab-Teaching.

[Access the CORE 42 portal](#)

BIO 101 Biology in Your World

General Education Course (Focus on Life Sciences).

A non-laboratory course that can fulfill the General Education requirement in the Life Sciences. Organisms are studied from their behavioral, ecological, heredity and evolutionary perspectives. Topics include examination of the human body in health and disease; the relevance of biology to contemporary issues in human society; an

introduction to environmental science and ecology with emphasis on the interrelationships of living and nonliving things in ecosystems and how disruptions of these relationships result in environmental problems. Cannot count towards a biology major or minor. Students receiving credit towards graduation for BIO 101 and/or BIO 111 cannot also receive credit for BIO 100.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring, Summer	BIOL 100 - Essentials in Biology.

[Access the CORE 42 portal](#)

BIO 102 Principles of Biological Science

General Education Course (Natural World).

Unifying principles of biology from the molecular level through ecosystems. Includes laboratory experience. Does not count for credit towards major or minor in biology. Students receive credit towards graduation for only one of BIO 100, 101, or 102.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

BIO 111 Laboratory for Biology in Your World

Prerequisite: BIO 101 or concurrent enrollment.

General Education Course (Focus on Life Sciences).

A laboratory course that partially fulfills the general education requirement in the Life Sciences. Organisms are studied from their physiological, behavioral, ecological, hereditary, and evolutionary perspectives. Students will develop skills of gathering information about science, reasoning scientifically from that information and synthesizing responses to questions based upon that information in order to explain biological phenomena. Cannot count towards a biology major or minor. Students receiving credit towards graduation for BIO 101 and/or BIO 111 cannot also receive credit for BIO 100.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
1	0	2	Fall, Spring, Summer	BIOL 100L - Essentials in Biology with Lab.

[Access the CORE 42 portal](#)

BIO 121 General Biology I

Prerequisite: eligibility for both ENG 110 and MTH 135.

General Education Course (Focus on Life Sciences).

First half of 2-semester introductory biology sequence for biology majors and minors. Introduction to the concepts of biological structure and function at the molecular and cellular level, genetics, and evolution. Cannot be taken Pass/Not Pass. A grade of C or better is required in this course in order to take BIO 122.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	3	3	Fall, Spring	BIOL 150L - Biology with Lab.

[Access the CORE 42 portal](#)

BIO 122 General Biology II

Prerequisite: eligibility for both ENG 110 and MTH 135.

Recommended Prerequisite: BIO 121. Second half of two-semester introductory biology sequence for biology majors and minors. Introduction to the biology of organisms including evolutionary history, diversity, structure, and function of major taxa; and ecology. Cannot be taken Pass/Not Pass. A grade of "C" or better is required in this course in order to take BIO 235, BIO 320, BIO 367 or BIO 368.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

BIO 197 Selected Topics in Biology

Prerequisite: permission of instructor.

Course devoted to a biologic topic of current interest. May be repeated to a maximum of four hours provided the topics are different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

BIO 205 Life Science for Middle School

Prerequisite: BIO 100 or BIO 101 and 111.

Processes of science using the inquiry approach with reference to society, technology, and decision-making. Content covers cellular biology, plant and animal structure and function, ecology and environmental biology. Does not count for credit towards major or minor in biology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Spring

BIO 210 Elements of Microbiology

Prerequisite: CHM 116 and 117 or CHM 160; and 4 hours of BIO or BMS courses.

Public health aspects of microbiology, particularly causes and control of infectious diseases, immunology, sterilization and disinfection, and food and water bacteriology. A student who takes BIO 210 and BIO 310 receives credit toward graduation only for BIO 310.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

BIO 212 Elements of Microbiology

Prerequisite: CHM 116 and CHM 117 or CHM 160 and CHM 161; and 4 hours of BIO or BMS courses.

Public health aspects of microbiology, particularly causes and control of infectious diseases, immunology, sterilization and disinfection, and food and water bacteriology. A student who takes BIO 212 and BIO 312 receives credit toward graduation only for BIO 312.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

BIO 213 Elements of Microbiology Laboratory

Prerequisite: BIO 212 or concurrent enrollment.

Microbiology laboratory class associated with BIO 212 with emphasis on development of sound laboratory skills. A student who takes BIO 213 and BIO 313 receives credit toward graduation only for BIO 313.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

BIO 235 Genetics

Prerequisite: BIO 121 or BMS 110 and 111; and CHM 116 and 117 or CHM 160 and 161 (recommended) or higher, and MTH 135 or higher.

Principles of classical and molecular genetics, epigenetics and biotechnology. Course content is foundational to concepts of modern biology, recommended for all majors in life science-related fields.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BIO 236 Genetics Laboratory

Prerequisite: BIO 235 or concurrent enrollment; concurrent enrollment is strongly encouraged.

Problem-solving and laboratory skills to complement lecture material presented in BIO 235. Emphasis on the chemical characteristics and in vitro manipulation of nucleic acids. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	3	Fall, Spring

BIO 300 Service Learning in Biology

Prerequisite: 30 hours and permission, and concurrent registration in a Biology course designated as a service learning offering.

This service component for an existing course incorporates community service with classroom instruction in biology to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; students should investigate possible placements, available through the Biology Department and the Citizenship and Service Learning Office, prior to registration. May be repeated. A total maximum of three hours from any combination of BIO 300, 399, and 499 credit may be counted towards the major. Graded Pass/Not Pass only. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

BIO 302 Biology Seminar

Prerequisite: BIO121 or BMS 110; and BIO 122.

Introduction to major fields of study in biology, the role of biology in the public affairs mission, and information on career development, undergraduate research, Education Abroad opportunities, and applying to graduate/professional schools. Graded Pass/Not Pass only. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

BIO 310 Microbiology

Prerequisite: "C-" or better in BIO 235 and BIO 236, or BMS 230 and BMS 232, or BMS 231; and "C-" or better in CHM 116 and 117, or CHM 160.

Fundamental principles of microbiology; development of sound laboratory skills. A student who takes BIO 210 and BIO 310 receives credit toward graduation only for BIO 310.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	4	Fall, Spring

BIO 312 Microbiology

Prerequisite: "C-" or better in BIO 235 and BIO 236 or BMS 230 or BMS 231; and "C-" or better in CHM 116 and CHM 117 or CHM 160 and CHM 161.

Fundamental principles of microbiology for Biology majors and pre-professional students. A student who takes BIO 212 and BIO 312 receives credit toward graduation only for BIO 312.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BIO 313 Microbiology Laboratory

Prerequisite: BIO 312 or concurrent enrollment.

Microbiology laboratory associated with BIO 312 for Biology majors and pre-professional students with emphasis on development of sound laboratory skills. A student who takes BIO 213 and BIO 313 receives credit toward graduation only for BIO 313.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall, Spring

BIO 320 Cellular and Molecular Biology

Prerequisite: "C-" or better in BIO 235 and BIO 236, or BMS 230 and BMS 232, or BMS 231; and "C-" or better in CHM 201 and 202, or CHM 342.

The structure and function of cells and their constituents, including biomolecules, with an emphasis on eukaryotes.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

BIO 334 Plant Taxonomy

Prerequisite: BIO 122.

Basic systematic principles, including the naming, classification, diversity, and evolution of angiosperms. Laboratory emphasis is on vegetative and reproductive morphology, use of taxonomic keys, and identification of common families and species of the local flora.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Spring

BIO 339 Identification of Woody Plants

Prerequisite: BIO 122.

A field course emphasizing the identification of woody plants (including some ornamentals) of the Interior Highlands of North America. Some consideration of forest communities and their distribution will also be included. Some Saturday field trips scheduled.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall

BIO 355 Developmental Biology

Prerequisite: BIO 235 and BIO 236, or BMS 230 and BMS 232, or BMS 231.

Public Affairs Capstone Experience course. An in-depth study of the molecular and cellular mechanisms involved in the development of vertebrate, invertebrate, and plant systems. Lectures will emphasize fertilization, morphogenesis, differentiation, induction, regeneration, and neoplasia. Laboratory exercises will emphasize techniques utilized by developmental biologists. Review of current literature and poster presentations will be required. May be taught concurrently with BIO 655. Cannot receive credit for both BIO 355 and BIO 655.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Upon demand

BIO 361 General Physiology

Prerequisite: "C-" or better in BIO 235 and BIO 236.

A study in animal biology that emphasizes the functional features of whole organisms including physiological regulations. A grade of "C" or better is required in this course in order to take BMS 363.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Fall, Spring

BIO 367 General Ecology

Prerequisite: BIO 122 and MTH 135 or higher.

Introduction to the basic concepts of ecology. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

BIO 368 General Ecology Lab

Prerequisite: BIO 367 or concurrent enrollment.

Methods used in ecological studies. Intended to emphasize sampling techniques and data analyses pertinent to lecture material in BIO 367.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring, Summer

BIO 369 General Ecology

Prerequisite: BIO 122 and MTH 135 or higher.

Introduction to the basic concepts of ecology. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

BIO 370 Invertebrate Zoology

Prerequisite: BIO 121 and BIO 122.

Biological principles exemplified by study of functional morphology, taxonomy and phylogeny of invertebrate phyla. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Spring (odd-numbered years)

BIO 371 Introduction to Entomology

Prerequisite: BIO 121 and BIO 122.

Introduction to insect structure and function with emphasis on comparative morphology, physiology, life history, behavior, and ecology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Fall

BIO 373 Principles of Wildlife Management

Prerequisite: BIO 122.

This course considers ecological principles, conservation, and management policies for wild animals and habitats. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BIO 377 Marine Science II: Marine Biology

Prerequisite: 8 hours biology; and concurrent enrollment in BIO 378.

A general introduction to marine biology with emphasis on local fauna and flora. Recommended for students considering a career in any phase of Oceanography. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

BIO 378 Marine Science II: Marine Biology Lab

Prerequisite: concurrent enrollment in BIO 377.

Laboratory portion of BIO 377. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Summer

BIO 380 Comparative Vertebrate Anatomy

Prerequisite: BIO 121 and BIO 122.

Vertebrate gross anatomy. Phylogeny and present status of organ systems of vertebrates. Shark, mud puppy and cat serve as principal sources for laboratory exercises. May be taught concurrently with BIO 680. Cannot receive credit for both BIO 380 and BIO 680.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	2	6	Fall

BIO 398 Laboratory Internship in Biology

Prerequisite: BSEd major in Biology Education; BIO 310 and BIO 367 and BIO 368, and permission of instructor.

This course provides the opportunity to earn academic credit through supervised laboratory preparation and teaching. Graded Pass/Not Pass only. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	3	Fall, Spring

BIO 399 Cooperative Education in Biology

Prerequisite: acceptance into Cooperative Education Program and permission of department head.

This course provides the opportunity to earn academic credit integrated with a supervised work experience. Under the guidance of a faculty advisor, students will complete a work-related independent study project. Variable content course. May be repeated to a maximum of six hours. A maximum of three hours from any combination of BIO 300, 399 and 499 may be counted towards the biology major. Graded Pass/Not Pass only. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

BIO 436 Plant Ecology

Recommended Prerequisite: BIO 367 and BIO 368. The dynamics, structure, and distribution of plant populations and communities, with emphasis on interactions among plants, plants and other organisms, and plants and ecosystems. Laboratory emphasis on experimental studies in the greenhouse and field. Weekend field trip is required. May be taught concurrently with BIO 636. Cannot receive credit for both BIO 436 and BIO 636.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall

BIO 485 Marine Conservation

Recommended Prerequisite: BIO 122 and BIO 367 and BIO 368 or permission. An overview of current issues related to the conservation and management of marine organisms, with emphasis on marine species and habitats exploited or endangered by human actions. May be taught concurrently with BIO 685. Cannot receive credit for both BIO 485 and 685. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Summer

BIO 492 Biology Program Assessment

Prerequisite: 90 hours including 20 hours of BIO courses, and biology major.

Comprehensive assessment examination for Biology majors. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
0			Fall, Spring

BIO 494 Senior Seminar

Prerequisite: 90 hours and biology major.

Current issues in the biological sciences will be discussed and information on post-graduate opportunities for biology majors will be presented. Successful completion of the Major Field Achievement Test will be required. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

BIO 498 Honors Senior Project

Prerequisite: student must be a biology major and have junior standing and be a member of the Honors College and permission of instructor.

The content of the project is determined by the honors student in consultation with a faculty member serving as project advisor and approved by the Director of the Honors College. The project can be started no earlier than the first semester of the junior year and must be completed before graduation. May be repeated to a maximum of nine hours. A maximum of three hours may be counted toward the major in biology. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

BIO 499 Undergraduate Research

Prerequisite: Biology major with a minimum of a 3.00 GPA; and 20 hours in Biology courses; and permission of instructor.

Outstanding students obtain additional experience through independent study. May be repeated to a maximum of three hours. A maximum of three hours from any combination of BIO 300, 399 and 499 may be counted towards the major. Graded Pass/Not Pass only. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

BIO 501 Natural History Museum Techniques

Techniques in the development of natural history museum displays including making models, design of displays, writing educational text, and other techniques. Course will be taught off-site at the Bull Shoals Field Station and Chase Studio. May be taught concurrently with BIO 601. Cannot receive credit for both BIO 501 and BIO 601. Identical with MST 501. Cannot receive credit for both BIO 501 and MST 501. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

BIO 502 Sustainability Science in Practice

Recommended Prerequisite GRY 108 or BIO 122. After exploring the three pillars of sustainability (environment, social equity, economics), students will embark on developing a research proposal in their area of study. Research in virtually all areas related to sustainable development can be a focus of a student's research proposal. For example: food, health, education, economics, social and gender equity, energy, law and diplomacy, land use change, biodiversity loss, chemical pollution, freshwater use, water quality, climate change mitigation, environmental remediation, smart structures, alternative energy, supply chain logistics and smart grids. May be taught concurrently with BIO 602. Cannot receive credit for both BIO 502 and BIO 602.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

BIO 504 Plant-Animal Interactions

Prerequisite: BIO 367 and BIO 368; or BIO 436.

The theories, evolutionary and ecological patterns, and major current topics in plant-animal interactions. This course encourages independence in learning, synthesizing, and communicating science via discussions and presentations. Topics are flexible and guided by student interests. May be taught concurrently with BIO 604. Cannot receive credit for both BIO 504 and BIO 604.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BIO 505 Human Nature

Prerequisite: BIO 235 and BIO 236 or BMS 230 or BMS 231; and PSY 121.

A survey of current biological research on the behavioral, psychological, and cognitive dimensions of human biology. This course emphasizes the evolution and function of human social behaviors and value systems, but also addresses the genetics of human psychological diversity, the genetics of human-ape divergence, and the neurobiology of human cognition. May be taught concurrently with BIO 605. Cannot receive credit for both BIO 505 and BIO 605. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BIO 508 Environmental Microbiology

Prerequisite: BIO 212 and 213 (or prior credit for BIO 210); or BIO 312 and 313 (or prior credit for BIO 310).

The study of the ecology of microorganisms and the applied use of microorganisms by man in the environment. Laboratory will emphasize current methods used in the field of environmental microbiology. May be taught concurrently with BIO 608. Cannot receive credit for both BIO 608 and BIO 508. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

BIO 509 Stream Ecology

Prerequisite: BIO 367 and BIO 368.

Recommended Prerequisite: CHM 171 or higher. The interdisciplinary study of running waters, including study of the physical and chemical environment, trophic interactions, nutrient cycling, and the multiple impacts of humans on modifying these systems. Lectures, group discussion of readings, and laboratory and field exercises. One all-day Saturday field trip required. May be taught concurrently with BIO 609. Cannot receive credit for both BIO 609 and BIO 509. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Spring

BIO 511 Immunology

Prerequisite: BIO 212 and 213 (or prior credit for BIO 210); or BIO 312 and 313 (or prior credit for BIO 310); or BIO 320 or BMS 521.

A study of the immune system with emphasis on molecular and cellular mechanisms underlying host-microbe interactions, allergy, transplant rejection, cancer surveillance, and autoimmune disease. Laboratory emphasis on

techniques used to address research and diagnostic problems. May be taught concurrently with BIO 611. Cannot receive credit for both BIO 511 and BIO 611. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall

BIO 512 Industrial Microbiology

Prerequisite: BIO 212 and 213 (or prior credit for BIO 210); or BIO 312 and 313 (or prior credit for BIO 310).

An introduction to the fundamental concepts of industrial and applied microbiology. The industrial production of proteins, metabolites, polymers, biocides, and vaccines will be discussed in addition to biotransformations and environmental applications. Production improvement strategies that employ both physical and modern molecular techniques will be introduced. Laboratory will emphasize the selection of industrially important microorganisms, the theory and operation of a fermentor for the production of proteins, antibiotics, and steroids, use of analytical equipment for monitoring product formation, enzymes analysis, downstream processing, and bio-reactor construction and design. May be taught concurrently with BIO 613. Cannot receive credit for both BIO 613 and BIO 512. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BIO 515 Evolution

Prerequisite: BIO 235 and BIO 236 or BMS 230 or BMS 231; and MTH 135 or higher.

A survey of modern evolutionary biology, including the evidence that supports the theory of evolution, the natural processes that cause evolution, patterns and mechanisms of specialization, and methods for estimating evolutionary relationships. May be taught concurrently with BIO 616. Cannot receive credit for both BIO 616 and BIO 515.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BIO 517 Microbial Physiology and Metabolism

Prerequisite: BIO 212 and 213 (or prior credit for BIO 210); or BIO 312 and 313 (or prior credit for BIO 310); and either [CHM 201 and 202] or CHM 342 and 345 (or CHM 342 taken prior to Fall 2019).

Physiology and anatomy of microorganisms including adaptive responses to environmental changes and microbial metabolic diversity will be discussed. Laboratory will emphasize selective isolation and identification of

microorganisms, the growth dynamics of microorganisms, and responses by microorganisms to environmental changes. May be taught concurrently with BIO 617. Cannot receive credit for both BIO 617 and BIO 517.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall

BIO 518 Regulatory Mechanisms

Prerequisite: BIO 310 or BIO 320 or BMS 521 or CHM 554.

The regulation of gene expression and protein/enzyme activity in prokaryotes, eukaryotes and viruses. A content-based lecture and discussion course utilizing both textbook and primary literature. May be taught concurrently with BIO 618. Cannot receive credit for both BIO 518 and BIO 618.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

BIO 520 Pathogenic Microbiology

Prerequisite: BIO 212 and 213 (or prior credit for BIO 210); or BIO 312 and 313 (or prior credit for BIO 310).

Fundamental principles of pathogenic microbiology; transmission, infection and control of the pathogen. May be taught concurrently with BIO 620. Cannot receive credit for both BIO 620 and BIO 520. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BIO 521 Marine Science for Teachers I

Prerequisite: 12 hours in biology; and concurrent enrollment in BIO 522.

A course designed to introduce students, particularly inservice teachers, to the study of marine science and to promote the teaching of marine biology at all grade levels. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 621. Cannot receive credit for both BIO 621 and BIO 521.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

BIO 522 Marine Science for Teachers I Lab

Prerequisite: concurrent enrollment in BIO 521.

Laboratory portion of BIO 521. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 623. Cannot receive credit for both BIO 623 and BIO 522.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Summer

BIO 527 Field Biology

Prerequisite: permission of instructor.

Field work during an extended field trip to a specific region of North America to familiarize the student with the flora and/or fauna of that region. Course is scheduled irregularly during academic breaks and may be preceded by several lectures in preparation for the trip. May be repeated to a maximum of six hours with a maximum of three hours to be applied to the major in biology. May be taught concurrently with BIO 627. Cannot receive credit for both BIO 627 and BIO 527. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

BIO 530 Phycology

Prerequisite: BIO 367 and BIO 368.

The structure, function, ecological significance, and diversity of algae. Emphasis will be placed on field studies, isolation and growth, and physiological characteristics. May be taught concurrently with BIO 629. Cannot receive credit for both BIO 629 and BIO 530.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BIO 532 Principles of Fisheries Management

Prerequisite: BIO 367 and BIO 368 or BIO 373.

Life history, population ecology, and management of exploited freshwater and marine species. Scientific sampling and analysis of fishery populations. Characterization, history, and management principles for representative commercial and recreational fisheries. May be taught concurrently with BIO 632. Cannot receive credit for both BIO 632 and BIO 532.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BIO 533 Wetland Ecology

Prerequisite: BIO 367 and BIO 368.

Recommended Prerequisite: CHM 171 or higher. The composition, structure, function, and importance of wetland ecosystems. Comparisons of different wetland types, hydrology, nutrient cycles, plants and animals and their adaptations, and conservation strategies. May be taught concurrently with BIO 633. Cannot receive credit for both BIO 633 and BIO 533.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Upon demand

BIO 534 Coastal Vegetation

Prerequisite: 10 hours of biology including BIO 121 and BIO 122; and concurrent enrollment in BIO 535.

A broad study of the general and specific aspects of coastal vegetation, with emphasis on local examples. Vegetational composition, variation, succession, climax, and distribution. Includes aerial techniques, plant identification, delineation of vegetational types and mapping. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 641. Cannot receive credit for both BIO 641 and BIO 534.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

BIO 535 Coastal Vegetation Lab

Prerequisite: concurrent enrollment in BIO 534.

Laboratory portion of BIO 534. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 635. Cannot receive credit for both BIO 635 and BIO 535.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Summer

BIO 537 Salt Marsh Plant Ecology

Prerequisite: BIO 122 and BIO 334 and BIO 367 and BIO 368 and BIO 544; and concurrent enrollment in BIO 538.

A study with emphasis on the botanical aspects of local marshes; includes plant identification, composition, structure, distribution, and development of coastal marshes. Biological and physical interrelationships. Primary productivity and relation of marshes to estuaries and associated fauna. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 637. Cannot receive credit for both BIO 637 and BIO 537.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

BIO 538 Salt Marsh Plant Ecology Lab

Prerequisite: concurrent enrollment in BIO 537.

Laboratory portion of BIO 537. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 638. Cannot receive credit for both BIO 638 and BIO 538.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Summer

BIO 539 Biogeography

Prerequisite: BIO 121 and BIO 122.

Study of patterns of distribution of organisms in space and in time. May be taught concurrently with BIO 639. Cannot receive credit for both BIO 639 and BIO 539. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BIO 540 Applications of Molecular Markers

Prerequisite: "B" or better in BIO 235 and BIO 236, or BMS 230 and BMS 232, or BMS 231.

Introduction to the use of molecular markers in biological research. Topics covered include methods for identifying genetic variation at the molecular level and their applications to gene discovery, gene mapping, phylogenetics, forensics, conservation biology, and research in ecology and evolution. Students will complete research projects using one or more of the techniques learned. May be taught concurrently with BIO 640. Cannot receive credit for both BIO 640 and BIO 540.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall (odd-numbered years)

BIO 544 Plant Physiology

Recommended prerequisite: CHM 201 and 202 or CHM 342 and 345 (or CHM 342 taken prior to Fall 2019). Basic chemical and physical principles of plant function considering water relationships, nutrient transport, mineral nutrition, photosynthesis, respiration, and phytohormones. May be taught concurrently with BIO 644. Cannot receive credit for both BIO 644 and BIO 544.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Upon demand

BIO 547 Water Resources

Prerequisite: BIO 122 or GLG 110 or GRY 142; and CHM 160 and CHM 161; and MTH 135.

An interdisciplinary study of freshwater resource development, including environmental impacts of humans on hydrology and water quality, conflicts among users, and politics at local and global scales. Identical with GLG 547. Cannot receive credit for both BIO 547 and GLG 547. May be taught concurrently with BIO 647. Cannot receive credit for both BIO 547 and BIO 647. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BIO 550 Statistical Methods for Biologists

Prerequisite: BIO 235 and BIO 236 or BMS 230 or BMS 231; and MTH 137 or higher.

Scientific methodology, experimental design, statistical analysis, and data interpretation applied to biological questions. May be taught concurrently with BIO 650. Cannot receive credit for both BIO 650 and BIO 550.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BIO 551 Experimental Design for Biologists

Prerequisite: "B-" or better in BIO 550.

The design and analysis of biological experiments, with an emphasis on the choice and interpretation of inferential statistics. Topics covered include causal inference, statistical power, general linear models, and repeated measures designs. The use of computer software to analyze real data sets from the biological literature is emphasized. May be taught concurrently with BIO 651. Cannot receive credit for both BIO 651 and BIO 551.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

BIO 555 Marine Ichthyology

Prerequisite: junior standing; 16 hours of biology including BIO 121 and BIO 122 and BIO 235 and BIO 236 and BIO 380; and concurrent enrollment in BIO 556.

This course provides the student with a strong general background in the biology of marine fishes. Emphasis placed on the principles involved in the classification and taxonomy of marine and estuarine fishes. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 654. Cannot receive credit for both BIO 654 and BIO 555.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

BIO 556 Marine Ichthyology Lab

Prerequisite: concurrent enrollment in BIO 555.

Laboratory portion of BIO 555. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 656. Cannot receive credit for both BIO 656 and BIO 556.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Summer

BIO 557 Marine Fisheries Management

Prerequisite: permission of instructor; and concurrent enrollment in BIO 558.

A course designed to familiarize students with practical marine fisheries management problems in today's real world. Covers the international and local, economic, social, legal, and political, as well as biological factors that are considered in decisions directed toward achieving optimum sustainable yield from marine resources. The history of management schemes, sources of information, current status of fishing technology, management

methods, legal problems and educational needs are explored. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 657. Cannot receive credit for both BIO 657 and BIO 557.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

BIO 558 Marine Fisheries Management Lab

Prerequisite: concurrent enrollment in BIO 557.

Laboratory portion of BIO 557. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 658. Cannot receive credit for both BIO 658 and BIO 558.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Summer

BIO 560 Population Genetics and Evolutionary Mechanisms

Prerequisite: BIO 235 and BIO 236.

The theory of genetic variation in populations, with emphasis on quantitative description of the mechanisms of biological evolution. May be taught concurrently with BIO 659. Cannot receive credit for both BIO 659 and BIO 560.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

BIO 561 Environmental Issues Education and Interpretation

Prerequisite: permission of instructor.

Discussion of environmental issues, practical experiences in teaching environmental concepts, and awareness of environmental resource materials for the formal and nonformal educational setting. May be taught concurrently with BIO 661. Cannot receive credit for both BIO 561 and BIO 661 Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

BIO 562 Limnology

Prerequisite: BIO 367 and BIO 368.

Recommended Prerequisite: CHM 171 or higher. Physical, chemical, and biological characteristics of lakes and reservoirs. Laboratory includes mapping, lake models, water chemistry, and surveys of diversity and abundance. Two all-day Saturday labs required. May be taught concurrently with BIO 662. Cannot receive credit for both BIO 662 and BIO 562.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall

BIO 563 Population Ecology

Prerequisite: BIO 367 and BIO 368; and MTH 138 or higher.

Discussion of factors controlling the distribution and abundance of populations. Quantitative description of population dynamics is emphasized. May be taught concurrently with BIO 663. Cannot receive credit for both BIO 663 and BIO 563.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring (even-numbered years)

BIO 564 Ozarks Natural Communities

Recommended Prerequisite: BIO 367 and BIO 368. Examination of forests, glades, and aquatic habitats with focus on environmental issues in the Ozarks. Integration into formal and non-formal educational settings will be covered. May be taught at the Bull Shoals Field Station. May be taught concurrently with BIO 664. Cannot receive credit for both BIO 564 and BIO 664.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

BIO 565 Marine Ecology

Prerequisite: 16 hours of biology including BIO 121 and BIO 122; and concurrent enrollment in BIO 566.

A consideration of the relationship of marine organisms to their environment includes the effects of temperature, salinity, light, nutrient concentration, currents, and food on the abundance and distribution of marine organisms.

Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 665. Cannot receive credit for both BIO 665 and BIO 565.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

BIO 566 Marine Ecology Lab

Prerequisite: concurrent enrollment in BIO 565.

Laboratory portion of BIO 565. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 666. Cannot receive credit for both BIO 666 and BIO 566.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Summer

BIO 567 Physiological Ecology

Prerequisite: BIO 367 and BIO 368; and either BIO 361 or BIO 544 or BMS 308.

Physiological adaptations of plants and animals to environmentally stressful conditions and to ecological/evolutionary pressures. May be taught concurrently with BIO 668. Cannot receive credit for both BIO 668 and BIO 567.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Spring (odd-numbered years)

BIO 571 Comparative Animal Physiology

Prerequisite: BIO 361 or BMS 308.

Organ/system function in a wide range of invertebrate and vertebrate animals. May be taught concurrently with BIO 671. Cannot receive credit for both BIO 671 and BIO 571.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Spring (odd-numbered years)

BIO 573 Ornithology

Prerequisite: 12 hours of biology.

Taxonomy, distribution, life histories and ecology of birds; emphasis on Missouri forms. Early morning field trips required. May be taught concurrently with BIO 673. Cannot receive credit for both BIO 673 and BIO 573. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BIO 574 Aquatic Entomology

Prerequisite: BIO 367 and 368 or BIO 370 or BIO 371 or AGP 581.

Aquatic insects, ecology and taxonomy with emphasis on field applications. One weekend field trip required. May be taught concurrently with BIO 674. Cannot receive credit for both BIO 674 and BIO 574. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Upon demand

BIO 575 Ichthyology

Prerequisite: 12 hours in biology.

Taxonomy, distribution, life histories and ecology of fish with emphasis on Missouri forms. May be taught concurrently with BIO 675. Cannot receive credit for both BIO 675 and BIO 575. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

BIO 576 Herpetology

Prerequisite: 12 hours in biology.

Taxonomy, distribution, life histories and ecology of amphibians and reptiles with emphasis on Missouri forms. One weekend field trip required. May be taught concurrently with BIO 676. Cannot receive credit for both BIO 676 and BIO 576. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BIO 577 Mammalogy

Prerequisite: 12 hours in biology.

Taxonomy, distribution, life histories and ecology of mammals with emphasis on Missouri forms. One weekend field trip required. May be taught concurrently with BIO 677. Cannot receive credit for both BIO 677 and BIO 577. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

BIO 578 Behavioral Ecology

Recommended Prerequisite: BIO 367 and BIO 368 and BIO 550. Fundamental principles of animal behavior with an emphasis on the study of the ecological and evolutionary processes that influence behavior. May be taught concurrently with BIO 678. Cannot receive credit for both BIO 678 and BIO 578. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

BIO 579 Conservation Biology

Prerequisite: GRY 108 or BIO 367 and BIO 368.

An in-depth examination of the science of conservation from a biological perspective, with an examination of ethical and legal aspects of conservation. May be taught concurrently with BIO 679. Cannot receive credit for both BIO 679 and BIO 579. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

BIO 584 Fish Ecology

Prerequisite: BIO 367 and BIO 368 and BIO 575.

The biology of fishes in relation to environmental conditions at the individual, population, and community levels. May be taught concurrently with BIO 686. Cannot receive credit for both BIO 686 and BIO 584. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BIO 587 Marine Invertebrate Zoology

Prerequisite: 16 hours in biology; and concurrent enrollment in BIO 588.

A concentrated study of the free-living marine and estuarine invertebrates of Mississippi Sound and adjacent bayous, salt marshes, barrier islands, and the nearshore continental shelf of the northeastern Gulf of Mexico. Course emphasizes structure, classification, phylogenetic relationships, larval development, functional processes, and ecological aspects of Gulf of Mexico invertebrates and their natural assemblages. Advanced undergraduates and graduate students may be asked to conduct independent, short-term research projects during the course. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 687. Cannot receive credit for both BIO 687 and BIO 587.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

BIO 588 Marine Invertebrate Zoology Lab

Prerequisite: concurrent enrollment in BIO 587.

Laboratory portion of BIO 587. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 688. Cannot receive credit for both BIO 688 and BIO 588.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Summer

BIO 589 Game Management

Prerequisite: BIO 373.

Management of game birds and mammals for recreational utilization. May be taught concurrently with BIO 689. Cannot receive credit for both BIO 689 and BIO 589. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

BIO 597 Topics in Biology

Prerequisite: permission of instructor.

A variable content course to provide for the offering of selected topics in biology on a one time or first-time basis. May be repeated when topic varies. May be taught concurrently with BIO 697. Cannot receive credit for both BIO 697 and BIO 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

BIO 601 Natural History Museum Techniques

Techniques in the development of natural history museum displays including making models, design of displays, writing educational text, and other techniques. Course will be taught off-site at the Bull Shoals Field Station and Chase Studio. May be taught concurrently with BIO 501. Cannot receive credit for both BIO 601 and BIO 501.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

BIO 602 Sustainability Science in Practice

After exploring the three pillars of sustainability, students will embark on developing a research proposal in their area of study. Research in virtually all areas related to sustainable development can be a focus of a student's research proposal. For example: food, health, education, economics, social and gender equity, energy, law and diplomacy, land use change, biodiversity loss, chemical pollution, freshwater use, water quality, climate change mitigation, environmental remediation, smart structures, alternative energy, supply chain logistics and smart grids. May be taught concurrently with BIO 502. Cannot receive credit for both BIO 602 and BIO 502.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

BIO 604 Plant-Animal Interactions

Recommended Prerequisite: BIO 367 and BIO 368; or BIO 436. The theories, evolutionary and ecological patterns, and major current topics in plant-animal interactions. This course encourages independence in learning, synthesizing, and communicating science via discussions and presentations. Topics are flexible and guided by student interests. May be taught concurrently with BIO 504. Cannot receive credit for both BIO 504 and BIO 604.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BIO 605 Human Nature

Recommended Prerequisite: general biology with evolution; genetics; college algebra; and introductory psychology. A survey of current biological research on the behavioral, psychological, and cognitive dimensions of human biology. This course emphasizes the evolution and function of human social behaviors and value systems, but also addresses the genetics of human psychological diversity, the genetics of human-ape divergence, and the neurobiology of human cognition. May be taught concurrently with BIO 505. Cannot receive credit for both BIO 605 and BIO 505.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BIO 608 Environmental Microbiology

Recommended Prerequisite: microbiology. The study of the ecology of microorganisms and the applied use of microorganisms by man in the environment. Laboratory will emphasize current methods used in the field of environmental microbiology. May be taught concurrently with BIO 508. Cannot receive credit for both BIO 508 and BIO 608.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

BIO 609 Stream Ecology

Recommended Prerequisite: ecology course and one year of college chemistry. The interdisciplinary study of running waters, including study of the physical and chemical environment, trophic interactions, nutrient cycling, and the multiple impacts of humans on modifying these systems. Lectures, group discussion of readings, and laboratory and field exercises. One all-day Saturday field trip required. May be taught concurrently with BIO 509. Cannot receive credit for both BIO 509 and BIO 609.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Spring

BIO 611 Immunology

Recommended Prerequisite: microbiology or molecular/cellular biology. A study of the immune system with emphasis on molecular and cellular mechanisms underlying host-microbe interactions, allergy, transplant rejection, cancer surveillance, and autoimmune disease. Laboratory emphasis on techniques used to address research and diagnostic problems. May be taught concurrently with BIO 511. Cannot receive credit for both BIO 511 and BIO 611.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall

BIO 613 Industrial Microbiology

Recommended Prerequisite: microbiology course. An introduction to the fundamental concepts of industrial and applied microbiology. The industrial production of proteins, metabolites, polymers, biocides, and vaccines will be discussed in addition to biotransformations and environmental applications. Production improvement strategies that employ both physical and modern molecular techniques will be introduced. Laboratory will emphasize the selection of industrially important microorganisms, the theory and operation of a fermentor for the production of proteins, antibiotics, and steroids, use of analytical equipment for monitoring product formation, enzymes analysis, downstream processing, and bio-reactor construction and design. May be taught concurrently with BIO 512. Cannot receive credit for both BIO 512 and BIO 613.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BIO 616 Evolution

Recommended Prerequisite: genetics course; and college algebra or pre-calculus mathematics course. A survey of modern evolutionary biology, including the evidence that supports the theory of evolution, the natural processes that cause evolution, patterns and mechanisms of speciation, and methods for estimating evolutionary relationships. May be taught concurrently with BIO 515. Cannot receive credit for both BIO 515 and BIO 616.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BIO 617 Microbial Physiology and Metabolism

Recommended Prerequisite: microbiology course and organic chemistry course. Physiology and anatomy of microorganisms including adaptive responses to environmental changes and microbial metabolic diversity will be discussed. Laboratory will emphasize selective isolation and identification of microorganisms, the growth dynamics of microorganisms, and responses by microorganisms to environmental changes. May be taught concurrently with BIO 517. Cannot receive credit for both BIO 517 and BIO 617.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall

BIO 618 Regulatory Mechanisms

Recommended Prerequisite: genetics, molecular/cellular biology, microbiology, or biochemistry. The regulation of gene expression and protein/enzyme activity in prokaryotes, eukaryotes and viruses. A content-based lecture and discussion course utilizing both textbook and primary literature. May be taught concurrently with BIO 518. Cannot receive credit for both BIO 618 and BIO 518.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

BIO 620 Pathogenic Microbiology

Recommended Prerequisite: microbiology course. Fundamental principles of pathogenic microbiology; transmission, infection and control of the pathogen. May be taught concurrently with BIO 520. Cannot receive credit for both BIO 520 and BIO 620.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BIO 621 Marine Science for Teachers I

Prerequisite: 12 hours in biology.

Recommended Prerequisite: genetics course. A course designed to introduce students, particularly inservice teachers, to the study of marine science and to promote the teaching of marine biology at all grade levels. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 521. Cannot receive credit for both BIO 521 and BIO 621.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

BIO 623 Marine Science for Teachers I Lab

Prerequisite: concurrent enrollment in BIO 621.

Laboratory portion of BIO 621. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 522. Cannot receive credit for both BIO 522 and BIO 623.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Summer

BIO 627 Field Biology

Prerequisite: permission of instructor.

Field work during an extended field trip to a specific region of North America to familiarize the student with the flora and/or fauna of that region. Course is scheduled irregularly during academic breaks and may be preceded by several lectures in preparation for the trip. May be repeated to a maximum of six hours with a maximum of three hours to be applied to the major in biology. May be taught concurrently with BIO 527. Cannot receive credit for both BIO 527 and BIO 627.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

BIO 629 Phycology

Recommended Prerequisite: ecology course. The structure, function, ecological significance, and diversity of algae. Emphasis will be placed on field studies, isolation and growth, and physiological characteristics. May be taught concurrently with BIO 530. Cannot receive credit for both BIO 530 and BIO 629.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BIO 632 Principles of Fisheries Management

Recommended Prerequisite: ecology or wildlife management course. Life history, population ecology, and management of exploited freshwater and marine species. Scientific sampling and analysis of fishery populations. Characterization, history, and management principles for representative commercial and recreational fisheries. May be taught concurrently with BIO 532. Cannot receive credit for both BIO 532 and BIO 632.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BIO 633 Wetland Ecology

Recommended Prerequisite: ecology course; and one year of college chemistry. The composition, structure, function, and importance of wetland ecosystems. Comparisons of different wetland types, hydrology, nutrient cycles, plants and animals and their adaptations, and conservation strategies. May be taught concurrently with BIO 533. Cannot receive credit for both BIO 533 and BIO 633.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Upon demand

BIO 635 Coastal Vegetation Lab

Prerequisite: concurrent enrollment in BIO 641.

Laboratory portion of BIO 641. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 535. Cannot receive credit for both BIO 535 and BIO 635.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Summer

BIO 636 Plant Ecology

Recommended Prerequisite: ecology course. The dynamics, structure, and distribution of plant populations and communities, with emphasis on interactions among plants, plants and other organisms, and plants and ecosystems. Laboratory emphasis on experimental studies in the greenhouse and field. Weekend field trip is required. BIO 436 may be taught concurrently with BIO 636. Cannot receive credit for both BIO 436 and BIO 636.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall

BIO 637 Salt Marsh Plant Ecology

Prerequisite: permission of advisor or department head.

Recommended Prerequisite: general biology II, plant taxonomy, ecology and plant physiology course. A study with emphasis on the botanical aspects of local marshes; includes plant identification, composition, structure, distribution, and development of coastal marshes. Biological and physical interrelationships. Primary productivity and relation of marshes to estuaries and associated fauna. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 537. Cannot receive credit for both BIO 537 and BIO 637.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

BIO 638 Salt Marsh Plant Ecology Lab

Prerequisite: concurrent enrollment in BIO 637.

Laboratory portion of BIO 637. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 538. Cannot receive credit for both BIO 538 and BIO 638.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Summer

BIO 639 Biogeography

Recommended Prerequisite: general biology I and II courses. Study of patterns of distribution of organisms in space and in time. May be taught concurrently with BIO 539. Cannot receive credit for both BIO 539 and BIO 639.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BIO 640 Applications of Molecular Markers

Recommended Prerequisite: genetics course. Introduction to the use of molecular markers in biological research. Topics covered include methods for identifying genetic variation at the molecular level and their applications to gene discovery, gene mapping, phylogenetics, forensics, conservation biology, and research in ecology and evolution. Students will complete research projects using one or more of the techniques learned. May be taught concurrently with BIO 540. Cannot receive credit for both BIO 640 and BIO 540.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall (odd-numbered years)

BIO 641 Coastal Vegetation

Prerequisite: 10 hours of biology and permission of advisor or department head.

Recommended Prerequisite: general biology I and II courses. A broad study of the general and specific aspects of coastal vegetation, with emphasis on local examples. Vegetational composition, variation, succession, climax, and distribution. Includes aerial techniques, plant identification, delineation of vegetational types and mapping. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 534. Cannot receive credit for both BIO 534 and BIO 641.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

BIO 644 Plant Physiology

Recommended Prerequisite: organic chemistry course. Basic chemical and physical principles of plant function considering water relationships, nutrient transport, mineral nutrition, photosynthesis, respiration, and phytohormones. May be taught concurrently with BIO 544. Cannot receive credit for both BIO 544 and BIO 644.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Upon demand

BIO 647 Water Resources

Recommended Prerequisite: BIO 122 or GLG 110 or GRY 142; and CHM 160 and CHM 161; and MTH 135. An interdisciplinary study of freshwater resource development, including environmental impacts of humans on hydrology and water quality, conflicts among users, and politics at local and global scales. Identical with GLG 647. Cannot receive credit for both BIO 647 and GLG 647. May be taught concurrently with BIO 547. Cannot receive credit for both BIO 647 and BIO 547.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

BIO 650 Statistical Methods for Biologists

Recommended Prerequisite: genetics course and pre-calculus mathematics course. Scientific methodology, experimental design, statistical analysis, and data interpretation applied to biological questions. May be taught concurrently with BIO 550. Cannot receive credit for both BIO 550 and BIO 650.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

BIO 651 Experimental Design for Biologists

Recommended Prerequisite: statistics course. The design and analysis of biological experiments, with an emphasis on the choice and interpretation of inferential statistics. Topics covered include causal inference, statistical power, general linear models, and repeated measures designs. The use of computer software to analyze real data sets from the biological literature is emphasized. May be taught concurrently with BIO 551. Cannot receive credit for both BIO 551 and BIO 651.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

BIO 654 Marine Ichthyology

Prerequisite: 16 hours of biology and permission of advisor or department head.

Recommended Prerequisite: General Biology I and II, Genetics and Comparative Vertebrate Anatomy. This course provides the student with a strong general background in the biology of marine fishes. Emphasis placed on the principles involved in the classification and taxonomy of marine and estuarine fishes. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 555. Cannot receive credit for both BIO 555 and BIO 654.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

BIO 655 Developmental Biology

Recommended Prerequisite: cell biology course. An in-depth study of the molecular and cellular mechanisms involved in the development of vertebrate, invertebrate, and plant systems. Lectures will emphasize fertilization, morphogenesis, differentiation, induction, regeneration, and neoplasia. Laboratory exercises will emphasize techniques utilized by developmental biologists. Review of current literature and poster presentations will be required. May be taught concurrently with BIO 355. Cannot receive credit for both BIO 355 and BIO 655.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

BIO 656 Marine Ichthyology Lab

Prerequisite: concurrent enrollment in BIO 654.

Laboratory portion of BIO 654. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 556. Cannot receive credit for both BIO 556 and BIO 656.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Summer

BIO 657 Marine Fisheries Management

Prerequisite: permission of instructor; and concurrent enrollment in BIO 658.

A course designed to familiarize students with practical marine fisheries management problems in today's real world. Covers the international and local, economic, social, legal, and political, as well as biological factors that are considered in decisions directed toward achieving optimum sustainable yield from marine resources. The history of management schemes, sources of information, current status of fishing technology, management methods, legal problems and educational needs are explored. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 557. Cannot receive credit for both BIO 557 and BIO 657.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

BIO 658 Marine Fisheries Management Lab

Prerequisite: concurrent enrollment in BIO 657.

Laboratory portion of BIO 657. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 558. Cannot receive credit for both BIO 558 and BIO 658.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Summer

BIO 659 Population Genetics and Evolutionary Mechanisms

Recommended Prerequisite: evolution course and statistics course. The theory of genetic variation in populations, with emphasis on quantitative description of the mechanisms of biological evolution. May be taught concurrently with BIO 560. Cannot receive credit for both BIO 560 and BIO 659.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

BIO 661 Environmental Issues Education and Interpretation

Prerequisite: permission of instructor.

Discussion of environmental issues, practical experiences in teaching environmental concepts, and awareness of environmental resource materials for the formal and nonformal educational setting. May be taught concurrently with BIO 561. Cannot receive credit for both BIO 661 and BIO 561

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

BIO 662 Limnology

Recommended Prerequisite: ecology course; and one year of college chemistry. Physical, chemical, and biological characteristics of lakes and reservoirs. Laboratory includes mapping, lake models, water chemistry, and surveys of diversity and abundance. Two all-day Saturday labs required. May be taught concurrently with BIO 562. Cannot receive credit for both BIO 562 and BIO 662.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall

BIO 663 Population Ecology

Recommended Prerequisite: ecology course and pre-calculus mathematics course. Discussion of factors controlling the distribution and abundance of populations. Quantitative description of population dynamics is emphasized. May be taught concurrently with BIO 563. Cannot receive credit for both BIO 563 and BIO 663.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring (even-numbered years)

BIO 664 Ozarks Natural Communities

Recommended Prerequisite: BIO 367 and BIO 368. Examination of forests, glades, and aquatic habitats with focus on environmental issues in the Ozarks. Integration into formal and non-formal educational settings will be covered. May be taught at the Bull Shoals Field Station. May be taught concurrently with BIO 564. Cannot receive credit for both BIO 664 and BIO 564.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Upon demand

BIO 665 Marine Ecology

Prerequisite: 16 hours of biology and permission of advisor or department head.

Recommended Prerequisite: General Biology I and II. A consideration of the relationship of marine organisms to their environment includes the effects of temperature, salinity, light, nutrient concentration, currents, and food on the abundance and distribution of marine organisms. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. Concurrent enrollment in BIO 566 required. May be taught concurrently with BIO 565. Cannot receive credit for both BIO 565 and BIO 665.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

BIO 666 Marine Ecology Lab

Prerequisite: concurrent enrollment in BIO 665.

Laboratory portion of BIO 665. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 566. Cannot receive credit for both BIO 566 and BIO 666.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Summer

BIO 668 Physiological Ecology

Recommended Prerequisite: ecology course; and general physiology or plant physiology or human physiology course. Physiological adaptations of plants and animals to environmentally stressful conditions and to ecological/evolutionary pressures. May be taught concurrently with BIO 567. Cannot receive credit for both BIO 567 and BIO 668.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Spring (odd-numbered years)

BIO 671 Comparative Animal Physiology

Recommended Prerequisite: general physiology or human physiology course. Organ/system function in a wide range of invertebrate and vertebrate animals. May be taught concurrently with BIO 571. Cannot receive credit for both BIO 571 and BIO 671.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	3	Spring (odd-numbered years)

BIO 673 Ornithology

Prerequisite: 12 hours of biology.

Taxonomy, distribution, life histories and ecology of birds; emphasis on Missouri forms. Early morning field trips required. May be taught concurrently with BIO 573. Cannot receive credit for both BIO 573 and BIO 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BIO 674 Aquatic Entomology

Aquatic insects, ecology and taxonomy with emphasis on field applications. One weekend field trip required. May be taught concurrently with BIO 574. Cannot receive credit for both BIO 574 and BIO 674.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Upon demand

BIO 675 Ichthyology

Prerequisite: 12 hours in biology.

Taxonomy, distribution, life histories and ecology of fish with emphasis on Missouri forms. May be taught concurrently with BIO 575. Cannot receive credit for both BIO 575 and BIO 675.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

BIO 676 Herpetology

Prerequisite: 12 hours in biology.

Taxonomy, distribution, life histories and ecology of amphibians and reptiles with emphasis on Missouri forms. One weekend field trip required. May be taught concurrently with BIO 576. Cannot receive credit for both BIO 576 and BIO 676.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

BIO 677 Mammalogy

Prerequisite: 12 hours in biology.

Taxonomy, distribution, life histories and ecology of mammals with emphasis on Missouri forms. One weekend field trip required. May be taught concurrently with BIO 577. Cannot receive credit for both BIO 577 and BIO 677.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

BIO 678 Behavioral Ecology

Recommended Prerequisite: ecology course and statistics course. Fundamental principles of animal behavior with an emphasis on the study of the ecological and evolutionary processes that influence behavior. May be taught concurrently with BIO 578. Cannot receive credit for both BIO 578 and BIO 678.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

BIO 679 Conservation Biology

Recommended Prerequisite: genetics course and ecology course. An in-depth examination of the science of conservation from a biological perspective, with an examination of ethical and legal aspects of conservation.

May be taught concurrently with BIO 579. Cannot receive credit for both BIO 579 and BIO 679.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

BIO 680 Vertebrate Anatomy and Evolution

Vertebrate gross anatomy. Phylogeny and present status of organ systems in vertebrates. May be taught concurrently with BIO 380. Cannot receive credit for both BIO 380 and BIO 680.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

BIO 685 Marine Conservation

An overview of current issues related to the conservation and management of marine organisms, with emphasis on marine species and habitats exploited or endangered by human actions. BIO 485 may be taught concurrently with BIO 685. Cannot receive credit for both BIO 685 and 485.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Summer

BIO 686 Fish Ecology

Recommended Prerequisite: ecology course and ichthyology course. The biology of fishes in relation to environmental conditions at the individual, population, and community levels. May be taught concurrently with BIO 584. Cannot receive credit for both BIO 584 and BIO 686.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

BIO 687 Marine Invertebrate Zoology

Prerequisite: 16 hours in biology; and concurrent enrollment in BIO 688.

A concentrated study of the free-living marine and estuarine invertebrates of Mississippi Sound and adjacent bayous, salt marshes, barrier islands, and the nearshore continental shelf of the northeastern Gulf of Mexico.

Course emphasizes structure, classification, phylogenetic relationships, larval development, functional processes, and ecological aspects of Gulf of Mexico invertebrates and their natural assemblages. Advanced undergraduates and graduate students may be asked to conduct independent, short-term research projects during the course. Must be taken at the Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with BIO 587. Cannot receive credit for both BIO 587 and BIO 687.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

BIO 688 Marine Invertebrate Zoology Lab

Prerequisite: concurrent enrollment in BIO 687.

Laboratory portion of BIO 687. May be taught concurrently with BIO 588. Cannot receive credit for both BIO 588 and BIO 688.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Summer

BIO 689 Game Management

Recommended Prerequisite: wildlife management course. Management of game birds and mammals for recreational utilization. May be taught concurrently with BIO 589. Cannot receive credit for both BIO 589 and BIO 689.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

BIO 697 Topics in Biology

Prerequisite: permission of instructor.

A variable content course to provide for the offering of selected topics in biology on a one time or first-time basis. May be repeated for credit when topic varies. May be taught concurrently with BIO 597. Cannot receive credit for both BIO 597 and BIO 697.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

BIO 710 Topics in Microbial Physiology

Topics of interest in microbial physiology will be discussed. These may include, cell structure, energy production, fermentation, nitrogen metabolism, protein and nucleic acid syntheses, regulation of gene expression, and dynamics of cell growth. Lecture will supplement discussion sessions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

BIO 712 Advanced Immunology

Recommended Prerequisite: immunology course. Cellular aspects of the immune system.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

BIO 725 Advanced Limnology

Recommended Prerequisite: limnology course. Advanced concepts of biological, chemical and physical limnology. Recent symposia, reviews, and primary literature are discussed. Prerequisite: BIO 562. Advanced concepts of biological, chemical and physical limnology. Recent symposia, reviews, and primary literature are discussed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

BIO 726 Advanced Limnology Methods

Recommended Prerequisite: limnology course. Research and practical application of modern limnological methods are taught.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Upon demand

BIO 728 Recent Advances in Biology

Prerequisite: permission of instructor.

Selected topics in biology to be discussed using original literature as the focal point. Variable content course. May be repeated when topic varies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

BIO 730 Advanced Topics in Biology

Prerequisite: permission of instructor.

Individual study in biology; may include literature, field and/or laboratory work. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring

BIO 734 Advanced Plant Taxonomy

Prerequisite: permission of instructor.

Philosophy and principles of modern taxonomic procedures.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Upon demand

BIO 755 Advanced Developmental Biology

Recommended Prerequisite: developmental biology course. This course delves deeper into topics introduced in BIO 355 and 655, and will explore other subjects not previously covered. Topics discussed may include, but are not limited to, fertilization (how do sperm and eggs mature, and how does fertilization occur?), organ size determination (what controls the size and correct proportions of organs during development), organ/embryo patterning (how does an embryo know which side will become the left and which will become the right?), organogenesis (how is a branching pattern created in developing blood vessels?), ecological developmental biology (how does climate change affect development of an organism?), and evolutionary developmental biology (how do cavefish develop without eyes, despite their eye bearing ancestors?).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

BIO 760 Topics in Teaching Biology

Prerequisite: permission of instructor.

Biological concepts, information, practical experiences, and use of resource materials in the elementary and secondary classroom. Variable content course. May be repeated when topic varies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

BIO 767 Advanced Vertebrate Zoology

Evolutionary relationships of living and extinct vertebrates; analysis of geographic distribution and adaptive radiation. Includes field/lab experiences to be arranged.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

BIO 790 Degree Paper

Prerequisite: permission of advisor.

Extensive paper on selected topics. Exclusively satisfies requirements for non-thesis option, which also requires one BIO 790 paper to be presented orally to the department. May be repeated to a maximum of four hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

BIO 794 Scientific Writing

Organization and methods in scientific writing. Included are discussion of literature searching, scientific methodology, experimental design, proposal writing, figure preparation, editing and oral presentation. Recommended for graduate students in biology, preferably during the first year of graduate study.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

BIO 796 Science Internship

Completion of an internship project (80 hours/credit hour) at a discipline-related business, nonprofit organization, or government agency, approved and supervised by both the departmental and internship advisors. Includes a formal report in the appropriate professional format, and an oral presentation at an approved venue. Graded Pass/Not Pass only. No more than 6 hours may count toward a masters degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

BIO 798 Research

Prerequisite: permission of advisor.

Supervised research in special biology areas. May be repeated, but no more than six hours may be counted towards the MS degree. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

BIO 799 Thesis

Prerequisite: permission of advisor.

Independent study connected with preparation of thesis. May be repeated, but no more than six hours may be counted towards the MS degree. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Undergraduate Catalog

Biology

Major(s)

Biology (Non-Comprehensive) (BA)

Bachelor of Arts

Major requirements (48-55 hours)

1. [BIO 121\(4\)](#), [122\(4\)](#), [235\(3\)](#), [236\(1\)](#); [BIO 312\(3\)](#) and [313\(2\)](#) or [BIO 320\(4\)](#); [367\(3\)](#), [368\(1\)](#), [302\(1\)](#), [492\(0\)](#), [550\(3\)](#).
2. Additional courses in biology to total a minimum of 32 hours and include at least 12 hours of 300 level or higher courses. Electives may be selected from one of the following emphases. Advisors can assist students to select electives to emphasize areas that best meet their interest and career goals. Popular areas of emphasis include pre-health studies (pre-medical, pre-veterinary, pre-physical therapy, etc.), microbiology, cell/molecular biology, environmental/conservation biology, and zoology, but other areas of emphasis are also possible.
3. Related requirements (16-23 hours): [CHM 201\(3\)](#) and [202\(2\)](#), or [CHM 342\(3\)](#) and [345\(2\)](#) and [343\(3\)](#); [PHY 123\(4\)](#) and [124\(4\)](#) or [PHY 203\(5\)](#) and [204\(5\)](#); [MTH 261\(5\)](#) or [287\(3\)](#).
4. Public Affairs Capstone Experience will be fulfilled by completion of [BIO 367\(3\)](#), [368\(1\)](#), [302\(1\)](#), [492\(0\)](#) and one additional course from the following: [BIO 300\(1\)](#), [355\(4\)](#), [370\(4\)](#), [373\(3\)](#), [398\(1\)](#), [399\(1-3\)](#), [485\(1-3\)](#), [498\(3\)](#), [499\(1-3\)](#), [501\(2\)](#), [505\(3\)](#), [508\(3\)](#), [509\(4\)](#), [511\(4\)](#), [512\(3\)](#), [520\(3\)](#), [527\(1-4\)](#), [539\(3\)](#), [547\(3\)](#), [561\(2\)](#), [573\(3\)](#), [574\(2\)](#), [575\(3\)](#), [576\(3\)](#), [577\(3\)](#), [578\(4\)](#), [579\(3\)](#), [584\(3\)](#), [589\(3\)](#). Course may also be used to satisfy the elective courses in biology.
5. Minor required (or second major).
6. [Specific Bachelor of Arts Degree Requirements](#)

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Biology (Non-Comprehensive) (BS)

Bachelor of Science

Major requirements (52-59 hours)

1. [BIO 121\(4\)](#), [122\(4\)](#), [235\(3\)](#), [236\(1\)](#); [BIO 312\(3\)](#) and [313\(2\)](#) or [BIO 320\(4\)](#); [367\(3\)](#), [368\(1\)](#), [302\(1\)](#), [492\(0\)](#), [550\(3\)](#).
2. Additional courses in biology to total a minimum of 36 hours and include at least 12 hours of 300-level or higher courses. Advisors can assist students to select electives to emphasize areas that best meet their interest and career goals. Popular areas of emphasis include pre-health studies (pre-medical, pre-veterinary, pre-physical therapy, etc.), microbiology, cell/molecular biology, environmental/conservation biology, and zoology, but other areas of emphasis are also possible.
3. Related requirements (16-23 hours): [CHM 201\(3\)](#) and [202\(2\)](#), or [CHM 342\(3\)](#) and [345\(2\)](#) and [343\(3\)](#); [PHY 123\(4\)](#) and [124\(4\)](#) or [PHY 203\(5\)](#) and [204\(5\)](#); [MTH 261\(5\)](#) or [287\(3\)](#).
4. Public Affairs Capstone Experience will be fulfilled by completion of [BIO 367\(3\)](#), [368\(1\)](#), [302\(1\)](#), [492\(0\)](#) and one additional course from the following: [BIO 300\(1\)](#), [355\(4\)](#), [370\(4\)](#), [373\(3\)](#), [398\(1\)](#), [399\(1-3\)](#), [485\(1-3\)](#), [498\(3\)](#), [499\(1-3\)](#), [501\(2\)](#), [505\(3\)](#), [508\(3\)](#), [509\(4\)](#), [511\(4\)](#), [512\(3\)](#), [520\(3\)](#), [527\(1-4\)](#), [539\(3\)](#), [547\(3\)](#), [561\(2\)](#), [573\(3\)](#), [574\(2\)](#), [575\(3\)](#), [576\(3\)](#), [577\(3\)](#), [578\(4\)](#), [579\(3\)](#), [584\(3\)](#), [589\(3\)](#). Course may also be used to satisfy the elective courses in biology.
5. Minor required (or second major).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Biology (Comprehensive) (BS)

Bachelor of Science

Major requirements

Major core:

1. [BIO 121\(4\)](#), [122\(4\)](#), [235\(3\)](#), [236\(1\)](#), [302\(1\)](#), [492\(0\)](#), [550\(3\)](#).
2. [PHY 123\(4\)](#) or [203\(5\)](#) and [PHY 124\(4\)](#) or [204\(5\)](#).
3. [MTH 137\(3\)](#) or [138\(5\)](#), or eligibility for [MTH 261](#) on [mathematics placement test](#).
4. [BIO 312\(3\)](#) and [313\(2\)](#) or [BIO 320\(4\)](#) or [361\(4\)](#) or [544\(4\)](#); consult options below before selecting course.
5. [CHM 116\(4\)](#) and [117\(1\)](#), or [CHM 160\(4\)](#) and [161\(1\)](#); consult options below before selecting course.
6. [CHM 201\(3\)](#) and [202\(2\)](#), or [CHM 302\(5\)](#) or [342\(3\)](#) and [343\(2\)](#); consult options below before selecting course.
7. Public Affairs Capstone Experience will be fulfilled by completion of [BIO 302\(1\)](#), [492\(0\)](#) and two additional courses from the following: [BIO 300\(1\)](#), [355\(4\)](#), [367\(3\)](#), [370\(4\)](#), [373\(3\)](#), [398\(1\)](#), [399\(1-3\)](#), [485\(1-3\)](#), [498\(3\)](#), [499\(1-3\)](#), [501\(2\)](#), [505\(3\)](#), [508\(3\)](#), [509\(4\)](#), [511\(4\)](#), [512\(3\)](#), [520\(3\)](#), [527\(1-4\)](#), [539\(3\)](#), [547\(3\)](#), [561\(2\)](#), [573\(3\)](#), [574\(2\)](#), [575\(3\)](#), [576\(3\)](#), [577\(3\)](#), [578\(4\)](#), [579\(3\)](#), [584\(3\)](#), [589\(3\)](#). Courses may also be used to satisfy option requirements.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Complete one of the following options:

Note: With approval of advisor, up to three hours of the following can be substituted for one of the BIO courses listed in any option: BIO 300, 399, 499, or 597.

Pre-Teacher Education option (72-74 hours total for major)

This option is designed for students preparing to enter post-graduate studies to become a high school science teacher. This program does not include courses in teacher education that are required by the state of Missouri for certification as a teacher. Certification requirements can be met through postbaccalaureate programs or master's program at Missouri State University.

1. [BIO 312](#)(3), [313](#)(2), [361](#)(4), [367](#)(3), [368](#)(1), [515](#)(3).
2. Nine additional hours of upper division Biology courses (with approval of advisor).
3. Related chemistry courses: [CHM 160](#)(4), [161](#)(1), [170](#)(3), [171](#)(1); [CHM 201](#)(3) and [202](#)(2), or [CHM 302](#)(5).
4. Related science courses: [GLG 110](#)(4); [GRY 135](#)(4); [SCI 505](#)(3).
5. Related mathematics requirement. One course from: [MTH 137](#)(3), or eligibility for [MTH 261](#)(5) on [Mathematics Placement test](#).

Environmental Biology and Evolution option (72-85 hours total for major)

1. [BIO 367](#)(3), [368](#)(1), [515](#)(3).
2. One course in biodiversity and evolution: [BIO 334](#)(3), [339](#)(2), [370](#)(4), [371](#)(3), [380](#)(5), [530](#)(3), [571](#)(4), [573](#)(3), [574](#)(2), [575](#)(3), [576](#)(3), [577](#)(3); the following courses taught during the summer at the Gulf Coast Research Laboratory in Ocean Springs, Mississippi: [BIO 534](#)(2) and [535](#)(1); [555](#)(3), [556](#)(3), [587](#)(3), [588](#)(3).
3. One course in population biology: [BIO 436](#)(4), [505](#)(3), [532](#)(3), [540](#)(4), [560](#)(3), [563](#)(3), [567](#)(4), [578](#)(4), [584](#)(3), [589](#)(3); the following courses taught during the summer at the Gulf Coast Research Laboratory in Ocean Springs, Mississippi: [BIO 557](#)(2) and [558](#)(2).
4. Three hours in community/ecosystem biology: [BIO 373](#)(3), [485](#)(1-3), [504](#)(3), [508](#)(3), [509](#)(4), [533](#)(3), [539](#)(3), [547](#)(3), [562](#)(4), [564](#)(2), [579](#)(3); the following courses taught during the summer at the Gulf Coast Research Laboratory in Ocean Springs, Mississippi: [BIO 537](#)(2), [538](#)(2), [565](#)(3), [566](#)(2).
5. One biology course with a substantial field component. A course used to satisfy this requirement also may be counted toward the biodiversity, population biology, and community/ecosystem biology concentration areas described above. Complete one of the following: [BIO 334](#)(3), [339](#)(2), [370](#)(4), [436](#)(4), [509](#)(4), [527](#)(1-4), [562](#)(4), [564](#)(2), [574](#)(2), [575](#)(3), [576](#)(3), [577](#)(3), any biology course taught at the Gulf Coast Research Laboratory, any biology course taught at the Bull Shoals Field station or another field station (with the approval of your advisor).
6. Zero to eight hours of elective BIO courses at the level of 300 or higher to total a minimum of 43 hours in biology.
7. One of the following mathematics, statistics, or computer programming courses: [MTH 261](#)(5), [MTH 287](#)(3), [CSC 125](#)(4), [CSC 130](#)(3), [CSC 587](#)(3), [BIO 551](#)(2), [PSY 527](#)(3).
8. Related requirements in chemistry: [CHM 160](#)(4), [161](#)(1), [170](#)(3), [171](#)(1).
9. One of the following related science courses: [AGN 215](#)(3), [ANT 305](#)(3), [ANT 375](#)(3); [CHM 260](#)(3) or [460](#)(3); [GLG 171](#)(3), [GRY 351](#)(3).
10. One of the following related fields of study courses: [BIO 561](#)(2), [ECO 540](#)(3), [GEO 363](#)(4), [LAW 537](#)(3), [PHI 302](#)(3), [PLS 555](#)(3), [PSY 379](#)(3).

Microbiology and Biotechnology option (71-87 hours total for major):

1. [BIO 312\(3\)](#), [313\(2\)](#), [320\(4\)](#).
2. 21 additional hours in BIO courses with a minimum of 18 hours from the following: [BIO 355\(4\)](#), [508\(3\)](#), [511\(4\)](#), [512\(3\)](#); [505\(3\)](#) or [515\(3\)](#); [517\(4\)](#), [518\(2\)](#), [520\(3\)](#), [530\(3\)](#), [540\(4\)](#). [BMS 524\(3\)](#) may be substituted for one of these courses. [CHM 302\(5\)](#); or [CHM 502\(3\)](#) and [503\(1\)](#); or [CHM 504\(3\)](#) and [505\(1\)](#) may be substituted for one of these courses.
3. Related requirements in chemistry: [CHM 160\(4\)](#), [161\(1\)](#), [170\(3\)](#), [171\(1\)](#); [CHM 201\(3\)](#) and [202\(2\)](#), or [CHM 342\(3\)](#) and [345\(2\)](#) and [CHM 343\(3\)](#), or [CHM 342\(3\)](#) and [345\(2\)](#); [CHM 352\(3\)](#) or [CHM 554\(3\)](#) and [556\(3\)](#).

Wildlife and Fisheries Biology option (68-87 hours total for major):

1. [BIO 320\(4\)](#) or [361\(4\)](#), [367\(3\)](#), [368\(1\)](#).
2. Two courses in plant biology from: [BIO 334\(3\)](#), [339\(2\)](#), [530\(3\)](#), [544\(4\)](#).
3. Three courses in animal biology from: [BIO 370\(4\)](#), [371\(3\)](#), [380\(5\)](#), [571\(4\)](#), [573\(3\)](#), [574\(2\)](#), [575\(3\)](#), [576\(3\)](#), [577\(3\)](#).
4. Five hours in management from: [BIO 373\(3\)](#), [485\(1-3\)](#), [509\(4\)](#), [532\(3\)](#), [533\(4\)](#), [562\(4\)](#), [589\(3\)](#).
5. Two courses in ecology and evolution from: [BIO 436\(4\)](#), [504\(3\)](#), [515\(3\)](#), [539\(3\)](#), [563\(3\)](#), [567\(4\)](#), [578\(4\)](#), [579\(3\)](#), [584\(3\)](#).
6. One course in human dimensions from: [AGN 335\(3\)](#), [BIO 547\(3\)](#), [BIO 561\(2\)](#), [CRM 210\(3\)](#), [ECO 540\(3\)](#), [GRY 108\(3\)](#), [GRY 351\(2\)](#), [PHI 302\(3\)](#), [PLS 555\(3\)](#), [LAW 537\(3\)](#).
7. One course in earth/environmental science from: [AGN 215\(3\)](#), [CHM 260\(3\)](#), [GLG 110\(4\)](#), [GRY 142\(4\)](#).

Minor(s)

Biology

Bachelor of Arts

1. [BIO 121\(4\)](#), [122\(4\)](#), [235\(3\)](#), [236\(1\)](#).
2. Additional biology electives to total 15 hours.

Biology

Bachelor of Science

1. [BIO 121\(4\)](#), [122\(4\)](#), [235\(3\)](#), [236\(1\)](#).
2. Additional biology electives to total 19 hours.

Biology

Bachelor of Science in Education (Non-Certifiable)

[BIO 121\(4\)](#), [122\(4\)](#), [235\(3\)](#), [236\(1\)](#), [320\(4\)](#), [367\(3\)](#) and [368\(1\)](#).

Accelerated graduate program in Biology

Eligible Missouri State undergraduate students may apply for admission to the Biology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-biology.htm\)](https://graduate.missouristate.edu/Catalog/prog-biology.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Natural and Applied Science

Eligible Missouri State undergraduate students may apply for admission to the Master of Natural and Applied Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm\)](https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Plant Science

Eligible Missouri State undergraduate students may apply for admission to the Plant Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-AG-plant-science.htm\)](https://graduate.missouristate.edu/Catalog/prog-AG-plant-science.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate certificate in Science Content

Eligible Missouri State undergraduate students may apply for admission to the Science Content certificate program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate certificate (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-science-content.htm\)](https://graduate.missouristate.edu/Catalog/prog-science-content.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Conservation Law Enforcement Certificate

Conservation Law Enforcement

This certificate is jointly offered by the Department of Criminology and Criminal Justice and the Department of Biology and is designed to provide students with the fundamental knowledge needed to pursue a career in conservation law enforcement. Students who complete this certificate will better understand the interdisciplinary nature of conservation law enforcement and the interdependent relationship between criminological and biological principles in this unique law enforcement field.

This certificate is administered by the Department of Criminology and Criminal Justice.

Program requirements (18-19 hours)

1. Recommended Elective: [BIO 121\(4\)](#); or [BIO 101\(3\)](#) and [111\(1\)](#).
2. [CRM 210\(3\)](#), [CRM 365\(3\)](#), [CRM 400\(3\)](#), [BIO 122\(4\)](#), [BIO 373\(3\)](#).
3. One course from following to complete at least 18-19 hours: [BIO 532\(3\)](#), [561\(2\)](#), [573\(3\)](#), [575\(3\)](#), [576\(3\)](#).
4. All candidates must satisfy the [General University Certificate Requirements](#).

Environmental Education Certificate

Environmental Education

This certificate is jointly offered by Department of Biology and Department of Geography, Geology and Planning and provides coursework to improve or broaden the student's background knowledge of environmental related topics and provides instruction on techniques for presenting environmental topics in formal and in nonformal education settings. It also provide exposure to and access to a variety of national and regional environmental education resources that participants can use when developing their own educational programs in the future.

This certificate is administered by the College of Natural and Applied Science.

Program requirements (14-16 hours)

1. [GRY 108\(3\)](#), [BIO 561\(2\)](#).
2. Three courses from following with at least two different course codes. Only one internship and one field course can count toward this program. Cannot count both BIO 547 and GLG 547. Other courses approved by the faculty advisor for the program may be substituted on a case-by-case basis. [BIO 399\(1-3\)](#), [BIO 485\(1-3\)](#), [BIO 527\(1-4\)](#), [BIO 547\(3\)](#), [BIO 564\(2\)](#), [BIO 579\(4\)](#); [GRY 318\(3\)](#), [GRY 348\(3\)](#), [GRY 353\(2\)](#), [GRY 399\(1-3\)](#); [GLG 110\(4\)](#), [GLG 115\(3\)](#), [GLG 171\(3\)](#), [GLG 350\(3\)](#), [GLG 360\(1-3\)](#), [GLG 399\(1-3\)](#), [GLG 547\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of 2.50 or higher in the courses used to fulfill the certificate requirements.

Foundations of Pharmaceutical Science Certificate

Foundations of Pharmaceutical Science

This certificate is jointly offered by the Department of Chemistry, Department of Biology, and Department of Biomedical Science and provides students with broad exposure to foundational courses in the sciences required for pursuit of a Doctor of Pharmacy or a career in pharmaceutical science.

This certificate is administered by the Department of Chemistry.

Admission requirement

To be admitted students must have declared Pre-Pharmacy as a pre-professional area of interest.

Program requirements (16-18 hours)

1. [BIO 312](#)(3) and [313](#)(2); [BMS 307](#)(4); [CHM 170](#)(3) and [CHM 171](#)(1).
2. Complete one of the following areas of emphasis:
 - a. Biology: [BIO 320](#)(4) or [BIO 361](#)(4) or [BIO 511](#)(4).
 - b. Biomedical Science: [BMS 308](#)(4) or [BMS 321](#)(4) or [BMS 442](#)(3).
 - c. Chemistry: [CHM 342](#)(3) and [345](#)(2).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Wildlife Conservation and Management

Major(s)

Wildlife Conservation and Management (Comprehensive)

Bachelor of Science

This major is offered in cooperation with the Department of Environmental Plant Science and Natural Resources.

Major requirements (65-68 hours):

1. Specific General Education Requirements: [BIO 121\(4\)](#); [GLG 110\(4\)](#) or [GLG 171\(3\)](#) or [GRY 142\(4\)](#); [GRY 100\(3\)](#) or [GRY 108\(3\)](#); [MTH 130\(3\)](#) or higher numbered mathematics course listed in the General Education Quantitative Literacy requirement.
2. Agriculture requirements:
 - a. [AGN 115\(3\)](#) or [AGP 103\(3\)](#); [AGN 143\(3\)](#), [215\(3\)](#), [335\(3\)](#); [AGP 365\(3\)](#) or [AGP 370\(3\)](#) or [AGN 543\(3\)](#); [AGP 581\(3\)](#); [GEP 101\(2\)](#) or [UHC 110\(2\)](#) or [AGR 301\(1\)](#).
 - b. Two courses from: [AGB 354\(2\)](#), [AGN 351\(2\)](#), [AGN 465\(3\)](#), [AGP 583\(3\)](#), [AGP 585\(3\)](#).
3. Biology requirements:
 - a. [BIO 121\(4\)*](#), [122\(4\)*](#), [334\(3\)](#), [339\(2\)](#), [367\(3\)](#), [368\(1\)](#); [BIO 373\(3\)](#) or [BIO 532\(3\)](#).
 - b. Two courses from: [BIO 370\(4\)](#), [573\(3\)](#), [575\(3\)](#), [576\(3\)](#), [577\(3\)](#).
4. [CHM 116\(4\)](#) and [117\(1\)](#); or [CHM 160\(4\)](#) and [161\(1\)](#).
5. 10 additional hours in courses numbered 200 level or higher in Agriculture and/or Biology.
6. [AGR 490\(1\)](#) or [BIO 302\(1\)](#) or [BIO 494\(1\)](#); [BIO 492\(0\)](#).
7. Public Affairs Capstone Experience Requirement will be fulfilled by completion of [BIO 373\(3\)](#) or [BIO 532\(3\)](#) and two courses from 2b.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Accelerated graduate program in Natural and Applied Science

Eligible Missouri State undergraduate students may apply for admission to the Master of Natural and Applied Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Chemistry Courses

Chemistry (CHM) courses

CHM 107 Chemistry for the Citizen

General Education Course (Focus on Physical Sciences).

Concurrent enrollment in CHM 108 is highly recommended. A course for the non-science major. Principal concepts and applications of chemistry are presented. The course looks at both the beneficial side of chemical usage and the problems associated with chemical production and usage. The course provides information needed for a better understanding of environmental concerns, the chemical industry, consumer products and our alternate sources and storage of energy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	CHEM 100 - Essentials in Chemistry.

[Access the CORE 42 portal](#)

CHM 108 Chemistry for the Citizen Laboratory

Prerequisite: "C-" grade or better in CHM 107 or concurrent enrollment.

General Education Course (Focus on Physical Sciences).

A one semester course for the non-science major. Principal concepts and applications of chemistry are presented. Emphasis on experiments and lab skills associated with the lecture material in CHM 107.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
1	0	2	Fall, Spring	CHEM 100L - Essentials in Chemistry with Lab.

[Access the CORE 42 portal](#)

CHM 116 Fundamentals of Chemistry

Prerequisite: concurrent enrollment in MTH 103 or eligibility for MTH 130 or higher mathematics course.

General Education Course (Focus on Physical Sciences).

Concurrent enrollment in CHM 117 is highly recommended. Emphasis on chemical fundamentals and applications. Recommended for students needing only one semester of introductory chemistry. Cannot be counted towards a chemistry major or minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	4	0	Fall, Spring	CHEM 100 - Essentials in Chemistry.

[Access the CORE 42 portal](#)

CHM 117 Fundamentals of Chemistry Laboratory

Prerequisite: "C-" or better in CHM 116 or concurrent enrollment; concurrent enrollment in MTH 103 or eligibility for MTH 130 or higher mathematics course.

General Education Course (Focus on Physical Sciences).

Emphasis on experiments and lab skills associated with the lecture material in CHM 116, such as chemical fundamentals and applications. Recommended for students needing only one semester of general chemistry lab. Cannot be counted towards a chemistry major or minor. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
1	0	2	Fall, Spring	CHEM 100L - Essentials in Chemistry with Lab.

[Access the CORE 42 portal](#)

CHM 160 General Chemistry I

Prerequisite: eligibility for MTH 136 or higher; concurrent enrollment in CHM 161 is highly recommended.

General Education Course (Focus on Physical Sciences).

Emphasis on fundamental and theoretical concepts of chemistry. Recommended for all science majors, chemistry majors and minors, and most preprofessional students. A grade of "C-" or better is required in this course in order to take CHM 170 or CHM 171. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	4	0	Fall, Spring	CHEM 150 - Chemistry I.

[Access the CORE 42 portal](#)

CHM 161 General Chemistry I Laboratory

Prerequisite: CHM 160 or concurrent enrollment.

General Education Course (Focus on Physical Sciences).

An introduction to laboratory chemistry employing principles and techniques that reflect material presented in CHM 160, e.g., synthesis, stoichiometry, physical studies, and data manipulation and interpretation. A grade of "C-" or better is required in this course in order to take CHM 171. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
1	0	2	Fall, Spring	CHEM 150L - Chemistry I with Lab.

[Access the CORE 42 portal](#)

CHM 170 General Chemistry II

Prerequisite: "C-" grade or better in CHM 160.

Concurrent enrollment in CHM 171 is highly recommended. Emphasis on reaction kinetics, chemical equilibrium, precipitation reactions, acid-base theory and oxidation-reduction reactions. A grade of "C-" or better is required in this course in order to take CHM 342, 352, or 506. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CHM 171 General Chemistry II Laboratory

Prerequisite: CHM 170 or concurrent enrollment; and a "C-" or better in CHM 160 and CHM 161.

An introduction to laboratory chemistry, employing principles and techniques that reflect material presented in CHM 170, e.g., physical studies on kinetics and equilibria of aqueous systems, qualitative and quantitative analysis, and data manipulation and interpretation. A grade of "C-" or better is required in this course in order to take CHM 302 or 342. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	3	Fall, Spring

CHM 197 Chemical Topics

For non-science majors: a single topic of contemporary, historical or theoretical significance. Topics may vary each semester. Variable content course. May be repeated provided topics are different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

CHM 201 Essentials of Organic Chemistry

Prerequisite: a "C-" grade or better in CHM 116 or CHM 160.

Principles of organic chemistry and biochemistry. The laboratory associated with this course is CHM 202. Cannot be counted toward a chemistry major or minor if student passes CHM 342.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CHM 202 Essentials of Organic Chemistry Laboratory

Prerequisite: "C-" or better in CHM 117 or CHM 161; "C-" or better in CHM 201 or concurrent enrollment.

Principles of organic chemistry and biochemistry. Emphasis on experiments and lab skills associate with the lecture material in CHM 201. Cannot be counted towards a chemistry major or minor if the student passes CHM 342. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall, Spring

CHM 240 Glass Working

Prerequisite: CHM 170.

Instruction and practice in glass-working techniques needed to make simple apparatus.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

CHM 242 Preparing for Organic Chemistry

Prerequisite: "C-" or better in CHM 170 or concurrent enrollment.

Bridging the gap between CHM 170 and CHM 342, including discussion of how general chemistry differs from organic chemistry, study strategies for organic chemistry, and general chemistry topics discussed in terms of their application to organic chemistry.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CHM 260 Principles of Environmental Chemistry

Prerequisite: "C-" grade or better in CHM 116 and 117 or CHM 160.

An introduction to chemical processes occurring in the atmosphere, natural waters and soil. Sources of pollution, effects and remediation strategies are emphasized.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

CHM 300 Service Learning in Chemistry

Prerequisite: 30 hours, and concurrent registration in a chemistry course designated as a service learning offering.

This service component for an existing course incorporates community service with classroom instruction in chemistry to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; students should investigate possible placements, available through the Chemistry Department and the Citizenship and Service Learning Office, prior to registration. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

CHM 302 Introduction to Analytical Chemistry

Prerequisite: "C-" grade or better in both CHM 170 and CHM 171.

Fundamentals of chemical analysis and basic statistics; solution equilibria, fundamentals of spectrophotometric, chromatographic, and electrochemical methods. Laboratory includes both wet chemical and instrumental methods. Representative analyses are performed in laboratory.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	4	Fall, Spring

CHM 342 Organic Chemistry I

Prerequisite: "C-" grade or better in CHM 170.

Systematic coverage of reactions and properties of organic compounds. A grade of "C-" or better is required in this course in order to take CHM 343, CHM 345 or CHM 352. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CHM 343 Organic Chemistry II

Prerequisite: "C-" grade or better in CHM 342.

Continuation of CHM 342. A grade of "C-" or better is required in this course in order to take CHM 445 or CHM 542. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CHM 345 Microscale Organic Chemistry Laboratory

Prerequisite: "C-" grade or better in CHM 171 and in 342.

Learn and apply experimental techniques used in the microscale organic chemistry laboratory, including synthesis, isolation, and characterization of organic molecules.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Fall, Spring

CHM 352 Introduction to Biochemistry

Prerequisite: "C-" grade or better in either [CHM 201 and 202] or CHM 342.

Recommended Prerequisite: BIO 121 or BMS 110 and 111. Essentials of biochemistry; chemistry and metabolism of biologically important compounds. CHM 352 and 554 cannot both be applied toward a Chemistry major or minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CHM 353 Introduction to Biochemistry Laboratory

Prerequisite: CHM 171 or [CHM 201 and 202] or CHM 342; and CHM 352 or concurrent enrollment.

Introduction to modern biochemical techniques including buffer preparation, chromatographic separations and spectrophotometric analysis of biomolecules. CHM 353 and 555 cannot both be applied toward a chemistry major or minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall, Spring

CHM 375 Inorganic Chemistry

Prerequisite: "C-" grade or better in CHM 170.

Atomic structure, chemical bonding, acid/base and reduction/oxidation concepts, reactivity of inorganic compounds, chemistry of main group elements, fundamentals of coordination theory. A grade of "C-" or better is required in this course in order to take CHM 575. May be taught concurrently with CHM 673. Cannot receive credit for both CHM 375 and CHM 673. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CHM 376 Inorganic Preparation

Prerequisite: "C-" grades or better in CHM 171 and CHM 375.

Synthesis of inorganic compounds and measurements of physical and chemical properties of selected inorganic compounds.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Spring

CHM 397 Cooperative Education in Chemistry

Prerequisite: acceptance into Cooperative Education Program and permission.

A combination of supervised work experience in an industrial or governmental laboratory and academic training. Variable content course. May be repeated to a maximum of six hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2			Fall, Spring

CHM 398 Chemical Symposium

Prerequisite: 14 hours of chemistry.

Recommended Prerequisite: take within the first 75 hours. Introduction to oral and written scientific communication, laboratory safety, ethics, scientific literature searching and software, and current trends in chemical research. Does not count toward a chemistry minor. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

CHM 399 Undergraduate Research

Prerequisite: permission of instructor.

Individual investigation of a chemical problem under the guidance of a chemistry department faculty member. Students are required to consult with the chemistry department to obtain a research information packet and to discuss research options with chemistry faculty members. A formal written report is required for this course. May be repeated to a maximum of five hours. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

CHM 435 Investigations in Chemistry for Teachers

Prerequisite: 15 hours of chemistry or permission.

Techniques in performing science investigation with application to secondary and middle school science. May be taught concurrently with CHM 635. Cannot receive credit for both CHM 435 and CHM 635.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring (odd-numbered years)

CHM 445 Intermediate Organic Chemistry Laboratory

Prerequisite: "C-" grade or better in CHM 343 and in CHM 345.

Learn and apply experimental techniques used in the preparative organic chemistry laboratory, including synthesis, multistep synthesis, isolation, purification, and characterization of organic molecules. Course is intended for chemistry majors.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	3	Fall, Spring

CHM 460 Environmental Chemistry: Water and Land

Prerequisite: "C-" or better in CHM 170; and "C-" or better in CHM 201 or CHM 342.

Recommended Prerequisite: CHM 302. Chemistry of water and soil, water treatment, agricultural chemistry and related topics. May be taught concurrently with CHM 660. Cannot receive credit for both CHM 460 and CHM 660.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CHM 461 Environmental Chemistry: Air and Energy

Prerequisite: "C-" or better in CHM 201 or CHM 342.

Recommended Prerequisite: some advanced coursework in chemistry, geosciences, biology, or related fields. Atmospheric chemistry; pollution issues related to power production and transportation; energy sources and fuels. May be taught concurrently with CHM 661. Cannot receive credit for both CHM 461 and CHM 661.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CHM 462 Environmental Chemistry Laboratory

Prerequisite: "C-" or better in CHM 302 and CHM 460.

Techniques and procedures for environmental monitoring to test natural samples. Applications and limitations of wet chemical and instrumental methods such as atomic absorption, gas chromatography, absorption spectrophotometry. May be taught concurrently with CHM 662. Cannot receive credit for both CHM 462 and CHM 662. Cannot receive credit for both CHM 462 and CHM 463.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Spring

CHM 463 Environmental Analysis

Prerequisite: "C-" or better in CHM 302 and CHM 460.

Techniques and procedures for environmental analysis of natural water samples with an emphasis on wet chemical methods. Cannot receive credit for both CHM 462 and CHM 463. Scheduled as first block class.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring

CHM 492 Program Assessment

Prerequisite: senior standing chemistry major; and permission of department head.

Required assessment of undergraduate Comprehensive and Non-comprehensive Chemistry majors, who are required to enroll in this course during their final semester and complete a comprehensive assessment exam, as administered by the department. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
0			Fall, Spring

CHM 498 Chemistry Careers

Prerequisite: CHM 398 and 60 hours.

Writing scientific resumes and cover letters, discussion of chemistry careers, graduate school, job-hunting resources and professional ethics. Outside speakers from chemistry-related employers will be invited. Interaction with the Career Center will be required. Public Affairs Capstone Experience course. May be taught concurrently with CHM 696. Cannot receive credit for both CHM 498 and CHM 696.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

CHM 499 Advanced Undergraduate Research

Prerequisite: CHM 398 and CHM 399, and permission of instructor.

Investigation of a research project as a continuation from CHM399 or pursuit of more advanced study under the guidance of a chemistry department faculty member. A formal written report and formal oral presentation of the research conducted are is required for this course. May be repeated to a maximum of five hours. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

CHM 502 Instrumental Analysis

Prerequisite: "C-" or better in CHM 201 or CHM 342; and "C-" or better in CHM 302.

Recommended Prerequisite: PHY 124 or PHY 204. Applications of instrumental methods for the separation and analysis of materials; included are potentiometry, photometry and chromatography. May be taught concurrently with CHM 602. Cannot receive credit for both CHM 602 and CHM 502.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CHM 503 Instrumental Analysis Laboratory

Prerequisite: "C-" or better in CHM 302; and "C-" or better in CHM 502 or CHM 602 or concurrent enrollment.

A laboratory course emphasizing applications of Instrumental methods for the separation and analysis of materials. The course is designed to reflect and supplement the scope of CHM 502. Included are laboratory

exercises in potentiometry, spectrophotometry, and chromatography. May be taught concurrently with CHM 603. Cannot receive credit for both CHM 503 and CHM 603.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	3	Fall

CHM 504 Fundamentals of Physical Chemistry

Prerequisite: "C-" or better in CHM 170; and "C-" or better in CHM 201 or CHM 342; and "C-" or better in MTH 261 or MTH 287; and "C-" or better in PHY 123 or PHY 203.

A one semester introduction to physical chemistry including the following topics: thermodynamics, chemical equilibrium, chemical kinetics, atomic and molecular structure, and spectroscopy. Cannot count toward a Chemistry major or minor if the student passes CHM 506. May be taught concurrently with CHM 604. Cannot receive credit for both CHM 604 and CHM 504.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CHM 505 Fundamentals of Physical Chemistry Laboratory

Prerequisite: "C-" or better in CHM 302; and in CHM 201 or CHM 342; and CHM 504 or concurrent enrollment.

Experiments in physical chemistry employing principles and techniques reflecting materials presented in CHM 504. May be taught concurrently with CHM 605. Cannot receive credit for both CHM 605 and CHM 505.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	3	Spring

CHM 506 Physical Chemistry I

Prerequisite: "C-" or better in CHM 170; and MTH 280 or MTH 288 or concurrent enrollment in MTH 280 or MTH 288.

Recommended Prerequisite: MTH 302; and PHY 124 or PHY 204. First semester of a two-semester series covering aspects of quantum mechanics, classical and statistical thermodynamics, spectroscopy, kinetic theory of gases, and chemical kinetics. A grade of "C-" or better is required in this course in order to take CHM 507. Cannot be taken Pass/Not Pass. May be taught concurrently with CHM 606. Cannot receive credit for both CHM 606 and CHM 506.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CHM 507 Physical Chemistry II

Prerequisite: "C-" grade or better in CHM 506.

Recommended Prerequisite: CHM 375. Second semester of a two-semester series that builds upon and completes the topics introduced in CHM 506. May be taught concurrently with CHM 607. Cannot receive credit for both CHM 607 and CHM 507.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CHM 508 Physical Chemistry Laboratory I

Prerequisite: "C-" or better in CHM 302; and "C-" or better in CHM 506 or CHM 606 or concurrent enrollment in CHM 506 or CHM 606.

Experiments in physical chemistry employing principles and techniques reflecting material presented in CHM 506. May be taught concurrently with CHM 608. Cannot receive credit for both CHM 608 and CHM 508.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall

CHM 509 Physical Chemistry Laboratory II

Prerequisite: CHM 507 or CHM 607 or concurrent enrollment; and CHM 508 or CHM 608.

Experiments in physical chemistry employing principles and techniques reflecting material presented in CHM 507. May be taught concurrently with CHM 609. Cannot receive credit for both CHM 609 and CHM 509.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Spring

CHM 514 Polymer Chemistry

Prerequisite: "C-" or better in CHM 343; and "C-" or better in CHM 505 or CHM 605 or CHM 506 or CHM 606.

Morphology and chemical structure, polymer characterization, chemical structure and polymer properties, vinyl and non-vinyl polymers and mechanism of formation. Inorganic and partially inorganic polymers. May be taught concurrently with CHM 614. Cannot receive credit for both CHM 614 and CHM 514.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

CHM 542 Advanced Organic Chemistry

Prerequisite: "C-" grade or better in CHM 343.

Advanced discussion of structure, reaction mechanisms, stereochemistry and other topics of theoretical nature in organic chemistry. Polar, free-radical, pericyclic, and organometallic reactions beyond Organic Chemistry I and II will be discussed. May be taught concurrently with CHM 642. Cannot receive credit for both CHM 542 and CHM 642.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CHM 554 Biochemistry I

Prerequisite: "C-" or better in CHM 343.

Recommended Prerequisite: BIO 121 or BMS 110 and 111. Structure and function of biomolecules: proteins, enzymes, nucleic acids, carbohydrates, lipids and membranes. CHM 352 and 554 cannot both be applied toward a chemistry major or minor. May be taught concurrently with CHM 654. Cannot receive credit for both CHM 554 and CHM 654.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Upon demand

CHM 555 Biochemistry Laboratory I

Prerequisite: CHM 554 or concurrent enrollment.

A series of multidimensional biochemical experiments designed to explore the biochemical literature, scientific report writing, and the biochemical techniques used to isolate and study biomolecules. CHM 353 and 555 cannot both be applied toward a chemistry major or minor. May be taught concurrently with CHM 655. Cannot receive credit for both CHM 555 and CHM 655.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall, Upon demand

CHM 556 Biochemistry II

Prerequisite: "C-" or better in CHM 554.

Bioenergetics--Metabolism of biomolecules including carbohydrates, lipids, amino acids and nucleotides. Photosynthesis. Nitrogen metabolism. Mechanisms of hormone action. May be taught concurrently with CHM 656. Cannot receive credit for both CHM 556 and CHM 656.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring, Upon demand

CHM 557 Biochemistry Laboratory II

Prerequisite: CHM 555; and CHM 556 or concurrent enrollment.

Emphasis on modern techniques in the biochemistry laboratory; enzymology, protein purification and analysis; protein structure determination; isoelectric focusing; HPLC; trace techniques. May be taught concurrently with CHM 657. Cannot receive credit for both CHM 557 and CHM 657.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Upon demand

CHM 575 Advanced Inorganic Chemistry

Prerequisite: "C-" or better in CHM 375.

Theories and techniques of modern inorganic chemistry; correlation of theories with inorganic compounds. May be taught concurrently with CHM 675. Cannot receive credit for both CHM 575 and CHM 675.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CHM 597 Special Topics in Chemistry

Prerequisite: 18 hours of chemistry.

Selected topics of a theoretical or applied nature. May be repeated to a maximum of six hours with differing topics. May be taught concurrently with CHM 697. Cannot receive credit for both CHM 697 and CHM 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CHM 602 Instrumental Analysis

Prerequisite: "C-" or better in CHM 201 or CHM 342; and "C-" or better in CHM 302.

Recommended Prerequisite: PHY 124 or PHY 204. Applications of instrumental methods for the separation and analysis of materials; included are potentiometry, photometry and chromatography. May be taught concurrently with CHM 502. Cannot receive credit for both CHM 502 and CHM 602.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CHM 603 Instrumental Analysis Laboratory

Prerequisite: Prerequisite: "C-" or better in CHM 302; and "C-" or better in CHM 502 or CHM 602 or concurrent enrollment.

A laboratory course emphasizing applications of instrumental methods for the separation and analysis of materials. The course is designed to reflect and supplement the scope of CHM 602. Included are laboratory exercises in potentiometry, spectrophotometry, and chromatography. May be taught concurrently with CHM 503. Cannot receive credit for both CHM 503 and CHM 603.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	3	Fall

CHM 604 Fundamentals of Physical Chemistry

Prerequisite: permission.

A one semester introduction to physical chemistry including the following topics: thermodynamics, chemical equilibrium, chemical kinetics, atomic and molecular structure, and spectroscopy. Cannot count toward the BS or MS degrees in Chemistry. May be taught concurrently with CHM 504. Cannot receive credit for both CHM 504 and CHM 604.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CHM 605 Fundamentals of Physical Chemistry Laboratory

Prerequisite: CHM 504 or CHM 604 or concurrent enrollment.

Experiments in physical chemistry employing principles and techniques reflecting materials presented in CHM 604. May be taught concurrently with CHM 505. Cannot receive credit for both CHM 605 and CHM 505.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	3	Spring

CHM 606 Physical Chemistry I

Prerequisite: "C-" or better in CHM 170; and MTH 280 or MTH 288 or concurrent enrollment in MTH 280 or MTH 288.

Recommended Prerequisite: MTH 302; and PHY 124 or PHY 204. First semester of a two-semester series covering aspects of quantum mechanics, classical and statistical thermodynamics, spectroscopy, kinetic theory of gases, and chemical kinetics. A grade of "C-" or better is required in this course in order to take CHM 607. May be taught concurrently with CHM 506. Cannot receive credit for both CHM 606 and CHM 506.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CHM 607 Physical Chemistry II

Prerequisite: "C-" grade or better in CHM 506 or 606.

Recommended Prerequisite: CHM 375. Second semester of a two-semester series that builds upon and completes the topics introduced in CHM 606. May be taught concurrently with CHM 507. Cannot receive credit for both CHM 607 and CHM 507.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CHM 608 Physical Chemistry Laboratory I

Prerequisite: "C-" or better in CHM 302; and "C-" or better in CHM 506 or CHM 606 or concurrent enrollment in CHM 506 or CHM 606.

Experiments in physical chemistry employing principles and techniques reflecting material presented in CHM 506 or 606. May be taught concurrently with CHM 508. Cannot receive credit for both CHM 608 and CHM 508.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall

CHM 609 Physical Chemistry Laboratory II

Prerequisite: CHM 507 or CHM 607 or concurrent enrollment; and CHM 508 or CHM 608.

Experiments in physical chemistry employing principles and techniques reflecting material presented in CHM 507 or 607. May be taught concurrently with CHM 509. Cannot receive credit for both CHM 609 and CHM 509.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Spring

CHM 614 Polymer Chemistry

Prerequisite: "C-" or better in CHM 343; and CHM 505 or CHM 605 or CHM 506 or CHM 606.

Morphology and chemical structure, polymer characterization, chemical structure and polymer properties, vinyl and non-vinyl polymers and mechanism of formation. Inorganic and partially inorganic polymers. May be taught concurrently with CHM 514. Cannot receive credit for both CHM 514 and CHM 614.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

CHM 635 Investigations in Chemistry for Teachers

Prerequisite: coursework sufficient to meet Missouri certification standards for secondary/middle school science teaching.

Techniques in performing science investigation with application to secondary and middle school science. May be taught concurrently with CHM 435. Cannot receive credit for both CHM 435 and CHM 635.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Spring (odd-numbered years)

CHM 642 Advanced Organic Chemistry

Prerequisite: "C-" grade or better in CHM 343.

Advanced discussion of structure, reaction mechanisms, stereochemistry and other topics of theoretical nature in organic chemistry. Polar, free-radical, pericyclic, and organometallic reactions beyond Organic Chemistry I and II will be discussed. May be taught concurrently with CHM 542. Cannot receive credit for both CHM 542 and CHM 642.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CHM 654 Biochemistry I

Prerequisite: "C-" or better in CHM 343.

Recommended Prerequisite: BIO 121 or BMS 110 and 111. Structure and function of biomolecules: proteins, enzymes, nucleic acids, carbohydrates, lipids and membranes. May be taught concurrently with CHM 554. Cannot receive credit for both CHM 554 and CHM 654.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Upon demand

CHM 655 Biochemistry Laboratory I

Prerequisite: CHM 554 or CHM 654 or concurrent enrollment.

A series of multidimensional biochemical experiments designed to explore the biochemical literature, scientific report writing, and the biochemical techniques used to isolate and study biomolecules. May be taught concurrently with CHM 555. Cannot receive credit for both CHM 555 and CHM 655.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Fall, Upon demand

CHM 656 Biochemistry II

Prerequisite: "C-" or better in CHM 554 or CHM 654.

Bioenergetics--Metabolism of biomolecules including carbohydrates, lipids, amino acids and nucleotides. Photosynthesis. Nitrogen metabolism. Mechanisms of hormone action. May be taught concurrently with CHM 556. Cannot receive credit for both CHM 556 and CHM 656.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring, Upon demand

CHM 657 Biochemistry Laboratory II

Prerequisite: CHM 555 or CHM 655; and CHM 556 or CHM 656 or concurrent enrollment.

Emphasis on modern techniques in the biochemistry laboratory; enzymology, protein purification and analysis; protein structure determination; isoelectric focusing; HPLC; trace techniques. May be taught concurrently with CHM 557. Cannot receive credit for both CHM 557 and CHM 657.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Upon demand

CHM 660 Chemistry of Environmental Systems: Water and Land

Recommended Prerequisite: some advanced coursework in chemistry, geosciences, biology, or related fields. Chemistry of water and soil, water treatment, agricultural chemistry, and related topics. May be taught concurrently with CHM 460. Cannot receive credit for both CHM 460 and CHM 660.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CHM 661 Chemistry of Environmental Systems: Air and Energy

Recommended Prerequisite: some advanced coursework in chemistry, geosciences, biology, or related fields. Atmospheric chemistry; pollution issues related to power production and transportation; energy sources and fuels. May be taught concurrently with CHM 461. Cannot receive credit for both CHM 661 and CHM 461.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CHM 662 Chemistry of Environmental Systems Laboratory

Prerequisite: CHM 660 or concurrent enrollment.

Techniques and procedures for environmental monitoring to test natural samples. Applications and limitations of wet chemical and instrumental methods such as atomic absorption, gas chromatography, and absorption spectrophotometry. May be taught concurrently with CHM 462. Cannot receive credit for both CHM 462 and CHM 662.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Spring

CHM 673 Inorganic Chemistry

Prerequisite: "C-" grade or better in CHM 170.

Atomic structure, chemical bonding, acid/base and reduction/oxidation concepts, reactivity of inorganic compounds, chemistry of main group elements, fundamentals of coordination theory. A grade of "C-" or better is required in this course in order to take CHM 675. Cannot count toward the MS degree in Chemistry. May be taught concurrently with CHM 375. Cannot receive credit for both CHM 375 and CHM 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CHM 675 Advanced Inorganic Chemistry

Prerequisite: "C-" or better in CHM 375.

Theories and techniques of modern inorganic chemistry; correlation of theories with inorganic compounds. May be taught concurrently with CHM 575. Cannot receive credit for both CHM 575 and CHM 675.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CHM 696 Chemistry Careers

Students will develop a familiarity with campus resources for finding employment and/or further educational training upon graduation. Emphasis will be given to writing scientific resumes and cover letters, familiarization with job-hunting resources and professional ethics, and researching chemistry careers, employers, and graduate schools. Outside speakers from chemistry-related employers and graduate programs will be invited, and interaction with the Career Center will be required. May be taught concurrently with CHM 498. Cannot receive credit for both CHM 696 and CHM 498.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

CHM 697 Special Topics in Chemistry

Prerequisite: 18 hours of chemistry.

Selected topics of a theoretical or applied nature. May be repeated to a maximum of six hours with differing topics. May be taught concurrently with CHM 597. Cannot receive credit for both CHM 597 and CHM 697.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CHM 700 Chemistry Colloquium

Prerequisite: permission of department head.

A series of oral presentations on new developments in chemistry. Presentations to be made by faculty members, students, and guest speakers from industry and academe. One of the requirements of this course is an oral presentation. May be repeated, but not more than two hours may be counted toward the 32-hour requirement for the MS in Chemistry degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

CHM 701 Chemistry Seminar

Attendance at oral presentations on new developments in chemistry. Presentations may include those made by departmental faculty members, departmental graduate students, guest speakers from industry and academe and ACS tour speakers. All graduate students not enrolled in CHM 700 must be enrolled in CHM 701. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
0			Fall, Spring

CHM 702 Advanced Topics in Analytical Chemistry

Prerequisite: CHM 602.

An advanced topic in analytical chemistry will be addressed via faculty lectures and student projects. Examples of proposed topics include: electroanalytical methods, nanotechnology, forensic chemistry and data acquisition methods. Variable content course. May be repeated to a maximum of six hours with differing topics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CHM 710 Special Topics in Chemical Education

Prerequisite: coursework sufficient to meet Missouri certification standards in chemistry for secondary teaching or permission.

A single topic of current interest in the teaching of chemistry will be considered. May be repeated to a maximum of nine hours with differing topics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CHM 720 Advanced Topics in Physical Chemistry

Prerequisite: CHM 607 or permission of instructor.

An advanced topic in physical chemistry will be addressed via faculty lectures and student projects. Examples of proposed topics include: chemical kinetics, quantum chemistry, biophysical chemistry, and modern spectroscopic methods. Variable content course. May be repeated to a maximum of six hours with differing topics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CHM 735 Investigation in Chemistry for Teachers

Prerequisite: CHM 635 or concurrent enrollment; coursework sufficient to meet Missouri certification standards for secondary/middle school science teaching.

Techniques in performing science investigation with application to secondary and middle school science.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

CHM 742 Advanced Topics in Organic Chemistry

Prerequisite: CHM 642 or permission of instructor.

An in-depth study of an advanced topic in organic chemistry, entailing faculty lectures and student projects. Examples of proposed topics include: physical organic chemistry, medicinal chemistry, natural products, and spectroscopic characterization. Variable content course. May be repeated to a maximum of six hours with differing topics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CHM 752 Advanced Topics in Biochemistry

Prerequisite: CHM 656.

An advanced topic in biochemistry will be addressed via faculty lectures and student projects. Examples of proposed topics include: carbohydrates, the cell surface, and physical biochemistry. Variable content course. May be repeated to a maximum of six hours with differing topics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CHM 763 Advanced Topics in Environmental Chemistry

Prerequisite: permission.

An advanced topic in environmental chemistry will be addressed via faculty lectures and student projects. Examples of proposed topics include: Sampling methods, standardized testing, nanoparticles in the environment, and the impact of discarded emerging materials. Variable content course. May be repeated to a maximum of six hours with differing topics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CHM 770 Chemical Kinetics

Prerequisite: CHM 606.

Fundamental concepts of chemical kinetics and dynamics, from both macroscopic and molecular level perspectives. An emphasis will be placed on the interpretation of gas, liquid, surface and catalyst reaction kinetics and mechanisms.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CHM 771 Chemical Bonding

Prerequisite: CHM 607.

Quantum mechanics; atomic and molecular structure; computational procedures. Independent study project required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CHM 775 Advanced Topics in Inorganic Chemistry

Prerequisite: CHM 675 or permission of instructor.

An in-depth examination of a special topic in the area of inorganic chemistry, including faculty lectures and student projects. Examples of proposed topics include: organometallic chemistry, bioinorganic chemistry, solid-state materials, and crystal structure analysis. Variable content course. May be repeated to a maximum of six hours with differing topics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CHM 790 Advanced Topics in Chemistry

Detailed treatment of various advanced topics in chemistry. Variable content course. May be repeated with differing topics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CHM 791 Preparation for Graduate Study in Chemistry

Prerequisite: admission to graduate program in Chemistry.

Orientation to graduate study in chemistry, including laboratory safety, research awareness, scientific dissemination, and design of a research project.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CHM 792 Degree Paper in Chemistry

Prerequisite: 4 or more hours of CHM 798 and departmental permission.

Written research paper on a selected topic to be read and evaluated by an advisory committee and presented orally before a public audience. Exclusively satisfies requirements for non-thesis option.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CHM 793 Research Paper in Chemistry

Prerequisite: departmental permission.

Extensive paper on a selected topic to be read and evaluated by a faculty committee. Exclusively used to satisfy requirements for non-thesis option. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CHM 796 Science Internship

Completion of an internship project (80 hours/credit hour) at a discipline-related business, nonprofit organization, or government agency, approved and supervised by both the departmental and internship advisors. Includes a formal report in the appropriate professional format, and an oral presentation at an approved venue. Graded Pass/Not Pass only. No more than 6 hours may count toward a masters degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

CHM 798 Research

Supervised research in special chemistry areas. May be repeated, but not more than six hours may be counted toward the 32-hour requirement for the MS degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring

CHM 799 Thesis

Independent research and study connected with preparation of thesis. Not more than 6 hours of CHM 799 may be counted toward the 32-hour requirement for the MS degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Undergraduate Catalog

Chemistry

Major(s)

Chemistry (Non-Comprehensive)

Bachelor of Science

Major requirements (60-71 hours)

- [CHM 160](#)(4), [161](#)(1), [170](#)(3), [171](#)(1), [302](#)(5), [342](#)(3), [343](#)(3), [345](#)(2), [375](#)(3), [398](#)(1)*, [445](#)(2), [492](#)(0), [498](#)(1)*, [502](#)(3), [503](#)(1); [CHM 504](#)(3) and [505](#)(1); or [CHM 506](#)(3) and [507](#)(3) and [508](#)(2); and one hour from [CHM 397](#)* or [399](#)*,**.
- Chemistry electives from one of the following categories (8-9 hours):
 - For a basic chemistry program without a specific area of emphasis, at least eight hours from [CHM 352](#)(3), [376](#)(2), [399](#)*,** or [499](#)(1-3)*, [460](#)(3) or [461](#)(3), [509](#)(2).
 - For students with a strong interest in environmental chemistry: [CHM 460](#)(3), [461](#)(3), [462](#)(2).
 - For students with a strong interest in biochemistry or health careers: [CHM 554](#)(3), [555](#)(2), [556](#)(3).
 - For students with a strong interest in education: [CHM 352](#)(3), [435](#)(1), [460](#)(3), [462](#)(2). Students interested in pursuing certification for high school science teaching should declare a [Foundation of Interdisciplinary Science](#) minor.
 - For a specific area of interest not included in categories a, b, c, or d: at least nine hours of chemistry courses numbered greater than 300 selected in consultation with the student's academic advisor and approved by the department head.
- Public Affairs Capstone Experience will be fulfilled by completion of [CHM 398](#) and [498](#)(2); and [CHM 397](#) or [399](#) or [499](#)(1).
- Related science and mathematics requirements (14-20 hours):
 - [MTH 261](#)*** and [280](#)(10) or [MTH 261](#)*** and [288](#)(8) or [MTH 287](#) and [288](#)(6).
 - [PHY 123](#)*** and [124](#)(8) or [PHY 203](#)*** and [204](#)(10).
- Minor required (or second major).

**Will also count toward the Public Affairs Capstone Experience requirement.*

***If using CHM399 to fulfill B.1. and B.2.a.: Any hours of CHM399 used to fulfill B.2.a. are in addition to B.1.*

****Will also count toward General Education requirements.*

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Chemistry (Comprehensive)

Bachelor of Science

Major requirements (70-87 hours):

Major core (61-67 hours):

1. [CHM 160](#)(4), [161](#)(1), [170](#)(3), [171](#)(1), [302](#)(5), [342](#)(3), [343](#)(3), [345](#)(2), [375](#)(3), [398](#)(1)*, [445](#)(2), [492](#)(0), [498](#)(1)*, [502](#)(3), [503](#)(1), [506](#)(3), [507](#)(3), [508](#)(2), [554](#)(3), [575](#)(3).
2. Related science and mathematics requirements (14-20 hours):
 - a. [MTH 287](#) and [288](#)(6) or [MTH 261](#)** and [280](#)(10) or [MTH 261](#)** and [288](#)(8).
 - b. [PHY 123](#)** and [124](#)(8) or [PHY 203](#)** and [204](#)(10).
 - c. Recommended: [CSC 111](#)(3).
3. Public Affairs Capstone Experience will be fulfilled by completion of [CHM 398](#) and [498](#)(2); and [CHM 397](#) or [399](#) or [499](#)(1).

Complete one of the following options:

Biochemistry option (20 hours):

This option is designed for students preparing for graduate study and/or careers in biochemistry.

1. [CHM 399](#)(1-3)* or [499](#)(1-3)*.
2. [CHM 555](#)(2), [556](#)(3), [557](#)(2).
3. [BIO 121](#)(4)**, [235](#)(3), [236](#)(1), [320](#)(4).
4. Recommended: [BIO 312](#)(3) and [313](#)(2).

Graduate School/Industrial option (9 hours):

This option is designed for students preparing for graduate study in chemistry and/or industrial positions.

1. [CHM 376](#)(2) and [509](#)(2).
2. One course from: [CHM 514](#)(3), [542](#)(3), [556](#)(3).
3. Two hours from: [CHM 397](#)(2)*, [399](#)(1-2)*, [499](#)(1)*.

**Will also count toward Public Affairs Capstone Experience requirement.*

***Will also count toward General Education requirements.*

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Minor(s)

Chemistry

Bachelor of Arts
Bachelor of Science

1. [CHM 160](#)(4), [161](#)(1), [170](#)(3), [171](#)(1); [CHM 201](#)(3) and [202](#)(2) or [CHM 342](#)(3) and [345](#)(2).
2. Select an emphasis area from:
 - a. Analytical: [CHM 302](#)(5).
 - b. Biochemistry: [CHM 352](#)(3) and [353](#)(2); or [CHM 554](#)(3) and [555](#)(2).
 - c. Environmental: [CHM 460](#)(3) and [461](#)(3).
 - d. Inorganic: [CHM 375](#)(3) and [376](#)(2).
 - e. Organic: [CHM 343](#)(3); and [CHM 514](#)(3) or [542](#)(3).
 - f. Physical: [CHM 506](#)(3); and [CHM 507](#)(3) or [508](#)(2).
 - g. Pre-Health: [CHM 343](#)(3); and [CHM 352](#)(3) or [554](#)(3).
 - h. Student Option: Select at least eight hours in CHM courses numbered 302 or higher.

Accelerated graduate program in Chemistry

Eligible Missouri State undergraduate students may apply for admission to the Chemistry program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-chemistry-program.htm\)](https://graduate.missouristate.edu/Catalog/prog-chemistry-program.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(//Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Natural and Applied Science

Eligible Missouri State undergraduate students may apply for admission to the Master of Natural and Applied Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm\)](https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(//Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Plant Science

Eligible Missouri State undergraduate students may apply for admission to the Plant Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-AG-plant-science.htm\)](https://graduate.missouristate.edu/Catalog/prog-AG-plant-science.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(/Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate certificate in Science Content

Eligible Missouri State undergraduate students may apply for admission to the Science Content certificate program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate certificate (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-science-content.htm\)](https://graduate.missouristate.edu/Catalog/prog-science-content.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(/Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Foundations of Interdisciplinary Science

Minor(s)

Foundations of Interdisciplinary Science

Bachelor of Science

This minor is designed for students preparing to enter post-graduate studies to become a high school science teacher. This minor does not include courses in teacher education that are required by the state of Missouri for certification as a teacher. Certification requirements can be met through postbaccalaureate programs or masters programs.

1. Foundational biology competencies: [BIO 121\(4\)*](#) and [122\(4\)](#)
2. Foundational chemistry competencies: [CHM 160\(4\)](#), [161\(1\)](#), [170\(3\)](#), and [171\(1\)](#)
3. Foundational geography and geology competencies: [GLG 110\(4\)*](#) and [GRY 135\(4\)*](#)
4. Foundational physics and astronomy competencies: [PHY 123\(4\)*](#) or [203\(5\)*](#) and [PHY 124\(4\)](#) or [204\(5\)](#). Those seeking earth science certification must additionally complete [AST 115\(4\)](#)
5. Intellectual Foundations of Science and Technology: [SCI 505\(3\)](#)

*In the Natural World area of General Education, BIO 121 will satisfy Life Sciences requirement while GLG 110, GRY 135, PHY 123, or PHY 203 will satisfy the Physical Sciences requirement. Some additional courses on the list may already be part of major degree requirements.

Foundations of Pharmaceutical Science Certificate

Foundations of Pharmaceutical Science

This certificate is jointly offered by the Department of Chemistry, Department of Biology, and Department of Biomedical Science and provides students with broad exposure to foundational courses in the sciences required for pursuit of a Doctor of Pharmacy or a career in pharmaceutical science.

This certificate is administered by the Department of Chemistry.

Admission requirement

To be admitted students must have declared Pre-Pharmacy as a pre-professional area of interest.

Program requirements (16-18 hours)

1. [BIO 312](#)(3) and [313](#)(2); [BMS 307](#)(4); [CHM 170](#)(3) and [CHM 171](#)(1).
2. Complete one of the following areas of emphasis:
 - a. Biology: [BIO 320](#)(4) or [BIO 361](#)(4) or [BIO 511](#)(4).
 - b. Biomedical Science: [BMS 308](#)(4) or [BMS 321](#)(4) or [BMS 442](#)(3).
 - c. Chemistry: [CHM 342](#)(3) and [345](#)(2).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Missouri State

Office of the Registrar

Undergraduate Catalog

Computer Science Courses

Computer Science (CSC) courses

CSC 111 Introduction to Computing

Prerequisite: eligible for MTH 261.

An introduction to computer hardware, software, and network resources. Spreadsheets and computer-based mathematical software will be emphasized. Students will write programs and create computational models to analyze data and make written and oral presentations describing conclusions drawn from their analyses.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 121 Introduction to BASIC Programming

Problem solving with computers, analysis of computational problems and development of algorithms for their solution. Algorithms will be implemented in the BASIC language utilizing personal computers.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 125 Introduction to C++ Programming

Programming and problem-solving using C++. Topics will include data representation and data types, logic and control flow, selection, loops, and functions, etc. Techniques of object-oriented programming are introduced. Concurrent enrollment in MTH 136 or MTH 137 or MTH 138 is strongly suggested for Computer Science majors or minors.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

CSC 130 The World of Computer Science

An introduction to programming and computer science. Topics will include data representation, algorithm design, and software development. Students will learn a high level language and use it to write programs. Suitable for non-majors who want to learn about programming and computer science. Concurrent enrollment in MTH 136 or MTH 137 or MTH 138 is strongly suggested for Computer Science majors or minors.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSC 131 Computational Thinking

Prerequisite: "C" or better in CSC 130; and MTH 137 or MTH 138 or concurrent enrollment.

Solving problems using computation and implementing solutions in a high-level programming language with emphasis on higher order functions, recursion, object-oriented programming and GUI development. The course continues with Python from CSC 130 before transitioning to C++. The basic constructs of C++ including data types, I/O, control statements, arrays, and pointers are covered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

CSC 197 Introductory Topics in Computer Science

Variable content course with topics that can change from semester to semester. Topics will be identified by title in the schedule of classes. The course may be repeated if a different topic is offered, however, no more than six credits may count toward any degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CSC 210 Public Affairs Issues in Computing

An introduction to public affairs issues in computing. Topics include civic applications, public sources of data, data and computer system security, opportunities and dangers of artificial intelligence and data mining, social media and computer mediated collaboration, and cultural factors in the internationalization of software. Student will design a civic application or system intended to serve the public good.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 226 Special Languages

Study of computer languages and their use in particular application domains.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 232 Data Structures

Prerequisite: "C" or better in CSC 131; and MTH 261 or MTH 314 or MTH 315 or concurrent enrollment.

A continuation of CSC 131. Topics will include: algorithm design; complexity analysis; abstract data types and encapsulation; basic data structures and their application, including stacks, queues, linked lists and binary trees; dynamic memory allocation; recursion; sorting and searching; debugging techniques.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

CSC 244 Computer Architecture

Prerequisite: CSC 131.

An overview of computer architecture, which stresses the underlying design principles and the impact of these principles on computer performance. General topics include digital logic circuits, digital components, data representation, basic computer organization, processor design, control design, pipelining, vector processing, input-output organization, and memory organization.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSC 300 Service Learning in Computer Science

Prerequisite: 30 hours and concurrent registration in a Computer Science course designated as a service learning offering.

This service component for an existing course incorporates community service with classroom instruction in Computer Science to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Upon demand

CSC 301 Introduction to Video Game Design

Prerequisite: 30 hours; and eligible for Writing II; and permission of instructor.

An introduction to the main elements of video game design (including setting, story, goals, narrative, mechanics, and level design) and the structure and responsibilities of a game development team. The emphasis will be on game designs that could be implemented by a small team within one year. Students will design a game and create a design document. Does not count towards a Computer Science major. Identical with ART 301. Cannot receive credit for both CSC 301 and ART 301.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Upon demand

CSC 303 Introductory Video Game Development for Designers and Programmers

Prerequisite: ART/CSC 301; and either CSC 232 or MED 290.

Hands-on introduction to video game development software, emphasizing level design, placement of art assets, lighting, and scripting. Students may collaborate with ART 302 students to experience industry-typical workflow between designers, artists and programmers. Does not count towards a Computer Science major.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

CSC 325 Algorithms and Advanced Data Structures

Prerequisite: "C" or better in CSC 232; and either MTH 314 or MTH 315.

A study of algorithms and advanced data structures including graphs, heaps, hashing, self-adjusting data structures, set representations, greedy algorithms, dynamic programming and introduction to NP-complete problems. The course emphasizes on the study of efficiency and algorithm analysis. May be taught concurrently with CSC 611. Cannot receive credit for both CSC 325 and CSC 611.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSC 333 Languages and Machines

Prerequisite: "C" or better in CSC 232; and MTH 314 or MTH 315.

A study of two classes of languages: formal languages (regular, context-free, and computable) and their associated machines (finite automata, pushdown automata, and Turing machines). Other topics include programming languages, focusing on the essential features of imperative, functional, object-oriented, and logic programming languages, together with their design and implementation on modern computers.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

CSC 335 Database System Concepts

Prerequisite: "C" or better in CSC 121 or CSC 125 or CSC 131; and MTH 314 or MTH 315.

A study of modern database systems and their underlying concepts. Core topics include the relational model, SQL, database design theory, query processing, file structures, transactions, and concurrency. Programming projects provide practical experience in developing GUI database applications. Public Affairs Capstone Experience course. May be taught concurrently with CSC 612. Cannot receive credit for both CSC 335 and CSC 612.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSC 344 Computer Systems Fundamentals

Prerequisite CSC 232. An integrated introduction to computer systems fundamentals. Topics include computer architecture and major components, operating system concepts and implementation techniques (processes,

threads, memory management, and distributed systems), and network theory, concepts and techniques. May be taught concurrently with CSC 613. Cannot receive credit for both CSC 344 and CSC 613.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 360 Operating Systems

Prerequisite: "C" or better in CSC 232 and in CSC 244.

Introduction to operating systems concepts, principles, and design. Topics include: processes, threads, CPU scheduling, mutual exclusion, process synchronization, deadlocks, memory management, file systems, i/o systems, disk management, distributed systems, security and protection. May be taught concurrently with CSC 660. Cannot receive credit for both CSC 360 and CSC 660.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSC 365 Internet Programming

Prerequisite: "C" or better in CSC 121 or CSC 125 or CSC 131.

An introduction to paradigms and languages used in internet and World Wide Web programming. These include modern tools for client-side and server-side programming and dynamic Web page generation. Advanced topics, such as security and XML, will be covered as time allows. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSC 388 Introduction to Secure Computing

Prerequisite: CSC 232.

This course provides an introduction to the general principles of secure computing and computer security. Students will learn about common threat types and cyber attacks including malware, denial-of-service, spoofing, and phishing as well as fundamental building blocks of secure computing systems such as authentication, encryption, and digital signatures.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSC 399 Cooperative Education in Computer Science

Prerequisite: permission of department head.

The opportunity to earn academic credit in a planned learning process that integrates academic training with a supervised work experience. Does not count toward a Computer Science minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CSC 421 Numerical Analysis I

Prerequisite: MTH 280.

Recommended: CSC 125 or CSC 131. Solution of systems of linear and nonlinear equations, interpolation, integration, approximation, matrix computations. Problem solution will include the use of software. Identical with MTH 421. Cannot receive credit for both CSC 421 and MTH 421.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 422 Numerical Analysis II

Prerequisite: MTH 303 and MTH 421.

Solution of initial and boundary value problems in ordinary and partial differential equations, simulation, and optimization. Problem solution will include the use of software. Identical with MTH 422. Cannot receive credit for both CSC 422 and MTH 422.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 423 Digital Simulation

Prerequisite: CSC 232 and either MTH 345 or MTH 540.

The study of simulation techniques. Topics will include: probability distributions, statistical testing, random number generators, design of simulation experiments, language structures for simulation, and study of a simulation language.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 450 Introduction to Software Engineering

Prerequisite: any two courses from CSC 325, CSC 335, and CSC 360.

This course provides students with a capstone project experience. Focus will be on the software engineering concepts including requirements gathering and analysis, software architecture and design, testing, and basic project management. A semester-long group project will require application of the software engineering concepts from requirements gathering to deployment and evaluation. Successful completion of the computer science major field test (MFT) with at least a score of 145 for Computer Science/Computer Science option and 140 for Computer Science/Software Development option is required for passing the course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	4	0	Fall, Spring

CSC 455 Software Quality Assurance and Project Management

Prerequisite: CSC 232.

A broad coverage of software quality and testing including quality assurance, inspections and reviews, software validation and verification, various testing techniques, and related tools. Other topics are essential software project planning steps, cost estimation, productivity metrics, release and configuration management concepts. May be taught concurrently with CSC 655. Cannot receive credit for both CSC 455 and CSC 655.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSC 482 Seminar in Computer Science

Prerequisite: 60 hours.

This course focuses on professional development skills, including resume development, interviewing, and presentations. Case studies in ethics and steps for ethical decision making will be introduced. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

CSC 500 Hardware, Software, and Troubleshooting Personal Computers

An introduction to the installation, maintenance, troubleshooting, upgrading, simple repair, and management of personal computers found in educational settings. This course will provide numerous laboratory experiences providing hands-on experience with the goal of enabling students to support personal computer laboratories found in PK-12 schools. This course cannot be taken for credit toward a computer science major or minor. May be taught concurrently with CSC 600. Cannot receive credit for both CSC 600 and CSC 500.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

CSC 505 Web-Based Resources in Educational Settings

An introduction to the design, implementation, and management of World Wide Web resources over the internet and intranet networks. Topics include Internet overview, web authoring, web programming, server setting and maintenance. The objective of the course is to know tools (HTML, JavaScript, and Java applets, and Internet Server software, and Navigator/Internet Explorer software packages), and their applicability in WWW design and management in PK-12 school settings. This course cannot be taken for credit toward a computer science major or minor. May be taught concurrently with CSC 605. Cannot receive credit for both CSC 605 and CSC 505.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

CSC 510 Networking and Telecommunications in Educational Settings

An introduction to networking and data communications from an educator's perspective. The course will examine the necessary computer hardware, software, and personnel resources relevant to networking and data communication requirements in various educational settings. Local Area Networks, Wide Area Networks, Network Interconnections, and the internet will be addressed. This course cannot be taken for credit toward a computer science major or minor. May be taught concurrently with CSC 610. Cannot receive credit for both CSC 610 and CSC 510.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

CSC 515 Advanced Internet Programming

Prerequisite: CSC 365.

A continuation of CSC 365. Topics include HTML as a semantic language, advanced CSS techniques, the DOM event model, asynchronous JavaScript, user input validation, utilizing 3rd party APIs, authentication over HTTP and high performance site design (including request minification and compression). Security principles will be reinforced throughout the course. May be taught concurrently with CSC 615. Cannot receive credit for both CSC 515 and CSC 615.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSC 521 Compiler Construction

Prerequisite: CSC 333.

Topics include lexical analysis, parsing, symbol tables, type checking, run-time organization, code generation, basic code optimization, and the use of compiler development tools. The student must write a complete compiler for a small imperative programming language. May be taught concurrently with CSC 621. Cannot receive credit for both CSC 621 and CSC 521.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Upon demand

CSC 525 Computer Graphics

Prerequisite: CSC 232 and either MTH 314 or MTH 315.

An introduction to two-dimensional and three-dimensional computer rendering. Topics will include computer graphics API's, techniques and algorithms for object modeling, viewing, transformations, and event-driven programming. May be taught concurrently with CSC 625. Cannot receive credit for both CSC 525 and CSC 625.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSC 526 Methods of Optimization

Prerequisite: CSC 421 or MTH 421; and MTH 533.

Convex sets, classical optimization of functions, constrained optimization, search techniques, linear and nonlinear optimization, applications to applied problems. May be taught concurrently with CSC 626. Cannot receive credit for both CSC 626 and CSC 526.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 535 Data Mining

Prerequisite: CSC 232.

Introduction to the basic concepts of data mining including data preprocessing, classification, clustering and association rules mining. The focus will be on understanding the algorithms underlying data mining and on the practical use of those algorithms. May be taught concurrently with CSC 635. Cannot receive credit for both CSC 535 and CSC 635.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 538 Parallel and Distributed Computing

Prerequisite: CSC 360.

Introduction to parallel and distributed computing through algorithms, strategies for problem decomposition, system architecture, implementation strategies, and performance analysis. In this course, students will have the opportunity to write parallel or distributed programs and applications in several contexts such as multithreaded programming, general purpose computing on a graphics processing unit, and MPI programming.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 540 Introduction to Artificial Intelligence

Prerequisite: CSC 325.

Modern techniques for the implementation of goal-directed behavior in intelligent systems, including knowledge representation, search, perception, reasoning, and learning. May be taught concurrently with CSC 640. Cannot receive credit for both CSC 540 and CSC 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSC 545 Computer Speech, Music and Images

Prerequisite: CSC 232.

This is an applied course focusing on the technical aspects of computer-based multimedia-speech, music, audio, and video. In any given semester, the focus may be more on audio or image processing, or it may be equally balanced between the two. Topics include multimedia data capture and representation, methods of data compression, multimedia information retrieval, and multimedia standards. May be taught concurrently with CSC 645. Cannot receive credit for both CSC 545 and CSC 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 565 Computer Networks

Prerequisite: CSC 360.

An introduction to the theory, concepts and techniques upon which modern computer networks are based. The emphasis will be on layered network architectures, the design frameworks for both local and wide area networks and communication protocols. May be taught concurrently with CSC 665. Cannot receive credit for both CSC 565 and CSC 665.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSC 567 Mobile Computing Applications

Prerequisite: CSC 232.

An introduction to the design, development, and publication of software applications for mobile devices. Course topics will include design and creation of basic and advanced applications, use of an integrated development environment, performance and security issues, and application packaging and distribution mechanisms. May be taught concurrently with CSC 667. Cannot receive credit or both CSC 567 and CSC 667.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSC 587 Computing for Bioinformatics

Prerequisite: any one of CSC 121, CSC 125, CSC 131, CSC 232, BMS 231, BIO 235, or CHM 350.

This course focuses on computational techniques used in bioinformatics. Topics will include nucleotide and amino acid data representation, sequence alignment, coding sequence prediction, and use of statistical models. Students will learn to use bioinformatics libraries with a script language such as Python or Perl. May be taught concurrently with CSC 687. Cannot receive credit for both CSC 587 and CSC 687.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 590 Advanced Topics in Computer Science

Prerequisite: CSC 232.

Variable content course with topics in the field of Computer Science. Topics may be identified by title in the schedule of classes. May be repeated if a different topic is offered. May be taught concurrently with CSC 690. Cannot receive credit for both CSC 590 and CSC 690.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

CSC 596 Special Readings

Prerequisite: permission of department head.

Directed study with a faculty member. Periodic conferences with the faculty member are required. A maximum of three credit hours may count towards any degree option. May be taught concurrently with CSC 696. Cannot receive credit for both CSC 596 and CSC 696.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CSC 600 Hardware, Software, and Troubleshooting Personal Computers

An introduction to the installation, maintenance, troubleshooting, upgrading, simple repair, and management of personal computers found in educational settings. This course will provide numerous laboratory experiences providing hands-on experience with the goal of enabling students to support personal computer laboratories

found in PK-12 schools. May be taught concurrently with CSC 500. Cannot receive credit for both CSC 500 and CSC 600.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

CSC 605 Web-Based Resources in Educational Settings

An introduction to the design, implementation, and management of World Wide Web resources over the internet and intranet networks. Topics include Internet overview, web authoring, web programming, server setting and maintenance. The objective of the course is to know tools (HTML, JavaScript, and Java applets, and Internet Server software, and Navigator/Internet Explorer software packages), and their applicability in WWW design and management in PK-12 school settings. May be taught concurrently with CSC 505. Cannot receive credit for both CSC 505 and CSC 605.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

CSC 610 Networking and Telecommunications in Educational Settings

An introduction to networking and data communications from an educator's perspective. The course will examine the necessary computer hardware, software, and personnel resources relevant to networking and data communication requirements in various educational settings. Local Area Networks, Wide Area Networks, Network Interconnections, and the internet will be addressed. May be taught concurrently with CSC 510. Cannot receive credit for both CSC 510 and CSC 610.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

CSC 611 Algorithms and Advanced Data Structures

A study of algorithms and advanced data structures including graphs, heaps, hashing, self-adjusting data structures, set representations, greedy algorithms, dynamic programming and introduction to NP-complete problems. The course emphasizes on the study of efficiency and algorithm analysis. May be taught concurrently with CSC 325. Cannot receive credit for both CSC 325 and CSC 611.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 612 Advanced Database System Concepts

A study of modern database systems and their underlying concepts. Core topics include the relational model, SQL, database design theory, query processing, file structures, transactions, and concurrency. Programming projects provide practical experience in developing GUI database applications. May be taught concurrently with CSC 335. Cannot receive credit for both CSC 612 and CSC 335.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 613 Computer Systems Fundamentals

An integrated introduction to computer systems fundamentals. Topics include computer architecture and major components, operating system concepts and implementation techniques (processes, threads, memory management, and distributed systems), and network theory, concepts and techniques. May be taught concurrently with CSC 344. Cannot receive credit for both CSC 344 and CSC 613.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 615 Advanced Internet Programming

Topics include HTML as a semantic language, advanced CSS techniques, the DOM event model, asynchronous JavaScript, user input validation, utilizing 3rd party APIs, authentication over HTTP and high performance site design (including request minification and compression). Security principles will be reinforced throughout the course. May be taught concurrently with CSC 515. Cannot receive credit for both CSC 615 and CSC 515.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSC 621 Compiler Construction

Topics include lexical analysis, parsing, symbol tables, type checking, run-time organization, code generation, basic code optimization, and the use of compiler development tools. The student must write a complete compiler for a small imperative programming language. May be taught concurrently with CSC 521. Cannot receive credit for both CSC 521 and CSC 621.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Upon demand

CSC 625 Computer Graphics

An introduction to two-dimensional and three-dimensional computer rendering. Topics will include computer graphics API's, techniques and algorithms for object modeling, viewing, transformations, and event-driven programming. May be taught concurrently with CSC 525. Cannot receive credit for both CSC 525 and CSC 625.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSC 626 Methods of Optimization

Convex sets, classical optimization of functions, constrained optimization, search techniques, linear and nonlinear optimization, applications to applied problems. May be taught concurrently with CSC 526. Cannot receive credit for both CSC 526 and CSC 626.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 630 Introduction to Data Science

Prerequisite: admission to a Computer Science graduate program or permission.

An introduction to software and techniques used in data science. Topics will include sources of data, data preparation, data analysis, use of software tools, development of data analysis software, and ethical and legal considerations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 635 Data Mining

Recommended Prerequisite: equivalent of CSC 232. Introduction to the basic concepts of data mining including data preprocessing, classification, clustering and association rules mining. The focus will be on understanding the algorithms underlying data mining and on the practical use of those algorithms. May be taught concurrently with CSC 535. Cannot receive credit for both CSC 535 and CSC 635.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 640 Introduction to Artificial Intelligence

Recommended Prerequisite: equivalent of CSC 325. Modern techniques for the implementation of goal-directed behavior in intelligent systems, including knowledge representation, search, perception, reasoning, and learning. May be taught concurrently with CSC 540. Cannot receive credit for both CSC 640 and CSC 540.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSC 645 Computer Speech, Music and Images

This is an applied course focusing on the technical aspects of computer-based multimedia-speech, music, audio, and video. In any given semester, the focus may be more on audio or image processing, or it may be equally balanced between the two. Topics include multimedia data capture and representation, methods of data compression, multimedia information retrieval, and multimedia standards. May be taught concurrently with CSC 545. Cannot receive credit for both CSC 645 and CSC 545.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 655 Software Quality Assurance and Project Management

A broad coverage of software quality and testing including quality assurance, inspections and reviews, software validation and verification, various testing techniques, and related tools. Other topics are essential software project planning steps, cost estimation, productivity metrics, release and configuration management concepts. May be taught concurrently with CSC 455. Cannot receive credit for both CSC 655 and CSC 455.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSC 660 Operating Systems

Introduction to operating systems concepts, principles, and design. Topics include: processes, threads, CPU scheduling, mutual exclusion, process synchronization, deadlocks, memory management, file systems, i/o systems, disk management, distributed systems, security and protection. May be taught concurrently with CSC 360. Cannot receive credit for both CSC 360 and CSC 660.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

CSC 665 Computer Networks

An introduction to the theory, concepts and techniques upon which modern computer networks are based. The emphasis will be on layered network architectures, the design frameworks for both local and wide area networks and communication protocols. May be taught concurrently with CSC 565. Cannot receive credit for both CSC 565 and CSC 665.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSC 667 Mobile Computing Applications

An introduction to the design, development, and publication of software applications for mobile devices. Course topics will include design and creation of basic and advanced applications, use of an integrated development environment, performance and security issues, and application packaging and distribution mechanisms. May be taught concurrently with CSC 567. Cannot receive credit or both CSC 667 and CSC 567.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSC 687 Computing for Bioinformatics

This course focuses on computational techniques used in bioinformatics. Topics will include nucleotide and amino acid data representation, sequence alignment, coding sequence prediction, and use of statistical models. Students will learn to use bioinformatics libraries with a script language such as Python or Perl. May be taught concurrently with CSC 587. Cannot receive credit for both CSC 687 and CSC 587.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 690 Advanced Topics in Computer Science

Variable content course with topics in the field of Computer Science. Topics may be identified by title in the schedule of classes. May be repeated in a different topic is offered. May be taught concurrently with CSC 590. Cannot receive credit for both CSC 590 and CSC 690.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

CSC 696 Special Readings

Prerequisite: permission of department head.

Directed study with a faculty member. Periodic conferences with the faculty member are required. A maximum of three credit hours may count towards the degree. May be taught concurrently with CSC 596. Cannot receive credit for both CSC 596 and CSC 696.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

CSC 701 Seminar I

Computer Science literature and research methods. Students will read research literature in Computer Science and make presentations describing that research. Students will attend presentations by faculty, visitors, and other students. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall

CSC 702 Seminar II

Prerequisite: CSC 701 or concurrent enrollment.

Continuation of CSC 701 with a focus on tools and methods for data analysis. Students will make oral presentations that report experimental results and will attend presentations by faculty, visitors, and other students. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Spring

CSC 735 Data Analytics

Study of tools, techniques and frameworks for extracting useful information from large data. Study of machine learning algorithms for data analytics. Visual display of results.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (even-numbered years)

CSC 736 Machine Learning

Prerequisite: CSC 325 or CSC 611 or equivalent.

Machine learning explores the study and construction of algorithms that can learn from data. This study combines ideas from both computer science and statistics. The study of learning from data is playing an increasingly important role in numerous areas of science and technology. This course will familiarize students with several frequently used machine learning models and algorithms to attack real world problems and prepare students for research or industry application of machine learning techniques.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 737 Deep Learning

A study of neural networks, including backpropagation, loss functions, gradient descent, convolutional neural networks, recurrent neural networks, regularization techniques, network architectures, transfer learning, generative models.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 742 Evolutionary Computing

Principles and applications of programs inspired by biological principles. Genetic algorithms and their use in search and optimization. Problem representation, operators, and control. Artificial life and the use of evolutionary computation in robotics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSC 745 Advanced Multimedia Programming

Advanced aspects of computer-based multimedia. Topics may differ from semester to semester but will be chosen from computer vision, speech recognition, gesture recognition, image and audio signal processing, data visualization, and multimedia information retrieval.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSC 746 Human Computer Interaction

Research and practice in Human-Computer interaction (HCI). Impact of human perception and cognition on user interface design. Tools for building graphical user interfaces (GUIs) and multimodal user interfaces incorporating speech and gesture. Research methods.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

CSC 747 Multimedia Communications

This course introduces fundamental technologies for multimedia coding, processing, and communications. Emphasis will be given on content representation, delivery over a variety of networks, and various applications including compression, adaptation, and authentication.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSC 755 Software Test/Quality Assurance

Various topics in software testing and quality assurance concepts will be covered including inspections and reviews, validation and verification, testing techniques, and related tools. Selective software project planning steps, cost estimation, productivity metrics, as well as release and configuration management concepts will be also covered. Cannot receive credit for both CSC 455 and CSC 755.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

CSC 765 Ubiquitous Computing and Internet of Things

Prerequisite: CSC 565 or CSC 665 or equivalent course or background approved by the instructor.

An introduction to some of the fundamental concepts and state-of-the-art research in the areas of ubiquitous computing (UbiComp). A significant portion of the course will cover the Internet of Things (IoT). Less emphasis will be given to the hardware and device level details. The major focus of this course is Internet Evolution and Wireless Technologies, Location Services in UbiComp, context-aware computing, privacy and security, wearable computing, mobile OS, IoT and data analytics, cloud computing. Students will learn to carry out research in UbiComp and IoT.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

CSC 790 Graduate Topics in Computer Science

Variable content course with topics that can change from semester to semester. Topics may be identified by title in the class schedule. May be repeated if a different topic is offered.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

CSC 796 Science Internship

Completion of an internship project (480 hours) at a discipline-related business, nonprofit organization, or government agency, approved and supervised by both the departmental and internship advisors. Includes a formal report in the appropriate professional format, and an oral presentation at an approved venue. Graded Pass/Not Pass only. No more than 6 hours may count toward a masters degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

CSC 798 Research in Computer Science

Prerequisite: permission of department head.

Supervised research in computer science. May be repeated, but no more than 6 hours may count toward the Master of Natural and Applied Science degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Fall, Spring

CSC 799 Thesis

Prerequisite: permission of instructor.

Independent research and study connected with preparation of thesis. No more than 6 hours may count toward the Master of Natural and Applied Science degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Computer Science

Major(s)

Computer Science (Non-Comprehensive)

Bachelor of Science

Major requirements (70-73 hours):

Major core (43 hours):

1. [CSC 130\(3\)](#), [131\(4\)](#), [232\(4\)](#), [244\(3\)](#), [335\(3\)](#), [360\(3\)](#), [365\(3\)](#), [388\(3\)](#), [450\(4\)](#), [482\(1\)](#), [565\(3\)](#).
2. Nine additional hours from [CSC 300](#) and eligible CSC courses numbered higher than 303, with no more than three hours in [CSC 399](#) and no more than three hours in [CSC 596](#). Courses not eligible: [CSC 500](#), [505](#), and [510](#).
3. Public Affairs Capstone Experience will be fulfilled by completion of [CSC 335\(3\)](#), [365\(3\)](#), and [482\(1\)](#).
4. Successful completion of the computer science major field test (MFT) with at least a score of 145 for Computer Science/Computer Science option and 140 for Computer Science/Software Development option is required.
5. Minor required or second major. (Note: The "Computer Science" option contains courses that satisfy the requirements for a minor in Mathematics.)

Complete one of the following options:

Computer Science Option (28-30 hours):

1. [CSC 325\(3\)](#), [333\(2\)](#).
2. Mathematics requirements: [MTH 261\(5\)*](#); [280\(5\)](#); [MTH 314\(3\)](#) or [315\(3\)](#); [MTH 345\(3\)](#) or [540\(3\)](#). Note: These required mathematics courses automatically satisfy the requirements for a minor in Mathematics.
3. [PHY 123\(4\)*](#) or [PHY 203\(5\)*](#).

4. [BIO 121\(4\)*](#) or [BMS 110\(3\)*](#).

Software Development Option (27-30 hours):

1. [CSC 455\(3\)](#).
2. Three additional hours from eligible CSC courses numbered 500 or higher excluding [CSC 596](#). Courses not eligible: [CSC 500](#), [505](#), and [510](#).
3. [ECO 165\(3\)](#); [PSY 121\(3\)](#); [ENG 321\(3\)](#). Each of these courses may also count toward General Education requirements.
4. One course from each group (at least one of the courses with a lab):
 - a. [BIO 121\(4\)*](#); [BMS 110\(3\)*](#); [BMS 110](#) and [111\(4\)*](#)
 - b. [CHM 116\(4\)*](#); [CHM 116](#) and [117\(5\)](#); [CHM 160\(4\)*](#); [CHM 160](#) and [161\(5\)](#); [GLG 110\(4\)*](#), [GLG 171\(3\)*](#), [GRY 135\(4\)*](#), [GRY 142\(4\)*](#), [PHY 123\(4\)*](#), [PHY 203\(5\)*](#); [AST 113\(3\)*](#); [AST 114\(4\)*](#); [AST 115\(4\)*](#).
5. One course from: [MKT 350\(3\)](#), [MGT 340\(3\)](#), [COM 315\(3\)](#), [PSY 305\(3\)](#), [PSY 481\(3\)](#). Other courses may be acceptable with department approval.
6. Mathematics requirement: [MTH 314\(3\)](#) or [MTH 315\(3\)](#).

**May also count toward General Education requirements.*

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Accreditation

The BS in Computer Science-Computer Science option is accredited by the Computing Accreditation Commission of ABET <http://www.abet.org/>. (<http://www.abet.org/>)

Minor(s)

Computer Science

Bachelor of Arts

Bachelor of Science

1. [CSC 125\(4\)](#) or [130\(3\)](#); [CSC 131\(4\)](#), [232\(4\)](#).
2. Six additional hours from eligible CSC courses numbered higher than 300 to bring total to at least 17. Courses not eligible: [CSC 301](#), [303](#), [399](#), [500](#), [505](#), and [510](#).

Accelerated graduate program in Computer Science

Eligible Missouri State undergraduate students may apply for admission to the Computer Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 9 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to

the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-computer-science.htm) (https://graduate.missouristate.edu/Catalog/prog-computer-science.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](/Registrar/mixedcredit.htm) (/Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Natural and Applied Science

Eligible Missouri State undergraduate students may apply for admission to the Master of Natural and Applied Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm) (https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](/Registrar/mixedcredit.htm) (/Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

General Information

For more detailed information, visit the [Cooperative Engineering Program \(/EGR/\)](#) website.

Missouri State University and Missouri University of Science and Technology offer three engineering degrees on the Missouri State University campus in Springfield – Civil Engineering, Electrical Engineering and Mechanical Engineering. The degrees are granted by the Missouri University of Science and Technology in cooperation with Missouri State University. The courses required for the engineering degrees are all offered on the Missouri State University campus.

Phone

417-837-2315

Students will be able to complete the Civil Engineering, Electrical Engineering and Mechanical Engineering degrees in Springfield on the Missouri State University campus.

Missouri State University will continue to offer the pre-engineering program, which allows students to complete the first two years of engineering courses on the Missouri State University campus and then transfer to the Missouri University of Science and Technology (or another engineering school) to complete their engineering degree. The pre-engineering program is helpful for students who wish to study engineering degrees other than Civil Engineering, Electrical Engineering and Mechanical Engineering.

All entering students into the Civil Engineering, Electrical Engineering and Mechanical Engineering programs must first satisfy the admission requirements in the Missouri State University catalog. Students will be advised by faculty in the Cooperative Engineering Program, and will complete the courses specified for the Freshman Year of the degree. Students will complete the Freshman Year courses with a minimum of a 2.50 GPA, and meet other admission criteria in the Missouri University of Science and Technology catalog, before applying for admission to the Missouri University of Science and Technology. Students must be admitted to the Missouri University of Science and Technology before enrolling in the sophomore, junior and senior engineering courses.

Students will register for the sophomore, junior and senior level engineering courses through the Missouri University of Science and Technology, but the courses will be offered on the Missouri State University campus. Tuition and fees for the sophomore, junior and senior level engineering courses will be set at the Missouri University of Science and Technology rates. Students will register for all non-engineering courses through Missouri State University. Tuition and fees for the non-engineering courses will be set at the Missouri State University rates.

Engineering Courses

Engineering (EGR) courses

EGR 102 Mechanical Engineering-Enrollment Tracking Course

Enrollment tracking course for students in the cooperative mechanical engineering program with Missouri University of Science and Technology. Fees for this course will be assessed based on MO S&T rates. Course is initially graded with an I (Incomplete) grade and, when transcript from MO S&T is received and evaluation completed, the grade is changed to NV (No Value). The title of the section should reflect the corresponding course taken at MO S&T.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Fall, Spring, Summer

EGR 110 Study and Careers in Engineering

Examination of fields of engineering and career opportunities in engineering. Professional expectations of engineers. Introduction to resources for assisting student success.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall

EGR 202 Mechanical Engineering-Enrollment Tracking Course

Enrollment tracking course for students in the cooperative mechanical engineering program with Missouri University of Science and Technology. Fees for this course will be assessed based on MO S&T rates. Course is initially graded with an I (Incomplete) grade and, when transcript from MO S&T is received and evaluation completed, the grade is changed to NV (No Value). The title of the section should reflect the corresponding course taken at MO S&T.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Fall, Spring, Summer

EGR 302 Mechanical Engineering-Enrollment Tracking Course

Enrollment tracking course for students in the cooperative mechanical engineering program with Missouri University of Science and Technology. Fees for this course will be assessed based on MO S&T rates. Course is initially graded with an I (Incomplete) grade and, when transcript from MO S&T is received and evaluation completed, the grade is changed to NV (No Value). The title of the section should reflect the corresponding course taken at MO S&T.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Fall, Spring, Summer

EGR 402 Mechanical Engineering-Enrollment Tracking Course

Enrollment tracking course for students in the cooperative mechanical engineering program with Missouri University of Science and Technology. Fees for this course will be assessed based on MO S&T rates. Course is initially graded with an I (Incomplete) grade and, when transcript from MO S&T is received and evaluation completed, the grade is changed to NV (No Value). The title of the section should reflect the corresponding course taken at MO S&T.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Fall, Spring, Summer

EGR 502 Mechanical Engineering-Enrollment Tracking Course

Enrollment tracking course for students in the cooperative mechanical engineering program with Missouri University of Science and Technology. Fees for this course will be assessed based on MO S&T rates. Course is initially graded with an I (Incomplete) grade and, when transcript from MO S&T is received and evaluation completed, the grade is changed to NV (No Value). The title of the section should reflect the corresponding course taken at MO S&T.

Geography, Geology and Planning Courses

Geography (GRY) courses

GRY 100 World Regional Geography

General Education Course (Focus on Cultural Competence).

An examination of the world's geographic regions focusing on the location of Earth's major physical features, human populations and cultures, and their interaction. Topics include natural systems, globalization, ethnic and geopolitical conflicts, and human impacts upon the environment. This course provides both an introduction to geography as a discipline and a basic geographic foundation for those interested in current international issues, politics, history and public affairs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	GEOG 101 - World Regional Geography.

[Access the CORE 42 portal](#)

GRY 108 Principles of Sustainability

General Education Course (Focus on Social and Behavioral Sciences).

An introduction to the multidisciplinary concept of "sustainability," including the difficulty of defining sustainability and implementing sustainable development programs. Emphasis is placed on understanding basic

environmental and social processes and patterns and how they relate to current events.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GRY 135 Principles of Weather and Climate

General Education Course (Focus on Physical Sciences).

An introductory survey of the earth's weather and climate. A description of the physical processes of the atmosphere is followed by a survey of the world's varied climatic regions. The laboratory involves the preparation and interpretation of meteorological data and the classification of climates.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	3	2	Fall, Spring	PHYS 110LAS - Essentials in Physical Sciences with Lab-Meteorology/Atmospheric Sciences.

[Access the CORE 42 portal](#)

GRY 142 Introductory Physical Geography

General Education Course (Focus on Physical Sciences).

A study of the earth's natural systems including weather and climate, rocks and minerals, landforms and processes of landform development, biogeography, water resources and soils. Map fundamentals and the interrelationships of the geographic factors of the natural environment are emphasized. Students who take GRY 240 and GRY 142 may receive credit for only one of these courses.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	3	2	Fall, Spring	GEOG 100L - Physical Geography with Lab.

[Access the CORE 42 portal](#)

GRY 143 Physical Geography Laboratory

Laboratory instruction in the earth's natural systems including weather and climate, rocks and minerals, landforms and processes of landform development, biogeography, water resources and soils. Map fundamentals and the interrelationships of the geographic factors of the natural environment are emphasized. This course is open only to transfer students who have already completed a 3-credit course equivalent to the lecture portion of GRY 142.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

GRY 197 Selected Topics in Geography I

Prerequisite: permission.

Course devoted to a single topic that can vary from semester to semester depending on student and faculty interest. Topics are limited to those requiring no prior geography background. Examples: Geography of the Home Community, Geography of Energy Resources, Geography of Sport. Students should check the semester class schedule to determine the topic title for any given semester. May be repeated to a total of 5 hours credit. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GRY 240 Earth Science for Teachers

Prerequisite: 30 hours; open only to Early Childhood, Elementary, and Middle School majors.

A course designed to give students an understanding of the processes of science and the basic concepts of earth science using the inquiry approach in hands-on laboratory activities. Content includes maps, earth in space, weather and climate, soils and vegetation, rocks and minerals, landforms, processes of landform development, water resources, environmental relationship to the physical setting. Does not apply toward the major in Secondary Education. Students who take GRY 240 and GRY 142 may receive credit for only one of these courses.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall, Spring

GRY 275 Introduction to Plane Surveying

Prerequisite: MTH 137 or higher.

Fundamental concepts and practices of land surveying. Practical exercises comparable to those used at Missouri University of Science and Technology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Fall

GRY 300 Geography of the United States

Physical and cultural regions of the United States, including their characteristics and resource utilization. Topics include landforms, climates, natural resources, economic activities, and cultural and political patterns.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 301 Geography of the Ozarks

Physical and cultural geography of the Ozarks. Surveys basic geology, landforms, soils, vegetation and the geography of settlement, population, major economic activities, lifestyles and the cultural landscape. Emphasis on historical development and spatial distributions. Field trip required. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

GRY 305 Selected World Regions

An in-depth study of selected regions of the world. Examples: Tropical Areas, Arid Regions, Polar Regions, Pacific Islands, Australia and New Zealand. Surveys geology, landforms, soil, vegetation, climate, settlement, population, economic activities and the cultural landscape. The course will be devoted to a single region that can vary from semester to semester. Students should check the current registration schedule to determine the topic title for any given semester. Since topics vary, the course may be repeated with permission. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 310 Fundamentals of Tourism

Tourism is analyzed from the academic perspective. This course incorporates concepts, principles, and theories from disciplines such as psychology, economics, and marketing that greatly influence the industry. The course covers the destination, marketing, demand, and transportation. It connects the geographical elements and the impact of tourism, while also analyzing the government regulations that attempt to mitigate negative results.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

GRY 315 Service Learning in Geography

Prerequisite: 30 hours and concurrent enrollment in a Geography course designated as a service learning offering.

This service component for an existing course incorporates community service with classroom instruction in Geography to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

GRY 316 Geography of Global Health and Disease

An examination of global health and disease patterns from a geographic perspective. Part of the course focuses on disease and the impacts of globalization, economic development, land use, pollution, climate change, and cultural beliefs and practices. The rest of the course examines traditional and western health care systems and the distribution of health care resources. Topics include global pandemics, emerging diseases, health care accessibility, and disease mapping.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

GRY 318 Geography of the National Parks

A survey of the U.S. National Park system and national and international protected areas. Topics include natural and cultural heritage, park management, and the role of interpretation in creating a unique sense of place.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GRY 320 Cultural Geography

Geographic exploration of material and nonmaterial elements of culture, focusing on spatial patterns, regional similarities, unique places, and the changing imprint on the natural landscape. Specific topics include settlement, agriculture, language, religion, foodways, music, sport, and their spatial interrelationships. Discussions and readings will encompass global, national, and local scales.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

GRY 321 Economic Geography

Prerequisite: 30 hours.

Location, distribution and extent of world economic activity. Topics include resource extraction, agriculture, manufacturing, retailing, and services.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GRY 322 Urban Geography

With an emphasis on patterns, this course documents the growth of cities, the reasons for that growth, presents models of urban structure, describes transportation systems, residential concentration, and commercial activities. Finally, current urban problems are identified. Field trip required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

GRY 323 World Political Geography

Survey of the field of political geography based on the concept of the State. Major topics include territoriality, the development and decline of the nation-state, frontiers and borderlands, colonialism, historical and contemporary geopolitics, and international environmental laws. Modern political issues dealing with ethnicity, sovereignty,

ecology, and energy will be discussed from a geographic perspective. This is an upper-division geography course, and students are encouraged to have completed GRY 100 (World Regional Geography) prior to taking this course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GRY 325 Rural Geography

This course examines the cultural, environmental, and economic significance of rural places, with a focus on America. It looks at rapidly changing rural landscapes and the many contemporary issues confronting these areas. Topics include rural sense of place, rural economic, cultural, and environmental challenges, the rural Ozarks, and the role of regional and community planning. Field trip required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (odd-numbered years)

GRY 348 Geomorphology

Prerequisite: GRY 142 or GLG 110 or both GLG 171 and GLG 172.

Geomorphology is the study of the origin, composition, and spatial distribution of surface landforms and their formative processes such as tectonic forces, chemical and physical weathering, and erosion and deposition of by water, wind, and ice. Emphasis is on geomorphic processes and landform development, methods of landform analysis, and environmental management. Case study approach is used to apply geomorphic concepts to understanding environmental hazards and sustainability and the role of humans as geomorphic agents. Field trips required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GRY 351 Conservation of Natural Resources

Prerequisite: 30 hours.

An examination of the dynamic interplay between physical, economic, social, and political factors affecting the major natural resource issues facing the world today. A presentation of the laws of the natural environment followed by an analysis of conservation issues and problems that occur in response to human use of the natural environment.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GRY 353 Field Experience in Geography (inside continental USA)

Prerequisite: permission.

This Public Affairs Capstone Experience course is a field course that involves collecting, analyzing, interpreting, and sharing data in physical and cultural geography as part of a group field trip within the continental USA, meeting all three of the requirements for a Public Affairs Experience course: ethical leadership, cultural competence, and community engagement. Students must participate in classroom sessions before the required field trip as well as turn in a final project. At the discretion of the Department Head, field experience study courses in other departments may substitute for GRY 353. Graded Pass/Not Pass only. May be repeated to a total of 6 hours if the destinations differ.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Upon demand

GRY 367 Research Methods in Geography and Geospatial Science

Prerequisite: MTH 340 or AGR 330 or PSY 200 or QBA 237 or REC 328 or SOC 302.

Introduces the research process and methods used by geographers, including research design, data collection, sampling methods, data analysis procedures, computer applications and scientific communication. Cannot receive credit for both GRY 367 and PLN 367.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

GRY 375 Advanced Plane Surveying

Prerequisite: GRY 275.

Office and field techniques used in route surveying including circular, transitional and parabolic curves. Topographic mapping applications, slope stake and earthwork computations. Field astronomy, state plane coordinates, boundary control and USPLS surveys.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

GRY 377 Legal Aspects of Boundary Surveying

Prerequisite: GRY 375.

The legal principles of surveying: Missouri surveying law, Boundary Control, and the role of the surveyor within the judicial frame work of the court system.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 379 Surveying Computations

Prerequisite: GRY 375.

Computations in horizontal control networks, projections including Universal Transverse Mercator and State Plane Coordinates, Practical Astronomy, and Global Positioning Systems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 397 Selected Topics in Geography II

Prerequisite: permission.

Course devoted to a single topic that can vary from semester to semester depending upon student and faculty interest. Topics generally require previous training in geography. Examples: Geography of Water Resources, Tornadoes and other Violent Storms. Students should check the current registration schedule to determine the topic title for any given semester. Since credit and topics vary, this course may be repeated, with permission, to a total of 5 hours credit. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GRY 399 Internship in Geography

Prerequisite: permission.

Work experience in geography. Students have periodic conferences with geosciences department faculty and supervisory personnel of the employing business or agency. May be repeated to a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

GRY 429 Geography of World Tourism

A systematic description and analysis of the world's major tourism destination regions with special emphasis on World Heritage sites. Case studies will examine the role local communities play in the sustainable development of sites with special natural and/or cultural value.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GRY 470 Field Experience in Geography (outside continental USA)

Prerequisite: permission.

This Public Affairs Capstone Experience course is a field course that involves collecting, analyzing, interpreting, and sharing data in physical and cultural geography as part of a group field trip outside the continental USA, meeting all three of the requirements for the Public Affairs Experience course: ethical leadership, cultural competence, and community engagement. Students must participate in classroom sessions before the required field trip as well as turn in a final project. At the discretion of the Department Head, field study and Education Abroad courses in other departments may substitute for GRY 470. Graded Pass/Not Pass only. May be repeated to a total of 6 hours if the destinations differ.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	0	6	Upon demand

GRY 495 Undergraduate Research in Geography

Prerequisite: permission.

Enrichment through guided but independent, original research in geography and geography related subject areas. May be repeated for a total of 6 credit hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GRY 496 Readings in Geography

Prerequisite: permission.

Selected readings and reports on geographical literature. May be repeated to a total of 4 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall, Spring

GRY 497 Special Topics in Geography

Prerequisite: permission.

Open to departmental majors and minors. Outstanding students obtain additional experience through guided independent study in geography. May be repeated to a total of 5 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

GRY 507 Geography of Sub-Saharan Africa

An in-depth geographic study of Africa south of the Sahara Desert. Surveys physical and political geography, climate, tribalism, religion, demography, natural resources, transportation, industry and economic activities of African states South of the Sahara. Students are required to complete one research project. May be taught concurrently with GRY 607. Cannot receive credit for both GRY 607 and GRY 507.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 510 Applications in Sustainable Geotourism

This course will introduce some of the key concepts and methods used to investigate and make sense of the role, significance and impact of tourism that sustains or enhances the geographical character of a place--its environment, culture, aesthetics, heritage, and the well-being of its residents. Students will explore

environmentally and socially responsible tourism strategies and innovations, and study issues associated with tourism development. Students will work to develop tourism policy and plans based on geotourism parameters where ideas may be applied in a practicum to a local, regional or national community. May be taught concurrently with GRY 610. Cannot receive credit for both GRY 510 and GRY 610.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GRY 525 Environmental Hazards

Prerequisite: GRY 142 or both GRY 135 and GLG 110.

Identification, recognition, and impact of hazards. Physical exposure to hazards and human vulnerability in LDCs and MDCs. Disaster trends and patterns. Behavioral and structural paradigms of hazards. EM-DAT: international disaster database. Statistical methods used in risk assessments. Risk perception, communication, and disaster management. Tectonic, mass movement, atmospheric, hydrological, biophysical, and technological hazards: analysis, preparedness, and mitigation. May be taught concurrently with GRY 625. Cannot receive credit for both GRY 625 and GRY 525.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 535 Global Climate and Weather Cycles

Prerequisite: GRY 135; and MTH 340 or AGR 330 or PSY 200 or QBA 237 or REC 328.

Energy and mass exchanges. Global atmospheric circulation; surface and upper-air flows. Index cycle: zonal and meridional atmospheric circulations. Teleconnections and atmospheric oscillations: NAO, PNA, PDO, AO, ENSO, and AMO. Interactions between atmospheric oscillations and surface climatic variables in the United States and around the world. Weather cycles, natural climatic variability and climate change. Drought indices. Spatial and temporal statistical domains used in climatic data analysis. May be taught concurrently with GRY 635. Cannot receive credit for both GRY 635 and GRY 535.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 545 Global Environmental Change

Energy and mass fluxes and storages in the interlinked physical components of the ecosphere. Chemistry of the global atmosphere. Role of the oceans and thermohaline circulation. Land use and land cover influences on terrestrial ecosystems. Concepts of environmental cycles, thresholds, resilience, recovery and response times.

Understanding past environmental changes. Causes, mechanisms and likely impacts of natural and anthropogenically-induced changes on the global environment. Predictive models on global environmental change. May be taught concurrently with GRY 645. Cannot receive credit for both GRY 545 and GRY 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

GRY 550 Fluvial Geomorphology

Study of the formation, composition, distribution of fluvial landforms. Emphasis is on channel hydrology, quantification of geomorphic relationships, reach and watershed-scale processes, sediment transport, water and sediment contamination, and management applications to streams in the Ozarks Region as well as other places. Field work may be required. May be taught concurrently with GRY 650. Cannot receive credit for both GRY 550 and GRY 650.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GRY 596 Topical Issues in Education

Prerequisite: permission.

Selected topics in geography and earth science to upgrade understandings and skills in improvement of elementary or secondary teaching. Each course is concerned with a single topic or subject matter area. Number of class hours determined by semester hours of credit. May be repeated to a total of 5 hours credit. Variable content course. May be taught concurrently with GRY 696. Cannot receive credit for both GRY 696 and GRY 596.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

GRY 597 Special Topics in Geography

Prerequisite: permission.

Selected topics in geography. Special topics will be included in the class schedule for each term. Field trips may be required. Number of class hours determined by semester hours of credit. May be repeated to a maximum of 6 hours credit. Variable content course. May be taught concurrently with GRY 697. Cannot receive credit for both GRY 697 and GRY 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

GRY 607 Geography of Subsaharan Africa

An in-depth geographic study of Africa south of the Sahara Desert. Surveys physical and political geography, climate, tribalism, religion, demography, natural resources, transportation, industry and economic activities of African states South of the Sahara. Students are required to complete two research projects. May be taught concurrently with GRY 507. Cannot receive credit for both GRY 507 and GRY 607.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 610 Applications in Sustainable Geotourism

This course will introduce some of the key concepts and methods used to investigate and make sense of the role, significance and impact of tourism that sustains or enhances the geographical character of a place--its environment, culture, aesthetics, heritage, and the well-being of its residents. Students will explore environmentally and socially responsible tourism strategies and innovations, and study issues associated with tourism development. Students will work to develop a tourism policy and plans based on geotourism parameters where ideas may be applied in a practicum to a local, regional or national community. May be taught concurrently with GRY 510. Cannot receive credit for both GRY 610 and GRY 510.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GRY 625 Environmental Hazards

Recommended Prerequisite: GRY 142; or both GRY 135 and GLG 110. Identification, recognition, and impact of hazards. Physical exposure to hazards and human vulnerability in LDCs and MDCs. Disaster trends and patterns. Behavioral and structural paradigms of hazards. EM-DAT: international disaster database. Statistical methods used in risk assessments. Risk perception, communication, and disaster management. Tectonic, mass movement, atmospheric, hydrological, biophysical, and technological hazards: analysis, preparedness, and mitigation. May be taught concurrently with GRY 525. Cannot receive credit for both GRY 525 and GRY 625.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 635 Global Climate and Weather Cycles

Recommended Prerequisite: GRY 135; and MTH 340 or AGR 330 or ECO 308 or PSY 200 or QBA 237 or REC 328 or SOC 302. Energy and mass exchanges. Global atmospheric circulation; surface and upper-air flows. Index cycle: zonal and meridional atmospheric circulations. Teleconnections and atmospheric oscillations: NAO, PNA, PDO, AO, ENSO, and AMO. Interactions between atmospheric oscillations and surface climatic variables in the United States and around the world. Weather cycles, natural climatic variability and climate change. Drought indices. Spatial and temporal statistical domains used in climatic data analysis. May be taught concurrently with GRY 535. Cannot receive credit for both GRY 535 and GRY 635.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 645 Global Environmental Change

Recommended Prerequisite: GRY 142 or both GRY 135 and GLG 110. Energy and mass fluxes and storages in the interlinked physical components of the ecosphere. Chemistry of the global atmosphere. Role of the oceans and thermohaline circulation. Land use and land cover influences on terrestrial ecosystems. Concepts of environmental cycles, thresholds, resilience, recovery and response times. Understanding past environmental changes. Causes, mechanisms and likely impacts of natural and anthropogenically-induced changes on the global environment. Predictive models on global environmental change. May be taught concurrently with GRY 545. Cannot receive credit for both GRY 545 and GRY 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

GRY 650 Fluvial Geomorphology

Study of the formation, composition, distribution of fluvial landforms. Emphasis is on channel hydrology, quantification of geomorphic relationships, reach and watershed-scale processes, sediment transport, water and sediment contamination, and management applications to streams in the Ozarks Region as well as other places. Field work may be required. May be taught concurrently with GRY 550. Cannot receive credit for both GRY 550 and GRY 650.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GRY 696 Topical Issues in Education

Prerequisite: permission.

Selected topics in geography and earth science to upgrade understandings and skills in improvement of elementary or secondary teaching. Each course is concerned with a single topic or subject matter area. Number of class hours determined by semester hours of credit. Variable content course. May be repeated to a total of 5 hours credit. May be taught concurrently with GRY 596. Cannot receive credit for both GRY 596 and GRY 696.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

GRY 697 Special Topics in Geography

Prerequisite: permission.

Selected topics in geography. Special topics will be included in the class schedule for each term. Field trips may be required. Number of class hours determined by semester hours of credit. Variable content course. May be repeated to a maximum of 6 hours credit. May be taught concurrently with GRY 597. Cannot receive credit for both GRY 597 and GRY 697.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

GRY 698 Research in Geography

Prerequisite: permission.

Enrichment through guided but independent, original research in geography and geography related subject areas. May be repeated for a total of 6 credit hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

GRY 700 Cultural Geography for Secondary Teachers I

Population and the spatial imprint of man on the landscape in terms of settlement, economic activities, institutions; methods and materials of the high school geography project; other current curriculum materials.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

GRY 703 Cultural Geography for Secondary Teachers II

Prerequisite: GRY 700.

Continuation of GRY 700. Contemporary problems in land use, urbanization and planning for optimum use of resources; methods and materials of the high school geography project; other current curriculum materials.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

GRY 708 The Philosophy of Sustainability

This discussion and inquiry-based course provides students increased understanding in the historical and philosophical underpinnings of sustainability. Emphasis is placed evenly on social, economic and environmental factors and how they all contribute to present-day applications of sustainability in varying contexts such as policy, business, and development. Special emphasis is placed on how sustainability intersects with conservation, preservation, economic and social development, and the United Nations Sustainable Development Goals (SDGs).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GRY 730 Weather Elements for Secondary Teachers

Physical processes of the earth's atmosphere, use of weather instruments and interpretation of weather maps. Applied aspects of weather and climate and their effects on man's activities. Emphasis on current curriculum materials for secondary schools.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 731 Environmental Assessment

The procedures and processes of environmental assessment. Soils, hydrology, climate, biogeography and geomorphology will be examined in an environmental assessment context. Environmental assessment is a prerequisite for satisfying the National Environmental Policy Act (NEPA) requirements.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GRY 740 Selected Topics in Earth Science

Prerequisite: permission of instructor.

Students cooperatively select from general subject areas in earth science more specific areas to explore. Topics are studied consecutively during the semester. Subject areas from which the topic selections will be made are included in the class schedule for each term the course is offered. Variable content course. Since topics vary, the course may be repeated for a total of 6 hours. Identical with GLG 765. Cannot receive credit for more than 6 hours of GRY 740 and GLG 765.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GRY 748 Physiography and Resource Conservation

Landforms, economic minerals, soils, climate, water resources and closely related aspects of the natural environment as they relate to man's inhabitation and use of the earth; map reading and simple map construction; methods and materials for secondary schools.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

GRY 751 Topics in Advanced Physical Geography

Critical review of recent advances and trends in applied and/or theoretical physical geography. Course will involve the study of seminal and recent journal articles and presentation of a research paper. Course content may vary among the subfields of physical geography including geomorphology, hydrology, water resources, soil geography climatology, and biogeography. Field trips may be required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GRY 779 Research in Geography

Prerequisite: permission.

Enrichment through guided but independent, original research in geography and geography related subject areas. May be repeated for a total of 3 credit hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GRY 799 Thesis

Prerequisite: permission.

Independent research and study connected with preparation of thesis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

Geology (GLG) courses

GLG 110 Principles of Geology

General Education Course (Focus on Physical Sciences).

How Earth works. The building blocks of Earth: minerals and rocks. Earth's dynamic interior: plate tectonics, earthquakes, volcanism, and mountain building. Surface processes associated with streams, ground water, glaciers, wind, and shorelines. Laboratory instruction in identification of common minerals and rocks, the use of topographic maps, and landform identification from topographic maps. Optional weekend field trips.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	3	2	Fall, Spring	GEOL 100L - Geology with Lab.

[Access the CORE 42 portal](#)

GLG 115 Life of the Past

General Education Course (Focus on Life Sciences).

Addresses the origin, evolution, and extinction of life forms within the 3.5 billion year history of life on earth. Topics of discussion will include the basic principles of evolution, stratigraphy, and plate tectonics. Optional fossil collecting field trip.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GLG 171 Environmental Geology

General Education Course (Focus on Physical Sciences).

Treats those aspects of geology that interface directly with humanity. Key concepts of Earth processes and how they relate to geologic hazards, mineral and energy resources, and sustainability. Human dependence on geologic resources is examined and related to issues confronting society. Optional field trips.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	GEOL 100 - Geology.

[Access the CORE 42 portal](#)

GLG 172 Physical Geology Laboratory

Prerequisite: permission.

Laboratory instruction in identification and classification of common minerals and rocks; introduction to the identification of landforms as interpreted from topographic maps. This course number allows students who have already had GLG 171 to take a laboratory section of GLG 110 as a stand-alone one credit course. GLG 171 plus GLG 172 will substitute for GLG 110 in the requirements for all geology programs and in the prerequisites for all upper division geology courses.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

GLG 197 Popular Topics in Geology

Course devoted to a single topic that can vary from semester to semester depending on student and faculty interest. Topics are limited to those requiring no prior geology background. Examples: Earthquakes and Volcanoes, Rocks and Minerals, Caves and Karst, etc. Students should check the current registration schedule to determine the topic title for any given semester. Variable content course. Because topics vary, this course may be repeated, with permission of the instructor to a total of 10 credits. Cannot be counted toward any major or minor in Geology.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
--------------	-----------------------	-------------------	-------------------

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GLG 314 Historical Geology

Prerequisite: GLG 110 or both GLG 171 and GLG 172.

Geological history of the earth with emphasis on North America; origin and evolution of animal and plant life on earth. One Saturday field trip required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GLG 318 Physical Oceanography

Prerequisite: GLG 110 or both GLG 171 and GLG 172.

A comprehensive study of the physical ocean; including the origin and nature of tides, waves, and ocean currents; marine geology, resources and pollution.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GLG 326 Marine Science I: Oceanography

Prerequisite: MTH 135 and CHM 160 and CHM 170 and CHM 171 and BIO 101 and 111.

Integrates physical, chemical, biological, and geological oceanography to provide a multidisciplinary approach to the fundamentals of oceanography. (Must be taken at Gulf Coast Research Laboratory, Ocean Springs, Mississippi).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Summer

GLG 327 Marine Science I: Oceanography Lab

Prerequisite: concurrent enrollment in GLG 326.

Laboratory portion of GLG 326. Field and laboratory activities. (Must be taken at Gulf Coast Research Laboratory, Ocean Springs, Mississippi).

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	0	4	Summer

GLG 330 Service Learning in Geology

Prerequisite: 30 hours and permission and concurrent registration in a Geology course designated as a service geology offering.

This service component for an existing course incorporates community service with classroom instruction in geology to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignment will vary depending on the specific course topic and learning objectives; students should investigate possible placements, available through the Department of Geography, Geology and Planning and the Office of Citizenship and Service Learning prior to registration. May be repeated. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

GLG 332 Mineralogy

Prerequisite: GLG 110 or both GLG 171 and GLG 172; and CHM 160; and MTH 136 or higher.

Origin, classification, description, and identification of ore minerals and rock-forming minerals.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GLG 333 Igneous and Metamorphic Petrology

Prerequisite: GLG 332.

Origin, classification, and identification of common igneous and metamorphic rocks. Field trip required. A grade of "C" or better is required in this course in order to take GLG 413. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GLG 334 Sedimentary Geology

Prerequisite: GLG 314 and GLG 332.

Principles underlying the production, weathering and deposition of sediments; environmental control of lithofacies and biofacies; recognition of ancient depositional environments by key indicators and modern analogs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Spring

GLG 340 Structural Geology

Prerequisite: GLG 314 and GLG 333 and GLG 334 or concurrent enrollment; and either MTH 138 or MTH 181.

Recommended Prerequisite: PHY 123 or PHY 203. Elementary theory of stress and strain, rock behavior, continuous structures, fracture theory, discontinuous structures and kinematics of plate motion. Field trips required. A grade of "C" or better is required in this course in order to take GLG 413. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

GLG 350 Speleology

Prerequisite: GLG 110 or GLG 171.

Caves, karst and cavernous terrain, their origin, geologic environment and evolution. Field trips and field research required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GLG 355 Volcanology

Prerequisite: GLG 110 or GLG 171 and GLG 172.

Systematic discussion of volcanic phenomena, including types of eruptions, generation and emplacement of magmas, products of volcanism, volcanic impact on humans, and the monitoring and forecasting of volcanic events. Case studies of individual volcanoes illustrate principles of volcanology, with a particular emphasis on Hawaiian, Andean, Icelandic and Cascade volcanism.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring (odd-numbered years)

GLG 358 Writing II: Reporting Geological Information

Prerequisite: ENG 110 or equivalent, and 30 hours, and C- or better in both GLG 333 and GLG 334.

General Education Course (Focus on Written Communication and Integrative and Applied Learning).

Techniques and strategies for locating and accessing technical geological information. Preparation of technical reports and presentations on geologic topics with emphasis on the styles and formats of the Geological Society of America and the United States Geological Survey. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall

GLG 360 Directed Field Trips

Prerequisite: GLG 110 or both GLG 171 and GLG 172; and GLG 314; and permission.

Geologic field trips to areas of special interest. Because credit hours and destinations vary, the course may be repeated to a total of 8 hours. However, no more than 4 hours may count toward any Geology major. Variable content course. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GLG 397 Selected Topics in Geology

Prerequisite: permission.

Course devoted to a single topic which may vary from semester to semester depending upon student and faculty interest. Since credit and topics vary, this course may be repeated, with permission, to a total of 5 hours credit. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GLG 399 Internship in Geology

Prerequisite: permission.

Work experience in geology. Students have periodic conferences with geology faculty and supervisory personnel of the employing business or agency. May be repeated to a maximum of 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

GLG 412 Field Geology of the Midcontinent Region

Prerequisite: GLG 314; and either GLG 318 or GLG 333 or concurrent enrollment.

Regional geology of the Midcontinent including the Ozark, Wichita, Arbuckle, Ouachita and Boston Mountains, and associated basins. Introduction to geologic field methods including the use of aerial photograph and geologic maps, cross-sections, and block diagrams in the interpretation of regional geologic history.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Spring

GLG 413 Field Geology

Prerequisite: GLG 314; and a grade of "C" or better in both GLG 333 and GLG 340.

Use of Brunton compass, Jacob staff, and tape in field methods; aerial photographs and topographic maps in mapping sedimentary, igneous, and metamorphic rocks; demonstration of lithostratigraphic succession and correlation in the field; preparation of geological reports from field data. Taught at off campus field station.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6			Summer

GLG 415 Invertebrate Paleontology

Prerequisite: GLG 314.

Morphology and taxonomy of invertebrate fossils. May be taught concurrently with GLG 615. Cannot receive credit for both GLG 415 and GLG 615.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Spring

GLG 498 Seminar in Geology

Prerequisite: permission.

Lectures and discussions of topics in geology. May be repeated for 4 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

GLG 499 Research in Geology

Prerequisite: permission.

Outstanding student obtains enrichment through guided, but independent, original research in geology and geology related subject areas. May be repeated at the discretion of the geology staff to a total of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

GLG 523 Coastal Marine Geology

Prerequisite: 6 hours of geology; and concurrent enrollment in GLG 524.

A study of inshore and nearshore geologic processes, sedimentation patterns and landform development. Concurrent enrollment in GLG 524 required. Must be taken at Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with GLG 623. Cannot receive credit for both GLG 623 and GLG 523.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

GLG 524 Coastal Marine Geology Lab

Prerequisite: concurrent enrollment in GLG 523.

Laboratory portion of GLG 523. Field and laboratory activities. Must be taken at Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with GLG 624. Cannot receive credit for both GLG 624 and GLG 524.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Summer

GLG 530 Optical Mineralogy

Prerequisite: GLG 333.

Essentials of optical crystallography; the use of the petrographic microscope in the identification of rock-forming minerals, both in oil-immersion grain mounts and in thin sections. May be taught concurrently with GLG 630. Cannot receive credit for both GLG 630 and GLG 530.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

GLG 540 X-Ray Mineralogy

Prerequisite: GLG 332.

Principles and techniques of x-ray mineralogy; the use of x-ray powder diffraction in the identification and characterization of minerals and related crystalline phases. May be taught concurrently with GLG 640. Cannot receive credit for both GLG 640 and GLG 540.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

GLG 547 Water Resources

Prerequisite: BIO 122 or GLG 110 or GRY 142; and CHM 160 and CHM 161; and MTH 135.

An interdisciplinary study of freshwater resource development, including environmental impacts of humans on hydrology and water quality, conflicts among users, and politics at local and global scales. Identical with BIO 547. Cannot receive credit for both GLG 547 and BIO 547. May be taught concurrently with GLG 647. Cannot receive credit for both GLG 547 and GLG 647.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GLG 570 Principles of Stratigraphy

Prerequisite: GLG 314 and GLG 334.

Principles and procedures applied to the study of sedimentary successions; astronomical forcing, cyclicity, eustasy, and tectonic controls on stratification and basin evolution; application of the Stratigraphic Code, practical field methods, observations and interpretation of depositional environments, and sequence stratigraphic interpretations; field trips required. May be taught concurrently with GLG 670. Cannot receive credit for both GLG 670 and GLG 570.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GLG 572 Geohydrology

Prerequisite: GLG 314; and either MTH 261 or MTH 287.

Aquifer properties; elementary theory of groundwater flow through a porous medium; well and aquifer relationships. Laboratories include ground-water case studies and Hydrologic Investigation Atlas interpretations. Taught concurrently with GLG 672. Cannot receive credit for both GLG 572 and GLG 672.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GLG 573 Engineering Geology

Prerequisite: GLG 333 and either MTH 261 or MTH 287.

Engineering properties of rocks and soils; fundamentals of engineering geology field investigations; application of properties and fundamentals to engineering problems concerning slope stability, groundwater, industrial contamination, urban public works, and karst areas. Laboratories include engineering classification of soils, hydraulic conductivity testing, and public works design and management. Field trip to observe engineering problems of karst required. May be taught concurrently with GLG 673. Cannot receive credit for both GLG 573 and GLG 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring (even-numbered years)

GLG 574 Petroleum Geology

Prerequisite: GLG 314.

Recommended Prerequisite: GLG 333 and GLG 570. Origin of hydrocarbons in sedimentary successions; petroleum systems, sequence stratigraphic concepts; basin analysis; petroleum exploration techniques, including well log and seismic interpretation; techniques for resource exploitation and an introduction to petroleum production. May be taught concurrently with GLG 674. Cannot receive credit for both GLG 574 and GLG 674.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GLG 580 Geochemistry

Prerequisite: GLG 332.

Topics include the dominant chemical reactions in natural waters, equilibrium conditions between mineral precipitation and dissolution, and characteristics of contaminated groundwater. Field trips required. Taught concurrently with GLG 680. Cannot receive credit for both GLG 580 and GLG 680.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GLG 581 Geochemical Techniques

Prerequisite: GLG 332.

Geochemical techniques and procedures used in ore exploration, point and nonpoint contamination and other environmental studies. Analyses of trace elements in rocks, soils, plants and waters using inductively coupled plasma methods. Also use of GPS to locate sample sites and ArcView to prepare maps. Field trips required. May be taught concurrently with GLG 681. Cannot receive credit for both GLG 681 and GLG 581.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Spring (odd-numbered years)

GLG 590 Applied Geophysics

Prerequisite: either PHY 124 or PHY 204; and either MTH 280 or MTH 288.

Recommended Prerequisite: GLG 340. Application of geophysical methods in solving geologic problems. Techniques covered include seismic refraction and reflection, gravity, magnetics, direct current and electromagnetic resistivity. Field trips required. May be taught concurrently with GLG 690. Cannot receive credit for both GLG 690 and GLG 590.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GLG 591 Seismic Data Processing

Prerequisite: GLG 340 (or permission); and either PHY 124 or PHY 204 or concurrent enrollment in either; and either MTH 280 or MTH 288 or concurrent enrollment in either.

The basic techniques to process seismic reflection data as used for tectonic, oil, environmental and mining applications. Techniques include deconvolution, filtering, migration, stacking, normal moveout corrections. Basic seismic reflection interpretation will be addressed. This is a computer based class. May be taught concurrently with GLG 691. Cannot receive credit for both GLG 591 and GLG 691.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring (even-numbered years)

GLG 597 Selected Topics in Geology

Prerequisite: permission.

Detailed treatment of various advanced topics in geology which may vary from year to year. Some typical topics: geologic instrumentation, selenology, sedimentology, and crystallography. Since credit and topics vary, the course may be repeated for a total of 6 hours. Variable content course. May be taught concurrently with GLG 697. Cannot receive credit for both GLG 697 and GLG 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

GLG 615 Invertebrate Paleontology

Morphology and taxonomy of invertebrate fossils. May be taught concurrently with GLG 415. Cannot receive credit for both GLG 415 and GLG 615.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Spring (odd-numbered years)

GLG 623 Coastal Marine Geology

Prerequisite: permission; and concurrent enrollment in GLG 624.

A study of inshore and nearshore geologic processes, sedimentation patterns and landform development. Must be taken at Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with GLG 523. Cannot receive credit for both GLG 523 and GLG 623.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Summer

GLG 624 Coastal Marine Geology Lab

Prerequisite: concurrent enrollment in GLG 623.

Laboratory portion of GLG 623. Field and laboratory activities. Must be taken at Gulf Coast Research Laboratory, Ocean Springs, Mississippi. May be taught concurrently with GLG 524. Cannot receive credit for both GLG 524 and GLG 624.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Summer

GLG 630 Optical Mineralogy

Recommended Prerequisite: GLG 333. Essentials of optical crystallography; the use of the petrographic microscope in the identification of rock-forming minerals, both in oil-immersion grain mounts and in thin sections. May be taught concurrently with GLG 530. Cannot receive credit for both GLG 530 and GLG 630.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

GLG 640 X-Ray Mineralogy

Recommended Prerequisite: GLG 332. Principles and techniques of x-ray mineralogy; the use of x-ray powder diffraction in the identification and characterization of minerals and related crystalline phases. May be taught concurrently with GLG 540. Cannot receive credit for both GLG 540 and GLG 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

GLG 647 Water Resources

Recommended Prerequisite: BIO 122 or GLG 110 or GRY 142; and CHM 160 and CHM 161; and MTH 135. An interdisciplinary study of freshwater resource development, including environmental impacts of humans on hydrology and water quality, conflicts among users, and politics at local and global scales. Identical with BIO 647. Cannot receive credit for both GLG 647 and BIO 647. May be taught concurrently with GLG 547. Cannot receive credit for both GLG 647 and GLG 547.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

GLG 670 Principles of Stratigraphy

Recommended Prerequisite: GLG 314 and GLG 334. Principles and procedures applied to the study of sedimentary successions; astronomical forcing, cyclicity, eustasy, and tectonic controls on stratification and basin evolution; application of the Stratigraphic Code, practical field methods, observations and interpretation of depositional environments, and sequence stratigraphic interpretations; field trips required. May be taught concurrently with GLG 570. Cannot receive credit for both GLG 570 and GLG 670.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GLG 672 Geohydrology

Recommended Prerequisite: GLG 314; and either MTH 261 or MTH 287. Aquifer properties; elementary theory of groundwater flow through a porous medium; well and aquifer relationships. Laboratories include ground-water case studies and Hydrologic Investigation Atlas interpretations. Field trips required. Taught concurrently with GLG 572. Cannot receive credit for both GLG 572 and GLG 672.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GLG 673 Engineering Geology

Recommended Prerequisite: GLG 333. Engineering properties of rocks and soils; fundamentals of engineering geology field investigations; application of properties and fundamentals to engineering problems concerning slope stability, groundwater, industrial contamination, urban public works, and karst areas. Laboratories include engineering classification of soils, hydraulic conductivity testing, and public works design and management. Field trip to observe engineering problems of karst required. May be taught concurrently with GLG 573. Cannot receive credit for both GLG 673 and GLG 573.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring (even-numbered years)

GLG 674 Petroleum Geology

Recommended Prerequisite: GLG 314 and GLG 333 and GLG 570. Origin of hydrocarbons in sedimentary successions; petroleum systems, sequence stratigraphic concepts; basin analysis; petroleum exploration techniques, including well log and seismic interpretation; techniques for resource exploitation and an introduction to petroleum production. May be taught concurrently with GLG 574. Cannot receive credit for both GLG 674 and GLG 574.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GLG 676 Geoscience Computing

This course will explore the dynamic relationships between Earth systems and introduce students to techniques to create map products and Earth system models using surficial and subsurface geologic data. Mapping and modeling topics will include: heat flow, geologic bedrock mapping, geochemical data processing, fluid mechanics, well data, subsurface geologic data interpretation, and seismic attribute analysis. Students will explore these topics and characterize their behavior by building theoretical Earth system models to test map-based hypotheses.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GLG 680 Geochemistry

Recommended Prerequisite: GLG 332. Topics include the dominant chemical reactions in natural waters, equilibrium conditions between mineral precipitation and dissolution, and characteristics of contaminated groundwater. Field trips required. Taught concurrently with GLG 580. Cannot receive credit for both GLG 580 and GLG 680.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GLG 681 Geochemical Techniques

Recommended Prerequisite: GLG 332. Geochemical techniques and procedures used in ore exploration, point and nonpoint contamination and other environmental studies. Analyses of trace elements in rocks, soils, plants and waters using inductively coupled plasma methods. Also use of GPS to locate sample sites and ArcView to prepare maps. Field trips required. May be taught concurrently with GLG 581. Cannot receive credit for both GLG 581 and GLG 681.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Spring (odd-numbered years)

GLG 690 Applied Geophysics

Recommended Prerequisite: GLG 340; and either PHY 124 or PHY 204; and either MTH 280 or MTH 288. Application of geophysical methods in solving geologic problems. Techniques covered include seismic refraction and reflection, gravity, magnetics, direct current and electromagnetic resistivity. Field trips required. May be taught concurrently with GLG 590. Cannot receive credit for both GLG 590 and GLG 690.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GLG 691 Seismic Data Processing

Prerequisite: GLG 340 (or permission); and either PHY 124 or PHY 204 or concurrent enrollment in either; and either MTH 280 or MTH 288 or concurrent enrollment in either.

The basic techniques to process seismic reflection data as used for tectonic, oil, environmental and mining applications. Techniques include deconvolution, filtering, migration, stacking, normal moveout corrections. Basic seismic reflection interpretation will be addressed. This is a computer based class. May be taught concurrently with GLG 591. Cannot receive credit for both GLG 691 and GLG 591.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring (even-numbered years)

GLG 697 Selected Topics in Geology

Prerequisite: permission.

Detailed treatment of various advanced topics in geology which may vary from year to year. Some typical topics: geologic instrumentation, selenology, sedimentology, and crystallography. Variable content course. May be

repeated for a total of 6 hours. May be taught concurrently with GLG 597. Cannot receive credit for both GLG 597 and GLG 697.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

GLG 701 Geosystems

Prerequisite: permission.

A study of rocks and minerals, plate tectonics, geological internal processes (volcanoes, earthquakes), geologic history, geologic time, and surface processes (rivers, karst, soils). Note: students with an undergraduate degree in geology may not count this course toward their degree requirement in the Geography and Geology master's program or towards the geology emphasis in the Master of Natural and Applied Science program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

GLG 702 Geology for Secondary Teachers II

Prerequisite: GLG 701.

Continuation of GLG 701.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

GLG 713 Field Geology for Secondary Teachers

Prerequisite: permission.

Field work; identification and correlation of rock units; determination of depositional environments from fossils and other indicators. Students are required to make a collection of specimens from rock formations in the study area. May be repeated to a total of 6 hours when destination varies.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GLG 715 Isotope Geochemistry

Topics include the application of radiogenic, radioactive and stable isotopes to the processes and timescales relevant to the formation of the planet and solar system, the evolution of the Earth system and interactions in the hydrosphere and biosphere. Course consists of lecture and seminar section, where students are exposed to these applications and discuss relevant papers from the literature. A semester long project using geochronology and isotope geochemistry data is required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (even-numbered years)

GLG 751 Seminar in Geology

Prerequisite: permission.

Preparation of an extensive paper on selected topics to be read before staff seminars.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

GLG 765 Selected Topics in Earth Science

Prerequisite: permission.

Students cooperatively select from general subject areas in earth science more specific areas to explore. Topics are studied consecutively during the semester. Subject areas from which the topic selections are made are included in the class schedule for each term the course is offered. Variable content course. Since topics vary, the course may be repeated for a total of 6 hours. Identical with GRY 740. Cannot receive credit for more than 6 hours of GLG 755 and GRY 740 combined.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GLG 779 Research/Geological Sciences

Prerequisite: permission.

Original research supervised by the geology staff, involving special areas of the geological sciences. May be repeated to a total of 3 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GLG 782 Contaminant Hydrology

Recommended Prerequisite: undergraduate background in both geology and chemistry. Geochemical principles applied to solve environmental problems effecting surface water and groundwater. Case studies in groundwater geochemistry, medical geology, and mining geology. Geostatistics (ArcGIS, SPSS) and geochemical modeling (MINTEQ) tools used.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring (odd-numbered years)

GLG 794 Global Tectonics

Recommended Prerequisite: GLG 314. The fundamental basis of plate tectonics. Topics covered include geophysical methods, plate motion theory, fundamental properties of plate boundaries, formation of sedimentary basins and orogenic belts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GLG 796 Science Internship

Completion of an internship project (80 hours/credit hour) at a discipline-related business, nonprofit organization, or government agency, approved and supervised by both the departmental and internship advisors. Includes a formal report in the appropriate professional format, and an oral presentation at an approved venue. Graded Pass/Not Pass only. No more than 6 hours may count toward a masters degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

GLG 799 Thesis

Prerequisite: permission.

Independent research and study connected with preparation of thesis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Geospatial Sciences (GEO) courses

GEO 200 Exploring Our Digital Earth

Prerequisite: 12 hours.

General Education Course (Focus on Public Issues).

An exploration of the geospatial technologies related to digital Earth with a focus on their applications in our current world. Topics include geospatial data, digital mapping, geographic information systems (GIS), global positioning systems (GPS), and remote sensing. This course uses a wide range of geospatial technology software freely available on the internet, and provides an introduction to geospatial technologies as critical thinking and inquiry tools.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GEO 360 Interpretation of Aerial Photography

Detection, identification, and analysis of objects or features from film and digital aerial photography and other types of high resolution remotely sensed images. Laboratory emphasizes manual and digital image interpretation for land cover mapping, forestry, agriculture, geology, and planning applications. Field trip is required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	3	Fall

GEO 363 Introduction to Geographic Information Science

Introduction to the foundations of geographic information systems (GIS), digital cartography, global positioning systems (GPS), and remote sensing used in academia, government agencies, and private industries. Topics include maps, data collection, data processing, and data analysis and display.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	4	Fall, Spring

GEO 551 Remote Sensing

Prerequisite: GEO 360.

Introduction to environmental studies through the application of remotely sensed imagery and geospatial technologies. The course covers principles of remote sensing, interactions of electromagnetic energy with the atmosphere and earth's surface, satellite systems and sensors (electro-optical, thermal, radar and LiDAR). Emphasis is placed on regional and global monitoring, land cover mapping, forestry, agriculture, geology, planning and oceanography. Laboratory emphasizes interpretation of remotely sensed imagery and introduction to digital image processing including enhancements, corrections and classification routines. May be taught concurrently with GEO 651. Cannot receive credit for both GEO 651 and GEO 551.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GEO 561 Applied Geographic Information Science

Prerequisite: GEO 363 or permission of instructor.

Principles and applications of Geographic Information Systems (GIS) software. Examines the nature and accuracy of spatially referenced data, as well as methods of data capture, storage, retrieval, visualization and output. This course will emphasize the application of GIS to solving geospatial problems in various disciplines. May be taught concurrently with GEO 661. Cannot receive credit for both GEO 661 and GEO 561.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GEO 562 Internet Geospatial Science

Prerequisite: GEO 561.

Basic understanding of the contemporary standards for using the internet to distribute and utilize geospatial data. Students will set up and maintain a WebGIS server, design maps, and publish maps to the WebGIS server. A major part of the course will examine the development of WebGIS applications that utilize the published WebGIS services. May be taught concurrently with GEO 662. Cannot receive credit for both GEO 662 and GEO 562.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GEO 566 Advanced Geographic Information Science

Prerequisite: GEO 561.

A theoretical and practical examination of analytical methods used in GIS, including point pattern/clustering analysis, global and local spatial autocorrelation, analysis of fields, spatial interpolation, map overlay and cartographic modeling, and new approaches to spatial analysis. May be taught concurrently with GEO 666. Cannot receive credit for both GEO 666 and GEO 566.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GEO 568 Thematic Cartography

Prerequisite: GEO 363.

Theoretical and applied aspects of map design in thematic mapping, animated mapping, interactive and web mapping. Emphasis will be applying computer-assisted mapping techniques of the problems of effective and efficient communication of spatial data. May be taught concurrently with GEO 668. Cannot receive credit for both GEO 568 and GEO 668.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GEO 569 Landscape Analysis

Prerequisite: GEO 200 or GEO 363 or permission of instructor.

A project-based exploration of geospatial methods and processing techniques for the analysis, modeling, and prediction of hydrologic and geomorphic processes at various landscape scales. An emphasis will be placed on the applications of digital elevation models, remotely sensed data, and modeling techniques to understand landscape processes of interest to fields such as geology, physical geography, agriculture, soils, ecological systems, and archaeology. May be taught concurrently with GEO 669. Cannot receive credit for both GEO 569 and GEO 669.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	2	Fall (even-numbered years)

GEO 572 Introduction to Photogrammetry and LiDAR Technology

Recommended Prerequisite: GEO 360. Course covers basic concepts of photogrammetry and LiDAR techniques such as stereo feature extraction, orthophoto, LiDAR point cloud visualization and DEM/DTM generation.

Laboratory emphasizes geospatial stereo feature extraction using digital photogrammetry software, ArcGIS and Matlab toolboxes. May be taught concurrently with GEO 572. Cannot receive credit for both GEO 572 and GEO 672.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Spring

GEO 573 Geographic Information Science Programming

Prerequisite: GEO 561; and either ITC 202 or CSC 121 or CSC 125.

Course devoted to theories and processes of analytical and automated Geographic Information Science (GIS). Principal topics covered are spatial programming, geographic data storage, computer map rendering, application customization and automation and human interface development of GIS. Advanced GIS and programming skills for professional development are emphasized. May be taught concurrently with GEO 673. Cannot receive credit for both GEO 673 and GEO 573.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GEO 575 GPS Surveying and Mapping

Prerequisite: 30 hours.

Theory and operation of global positioning systems (GPS) hardware and software. Including mission planning, measurement of point, line and area features, differential correction techniques and waypoint navigation. Field exercises required. May be taught concurrently with GEO 675. Cannot receive credit for both GEO 675 and GEO 575.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Spring

GEO 578 Remote Sensing Digital Image Processing

Prerequisite: GEO 551 or GEO 566 or GEO 572.

Advanced application of remote sensing digital image processing in areas of interest such as land use/land cover mapping, agriculture, forestry, resource planning and geology. Course covers image visualization, image correction, classification algorithms and change detection methods. Laboratory emphasizes advanced image processing techniques using ENVI software. May be taught concurrently with GEO 678. Cannot receive credit for both GEO 678 and GEO 578.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GEO 597 Topics in Geospatial Science

Prerequisite: permission.

Detailed treatment of a selected topic in Geospatial Science that may vary from offering to offering. Variable content course. May be repeated for a total of 7 hours. May be taught concurrently with GEO 697. Cannot receive credit for the same topic in both GEO 597 and GEO 697.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

GEO 651 Remote Sensing

Recommended Prerequisite: GEO 360. Introduction to environmental studies through the application of remotely sensed imagery and geospatial technologies. The course covers principles of remote sensing, interactions of electromagnetic energy with the atmosphere and earth's surface, satellite systems and sensors (electro-optical, thermal, radar and LiDAR). Emphasis is placed on regional and global monitoring, land cover mapping, forestry, agriculture, geology, planning and oceanography. Laboratory emphasizes interpretation of remotely sensed imagery and introduction to digital image processing including enhancements, corrections and classification routines. May be taught concurrently with GEO 551. Cannot receive credit for both GEO 551 and GEO 651.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GEO 657 Fundamentals of Geospatial Science

This course is designed for graduate students who have limited background in Geospatial Science, or whose skills need refreshed, but wish to take graduate-level Geospatial Science courses. As such, this course uses a series of self-paced modules to provide students with the fundamental knowledge of the theory and software related to geographic information systems and remote sensing and will prepare them to succeed in other graduate-level GEO courses that have GEO 360 or GEO 363 as recommended prerequisites.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

GEO 661 Applied Geographic Information Science

Recommended Prerequisite: GEO 363 or permission of instructor. Principles and applications of Geographic Information Systems (GIS) software. Examines the nature and accuracy of spatially referenced data, as well as methods of data capture, storage, retrieval, visualization and output. This course will emphasize the application of GIS to solving geospatial problems in various disciplines. May be taught concurrently with GEO 561. Cannot receive credit for both GEO 661 and GEO 561.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GEO 662 Internet Geospatial Science

Recommended Prerequisite: GEO 561 or GEO 661. Basic understanding of the contemporary standards for using the internet to distribute and utilize geospatial data. Students will set up and maintain a WebGIS server, design maps, and publish maps to the WebGIS server. A major part of the course will examine the development of WebGIS applications that utilize the published WebGIS services. May be taught concurrently with GEO 562. Cannot receive credit for both GEO 562 and GEO 662.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GEO 666 Advanced Geographic Information Science

Recommended Prerequisite: GEO 561 or GEO 661. A theoretical and practical examination of analytical methods used in GIS, including point pattern/clustering analysis, global and local spatial autocorrelation, analysis of fields, spatial interpolation, map overlay and cartographic modeling, and new approaches to spatial analysis. May be taught concurrently with GEO 566. Cannot receive credit for both GEO 566 and GEO 666.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GEO 668 Thematic Cartography

Recommended Prerequisite: GEO 363. Theoretical and applied aspects of map design in thematic mapping, animated mapping, interactive and web mapping. Emphasis will be applying computer-assisted mapping techniques of the problems of effective and efficient communication of spatial data. May be taught concurrently with GEO 568. Cannot receive credit for both GEO 668 and GEO 568.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GEO 669 Landscape Analysis

Recommended Prerequisite: GEO 363 or GEO 657. A project-based exploration of geospatial methods and processing techniques for the analysis, modeling, and prediction of hydrologic and geomorphic processes at various landscape scales. An emphasis will be placed on the applications of digital elevation models, remotely sensed data, and modeling techniques to understand landscape processes of interest to fields such as geology, physical geography, agriculture, soils, ecological systems, and archaeology. May be taught concurrently with GEO 569. Cannot receive credit for both GEO 669 and GEO 569.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	2	Fall (even-numbered years)

GEO 672 Introduction to Photogrammetry and LiDAR Technology

Recommended Prerequisite: GRY 360. Course covers basic concepts of photogrammetry and LiDAR techniques such as stereo feature extraction, orthophoto, LiDAR point cloud visualization and DEM/DTM generation. Laboratory emphasizes geospatial stereo feature extraction using digital photogrammetry software, ArcGIS and Matlab toolboxes. May be taught concurrently with GEO 572. Cannot receive credit for both GEO 572 and GEO 672.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Spring

GEO 673 Geographic Information Science Programming

Recommended Prerequisite: GEO 561 or GEO 661, and either ITC 202 or CSC 121 or CSC 125. Course devoted to theories and processes of analytical and automated Geographic Information Science (GIS). Principal topics covered are spatial programming, geographic data storage, computer map rendering, application customization and automation and human interface development of GIS. Advanced GIS and programming skills for professional development are emphasized. May be taught concurrently with GEO 573. Cannot receive credit for both GEO 573 and GEO 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GEO 675 GPS Surveying and Mapping

Theory and operation of global positioning systems (GPS) hardware and software. Including mission planning, measurement of point, line and area features, differential correction techniques and waypoint navigation. Field exercises required. May be taught concurrently with GEO 575. Cannot receive credit for both GEO 575 and GEO 675.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Spring

GEO 678 Remote Sensing Digital Image Processing

Prerequisite: GEO 551 or GEO 651 or GEO 566 or GEO 666 or GEO 572 or GEO 672.

Advanced application of remote sensing digital image processing in areas of interest such as land use/land cover mapping, agriculture, forestry, resource planning and geology. Course covers image visualization, image correction, classification algorithms and change detection methods. Laboratory emphasizes advanced image processing techniques using ENVI software. May be taught concurrently with GEO 578. Cannot receive credit for both GEO 578 and GEO 678.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

GEO 697 Topics in Geospatial Science

Prerequisite: permission.

Detailed treatment of a selected topic in Geospatial Science that may vary from offering to offering. Variable content course. May be repeated for a total of 7 hours. May be taught concurrently with GEO 597. Cannot receive credit for the same topic in both GEO 597 and GEO 697.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

GEO 700 Introduction to Graduate Study in Geography, Geology and Planning

This course serves as a foundation for students pursuing a graduate degree in the Department of Geography, Geology and Planning. First-semester graduate students are introduced to the research interests of the department's faculty, are guided in effective strategies for conducting a literature search and are mentored in the effective development of a research proposal.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

GEO 701 Graduate Research Methods in Geography, Geology and Planning

Prerequisite: GEO 700.

Methods of collecting, organization, and analyzing data pertinent to graduate study in geography, geology and planning. Emphasis will be on the application of univariate and multivariate statistical techniques and other quantitative techniques pertinent to mathematically and statistically modeling problems in geography, geology and planning.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

GEO 705 Geography, Geology, and Planning Seminar

This course consists of a series of oral presentations to be made by faculty members, students, and guest speakers from industry, academe and government on new developments in geography, geology or planning. Graded Pass/Not Pass. Repeatable to a maximum of 3 credit hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

GEO 755 Applications of Digital Cartography, Analytical Photogrammetry, and Remote Sensing

Prerequisite: permission.

Advanced application of aerial photography and digital imagery, analytical photogrammetry, remote sensing, digital cartography and other geospatial technologies in areas of interest such as land use/land cover mapping, landscape ecology, agriculture, forestry, resource planning, geology, and soils. Since credit and topics vary, the course may be repeated for a maximum of 7 hours with permission.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

GEO 770 Advanced Field and Laboratory Methods

Advanced training in laboratory and field methods in geography and geology. Topics will vary due to faculty expertise or student interest. Examples include watershed monitoring techniques, geochemical techniques, and field studies in remote areas. Field trips are required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

GEO 780 Research Paper in Geospatial Sciences

Prerequisite: permission.

Extensive research paper on selected topic to be presented orally at a departmental seminar or professional meeting. Exclusively used to satisfy requirements for non-thesis option.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

Planning (PLN) courses

PLN 100 Introduction to Urban Studies

Prerequisite: 12 hours.

General Education Course (Focus on Public Issues).

This course provides an introduction to understanding metropolitan issues from a variety of viewpoints. It will explore questions such as: What is a city? What is the relationship between the natural and built environments? How do planners create a sustainable city? How do people perceive cities? How do planners work with diverse communities? What are their current issues and problems? How will cities respond to a changing world economy and the globalization of culture? This course will help students recognize community needs and how to contribute knowledge and work within diverse communities to meet those needs.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	URBN 202 - Introduction to Urban Studies.

[Access the CORE 42 portal](#)

PLN 300 Graphic Communication for Planners

Focuses on planning graphics, visual analysis, graphic design, diagramming, photo- editing techniques, spreadsheets, and the developing of a portfolio. The graphics and computer techniques as well as the oral and written skills which are used by planners to communicate information to the public and elected officials are emphasized.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLN 367 Planning Methods

Introduces data collection, sampling methods, statistical procedures and analysis, changing demographic characteristics, economic analysis, population projection methodologies and computer application in data analysis. Cannot receive credit for both PLN 367 and GRY 367.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLN 371 History and Introduction to Planning

This course provides an introduction to planning and a critical analysis of past and present planning concepts in terms of social, economic, political, and urban design aspects. It analyzes the development of urban form in different eras, and assesses its success and failure to meet the needs of diverse users. It also examines the history and forces behind the development of the planning profession in the United States.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLN 372 Planning Theory and Ethics

This course aims to introduce students to the theories of city and regional planning. Specifically, it examines the need for theory in planning and overviews the evolution of planning paradigms from the beginning of the 20th century to the present. Additionally, the following issues are investigated: why plan; how to planners plan; how can planning be achieved in a pluralistic society; what are the values and ethics of planners? Finally, a major aim is for students to appreciate the link between theory and praxis. Field trip required.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLN 397 Selected Topics in Planning

Course devoted to a single topic which may vary from semester to semester depending upon student and faculty interest. Since credit and topics vary, this course may be repeated, with permission, to a total of 5 hours credit. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PLN 505 Social Planning

This course will address planning practice in relation to values of justice, equity, fairness, and efficiency. In particular the course will focus upon inclusion of different community groups within the planning decision making process. A field project is required. May be taught concurrently with PLN 605. Cannot receive credit for both PLN 505 and PLN 605.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLN 570 Planning Law

Study of the legal foundations of land use controls. Topics include historic legal cases establishing government intervention in private development zoning, subdivision, growth management, individual liberty, environmental regulation and the general welfare concept. May be taught concurrently with PLN 670. Cannot receive credit for both PLN 570 and PLN 670.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLN 571 Land Use Planning

Prerequisite: PLN 371 or PLN 372 or FIN 266.

Focuses on conceptual and analytical techniques of land use planning, including land use analysis, planning studies and procedures, and the synthesis of planning elements through comprehensive plan development. The course also explores land use planning with regard to social justice and sustainability, diverse communities, and resiliency planning. May be taught concurrently with PLN 671. Cannot receive credit for both PLN 571 and PLN 671.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLN 572 Community Planning Practicum

Prerequisite: PLN 571; Recommended **Prerequisite:** PLN 367.

This course provides students the opportunity to apply the accumulated knowledge of planning theory and skills learned throughout the program. It focuses on the process of community planning and plan development. It also provides experience in the application of planning principles and analytic techniques to an actual planning scenario. Students will work on an individual basis and as part of a team to create a planning document. Field trip(s) required. May be taught concurrently with PLN 672. Cannot receive credit for both PLN 572 and PLN 672. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

PLN 573 Urban Design and Preservation

Prerequisite: PLN 371 and GRY 322.

Elements of urban design and preservation in relation to social, economic, and political forces; the role of the urban designer in the planning process. May be taught concurrently with PLN 673. Cannot receive credit for both PLN 673 and PLN 573.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLN 574 Open Space Planning

Principles and methods of open space planning. Students will learn about the relationship between open space and the quality of life in cities and will obtain a foundation for conducting open space planning projects. Class format includes lecture, seminar and studio. Field problem required. May be taught concurrently with PLN 574. Cannot receive credit for both PLN 574 and PLN 674.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

PLN 576 Site Planning and Design Studio

Focuses on the principles of site planning approaches in evaluating, planning, and designing sites within the context of natural and cultural systems. Provides a foundation for conducting any type of site planning project. A specific site in the region is studied and plans are developed for present and future use. May be taught concurrently with PLN 676. Cannot receive credit for both PLN 676 and PLN 576.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall

PLN 596 Research in Planning

Prerequisite: permission.

Enrichment through guided but independent, original research in planning and planning related subject areas. May be repeated to a total of 6 hours. May be taught concurrently with PLN 696. Cannot receive credit for both PLN 696 and PLN 596.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

PLN 597 Selected Topics in Planning

Detailed treatment of various advanced topics in planning which may vary from semester to semester. Some typical topics: Economic Development Planning, Rural and Small Town Planning, Housing in America. Since credit and topics vary, the course may be repeated to a total of 6 hours. Variable content course. May be taught concurrently with PLN 697. Cannot receive credit for both PLN 697 and PLN 597.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

PLN 599 Internship in Community and Regional Planning

Prerequisite: 90 hours and PLN 571.

Work in community or regional planning agency. Students are monitored by Planning faculty and supervisory personnel of the planning agency. May be repeated to a total of 6 hours. May be taught concurrently with PLN 699. Cannot receive credit for both PLN 699 and PLN 599.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

PLN 605 Social Planning

This course will address planning practice in relation to values of justice, equity, fairness, and efficiency. In particular the course will focus upon inclusion of different community groups within the planning decision making process. A field project is required. May be taught concurrently with PLN 505. Cannot receive credit for both PLN 605 and PLN 505.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLN 670 Planning Law

Study of the legal foundations of land use controls. Topics include historic legal cases establishing government intervention in private development zoning, subdivision, growth management, individual liberty, environmental regulation and the general welfare concept. May be taught concurrently with PLN 570. Cannot receive credit for both PLN 570 and PLN 670.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLN 671 Land Use Planning

Recommended Prerequisite: PLN 371 or PLN 372 or FIN 266. Focuses on conceptual and analytical techniques of land use planning, including land use analysis, planning studies and procedures, and the synthesis of planning elements through comprehensive plan development. The course also explores land use planning with regard to social justice and sustainability, diverse communities, and resiliency planning. May be taught concurrently with PLN 571. Cannot receive credit for both PLN 571 and PLN 671.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PLN 672 Community Planning Practicum

Recommended Prerequisite: PLN 367. This course provides students the opportunity to apply the accumulated knowledge of planning theory and skills learned throughout the program. It focuses on the process of community planning and plan development. It also provides experience in the application of planning principles and analytic techniques to an actual planning scenario. Students will work on an individual basis and as part of a team to create a planning document. Field trip(s) required. May be taught concurrently with PLN 572. Cannot receive credit for both PLN 572 and PLN 672.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Spring

PLN 673 Urban Design and Preservation

Recommended Prerequisite: PLN 371 and GRY 322. Elements of urban design and preservation in relation to social, economic, and political forces; the role of the urban designer in the planning process. May be taught concurrently with PLN 573. Cannot receive credit for both PLN 573 and PLN 673.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PLN 674 Open Space Planning

Principles and methods of open space planning. Students will learn about the relationship between open space and the quality of life in cities and will obtain a foundation for conducting open space planning projects. Class format includes lecture, seminar and studio. Field problem required. May be taught concurrently with PLN 574. Cannot receive credit for both PLN 574 and PLN 674.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

PLN 676 Site Planning and Design Studio

Recommended Prerequisite: PLN 371 and PLN 372. Focuses on the principles of site planning approaches in evaluating, planning, and designing sites within the context of natural and cultural systems. Provides a foundation for conducting any type of site planning project. A specific site in the region is studied and plans are developed for present and future use. May be taught concurrently with PLN 576. Cannot receive credit for both PLN 576 and PLN 676.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall

PLN 696 Research in Planning

Prerequisite: permission.

Enrichment through guided but independent, original research in planning and planning related subject areas. May be repeated to a total of 6 credit hours. May be taught concurrently with PLN 596. Cannot receive credit for both PLN 596 and PLN 696.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

PLN 697 Selected Topics in Planning

Detailed treatment of various advanced topics in planning which may vary from semester to semester. Some typical topics: Economic Development Planning, Rural and Small Town Planning, Housing in America. Variable content course. May be repeated to a total of 6 hours. May be taught concurrently with PLN 597. Cannot receive credit for both PLN 597 and PLN 697.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

PLN 699 Internship in Community and Regional Planning

Recommended Prerequisite: PLN 571. Work in community or regional planning agency. Students are monitored by Planning faculty and supervisory personnel of the planning agency. May be repeated to a total of 6 hours. May be taught concurrently with PLN 599. Cannot receive credit for both PLN 599 and PLN 699.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring, Summer

PLN 704 Community Resource Planning

Explanation of community growth and change. Review of public and private agency programs. Topics may focus on small towns and rural areas as well as urban and metropolitan areas. Since credit and topics vary, the course may be repeated for a maximum of 7 hours with permission.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

Applied Geophysics Certificate

Applied Geophysics

This certificate provides a program for students and professionals who desire knowledge of the methods and theories of applying geophysical techniques to the study of Earth systems.

Program requirements (12 hours)

1. [GLG 590\(3\)](#) and [591\(3\)](#).
2. Two courses from: [GLG 573\(3\)](#), [GLG 574\(3\)](#), [MTH 302\(3\)](#), [MTH 303\(3\)](#), [PHY 291\(3\)](#), [PHY 319\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Note: Students completing a major other than Geology may request a waiver of the GLG 340 prerequisite requirement for GLG 591 if they have completed either MTH 302 or 303 and either PHY 291 or 391.

Applied Geospatial Science Certificate

Applied Geospatial Science

This certificate provides a program for students and professionals who desire knowledge and credentials in the application of Geographic Information Science as a tool for solving problems in various disciplines.

Program requirements (16-17 hours)

1. [GEO 200\(3\)](#), [363\(4\)](#), [551\(3\)](#), [561\(3\)](#).
2. Three to four hours from the following list of approved courses which integrate Geospatial Science topics and hands-on skills within their disciplinary context: [GEO 360\(3\)](#), [GEO 569\(3\)](#), [GLG 340\(4\)](#), [GLG 412\(4\)](#); [GLG 547\(3\)](#) or [BIO 547\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a grade of C or better in all courses used to fulfill the certificate requirements.

Community and Regional Planning

Major(s)

Community and Regional Planning (Comprehensive)

Bachelor of Science

Major requirements (42-43 hours)

1. One course from: [PLN 100\(3\)](#), [GRY 100\(3\)](#), [GRY 108\(3\)](#), [GRY 142\(4\)](#), [GLG 110\(4\)](#), [GLG 171\(3\)](#).
2. [PLN 300\(3\)](#), [367\(3\)](#), [371\(3\)](#), [372\(3\)](#); [PLN 570\(3\)](#) or [LAW 537\(3\)](#); [PLN 571\(3\)](#), [572\(4\)](#), [576\(4\)](#), [599\(3\)](#); [GEO 363\(4\)](#); [SOC 302\(3\)](#).
3. Three additional hours from [GRY 322\(3\)](#) or [325\(3\)](#) or PLN courses numbered above 300.
4. Cannot count both GRY 322(3) and PLN 100(3) toward the major requirements.
5. Public Affairs Capstone Experience will be fulfilled by completion of [PLN 572\(4\)](#).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Minor(s)

Community and Regional Planning

Bachelor of Science

1. [PLN 367\(3\)](#), [371\(3\)](#), [372\(3\)](#), [571\(3\)](#).

2. [PLN 572\(4\)](#) or [576\(4\)](#).

Accelerated graduate program in Geography and Geology

Eligible Missouri State undergraduate students may apply for admission to the Geography and Geology program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-geography-geology.htm) (<https://graduate.missouristate.edu/Catalog/prog-geography-geology.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Natural and Applied Science

Eligible Missouri State undergraduate students may apply for admission to the Master of Natural and Applied Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm) (<https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Professional Studies

Eligible Missouri State undergraduate students may apply for admission to the Master of Professional Studies program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/professionalstudies.htm) (<https://graduate.missouristate.edu/Catalog/professionalstudies.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([/Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate certificate in Science Content

Eligible Missouri State undergraduate students may apply for admission to the Science Content certificate program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate

certificate (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-science-content.htm\)](https://graduate.missouristate.edu/Catalog/prog-science-content.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(/Registrar/mixedcredit.htm\)](https://Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

Engineering Geology Certificate

Engineering Geology

This certificate will allow geology majors to document additional competencies relevant to careers in the geotechnical and civil/environmental engineering fields. Engineering students will gain additional perspectives on the geological aspects of civil engineering. Students from related majors interested in careers in the geotechnical industry will also gain career-relevant skills that complement their area of major study.

Program requirements (13 hours)

1. [GRY 275\(3\)](#), [GLG 110\(4\)](#), [GLG 573\(3\)](#).
2. One course from: [GLG 572\(3\)](#), [580\(3\)](#), [590\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Note: The GLG prerequisites for GLG 573, 572, 580 and 590 may be waived for non-geology majors at the discretion of the department head, assuming that student has already completed GLG 110 and any MTH prerequisites for the course.

Note: Students in the cooperative engineering program may contact the Geography, Geology, and Planning department head to request a substitution for GLG 572.

Completion requirement

Attain a grade of C or better in all courses used to fulfill the certificate requirements.

Environmental Education Certificate

Environmental Education

This certificate is jointly offered by Department of Biology and Department of Geography, Geology and Planning and provides coursework to improve or broaden the student's background knowledge of environmental related topics and provides instruction on techniques for presenting environmental topics in formal and in nonformal education settings. It also provide exposure to and access to a variety of national and regional environmental education resources that participants can use when developing their own educational programs in the future.

This certificate is administered by the College of Natural and Applied Science.

Program requirements (14-16 hours)

1. [GRY 108\(3\)](#), [BIO 561\(2\)](#).
2. Three courses from following with at least two different course codes. Only one internship and one field course can count toward this program. Cannot count both BIO 547 and GLG 547. Other courses approved by the faculty advisor for the program may be substituted on a case-by-case basis. [BIO 399\(1-3\)](#), [BIO 485\(1-3\)](#), [BIO 527\(1-4\)](#), [BIO 547\(3\)](#), [BIO 564\(2\)](#), [BIO 579\(4\)](#); [GRY 318\(3\)](#), [GRY 348\(3\)](#), [GRY 353\(2\)](#), [GRY 399\(1-3\)](#); [GLG 110\(4\)](#), [GLG 115\(3\)](#), [GLG 171\(3\)](#), [GLG 350\(3\)](#), [GLG 360\(1-3\)](#), [GLG 399\(1-3\)](#), [GLG 547\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a GPA of 2.50 or higher in the courses used to fulfill the certificate requirements.

Environmental Geoscience Certificate

Environmental Geoscience

This certificate provides students the opportunity to develop an understanding of the theories and applications of environmental and conservation principles and the problem-solving approaches used to address environmental issues.

Program requirements (13-14 hours)

1. [GRY 135](#)(4) or [GRY 351](#)(3).
2. [GLG 171](#)(3) and [GLG 172](#)(1).
3. [GLG 580](#)(3) or [CHM 460](#)(3).
4. [GRY 108](#)(3) or [GLG 547](#)(3).
5. All candidates must satisfy the [General University Certificate Requirements](#).

Note: The GLG 172 requirement will be waived for students who have a grade of C or better in GLG 110.

Note: Students enrolled in sections of BIO 547 cross-listed with GLG 547 may count that course in place of GLG 547.

Completion requirement

Attain a grade of C or better in all courses used to fulfill the certificate requirements.

Hospitality Leadership Courses

Hospitality Leadership (HSP) courses

HSP 210 Essentials of Hospitality Leadership

This course is designed to examine the hospitality leadership processes, concepts, and principles and to improve personal competence in decision-making, problem solving, motivation, and communication as they relate to the hospitality industry.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

HSP 215 Introduction to Lodging Management

Prerequisite: HSP 210 or concurrent enrollment.

A study of the fundamentals of how lodging operations are managed from a rooms perspective. Practical examples are used to familiarize students with the line management aspects of reservations, registration, occupancy, and checkout and the settlement procedures in various lodging market segments.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 218 Safety and Sanitation

Prerequisite: HSP 210 or concurrent enrollment or permission.

Introduction to food service sanitation and safety practices pertinent to hospitality management. Emphasis on sanitation requirements, safe food handling, storage practices and accident prevention.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 220 Money Talks: Managing Hospitality Finances

The course is intended as an introduction to hospitality financial accounting. The course provides students with a basic understanding of hospitality industry accounting concepts and procedures necessary to succeed within hospitality organizations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

HSP 230 Creating Exceptional Guest Experiences

This course introduces the application of service concepts, principles, and techniques to the hospitality industry and explores the components of creating positive guest experience in hospitality organizations. Significant attention is given to making strategic decisions that enhance the guest experience.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

HSP 300 Special Topics in Hospitality Leadership

Prerequisite: permission of Department Head.

Selected topics of contemporary interest in hospitality leadership. Offered when resources and demand allow. May be repeated for a total of 6 hours when topics change. Variable Content Course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

HSP 302 Hospitality Leadership Study Tour

Prerequisite: permission of Department Head.

Study of and visits to museums, international hospitality tours, historic sites, trade shows, conferences, and conventions related to the hospitality industry. May be taken for a total of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

HSP 310 Analyzing Financial Performance in Hospitality Operations

Prerequisite: HSP 210; and HSP 220 or ACC 201.

Financial techniques in forecasting, budgeting, and performance measurement, and the application of the hospitality industry uniform system of accounts are covered in this course as they apply to operational and fiscal decision making.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 315 Advanced Lodging Management

Prerequisite: HSP 210 and HSP 215.

Students in this course will analyze the lodging industry in depth. Critical thinking skills are stressed as students are exposed to different viewpoints within a coherent theoretical structure, enabling them to formulate their own ideas and solutions. Current trends and challenges in lodging are also studied in depth.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HSP 321 Principles of Food Preparation

Prerequisite: HSP 218.

Students in this course study the scientific principles and techniques in the selection, preparation and preservation of food including fundamental principles of nutrition and diet.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall, Spring

HSP 325 Cultural Cuisine

Prerequisite: permission of instructor.

A course designed to extensively explore various cultures through a hands-on culinary experience. May be repeated for a total of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

HSP 330 Banquet Operations

Prerequisite: HSP 210 and HSP 321; and Hospitality Leadership major or enrolled in Food and Beverage Operations certificate program.

This course provides students with practical skills and knowledge for effective management of food and beverage practices, from the preparation of quantity foods to its service. Laboratory arranged.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

HSP 340 Destination Development

Prerequisite: HSP 410 or concurrent enrollment; or GRY 310.

This course offers a systematic study of hospitality businesses and attractions as they apply to destination development. The role of government agencies, private developers, and investors as they pertain to destination development will be studied. Case studies are used extensively which offer examples of successful and unsuccessful development efforts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HSP 345 Club Management

Prerequisite: HSP 210 and HSP 215 and HSP 218.

The purpose of this course is for students to develop an understanding of the private club segment of the hospitality industry and its unique challenges. Students study governance, strategy, marketing membership, human resources, and operations that are specific to the private club segment of the hospitality industry.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HSP 354 Hospitality Human Resource Development

Prerequisite: HSP 210; and HSP 220 or ACC 201; and HSP 230.

Study of concepts and applications of interpersonal skills as it relates to the hospitality industry; communication; leadership styles; product enhancement; labor market shortage; conflict resolution; recruitment, training and retention.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 360 Hospitality Facilities Management

Prerequisite: HSP 210 and HSP 215.

Students in this course study the management of the physical plant of various hospitality enterprises, with a focus on systems, sustainability, design and layout, equipment, development, and renovation. Current facility-related challenges are also addressed

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

HSP 370 Hospitality Industry Revenue Management

Prerequisite: HSP 310 or HSP 315 or concurrent enrollment.

The course presents the theories, strategies and tactics employed in hospitality revenue management including capacity management, duration control, demand and revenue forecasting, discounting, displacement analysis, and sales mix analysis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

HSP 400 Problems in Hospitality Leadership

Prerequisite: permission of Department Head.

Independent study for those who wish additional work in specific subject areas.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

HSP 409 Beverage Operations

Prerequisite: senior standing; and Hospitality Leadership major or enrolled in Food and Beverage Operations certificate program.

Principles and methods of operating a profitable beverage component in a foodservice business. Topics range from inventory control, accounting, equipment and pricing, to legal responsibilities and liability.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 410 Hospitality Marketing

Prerequisite: HSP 310 or concurrent enrollment.

The course is designed to provide students with theory and knowledge which will enable them to develop and interpret strategic marketing plans for hospitality enterprises properties.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 426 Food and Beverage Management

Prerequisite: HSP 321; and MTH 130 or higher; and junior standing; and Hospitality Leadership major or enrolled in Food and Beverage Operations certificate program.

A continuation of the student's familiarization with food service components in the hospitality industry. Menu, planning, pricing, food service accounting, wage and labor cost control, purchasing, portion control, advertising, sales and other food service principles, practices and techniques are analyzed.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 428 Hospitality Law

Prerequisite: HSP 210; and HSP 220 or ACC 201; and HSP 230; and Hospitality Leadership major or enrolled in Essentials of Hospitality Management certificate.

The study of the legal aspect of lodging and food service operations. Problem-solving approach applied to liability and litigation problems confronting hospitality executives.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 430 Special Event Planning

Prerequisite: HSP 321.

In-depth analysis of management and operational challenges involved in planning and deploying events as they relate to the hospitality industry.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 435 Restaurant Management

Prerequisite: HSP 321; and Hospitality Leadership major or enrolled in Food and Beverage Operations certificate program.

This course is designed to allow students to experience the step-by-step process of operating "Carrie's" Restaurant in Pummill Hall. Students will design the menu, prepare and serve the food and market the restaurant. In addition, students may participate in the planning and execution of various special events in the program. May be repeated to a total of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall, Spring

HSP 436 Casino Operations

Prerequisite: HSP 354 or concurrent enrollment.

This course provides an overview of the gaming industry with an emphasis on casino hotel operations as an integral part of the hospitality industry. Topics include the history of gaming, casino layout and design, surveillance, demographic profiles, psychological profiles, and economic impact.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 480 Global Strategic Management in the Hospitality Industry

Prerequisite: HSP 310; and HSP 410 or concurrent enrollment.

This is an integrative course that focuses on managing the various components of the hospitality industry at both the business and the corporate level. Students use case studies as well as current events in the industry to understand the nature of strategic issues and their management in the hospitality industry.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 490 Advanced Hospitality Leadership

Prerequisite: HSP 354 or concurrent enrollment; and Hospitality Leadership major or enrolled in Advanced Hospitality Leadership certificate.

An in-depth investigation into leadership principles and practices required of professionals in the hospitality industry. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

HSP 497 International Hospitality Field Study

Prerequisite: HSP 210 and HSP 215 and HSP 218 and permission.

Provides students with first-hand exposure to international issues in hospitality administration. This Education Abroad opportunity includes a preparation phase, a two to three week visit to an international destination where students are immersed in the local culture, and a debrief following the trip. Variable content course. Because credit and destinations vary, the course may be repeated to a total of 6 hours. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

HSP 499 Internship in Hospitality

Prerequisite: senior standing; and Hospitality Leadership major; and permission.

Supervised experience in a cooperative program in hospitality. Student must gain experience/exposure in at least three positions during the internship. The student must be paid for the internship and must work a minimum of 750 hours. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
6			Upon demand

HSP 710 Risk Management and Legal Compliance in the Hospitality Industry

In-depth studies of legal issues pertinent to hospitality and tourism firms are the focus of this course. Topical areas include contracts, negligence, and employment, labor, and real estate law. Treaties and international law affecting global trade policy as well as international tourism development receive heavy emphasis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HSP 720 Hospitality Change Management and Leadership

An in-depth investigation of the principles and theories of leading change in hospitality organizations. The processes, skills, and abilities needed to manage change in the industry are stressed. Attention is given to areas hospitality leaders need to address when initiating change such as vision development, team development and motivation, power and influence, performance standards, productivity, and organizational culture. Case studies will be used extensively to address course content.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HSP 730 Seminar in Hospitality and Tourism

Prerequisite: HSP 710 and HSP 720.

An evaluation and analysis of the theory, research, and practice involved in hospitality and tourism fields. The course involves an integrative learning experience where students will have the opportunity to engage in an applied research project.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

HSP 798 Field Experience in Hospitality Administration

Prerequisite: HSP 710 and HSP 720; and HSP 730 or concurrent enrollment; and application approval.

The field experience is the culminating course for students in the Hospitality Administration Certificate Program. This course provides the students with direct leadership experience in the hospitality industry. Possible field experience sites include hotels, restaurants, institutional foodservice operations, country clubs, senior living facilities, convention and visitors bureaus, tourism-related companies, stadiums, entertainment venues, cruise lines, and many others. An intentional match will be made between the student's career aspirations, the field experience site, and the industry segment. Student must successfully complete at least 300 hours of field experience and well as a seminar paper.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3			Upon demand

Hospitality Leadership

Major(s)

Hospitality Leadership (Comprehensive) (BS)

Bachelor of Science

Major requirements (54-55 hours):

Major core (45-46 hours):

Note: Three hours may double count toward General Education requirements.

1. Specific General Education Requirement: [GRY 100\(3\)](#).
2. [HSP 210\(2\)](#), [215\(3\)](#), [218\(3\)](#), [HSP 220\(2\)](#) or [ACC 201\(3\)](#); [HSP 230\(2\)](#), [310\(3\)](#), [321\(3\)](#), [354\(3\)](#), [410\(3\)](#), [426\(3\)](#), [428\(3\)](#), [480\(3\)](#), [490\(3\)](#), [499\(6\)](#).
3. Public Affairs Capstone Experience will be fulfilled by completion of [HSP 490\(3\)](#) and [499\(6\)](#).
4. Electives to bring total number of hours to 120. Students are encouraged to use these hours to complete more than one option and to take HSP electives.

Complete one of the following options:

Club Management option (9 hours):

1. [HSP 330\(3\)](#), [345\(3\)](#); [HSP 430\(3\)](#) or [436\(3\)](#).

Food and Beverage option (9 hours):

1. [HSP 330\(3\)](#), [409\(3\)](#), [435\(3\)](#).

General Operations option (9 hours):

1. [HSP 340\(3\)](#); [HSP 430\(3\)](#) or [436\(3\)](#); [HSP 315\(3\)](#) or [370\(3\)](#) or [435\(3\)](#).

Lodging option (9 hours):

1. [HSP 315\(3\)](#), [360\(3\)](#), [370\(3\)](#).

Senior Living Management option (9 hours):

1. [HSP 330\(3\)](#); [GER 366\(3\)](#) or [PSY 366\(3\)](#); [GER 375\(3\)](#) or [SOC 375\(3\)](#).

Tourism option (9 hours):

1. [GRY 310\(3\)](#), [GRY 510\(3\)](#); [HSP 340\(3\)](#).

University level requirements:

1. [General Education Program and Requirements](#)
 2. [General Baccalaureate Degree Requirements](#)
-

Hospitality Leadership (BAS)

Bachelor of Applied Science

Major requirements (52-53 hours):

1. Associate of Science or Associate of Applied Science degree from an accredited institution. Contact the department for details.
2. [HSP 210\(2\)](#), [215\(3\)](#), [218\(3\)](#); [HSP 220\(2\)](#) or [ACC 201\(3\)](#); [HSP 230\(2\)](#), [321\(3\)](#).
3. Core courses: [HSP 310\(3\)](#), [354\(3\)](#), [428\(3\)](#), [490\(3\)](#), [499\(6\)](#).
4. 12 additional hours of upper division HSP electives.
5. Public Affairs Capstone Experience will be fulfilled by completion of [HSP 490\(3\)](#) and [499\(6\)](#).
6. Seven additional hours of advisor approved upper division electives to bring total upper division hours in degree to 40.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Accelerated graduate program in Professional Studies

Eligible Missouri State undergraduate students may apply for admission to the Master of Professional Studies program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/professionalstudies.htm\)](https://graduate.missouristate.edu/Catalog/professionalstudies.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(/Registrar/mixedcredit.htm\)](https://Registrar/mixedcredit.htm) for additional information and procedures for obtaining permission for Mixed Credit.

Food and Beverage Operations Certificate

Food and Beverage Operations

This certificate provides an educational experience in the food and beverage discipline. Students will receive concentrated instruction on a number of pertinent aspects pertaining to the food and beverage industry.

Program requirements (14 hours)

1. [HSP 210\(2\)](#), [218\(3\)](#), [321\(3\)](#), [426\(3\)](#).
2. One course from: [HSP 330\(3\)](#), [409\(3\)](#), [435\(3\)](#).
3. All candidates must satisfy the [General University Certificate Requirements](#).

Completion requirement

Attain a grade of C or better in all courses used to fulfill the certificate requirements.

General information

Math placement

An appropriate placement is required prior to taking any of the entry level mathematics courses beyond MTH 101 as noted in the course prerequisite. Students can use their ACT or SAT math sub score or the results from the Department of Mathematics Placement Test to determine their appropriate math placement level. In the event that the placement determined by the ACT or SAT sub score and the departmental test are different, the student may choose either one after consulting with an advisor. Learn more: [Math Placement \(/GeneralEducation/math_placement.htm\)](http://GeneralEducation/math_placement.htm).

Pre-engineering preparation

Missouri State University offers a cooperative engineering program in conjunction with Missouri University of Science and Technology in Rolla, Missouri. The Departments of Mathematics and Physics, Astronomy and Materials Science jointly offer a two-year plan to meet the needs of these students, who must transfer later to complete a four-year degree in engineering. Contact either department for details.

Actuarial Science

Students may pursue a career as an actuary by choosing a major and minor in related areas and selecting appropriate electives. Students interested in Actuarial Science typically major in Mathematics/Actuarial Mathematics option and minor in either Enterprise Risk Management or Insurance. Students should contact the Department of Mathematics to declare their major and the College of Business Advisement Center to declare their minor.

Undergraduate Catalog

Mathematics Courses

Mathematics (MTH) courses

MTH 101 Intermediate Algebra A

This course is recommended for students who have not mastered algebra concepts needed for college algebra. Topics will include linear and quadratic equations, absolute value equations and inequalities, linear and nonlinear inequalities, properties of exponents, rectangular coordinate systems, lines, circles, parabolas, systems of equations, polynomials and rational expressions, and functions. Cannot receive credit toward graduation for both MTH 101 and MTH 103. Cannot count toward a mathematics major or minor. A grade of "C" or better is required in this course in order to take MTH 130, MTH 135, or MTH 138. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	2	Fall, Spring

MTH 103 Intermediate Algebra

Prerequisite: [appropriate placement score \(https://www.missouristate.edu/GeneralEducation/math_placement.htm\)](https://www.missouristate.edu/GeneralEducation/math_placement.htm).

This course is recommended for students who have not mastered algebra concepts needed for college algebra. Topics will include linear and quadratic equations, absolute value equations and inequalities, linear and nonlinear inequalities, properties of exponents, rectangular coordinate systems, lines, circles, parabolas, systems of equations, polynomials and rational expressions, and functions. Cannot receive credit toward graduation for both the MTH 101-102 sequence and MTH 103. Cannot count toward a mathematics major or minor. A grade of "C" or better is required in this course in order to take MTH 130, MTH 135, or MTH 138. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 107 Contemporary Mathematics Corequisite

Prerequisite: concurrent enrollment in MTH 130.

The primary objective of the corequisite course is to support student success in MTH 130. Strategies for success and mathematical skills will be emphasized to reinforce the content of MTH 130. Lab activities will solidify understanding of problem solving, geometry, probability, statistics, and personal finance. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring, Summer

MTH 121 Multicultural Views of History and Mathematics

This course explores the impact of major historical events, the mores of various societies, and basic human nature on the development of mathematical knowledge. Parallels will be drawn to events in today's world to determine how each individual can foster the global advancement of knowledge. The level of mathematical and historical knowledge expected on incoming students does not exceed the level of traditional high school courses.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 130 Contemporary Mathematics

Prerequisite: "C" grade or better in MTH 101 or MTH 103, or approved score on a departmental placement test; Corequisite: Students who do not meet the prerequisite yet have a Math ACT of 19, 20 or 21 (SAT 450 to 509), or a D grade in MTH 101 or MTH 103, or an approved score on the departmental placement exam may enroll in MTH 130 concurrently with MTH 107.

General Education Course (Focus on Quantitative Literacy).

This is a problem solving and applications of mathematics course. Topics to be studied will include, but not limited to: the art of problem solving, geometry, probability, statistics, and mathematics of finance. Cannot count toward a mathematics major or minor. Cannot be taken Pass/Not Pass. MTH 130 does not meet the prerequisite for MTH 135.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	MATH 120 - Mathematical Reasoning and Modeling.

[Access the CORE 42 portal](#)

MTH 134 Algebraic Reasoning and Modeling

Prerequisite: Suitable score on the mathematics placement exam or a grade of C or better in MTH 101 or MTH 103.

General Education Course (Focus on Quantitative Literacy).

This course focuses on developing and applying concepts of algebra and statistics to real world data and problems. Reasoning skills will be developed as students analyze data sets with descriptive statistics and by creating and analyzing algebraic models to describe the data. The algebraic functions that will be used in modeling include linear, power, exponential and logarithmic. Technology options will be utilized in the analysis of data. Cannot count toward the mathematics major or minor. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring, Summer	MATH 120 - Mathematical Reasoning and Modeling.

[Access the CORE 42 portal](#)

MTH 136 Precalculus 1

Prerequisite: Suitable placement score on the mathematics placement exam or a grade of "C" or better in MTH 101 or 103.

General Education Course (Focus on Quantitative Literacy).

This course is part one of a two course sequence with emphasis on the analytic, graphical, and numerical representations of functions. The focus of the course is on the library of algebraic functions (polynomial, rational, exponential, and logarithmic functions) along with higher algebraic reasoning in preparation for the study of Calculus (MTH 261). Grade of "C" or better required to enroll in MTH 137 or MTH 287. Cannot receive credit for both MTH 136 and MTH 138, or for both MTH 135 and MTH 136. Cannot count toward the mathematics major or minor. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring, Summer	MATH 130 - Pre-Calculus Algebra.

[Access the CORE 42 portal](#)

MTH 137 Precalculus 2

Prerequisite: "C" grade or better in MTH 136 or suitable score on the Mathematics placement exam.

General Education Course (Focus on quantitative Literacy).

This course is part two of a two course sequence with emphasis on the analytic, graphical, and numerical representations of functions. The focus of the course is on the library of trigonometric functions along with higher algebraic and geometric reasoning in preparation for the study of Calculus (MTH 261). Grade of "C" or better required to enroll in MTH 261. Cannot receive credit for both MTH 137 and MTH 138. Cannot count toward the mathematics major or minor. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring, Summer

MTH 138 Pre-Calculus Mathematics

Prerequisite: "C" grade or better in MTH 101 or MTH 103 (Recommended: "B" grade or better in MTH 101 or MTH 103), or appropriate score on the mathematics placement exam.

General Education Course (Focus on Quantitative Literacy).

The course has emphasis on the analytic, graphical, and numerical representations of functions. The focus is on the library of algebraic functions (polynomial, rational, exponential, and logarithmic functions), the library of trigonometric functions, and a high level of algebraic and geometric reasoning in preparation for the study of Calculus (MTH 261). A grade of "C" or better required to enroll in MTH 261 or MTH 287. Cannot receive credit for both MTH 136 and MTH 138 or for both MTH 137 and MTH 138. Cannot count toward the mathematics major or minor. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
5	5	0	Fall, Spring	MATH 150 - Pre-Calculus.

[Access the CORE 42 portal](#)

MTH 261 Analytic Geometry and Calculus I

Prerequisite: "C" grade or better in MTH 137 or MTH 138 or appropriate placement score.

General Education Course (Focus on Quantitative Literacy).

Analytic geometry of the plane, limits, continuity, differentiation with applications, introductory integration with applications. A grade of "C" or better is required in this course in order to take MTH 280 or 288. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	5	0	Fall, Spring

MTH 280 Analytic Geometry and Calculus II

Prerequisite: "C" or better in MTH 261.

Applications of integration, integration techniques, indeterminate forms, improper integrals, sequences, series, conic sections, parametrization, polar coordinates. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	5	0	Fall, Spring

MTH 287 Computational Calculus with Analytic Geometry I

Prerequisite: "C" or better in MTH 136 or MTH 138, or an approved score on a department placement test.

General Education Course (Focus on Quantitative Literacy).

Introduction to the concepts and methods of analytic geometry and differential and integral calculus with emphasis on applications in the natural sciences and technology. Cannot receive credit toward graduation for both MTH 287 and MTH 261. A grade of "C" or better is required in this course in order to take MTH 288. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MTH 288 Computational Calculus II

Prerequisite: "C" grade or better in MTH 261 or MTH 287.

Continuation of MTH 287. Cannot receive credit toward graduation for both MTH 288 and MTH 280. Cannot be taken Pass/Not Pass.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MTH 299 Introductory Topics in Mathematics

Variable content course with topics that can change from semester to semester. Topics will be identified by title in the schedule of classes. The course may be repeated if a different topic is offered. Cannot count toward a mathematics major or minor or General Education requirement.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

MTH 300 Service Learning in Mathematics

Prerequisite: 30 hours and concurrent registration in a Mathematics course designated as a service learning offering.

This service component for an existing course incorporates community service with classroom instruction in mathematics to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

MTH 302 Multivariate Calculus

Prerequisite: MTH 280.

Vector algebra and calculus, solid analytic geometry, partial differentiation, multiple integration, vector fields.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 303 Differential Equations

Prerequisite: MTH 280.

Ordinary differential equations; their solutions and applications. Introduction to operators and the Laplace transformation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 314 Discrete Mathematics

Prerequisite: MTH 137 or MTH 138 or approved calculus course or appropriate placement score.

Topics include: logic, mathematical reasoning, basic counting, discrete probability, matrices, recursion, sets and relations, graphs and trees.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 315 Algebraic Structures

Prerequisite: MTH 261.

Sets, logic, quantifiers, functions, relations, matrices, elementary number theory, induction, recursion, combinatorics, with emphasis on reading and writing proofs and the development of mathematical maturity.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 320 Foundations of Mathematics for Teachers

Prerequisite: completion of General Education mathematics requirement with grade of "C" or better; MTH 130 recommended.

This course centers around the structure and properties of the real number system and its subsets. Numeration systems, patterns of numbers, models and algorithms for operations, number theory, probability, and statistics will be studied. Problem solving and communication are continuing themes of this course. Manipulatives (including Base-10 Blocks, Cuisenaire Rods, Number Cubes, and Colored Counters), calculators, and computer software (including a statistical package, spreadsheet and word processor) are used extensively as tools to develop mathematical concepts. Cannot be used as a mathematics elective for the mathematics major or minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

MTH 333 Linear Algebra

Prerequisite: MTH 280.

Systems of linear equations, matrices and matrix algebra, determinants, vector spaces, linear independence, inner product spaces, linear transformations, eigenvectors, diagonalization, various applications and computational aspects.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 340 Statistical Methods

Prerequisite: completion of General Education mathematics requirement or appropriate placement score.

Statistics, elementary probability, estimation and tests of simple hypotheses involving both large and small sample methods, linear correlation. Cannot count toward mathematics major or minor. Cannot receive credit toward a degree for more than one of the following courses: AGR 330, IPE 381, MTH 340, PSY 200, QBA 237, REC 328, SOC 302.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 343 Foundations of Probability and Statistics for Teachers

Prerequisite: "C" or better in MTH 261 or "C" or better in MTH 320.

This course includes the collection, display, analysis, and misuse of data. The course is designed to provide preservice teachers with the content and pedagogical tools to effectively teach statistics in a middle school/high school setting. Topics include graphical representations and measures of analysis of univariate data (e.g., mean, MAD, standard deviation, five-number summary) and bivariate data (e.g., two-way tables, independence, correlation, regression). Counting techniques, including permutations and combinations, and elementary probability will also be covered. An informal introduction to inferential statistics topics (e.g. sampling distributions, confidence intervals, and tests of significance) will also be discussed. Problem-solving and communication skills are continuing themes. This is an activity-based course with extensive use of

manipulatives, models, and technology (e.g. GeoGebra and CODAP) that have application within middle/secondary mathematics classrooms.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

MTH 345 Statistics for Scientists and Engineers

Prerequisite: MTH 280 or MTH 288.

Topics include events, probability, random variables, discrete and continuous density functions, expectations, sampling distributions, central limit theorem, estimation, confidence intervals, tests or hypotheses. Computer statistical packages will be used for simulation study and data analysis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 360 Foundations of Geometry for Teachers

Prerequisite: "C" or better in MTH 320.

This course includes the study of synthetic, analytic, vector and transformational geometries through properties of geometric figures, measurement, construction, conjecture and proof, and tessellations. Problem solving and communication are continuing themes of this course. Manipulatives (including MIRA, Geoboard, Tangrams, Attribute Blocks and compass), calculators, and computer software (including Logo, Geometer's Sketchpad and a word processor) are used extensively as tools to develop geometric concepts. Cannot be used as a mathematics elective for the mathematics major or minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall, Spring

MTH 377 Mathematical Processes

Prerequisite: MTH 135 or MTH 138; and MTH 340 or MTH 343.

This course examines both finite and infinite mathematical processes used when solving problems involving discrete or continuous data. As an activity-base and laboratory-centered course, these processes are to be explored in the context of real-world applications. Communication of mathematical concepts and solutions to problems using technology, as well as paper and pencil procedures, is a continuing theme. This course is for the middle school education major who chooses mathematics as an area of subject matter concentration and elementary education majors with an emphasis area in mathematics. The course connects experiences from the

concepts of numbers, algebra, geometry, and data analysis to those of the calculus. This course cannot be used as a mathematics elective for the mathematics major or minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

MTH 409 Teaching and Learning of Mathematics I

Prerequisite: SEC 302 and 15 hours of college mathematics, and admission to the Teacher Education Program.

Develops foundation for reflective decision-making when teaching algebra to emphasize problem solving, communication, reasoning and proof, connections, and representations. The incorporation of appropriate classroom technology will be stressed. Credited only on the BSEd (Middle School/Secondary). A grade of "C" or better is required in this course in order to take MTH 493. Cannot be taken Pass/Not Pass. Cannot count toward the major GPA.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

MTH 410 Teaching and Learning of Mathematics II, with Practicum

Prerequisite: MTH 409, and admission to the Teacher Education Program.

Focus on developing the reflective decisionmaker's appropriate use of current technologies, classroom management techniques and assessment processes in teaching geometry. Some attention devoted to advanced algebra, trigonometry, discrete mathematics and calculus topics. All students will complete a field experience in a mathematics classroom. Credited only on the BSEd (Secondary). A grade of "C" or better is required in this course in order to take MTH 493. Cannot be taken Pass/Not Pass. Cannot count toward the major GPA.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

MTH 411 Teaching and Learning of Mathematics III

Prerequisite: MTH 409; and admission to the Teacher Education Program; and concurrent enrollment in MTH 410 is required.

Focus will be on knowledge of students and the learning environment, designing instruction for student learning, and implementing and analyzing instruction to promote student learning. Credited only on the BSEd (secondary). A grade of "C" or better is required in this course to take MTH 493. Cannot be taken Pass/Not Pass. Will not count toward the major GPA.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

MTH 421 Numerical Analysis I

Prerequisite: MTH 280.

Recommended Prerequisite: CSC 125 or CSC 130. Solution of systems of linear and nonlinear equations, interpolation, integration, approximation, matrix computations. Problem solution will include the use of software. Identical with CSC 421. Cannot receive credit for both MTH 421 and CSC 421.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 422 Numerical Analysis II

Prerequisite: MTH 303 and MTH 421.

Solution of initial and boundary value problems in ordinary and partial differential equations, simulation, and optimization. Problem solution will include the use of software. Identical with CSC 422. Cannot receive credit for both MTH 422 and CSC 422.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 450 Theory of Interest

Prerequisite: MTH 280.

A thorough treatment of the mathematical theory of interest with some discussion of economic aspects such as inflation, risk and uncertainty, and yield curves. Topics include: Annuities, yield rates, amortization, bonds, and sinking funds.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MTH 460 College Geometry

Prerequisite: MTH 315.

This course examines concepts not usually included in a high school plane geometry course: axiomatic structure, finite geometries; Euclidean geometry axioms, historical development and relationships between various geometries, transformations in two and three dimensions, groups of transformations, convexity, linear programming, geometry of polygons and circles, the nine-point circle, constructions, and an introduction to non-Euclidean geometry. These topics will be developed within a problem solving context and will emphasize construction and communication of mathematical ideas including argument and proof. A dynamic geometry software package, such as Geometer's Sketchpad, will be used as a tool to develop geometric concepts.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 478 Mathematical Modeling for Teachers

Prerequisite: MTH 343 or MTH 360 or concurrent enrollment.

Recommended Prerequisite: 15 hours of elementary or middle school mathematics. This course will focus on topics in upper elementary and middle school mathematics. This includes, within the context of problem solving: algebraic reasoning, proportional reasoning, integer operations, decimal operations, transformational geometry, and coordinate geometry. The course will also focus on integrating mathematical practices and process standards developed by professional organizations in mathematics education. The use of technological tools and manipulatives are embedded in the development of strategies for modeling mathematics. The course also includes school-based experiences for practical implementation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Spring

MTH 479 Mathematical Tools and Structures

Prerequisite: MTH 343 or MTH 360.

Recommended Prerequisite: 15 hours of elementary or middle school mathematics. This course is designed to coordinate, connect and extend the mathematical experiences of the student who is preparing to teach mathematics in the middle school. Specific course content will include all of the following: an in-depth overview of problem solving and the nature of proof in mathematics and the mathematics classroom; history of the development of mathematics; a variety of mathematical topics such as algebraic structures, discrete mathematics, fractals and chaos, etc.; examination and exploration of mathematical topics that are appropriate and necessary for middle school students to ensure their efficient transition into secondary mathematics. A constant awareness of the use and impact of technology upon the mathematician and the mathematics classroom is explored and integrated throughout the course. The course experience is culminated in the final project, which will be an original, independent investigating of some relevant mathematical topic of interest to the student. This course cannot be used as a mathematics elective for the mathematics major or minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

MTH 492 Seminar in Supervised Teaching (Secondary Mathematics)

Prerequisite: MTH 409 and MTH 410 and MTH 411; and a grade of "C" or better in all professional education courses; current pre-professional liability insurance; and approval for supervised teaching; and concurrent enrollment in MTH 494.

Focus will be on discussion, reflection, and analysis of field experiences during supervised teaching as well as discussion of Missouri Pre-service Teacher Assessment (MoPTA) to be completed while student teaching. Cannot be taken Pass/Not Pass. Course will not count toward the major GPA. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall, Spring

MTH 493 Supervised Teaching (Secondary Mathematics)

Prerequisite: MTH 409 and MTH 410 and MTH 411; and a grade of "C" or better in all professional education courses; current pre-professional liability insurance; and approval for supervised teaching; and concurrent enrollment in MTH 494.

The student observes, then teaches mathematics classes under the direction of the cooperating teacher and the university supervisor. The student also participates in professional activities of a teacher, attends all required university meetings, and completes all required university assignments. Course will not count toward the major GPA. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5-6			Fall, Spring

MTH 494 Supervised Teaching (Secondary Mathematics)

Prerequisite: concurrent enrollment in MTH 492.

The student observes, then teaches mathematics classes under the direction of the cooperating teacher and the university supervisor. The student also participates in professional activities of a teacher, attends all required university meetings, and completes all required university assignments. The student will complete the Missouri Pre-Service Teacher Assessment while student teaching. Cannot be taken Pass/Not Pass. Course will not count toward the major GPA. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
10			Fall, Spring

MTH 496 Clinical Experiences in Teaching II

Prerequisite: EDC 199; and admitted to Teacher Education Program; and grades of "C" or better in all professional education courses; and completion of portfolio checkpoints 1 and 2; and current pre-professional liability insurance; and program approval.

This course is designed to meet HB 1711 for student's experience as a Teacher's Aide or Assistant Rule (Rule 5 CSR 80-805.040), to that of conventional student teachers within the same program. It is also designed to support completion of additional clinical requirements within that program including: seminars and workshops, required meetings, school related activities appropriate to the assignment, demonstrated mastery of the MoSPE standards and completion and overall assessment of a Professional Preparation Portfolio. This course is credited only on BSEd or appropriate masters-level certification programs. Can only receive credit for one of the following: AGE 499, AGT 499, ART 469, COM 493, ECE 499, ELE 499, ENG 434, FCS 498, HST 499, KIN 498, MCL 491, MID 499, MTH 496, MUS 499, SCI 499, SEC 499, SPE 499, THE 493.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4			Fall, Spring

MTH 497 Topics

Prerequisite: 90 hours.

Recommended Prerequisite: completion of or concurrent enrollment in all mathematics courses required for the mathematics major. A written paper on a mathematical topic will be required. The student will be exposed to elementary research topics and to professional opportunities including graduate programs, employment by business, industry and government, and teaching options. Each student will be required to take the mathematics major assessment exam. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

MTH 503 Advanced Calculus I

Prerequisite: MTH 280 and MTH 315.

Concepts of limit, continuity, differentiation, Riemann integration, sequences and series, other related topics. May be taught concurrently with MTH 603. Cannot receive credit for both MTH 603 and MTH 503. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 504 Advanced Calculus II

Prerequisite: MTH 302 and MTH 503.

This is a continuation of MTH 503, including sequences and series of functions, uniform convergence, multivariate calculus, and other selected topics. May be taught concurrently with MTH 604. Cannot receive credit for both MTH 604 and MTH 504.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 506 Theory of Functions of a Complex Variable

Prerequisite: MTH 280 and MTH 315.

Theory of elementary functions-polynomial, trigonometric, exponential, hyperbolic, logarithmic-of a complex variable; their derivatives, integrals; power series; other selected topics. May be taught concurrently with MTH 605. Cannot receive credit for both MTH 605 and MTH 506.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 507 Introduction to Partial Differential Equations

Prerequisite: MTH 302 and MTH 303 and MTH 315.

Introduction to linear first and second order partial differential equations, including some formal methods of finding general solutions; the Cauchy problem for such equations, existence theorems, formal methods of finding the solution, and the role of characteristics; the classical boundary and initial value problems for the wave equation, heat equation and the boundary value problems for Laplace's equation. May be taught concurrently with MTH 607. Cannot receive credit for both MTH 607 and MTH 507.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 510 High School Mathematics from an Advanced Perspective

Prerequisite: permission of instructor.

The focus of the course will be on relating what the mathematics students have learned in upper-level courses to what they will be teaching when they are in the high school classroom. The students' ability to reason and problem-solve mathematically and to model real-world problems in a mathematical context will be developed so they will be able to pass these abilities on to their own students. If there is a sufficient demand, an online component may be offered. Credited only on the BSEd (secondary). Cannot be taken Pass/Not Pass. May be taught concurrently with MTH 611. Cannot receive credit for both MTH 510 and MTH 611.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MTH 532 Introduction to Abstract Algebra

Prerequisite: MTH 302 and MTH 315.

It is recommended that students not take MTH 532 before taking MTH 333. Theory of groups, rings, integral domains, fields, polynomials. May be taught concurrently with MTH 631. Cannot receive credit for both MTH 631 and MTH 532. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MTH 534 Advanced Linear Algebra

Prerequisite: MTH 315 and MTH 333.

Topics may include eigenvalue problems; Jordan normal form, linear functionals, bilinear forms, quadratic forms, orthogonal and unitary transformations, Markov processes, and other topics selected by the instructor. May be taught concurrently with MTH 634. Cannot receive credit for both MTH 634 and MTH 534.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 536 Theory of Numbers

Prerequisite: MTH 302 and MTH 315.

Factorization, Euler totient function, congruences, primitive roots, quadratic residues and reciprocity law. May be taught concurrently with MTH 636. Cannot receive credit for both MTH 636 and MTH 536.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 537 Applied Abstract Algebra

Prerequisite: MTH 333 or MTH 532.

Topics typically include finite fields, block designs, error-correcting codes (nonlinear, linear, cyclic, BCH, and Reed-Solomon codes), cryptography, and computer implementation of these applications. May be taught concurrently with MTH 637. Cannot receive credit for both MTH 637 and MTH 537.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 540 Statistical Theory I

Prerequisite: MTH 302.

Random variables, discrete and continuous probability functions, expectation, moment-generating functions, transformation of variables. May be taught concurrently with MTH 640. Cannot receive credit for both MTH 640 and MTH 540. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MTH 541 Statistical Theory II

Prerequisite: MTH 540 or equivalent.

Estimation, complete and sufficient statistics, maximum likelihood estimation, hypothesis testing, nonparametric statistics. May be taught concurrently with MTH 643. Cannot receive credit for both MTH 643 and MTH 541.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MTH 543 Stochastic Modeling

Prerequisite: MTH 540.

This course will study applications of probability and statistics from a modeling point of view. Topics include generating functions, branching processes, discrete time Markov chains, classification of states, estimation of transition probabilities, continuous time Markov Chains, Poisson processes, birth and death processes, renewal theory, queuing systems, Brownian motion, and stationary processes. Computer statistical packages will be used. May be taught concurrently with MTH 653. Cannot receive credit for both MTH 653 and MTH 543.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MTH 545 Applied Statistics

Prerequisite: 60 hours and completion of General Education Mathematics Requirement.

A course on statistical concepts, methods and data analysis with emphasis on assumptions and effects on violating those assumptions. Computer statistical packages will be used. Topics include statistical models, random sampling, normal distribution, estimation, confidence intervals, tests and inferences in single and two populations, and n-way analysis of variance. May be taught concurrently with MTH 645. Cannot receive credit for both MTH 645 and MTH 545.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MTH 546 Analysis of Variance and Design of Experiments

Prerequisite: MTH 345 or MTH 541 or MTH 545.

Topics include analysis of variance, estimation of variance components, randomized incomplete blocks, Latin squares, factorial nested, split-plot designs, fixed, random and mixed models. May be taught concurrently with MTH 646. Cannot receive credit for both MTH 646 and MTH 546.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 547 Applied Regression Analysis

Prerequisite: MTH 345 or MTH 541 or MTH 545.

Topics include fitting a straight line, matrix models, residuals, selecting best equation, multiple regression, and nonlinear estimation. May be taught concurrently with MTH 647. Cannot receive credit for both MTH 647 and MTH 547.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 548 Applied Time Series Analysis

Prerequisite: MTH 540; and MTH 345 or MTH 541 or MTH 545.

This course will study the analysis of data observed at different points of time. Topics include stationary and non-stationary time series models, linear time series models, autoregressive models, autocorrelations, partial autocorrelations, moving average models, ARMA models, ARIMA models, forecasting, prediction limits, model specification, least square estimation, and seasonal time series models. Computer statistical packages will be used. May be taught concurrently with MTH 648. Cannot receive credit for both MTH 648 and MTH 548.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MTH 567 Introduction to Non-Euclidean Geometry

Prerequisite: MTH 302 and MTH 315.

Development of non-Euclidean geometries; intensive study of hyperbolic geometry. May be taught concurrently with MTH 667. Cannot receive credit for both MTH 667 and MTH 567.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MTH 570 Combinatorial Analysis

Prerequisite: MTH 280 and MTH 315.

An introduction to combinatorial analysis including enumeration methods, combinatorial identities with applications to the calculus of finite differences and difference equations. May be taught concurrently with MTH 670. Cannot receive credit for both MTH 670 and MTH 570.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 575 History of Mathematics

Prerequisite: MTH 302 and MTH 315.

Development of mathematics through the calculus; solution of problems of historical interest, problems which use historically significant techniques; problems whose solutions illuminate significant mathematical characteristics of elementary mathematics. May be taught concurrently with MTH 675. Cannot receive credit for both MTH 675 and MTH 575.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 580 Applied Mathematics

Prerequisite: MTH 303 and MTH 333.

An introduction to several areas of applied mathematics including control theory, optimization, modeling of population dynamics, modeling of mathematical economics, minimax and game theory, and calculus of variations. May be taught concurrently with MTH 680. Cannot receive credit for both MTH 680 and MTH 580.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 582 Introductory Topology

Prerequisite: MTH 302 and MTH 315.

Properties of abstract metric and topological spaces; discussion of concepts of compactness and connectedness. May be taught concurrently with MTH 682. Cannot receive credit for both MTH 682 and MTH 582.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 596 Readings

Prerequisite: permission of department head.

Periodic conferences with an advisor are required. May be repeated to a total of 6 hours. May be taught concurrently with MTH 696. Cannot receive credit for both MTH 696 and MTH 596.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

MTH 603 Advanced Calculus I

Prerequisite: MTH 280 and MTH 315.

Concepts of limit, continuity, differentiation, Riemann integration, sequences and series, other related topics. May be taught concurrently with MTH 503. Cannot receive credit for both MTH 503 and MTH 603.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 604 Advanced Calculus II

Prerequisite: MTH 302; and MTH 503 or MTH 603.

This is a continuation of MTH 603, including sequences and series of functions, uniform convergence, multivariate calculus, and other selected topics. May be taught concurrently with MTH 504. Cannot receive credit for both MTH 504 and MTH 604.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 605 Theory of Functions of a Complex Variable

Prerequisite: MTH 280 and MTH 315.

Theory of elementary functions-polynomial, trigonometric, exponential, hyperbolic, logarithmic-of a complex variable; their derivatives, integrals; power series; other selected topics. May be taught concurrently with MTH 506. Cannot receive credit for both MTH 506 and MTH 605.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 607 Introduction to Partial Differential Equations

Prerequisite: MTH 302 and MTH 303 and MTH 315.

Introduction to linear first and second order partial differential equations, including some formal methods of finding general solutions; the Cauchy problem for such equations, existence theorems, formal methods of finding the solution, and the role of characteristics; the classical boundary and initial value problems for the wave equation, heat equation and the boundary value problems for Laplace's equation. May be taught concurrently with MTH 507. Cannot receive credit for both MTH 507 and MTH 607.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 611 High School Mathematics from an Advanced Perspective

Prerequisite: permission of instructor.

The focus of the course will be on relating what the mathematics students have learned in upper-level courses to what they will be teaching when they are in the high school classroom. The students' ability to reason and problem-solve mathematically and to model real-world problems in a mathematical context will be developed so they will be able to pass these abilities on to their own students. If there is a sufficient demand, an online component may be offered. May be taught concurrently with MTH 510. Cannot receive credit for both MTH 611 and MTH 510.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MTH 631 Introduction to Abstract Algebra

Prerequisite: MTH 302 and MTH 315.

Theory of groups, rings, integral domains, fields, polynomials. May be taught concurrently with MTH 532. Cannot receive credit for both MTH 532 and MTH 631.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MTH 634 Linear Algebra II

Prerequisite: MTH 333.

Topics include eigenvalue problems; Jordan normal form, linear functionals, bilinear forms, quadratic forms, orthogonal and unitary transformations, Markov processes, and other topics selected by the instructor. May be taught concurrently with MTH 534. Cannot receive credit for both MTH 534 and MTH 634.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 636 Theory of Numbers

Prerequisite: MTH 302 and MTH 315.

Factorization, Euler totient function, congruences, primitive roots, quadratic residues and reciprocity law. May be taught concurrently with MTH 536. Cannot receive credit for both MTH 536 and MTH 636.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 637 Applied Abstract Algebra

Prerequisite: MTH 333 or MTH 532 or MTH 632.

Topics typically include finite fields, block designs, error-correcting codes (nonlinear, linear, cyclic, BCH, and Reed-Solomon codes), cryptography, and computer implementation of these applications. May be taught concurrently with MTH 537. Cannot receive credit for both MTH 537 and MTH 637.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 640 Statistical Theory I

Prerequisite: MTH 302.

Random variables, discrete and continuous probability functions, expectation, moment-generating functions, transformation of variables. May be taught concurrently with MTH 540. Cannot receive credit for both MTH 540 and MTH 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MTH 643 Statistical Theory II

Prerequisite: MTH 540 or MTH 640 or equivalent.

Estimation, complete and sufficient statistics, maximum likelihood estimation, hypothesis testing, nonparametric statistics. May be taught concurrently with MTH 541. Cannot receive credit for both MTH 541 and MTH 643.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MTH 645 Applied Statistics

A course on statistical concepts, methods and data analysis with emphasis on assumptions and effects on violating those assumptions. Computer statistical packages will be used. Topics include statistical models, random sampling, normal distribution, estimation, confidence intervals, tests and inferences in single and two populations, and n-way analysis of variance. May be taught concurrently with MTH 545. Cannot receive credit for both MTH 545 and MTH 645.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MTH 646 Analysis of Variance and Design of Experiments

Prerequisite: MTH 345 or MTH 541 or MTH 643 or MTH 545 or MTH 645.

Topics include analysis of variance, estimation of variance components, randomized incomplete blocks, Latin squares, factorial nested, split-plot designs, fixed, random and mixed models. May be taught concurrently with MTH 546. Cannot receive credit for both MTH 546 and MTH 646.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 647 Applied Regression Analysis

Prerequisite: MTH 345 or MTH 541 or MTH 643 or MTH 545 or MTH 645.

Topics include fitting a straight line, matrix models, residuals, selecting best equation, multiple regression, and nonlinear estimation. May be taught concurrently with MTH 547. Cannot receive credit for both MTH 547 and MTH 647.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 648 Applied Time Series Analysis

Prerequisite: MTH 540 or MTH 640; and MTH 345 or MTH 541 or MTH 643 or MTH 545 or MTH 645.

This course will study the analysis of data observed at different points of time. Topics include stationary and non-stationary time series models, linear time series models, autoregressive models, autocorrelations, partial autocorrelations, moving average models, ARMA models, ARIMA models, forecasting, prediction limits, model specification, least square estimation, and seasonal time series models. Computer statistical packages will be used. May be taught concurrently with MTH 548. Cannot receive credit for both MTH 548 and MTH 648.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MTH 653 Stochastic Modeling

Prerequisite: MTH 540 or MTH 640.

This course will study applications of probability and statistics from a modeling point of view. Topics include generating functions, branching processes, discrete time Markov chains, classification of states, estimation of transition probabilities, continuous time Markov Chains, Poisson processes, birth and death processes, renewal theory, queuing systems, Brownian motion, and stationary processes. Computer statistical packages will be used. May be taught concurrently with MTH 543. Cannot receive credit for both MTH 543 and MTH 653.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MTH 667 Introduction to Non-Euclidean Geometry

Prerequisite: MTH 302 and MTH 315.

Development of non-Euclidean geometries; intensive study of hyperbolic geometry. May be taught concurrently with MTH 567. Cannot receive credit for both MTH 567 and MTH 667.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MTH 670 Combinatorial Analysis

Prerequisite: MTH 280 and MTH 315.

An introduction to combinatorial analysis including enumeration methods, combinatorial identities with applications to the calculus of finite differences and difference equations. May be taught concurrently with MTH

570. Cannot receive credit for both MTH 570 and MTH 670.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 675 History of Mathematics

Prerequisite: MTH 302 and MTH 315.

Development of mathematics through the calculus; solution of problems of historical interest, problems which use historically significant techniques; problems whose solutions illuminate significant mathematical characteristics of elementary mathematics. May be taught concurrently with MTH 575. Cannot receive credit for both MTH 575 and MTH 675.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 680 Applied Mathematics

Prerequisite: MTH 303 and MTH 333.

An introduction to several areas of applied mathematics including control theory, optimization, modeling of population dynamics, modeling of mathematical economics, minimax and game theory, and calculus of variations. May be taught concurrently with MTH 580. Cannot receive credit for both MTH 580 and MTH 680.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 682 Introductory Topology

Prerequisite: MTH 302 and MTH 315.

Properties of abstract metric and topological spaces; discussion of concepts of compactness and connectedness. May be taught concurrently with MTH 582. Cannot receive credit for both MTH 582 and MTH 682.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 696 Readings

Prerequisite: permission of department head.

Periodic conferences with an advisor are required. May be repeated to a total of 6 hours. May be taught concurrently with MTH 596. Cannot receive credit for both MTH 596 and MTH 696.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Fall, Spring

MTH 701 Real Analysis

Prerequisite: MTH 503 or MTH 603.

Topics include countable and uncountable sets, convergence, Lebesgue measure on the real line, the development of the Lebesgue integral, the fundamental theorem of calculus and L_p spaces.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 702 Real and Abstract Analysis

Prerequisite: MTH 701.

A study of the theory of abstract measures and integration, and an introduction to functional analysis.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 706 Complex Analysis

Prerequisite: MTH 503 or MTH 603.

Analytic functions, power series, Cauchy's theorem and its applications, residues. Selected topics from conformal mapping, analytic continuation, harmonic functions, Fourier series, and Dirichlet problems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 710 Contemporary Mathematics for Secondary Teachers

Prerequisite: MTH 460 and MTH 333.

Reports, research, and recent trends in secondary mathematics; recently developed programs in algebra and geometry.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 721 Theory of Ordinary Differential Equations I

Prerequisite: MTH 303; and MTH 503 or MTH 603.

Existence and uniqueness theorems for first order differential equations; system of linear and nonlinear differential equations; continuous dependence of solutions on initial conditions and parameters; behavior of solutions of equations with constant coefficients, study of Lyapunov's theorems on stability; introduction to boundary value problems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 722 Theory of Ordinary Differential Equations II

Prerequisite: MTH 721.

Theory and application of boundary value problems; periodic solutions; linear systems with periodic coefficients (Floquet theory); two dimensional (autonomous) systems limit cycles. Differential equations under Caratheodory conditions; theory of differential and integral inequalities and other selected topics, if time permits.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 730 Abstract Algebra I

Prerequisite: MTH 532 or MTH 631; and MTH 333.

Topics from group theory will include Cayley's Theorem, finite abelian groups, Cauchy's Theorem, the Sylow Theorems, and free groups.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 732 Abstract Algebra II

Prerequisite: MTH 730.

Topics from ring theory will include the Chinese Remainder Theorem, Euclidean domains, rings of fractions, PID's and UFD's, and polynomial rings. Topics from field theory will include splitting fields, Galois Theory, separability, normality, and finite fields.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 741 Statistical Inference I

Prerequisite: MTH 540 or MTH 640 or equivalent.

Formulation of statistical models, sufficiency and exponential families, methods of estimation, optimality theory. Uniformly minimum variance unbiased estimators, Fisher information, Cramer/Rao inequality, large sample theory, Bayes procedures and minimax procedures.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 742 Statistical Inference II

Prerequisite: MTH 741.

Confidence intervals and regions, hypothesis testing, the Neyman-Pearson framework, uniformly most powerful tests, likelihood ratio criteria, power functions, similar regions, invariant tests, distribution free tests.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 750 Number and Operations for Elementary Mathematics Specialists

Prerequisite: Two years teaching experience and permission of program coordinator; and concurrently enrollment in ELE 730.

This course is designed to develop an understanding of the learning and teaching of pre-number concepts, counting and cardinality, and numbers and operations in base ten. Emphasis will be given to how children think about and learn these concepts and how they fit into the elementary school curriculum. This course cannot be used within the MS Mathematics program or the MEd Secondary Education (Mathematics) program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 752 Rational Numbers and Proportional Thinking for Elementary Mathematics Specialists

Prerequisite: MTH 750 and permission of program coordinator; and concurrent enrollment in ELE 732.

This course is designed to develop an understanding of the learning and teaching of rational numbers and ratio and proportional relationships. Emphasis will be given to how children think about and learn these concepts and how they fit into the elementary school curriculum. This course cannot be used within the MS Mathematics program or the MEd Secondary Education (Mathematics) program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 754 Algebraic Reasoning for Elementary Mathematics Specialist

Prerequisite: two years teaching experience and permission of program coordinator; and concurrently enrollment in ELE 734.

This course will focus on the content and complexities of teaching and assessing algebraic reasoning in grade 1-6 settings. Course content will include examination of representation and analysis of mathematical situations and structures. Attention will be given to patterns, functions, and the transition from arithmetic to algebra. This course cannot be used within the MS Mathematics program or the MEd Secondary Education (Mathematics) program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 758 Data and Probability for Elementary Mathematics Specialist

Prerequisite: two years teaching experience and permission of program coordinator.

This course is designed to develop understanding of probabilistic reasoning and the collection, exploration, and analysis of data. Emphasis will be given to how children think and learn about these concepts and how they fit into the elementary school curriculum. This course cannot be used within the MS Mathematics program or the MEd Secondary Education (Mathematics) program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 760 Geometry and Measurement for Elementary Mathematics Specialist

Prerequisite: two years teaching experience and permission of program coordinator; and concurrently enrollment in ELE 738.

This course is designed to develop an understanding of the teaching and learning of geometry and measurement. Emphasis will be given to how children think about and learn these concepts and how they fit into an elementary curriculum. This course cannot be used within the MS Mathematics program or the MEd Secondary Education (Mathematics) program.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 781 Topology

Point set topology in abstract spaces.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 791 Seminar I

Seminar in Mathematics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 792 Seminar II

Seminar in Mathematics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

MTH 796 Science Internship

Completion of an internship project (at least 80 hours per credit hour) at a discipline-related business, nonprofit organization, or government agency, approved and supervised by both the departmental and internship advisors. Includes a formal report in the appropriate professional format, and an oral presentation at an approved venue. Graded Pass/Not Pass only. No more than 6 hours may count toward a masters degree. This course may only be counted toward the PSM designation of the MNAS degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

MTH 797 Topics

Prerequisite: permission of department head.

Material covered determined by the interests and backgrounds of the students. May be repeated for a maximum of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

MTH 798 Research

Supervised research in mathematics or mathematics education. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

MTH 799 Projects

Independent research for thesis preparation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring

Mathematics

Major(s)

Mathematics (Non-Comprehensive) (BA)

Bachelor of Arts

Major requirements (35-36 hours):

1. [MTH 261\(5\)](#), [280\(5\)](#), [302\(3\)](#), [315\(3\)](#), [333\(3\)](#), [497\(1\)](#), [503\(3\)](#), [532\(3\)](#), [540\(3\)](#).
2. One additional course from: [MTH 303\(3\)](#), [421\(3\)](#), [575\(3\)](#), or from mathematics courses numbered 400 or higher.
3. Course required from related area: [CSC 121\(3\)](#) or [125\(4\)](#) or [130\(3\)](#).
4. Public Affairs Capstone Experience will be fulfilled by completion of [MTH 497\(1\)](#), [503\(3\)](#), [532\(3\)](#), and [540\(3\)](#).
5. Minor required (or second major).
6. [Specific Bachelor of Arts Degree Requirements](#)

University level requirements:

1. [General Education Program and Requirements](#)
 2. [General Baccalaureate Degree Requirements](#)
-

Mathematics (Non-Comprehensive) (BS)

Bachelor of Science

Major requirements (52-53 hours):

Major core (40-41 hours):

1. [MTH 261](#)(5), [280](#)(5), [302](#)(3), [303](#)(3), [315](#)(3), [333](#)(3), [497](#)(1), [503](#)(3), [532](#)(3), [540](#)(3).
2. Courses required from related areas: [CSC 125](#)(4) or [130](#)(3); [PHY 203](#)(5). PHY 203 may partially fulfill the Natural World general education requirement.
3. Public Affairs Capstone Experience will be fulfilled by completion of [MTH 497](#)(1), [503](#)(3), [532](#)(3), and [540](#)(3).
4. Minor required (or second major).

Complete one of the following options:**Actuarial Mathematics option (12 hours):**

1. [MTH 450](#)(3), [541](#)(3).
2. Six hours from: [MTH 543](#)(3), [546](#)(3), [547](#)(3), [548](#)(3).
3. A minor in Insurance is recommended.

Applied Mathematics option (12 hours):

1. [MTH 421](#)(3), [580](#)(3).
2. Six hours from: [MTH 422](#)(3), [507](#)(3), [537](#)(3), [543](#)(3), [570](#)(3).

General Mathematics option (12 hours):

1. [MTH 421](#)(3) or [541](#)(3).
2. Nine additional hours from mathematics courses numbered 400 or higher.

Statistics option (12 hours):

1. [MTH 541](#)(3).
2. Nine hours from: [MTH 543](#)(3), [545](#)(3), [546](#)(3), [547](#)(3), [548](#)(3).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Mathematics (Comprehensive) (BS)

Bachelor of Science

Major requirements (61-62 hours):

1. [MTH 261](#)(5), [280](#)(5), [302](#)(3), [303](#)(3), [315](#)(3), [333](#)(3), [497](#)(1), [503](#)(3), [532](#)(3), [540](#)(3); [MTH 421](#)(3) or [541](#)(3).
2. 18 additional hours from mathematics courses numbered 400 or higher. The comprehensive major is individualized. Selection of courses for the additional 18 hours shall be made in conference with the advisor and is subject to approval by the department head. Students are encouraged to elect courses from other disciplines to enhance the comprehensive major.
3. Courses required from related areas: [CSC 125](#)(4) or [130](#)(3); [PHY 203](#)(5). PHY 203 may partially fulfill the natural world general education requirement.
4. Public Affairs Capstone Experience will be fulfilled by completion of [MTH 497](#)(1), [503](#)(3), [532](#)(3), and [540](#)(3).

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Minor(s)

Mathematics

Bachelor of Arts

Bachelor of Science

1. [MTH 261](#)(5), [280](#)(5); [314](#)(3) or [315](#)(3).
2. Additional mathematics courses numbered 300 or higher, other than MTH 314 or 315 (if used in number 1), to total at least 15 hours.

Mathematics

Bachelor of Science in Education (Non-Certifiable)

1. [MTH 261](#)(5), [280](#)(5), [315](#)(3), [575](#)(3).
2. One course from: [CSC 121](#)(3), [125](#)(4), [131](#)(4).
3. One course from: [MTH 460](#)(3), [567](#)(3).
4. Additional mathematics courses numbered 300 or above to total at least 24 hours.

Accelerated graduate program in Mathematics

Eligible Missouri State undergraduate students may apply for admission to the mathematics program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of nine hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-mathematics.htm) (<https://graduate.missouristate.edu/Catalog/prog-mathematics.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](#) ([Registrar/mixedcredit.htm](#)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Natural and Applied Science

Eligible Missouri State undergraduate students may apply for admission to the Master of Natural and Applied Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree

(Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm) (<https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](https://www.missouristate.edu/Registrar/mixedcredit.htm) ([/Registrar/mixedcredit.htm](https://www.missouristate.edu/Registrar/mixedcredit.htm)) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Secondary Education/Mathematics

Eligible Missouri State undergraduate students may apply for admission to the Secondary Education/Mathematics program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of nine hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-secondary-education-mathematics-emphasis.htm) (<https://graduate.missouristate.edu/Catalog/prog-secondary-education-mathematics-emphasis.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](https://www.missouristate.edu/Registrar/mixedcredit.htm) ([/Registrar/mixedcredit.htm](https://www.missouristate.edu/Registrar/mixedcredit.htm)) for additional information and procedures for obtaining permission for Mixed Credit.

Mathematics Education

Major(s)

Mathematics

Bachelor of Science in Education (Certifiable grades 9-12)

Major requirements (44-46 hours):

1. [MTH 261](#)(5), [280](#)(5), [302](#)(3), [315](#)(3), [333](#)(3), [343](#)(3), [460](#)(3), [532](#)(3), [545](#)(3), [575](#)(3).
2. One course from: [MTH 503](#)(3), [510](#)(3), [536](#)(3), [540](#)(3), [567](#)(3).
3. Courses required from related areas: [CSC 121](#)(3) or [125](#)(4) or [130](#)(3); [PHY 123](#)(4) or [203](#)(5). (PHY 123 or 203 may partially fulfill the Natural World general education requirement.)
4. Public Affairs Capstone Experience will be fulfilled by completion of MTH [492](#)(2) and [494](#)(10).

Professional Education requirements (41 hours):

Note: A grade of "C" or better in each course is required for state certification.

1. Teaching methods and supervised teaching (21 hours): [MTH 409](#)(3), [410](#)(3), [411](#)(3), [492](#)(2), [494](#)(10).
2. Additional [Professional Education Required Core and Competencies](#) (20 hours).
3. This program also requires compliance with the [Teacher Education Program](#) for eligibility to enroll in Professional Education courses; admission to and continuance in the Teacher Education Program; approval for supervised teaching; and recommendation for certification which includes following GPA requirements. All GPA requirements include both Missouri State and transfer grades.
 - a. at least a 2.75 GPA on all course work attempted at all colleges attended.
 - b. at least a 3.00 GPA in the certificate subject area (major field of study) which includes all courses listed under major requirements.
 - c. at least a 3.00 GPA in any additional certificate subject area.

- d. at least a 3.00 GPA in the professional education courses which includes all courses in number 1 and 2; and no grade lower than a "C" in all professional education courses.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

General Information

Pre-engineering preparation

The Department of Physics, Astronomy and Materials Science, the Department of Mathematics, and the collaborative Engineering Program Office share student advisement for all pre-engineering areas. Most students select a major in one of the two departments or continue on with the collaborative Engineering Program. Contact either department or the Engineering Program Office for more information.

Program requirements and restrictions

Mathematical preparation

The mathematical preparation (or lack thereof) in high school strongly governs the point at which a student should begin a physics major. Since there are at least six different levels of beginning students in this discipline, it is imperative that these students consult a member of the physics staff as soon as possible, preferably before their first semester in attendance.

Dated courses

Courses taken more than 10 years before graduation are subject to review and possible rejection by the department faculty.

Physics, Astronomy, and Materials Science Courses

Astronomy (AST) courses

AST 110 Astronomical Observations

An introductory laboratory course stressing the techniques of astronomical observation and analysis of observed data. Students will have an opportunity to use telescopes and instruments at the Baker Observatory.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Upon demand

AST 111 Astronomical Frontiers

A general interest course which will explore in detail, but nonmathematically, current subject areas of astronomy and astrophysics, such as quasars, black holes, and the origin of the universe, which attract the greatest attention in the media and among the general public.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

AST 112 Life in the Universe

An exploration of the prospects for life on other worlds and what that detection, or non-detection, means to humanity. Topics include the origin of elements in the Universe and how they form the building blocks of life, how conditions favorable for life can occur on planets, how life evolves, recent discoveries of exoplanets, and possible effects of the discovery of extraterrestrial life on society.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

AST 113 Modern Astronomy

General Education Course (Focus on Physical Sciences).

An introduction to our present knowledge of the nature of the universe, the galaxies, the stars, and the planets. A description of the natural laws and physical observations which are leading us to an understanding of our place in the cosmos. May only receive credit for one of AST 113, AST 114, or AST 115.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
3	3	0	Fall, Spring	ASTR 100 - Astronomy.

[Access the CORE 42 portal](#)

AST 114 Survey of Astronomy

General Education Course (Focus on Physical Sciences).

Historical and descriptive aspects of astronomy; topics of current interest related to space science. May only receive credit for one of AST 113, AST 114, or AST 115.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	4	0	Fall, Spring	ASTR 100 - Astronomy.

[Access the CORE 42 portal](#)

AST 115 Basic Astronomy

General Education Course (Focus on Physical Sciences).

Historical and descriptive aspects of astronomy; topics of current interest related to space science. Laboratory consists of observations with telescopes and of experiments pertinent to the field. May only receive credit for one of AST 113, AST 114, or AST 115.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	3	2	Fall, Spring	ASTR 100L - Astronomy with Lab.

[Access the CORE 42 portal](#)

AST 311 Astronomical Techniques

Prerequisite: MTH 136; and AST 113 or AST 114 or AST 115.

Intermediate level course; actual techniques of astronomical observation, methods of analysis of these observations, possible interpretations of acquired data. In laboratory, each student obtains observations for study in spectroscopy, photometry, and CCD imaging.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall (odd-numbered years)

AST 313 The New Solar Systems

Prerequisite: AST 113 or AST 114 or AST 115; and MTH 137 or MTH 138 or above.

A modern inquiry of the planets, comets, asteroids, and other members of our solar system and the planets of other stellar systems, based on recent interplanetary explorations and Earth-based observations. May only receive credit for one of AST 313, AST 513, or AST 613.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (even-numbered years)

AST 315 The Lives and Deaths of Stars

Prerequisite: AST 113 or AST 114 or AST 115; and MTH 137 or MTH 138 or above.

The structure of stars, processes at work in stellar atmospheres, the formation process, and the evolution of stars into white dwarfs, neutron stars, or black holes. May only receive credit for one of AST 315, AST 515, and AST 615.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (odd-numbered years)

AST 317 Our Universe, the Final Frontier

Prerequisite: AST 113 or AST 114 or AST 115; and MTH 137 or MTH 138 or above.

Modern views on the structure of the Universe: its past, present, and future. Topics include the structure and content of our Galaxy and other galaxies, clusters of galaxies, the Big Bang theory (including Inflation), and the eventual fate of our Universe. May only receive credit for one of AST 317, AST 517, and AST 617.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

AST 513 Solar and Extra-Solar Systems

Prerequisite: AST 113 or AST 114 or AST 115; and MTH 303.

Formation of planetary systems, planetary dynamics, and comparative planetology. Project required. May be taught concurrently with AST 313 and/or AST 613. May only receive credit for one of AST 313, AST 513, and AST 613.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (odd-numbered years)

AST 515 Stellar Structure and Evolution

Prerequisite: AST 113 or AST 114 or AST 115; and MTH 303.

Basic concepts of stellar structure, atmospheres, and evolution. Project required. May be taught concurrently with AST 315 and/or AST 615. May only receive credit for one of AST 315, AST 515, and AST 615.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (odd-numbered years)

AST 517 Galaxies and Cosmology

Prerequisite: AST 113 or AST 114 or AST 115; and MTH 303.

Study of galaxies and the Universe. Topics include the structure and content of our Galaxy and other galaxies, clusters of galaxies, the Big Bang theory (including Inflation), and the eventual fate of our Universe. Project required. May be taught concurrently with AST 317 and/or 617. May only receive credit for one of AST 317, AST 517, and AST 617.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

AST 613 Solar and Extra-Solar Systems

Prerequisite: AST 113 or AST 114 or AST 115; and MTH 303.

Formation of planetary systems, planetary dynamics, and comparative planetology. Project required. May be taught concurrently with AST 313 and/or AST 513. May only receive credit for one of AST 313, AST 513, and AST 613.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (odd-numbered years)

AST 615 Stellar Structure and Evolution

Prerequisite: AST 113 or AST 114 or AST 115; and MTH 303.

Basic concepts of stellar structure, atmospheres, and evolution. Project required. May be taught concurrently with AST 315 and/or AST 615. May only receive credit for one of AST 315, AST 515, and AST 615.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (odd-numbered years)

AST 617 Galaxies and Cosmology

Prerequisite: AST 113 or AST 114 or AST 115; and MTH 303.

Study of galaxies and the Universe. Topics include the structure and content of our Galaxy and other galaxies, clusters of galaxies, the Big Bang theory (including Inflation), and the eventual fate of our Universe. Project required. May be taught concurrently with AST 317 and/or 617. May only receive credit for one of AST 317, AST 517, and AST 617.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring (even-numbered years)

AST 711 Astronomy for Teachers

Theory and techniques of observational astronomy.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Upon demand

AST 719 Advanced Astronomical Techniques

Advanced astronomical observational techniques in imaging, photometry, spectroscopy, and astrometry. Techniques of data and error analysis. Laboratory portion will include obtaining and analyzing observational data.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall (odd-numbered years)

Materials Science (MAT) courses

MAT 509 Special Topics in Materials Science

Prerequisite: permission of instructor.

Variable content, variable credit course. Topics to be chosen from current areas of interest in Materials Science. May be repeated to a total of 6 hours with a different topic. May be taught concurrently with MAT 609. Cannot receive credit for both MAT 609 and MAT 509.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

MAT 514 Techniques in Electron Microscopy

An introduction to techniques in electron microscopy with a primary emphasis on scanning electron microscopy and X-ray microanalysis. Theoretical background and experimental procedures involve both techniques but the

major focus will be on obtaining secondary electron images. Additional coverage will include sample preparation, back-scattered electron imaging, X-ray mapping, and related image processing techniques. May be taught concurrently with MAT 614. Cannot receive credit for both MAT 514 and MAT 614.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall (even-numbered years)

MAT 540 Thermodynamics of Materials

Prerequisite: PHY 343 or CHM 506.

Review of classical thermodynamics, equilibrium in thermodynamic systems, the statistical interpretation of entropy, unary and multi-component systems, thermodynamics of phase diagrams and phase equilibrium. May be taught concurrently with MAT 640. Cannot receive credit for both MAT 540 and MAT 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MAT 550 Introduction to Materials Science

Prerequisite: PHY 375 or CHM 507.

Investigation of the relationships that exist between the structure, properties, processing and performance of materials. Different types of materials will be studied with a special emphasis on polymers and semiconductors. Structure-property correlations, including electronic, thermal, and mechanical properties, will be presented for these materials. May be taught concurrently with MAT 651. Cannot receive credit for both MAT 550 and MAT 651.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MAT 580 Structure of Solids

Prerequisite: PHY 575 or CHM 507.

Review of quantum mechanics, followed by an in-depth study of crystal structures, energy band structures in solids, lattice dynamics, and a survey of the physical properties of solids. May be taught concurrently with MAT 681. Cannot receive credit for both MAT 580 and MAT 681.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MAT 609 Special Topics in Materials Science

Prerequisite: permission of instructor.

Variable content course. Topics to be chosen from current areas of interest in Materials Science. May be repeated to a total of 6 hours with a different topic. May be taught concurrently with MAT 509. Cannot receive credit for both MAT 509 and MAT 609.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

MAT 614 Techniques in Electron Microscopy

An introduction to techniques in electron microscopy with a primary emphasis on scanning electron microscopy and X-ray microanalysis. Theoretical background and experimental procedures involve both techniques but the major focus will be on obtaining secondary electron images. Additional coverage will include sample preparation, back-scattered electron imaging, X-ray mapping, and related image processing techniques. May be taught concurrently with MAT 514. Cannot receive credit for both MAT 514 and MAT 614.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall (even-numbered years)

MAT 640 Thermodynamics of Materials

Prerequisite: PHY 343 or CHM 506 or CHM 606.

Review of classical thermodynamics, equilibrium in thermodynamic systems, the statistical interpretation of entropy, unary and multi-component systems, thermodynamics of phase diagrams and phase equilibrium. May be taught concurrently with MAT 540. Cannot receive credit for both MAT 540 and MAT 640.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MAT 651 Introduction to Materials Science

Prerequisite: PHY 375 or CHM 507 or CHM 607.

Investigation of the relationships that exist between the structure, properties, processing and performance of materials. Different types of materials will be studied with a special emphasis on polymers and semiconductors. Structure-property correlations, including electronic, thermal, and mechanical properties, will be presented for these materials. May be taught concurrently with MAT 550. Cannot receive credit for both MAT 550 and MAT 651.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MAT 681 Structure of Solids

Prerequisite: PHY 375 or CHM 507 or CHM 607.

Review of quantum mechanics, followed by an in-depth study of crystal structures, energy band structures in solids, lattice dynamics, and a survey of the physical properties of solids. May be taught concurrently with MAT 580. Cannot receive credit for both MAT 580 and MAT 681.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

MAT 720 Advanced Quantum Mechanics

Advanced topics in quantum mechanics including variational methods, approximation techniques, time-independent and time-dependent perturbation theory, second quantization, and the interactions of light with matter.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MAT 750 Experimental Design

Laboratory techniques necessary for the development of instrumentation. Topics will include elementary computer interfacing, prototype design, mechanical and electronic construction, and reliability testing. The student will develop, design and build a test instrument and study each of the above topics during this process.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Fall

MAT 758 Optoelectronic Materials

Course includes the study of advanced electronic properties of materials, lattice dynamics, and a survey of the optical-electronic interactions in materials.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MAT 770 Synthesis and Characterization of Advanced Materials

Experimental techniques in the synthesis of advanced materials applications in electronics and energy technology. The mechanism of growth of thin films using different deposition techniques will be studied. Structural and physical characterization of the thin films will also be studied. Experimental methods including physical vapor deposition, X-ray diffraction, and optical spectroscopies and analysis will be studied.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Spring

MAT 780 Polymer Preparation and Characterization

Preparation of polymers, including the techniques of condensation polymerization, free radical polymerization, and if time permits, plasma polymerization. Characterization experiments will be viscosity measurements, differential scanning calorimetry, and thermal gravimetric analysis. Film preparation including spin coating, aspiration, and doctor blade systems will also be investigated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Spring

MAT 790 Statistical Applications in Materials Science

Selective topics in materials science important to the design, testing, fabrication, and manufacture of materials whose underlying theme is mathematical modeling based in statistical methods. The topics include mass transport in solids, atomic diffusion on surfaces, adsorption and desorption on surfaces, epitaxial growth, degradation of materials, queuing theory, and operations research.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

MAT 792 Introduction to Computational Materials Science

Prerequisite: PHY 575 or PHY 675 or equivalent Introduction to Quantum Mechanics course.

The course aims to provide an introduction to and practical applications in high-performance computing as implemented in atomistic-based computational materials science. Topics include electronic structure calculations, classical molecular dynamics, Monte-Carlo simulations and crystal structure predictions for materials processes and/or fundamental materials properties.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (odd-numbered years)

MAT 796 Science Internship

Completion of an internship project (480 hours) at a discipline-related business, nonprofit organization, or government agency, approved and supervised by both the departmental and internship advisors. Includes a formal report in the appropriate professional format, and an oral presentation at an approved venue. Graded Pass/Not Pass only. No more than 6 hours may count toward a masters degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

MAT 798 Seminar in Materials Science

Prerequisite: candidate for the MS degree in Materials Science.

Selected topics in materials science of a theoretical, experimental, or applied nature with an emphasis on recent developments and their impact. May be repeated for a maximum of 4 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Spring

MAT 799 Research in Materials Science

Prerequisite: permission.

Supervised research in areas of materials science. May be repeated, but no more than 12 hours may be counted toward the MS degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Physics (PHY) courses

PHY 100 Survey of Physics with Laboratory

General Education Course (Focus on Physical Sciences).

Description of nature as seen by physicists; effects this description and new scientific discoveries will have on society. Laboratories consist of discussions of current relations between science and society, demonstration of precise experimental apparatus, some actual involvement with the experimental method.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	3	2	Fall	PHYS 100L - Essentials in Physics with Lab.

[Access the CORE 42 portal](#)

PHY 101 Physics by Inquiry for Educators

Prerequisite: open only to Early Childhood, Elementary, Middle School, and Special Education majors.

General Education Course (Focus on Physical Sciences).

Laboratory experiences model inquiry teaching methods appropriate for use in early childhood, elementary and middle school science lessons. Science content includes mechanics, optics, heat, electricity and magnetism, properties of materials. Students will increase their understanding of the nature of science.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	2	4	Fall, Spring	PHYS 100LT - Essentials in Physics with Lab-Teaching.

[Access the CORE 42 portal](#)

PHY 110 Big Ideas in Physics

Topics may include Big Bang Theory, Quantum Theory, String Theory, Special and General Relativity, High-Energy (particle accelerator) Physics, Exoplanets and Life in the Universe. Also includes an introduction to the profession, culture, and discipline of physics, astronomy, and materials science and the facilities, faculty and current research at Missouri State University. This course is primarily for those either considering or intending to pursue a career in physics, astronomy, and/or materials science. Graded Pass/Not Pass only.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Fall

PHY 123 Introduction to Physics I

Prerequisite: C or better in MTH 136 or MTH 287 or eligibility for enrollment in MTH 261.

General Education Course (Focus on Physical Sciences).

An introduction to physical theories covering the content areas of mechanics, fluids, sound, and thermodynamics. A knowledge of the laws of Physics will help the student better understand the world and how these laws can be used to make informed decisions to improve society. A grade of "C" or better is required in this course to take PHY 124.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
4	3	2	Fall, Spring	PHYS 150L - Physics I with Lab.

[Access the CORE 42 portal](#)

PHY 124 Introduction to Physics II

Prerequisite: "C" grade or better in PHY 123.

A continuation of PHY 123 in the content areas of electricity and magnetism, electronics, and optics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	3	2	Fall, Spring

PHY 131 Mini Physics

A course whose various sections treat physics or astronomy from a contemporary, historical and/or theoretical point of view. Students should check the current registration schedule to determine the topic associated with

each section being offered. Course may be repeated, provided topic and title are different, to a total of 5 hours. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

PHY 141 Mini Physics Laboratory

A laboratory course explaining the use of scientific equipment and experimental procedures. Students should check the current registration schedule to determine the topic and titles for any given semester. Since the content of this course varies from semester to semester, it may be repeated, provided the topic title is different, to a total of 5 hours. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

PHY 203 Foundations of Physics I

Prerequisite: MTH 261 (completed); or MTH 261 (concurrent enrollment) and ACT mathematics score equal to more than 29.

General Education Course (Focus on Physical Sciences).

Students must be skilled in using the Microsoft Excel spreadsheet program (see the Department of Physics, Astronomy, and Materials Science for a list of required spreadsheet skills). First of two semesters in basic calculus physics. Lecture and laboratory topics covered include mechanics, waves, and thermodynamics. A grade of "C" or better is required in this course to take PHY 204.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered	CORE 42 (MOTR) equivalent
5	3	4	Fall, Spring	PHYS 200L - Advanced Physics I with Lab.

[Access the CORE 42 portal](#)

PHY 204 Foundations of Physics II

Prerequisite: C grade or better in PHY 203; and; either MTH 280 or MTH 288 or concurrent enrollment in MTH 280.

Students must be skilled in using the Microsoft Excel spreadsheet program (see the Department of Physics, Astronomy, and Materials Science for a list of required spreadsheet skills). Continuation of PHY 203 with lecture and laboratories covering electricity, magnetism, and optics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
5	3	4	Fall, Spring

PHY 220 Introduction to Structure and Logic of Digital Computers

Prerequisite: eligibility for MTH 261.

Introduction to the internal structures of digital computers; design of gates, flipflops, registers, and memories to perform operations on numerical and other data represented in binary form. Laboratory uses logical blocks for experiments with combinational and sequential networks and simple digital systems.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
4	2	4	Fall, Spring

PHY 233 Engineering Statics

Prerequisite: C grade or better in MTH 280 and in PHY 203.

Application of mechanics to equilibrium problems; topics include principles of center of mass, resultant force, friction, moment of inertia, torque, etc. Course does not satisfy any requirement for a physics major or minor.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall, Spring

PHY 252 Introduction to Circuit Analysis

Prerequisite: MTH 280.

A study of Kirchoff's current and voltage laws, resistive circuits with DC sources, network analysis by node voltages and mesh currents, Thevenin's and Norton's theorems, and first order circuits.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PHY 291 Introduction to Computational Physics

Prerequisite: MTH 280.

Numerical and computer methods related to physics modeling and data analysis. Introduction of physics applications using symbolic, matrix, and spreadsheet software including programming. Programming applied directly to physical simulations. Recent advances in physics-related computing.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PHY 300 Service Learning in Physics

Prerequisite: 30 hours and concurrent registration in a Physics course designated as a service learning offering.

This service component for an existing course incorporates community service with classroom instruction in Physics to provide an integrative learning experience that addresses the practice of citizenship and promotes an awareness of and participation in public affairs. Includes 40 hours of service that benefits an external community organization, agency, or public service provider. Approved service placements and assignments will vary depending on the specific course topic and learning objectives; a list of approved placements and assignments is available from the instructor and the Citizenship and Service Learning Office. May be repeated.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1			Fall, Spring

PHY 319 Mathematics for Science and Engineering I

Prerequisite: MTH 302.

A study of mathematical techniques widely used in science and engineering. Topics covered include series solutions to differential equations, Fourier series and transforms, vector calculus, matrix algebra, complex functions, and partial differential equations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PHY 325 Experimental Instrumentation

Prerequisite: PHY 204.

The use of instrumentation to acquire and process data in physics and astronomy. Equipment will include multimeters, oscilloscopes, filters, lock-in amplifiers, detectors and related systems. The laboratory work will cover direct applications of all equipment and techniques covered in lecture.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Spring

PHY 333 Intermediate Mechanics

Prerequisite: PHY 203 and PHY 319 and MTH 303.

Classical mechanics of particles. Topics include kinematics, dynamics, oscillations, central forces, conservation theorems, scattering, and an introduction to the Lagrangian and Hamiltonian formulations of mechanics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PHY 343 Thermal Physics

Prerequisite: PHY 203; and MTH 302 or concurrent enrollment.

The macroscopic laws of thermodynamics and the microscopic foundation for those laws. Topics include the microcanonical, canonical, and grand canonical ensembles; Maxwell-Boltzmann, Fermi-Dirac, and Bose-Einstein statistics; equation of state, thermodynamic potentials, Maxwell's relations, and phase transitions.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PHY 351 Circuit, Signals, and Controls

Review of circuits. Transfer functions, passive and active filters, and signal processing. Amplifiers including classes, operational, differential and instrumentation, logic, number systems, and mixed-signal electronics. Digital and analog experimental sensing and control. Further use of circuit modeling software.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

PHY 353 Electricity and Magnetism

Prerequisite: PHY 204 and PHY 319.

An introduction to the theory of electric and magnetic fields and their sources. Topics include electrostatic and magnetostatic fields in a vacuum, electric potential, magnetic vector potential, electromagnetic fields, and Maxwell's equations.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PHY 373 Radiation Physics

Prerequisite: PHY 124 or PHY 204.

Theory of and measurement techniques for electromagnetic and particulate radiation.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	2	2	Fall

PHY 375 Modern Physics

Prerequisite: PHY 204; and MTH 302 or concurrent enrollment.

An introduction to the major developments in physics during the twentieth century. Topics include the special theory of relativity, the experimental basis for quantum mechanics, wave-particle duality, introductory quantum mechanics of one-dimensional systems, nuclear physics, and elementary particle physics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PHY 385 Experiments in Modern Physics

Prerequisite: PHY 375.

A study of basic experimental techniques, data analysis, and analysis of experimental errors. Laboratory experiments chosen from physical phenomena discovered in the twentieth century and may include photoelectric effect, Hall effect, Frank-Hertz experiment, electron spin resonance, and others. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Spring

PHY 386 Undergraduate Research I

Prerequisite: permission.

An introduction to research that requires the selection of a suitable research project, completing a written feasibility study for the proposed project, and making all necessary preparations for the actual pursuit of the project in PHY 486. Graded Pass/Not Pass only. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	1	0	Fall, Spring

PHY 390 Interdisciplinary Topics in Physics

Prerequisite: permission.

Topics of interdisciplinary nature; usually team-taught by members of the disciplines involved. Typical topics chosen from: space physics (e.g. lunar studies), chemical physics (e.g. spectroscopy), biophysics, geophysics, mathematical physics, etc. Since credit and topics vary, the course may be repeated to a total of 6 hours. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

PHY 392 Mathematics for Science and Engineering II

Prerequisite: PHY 319.

A continuation of PHY 319 with topics selected from complex integration, numerical solutions to differential equations, special functions, probability distribution functions, and group theory.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Upon demand

PHY 399 Cooperative Education in Physics

Prerequisite: acceptance into the Cooperative Education Program and permission.

The opportunity to earn academic credit in a planned learning process that integrates academic training with a supervised work experience. This is a variable content course that may be repeated to a total of 6 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PHY 409 Selected Topics in Physics

Prerequisite: permission.

Advanced topics in physics which may vary from year to year. Some typical topics: solid state, nuclear structure, plasmas, fluids, astrophysics, applied group theory. Inter-disciplinary topics such as atmospheric physics and spectroscopy might also be offered. Since credit and topics vary, the course may be repeated to a total of 6 hours. Variable content course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-5			Upon demand

PHY 476 Introduction to Nuclear and Particle Physics

Prerequisite: PHY 319 and PHY 375 and MTH 303.

Studies subatomic structure, basic constituents and their mutual interactions. Topics include nuclei, radioactivity, interactions of radiation with matter, particle detection, accelerators, nuclear models and reactions, and classification and interactions of quarks and other elementary particles.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Spring

PHY 486 Undergraduate Research II

Prerequisite: PHY 386.

A continuation of PHY 386 in which the feasibility study from PHY 386 and the research project outcome are to be combined in a written report following a format required for journal publication. An oral presentation of this work will be reviewed by the faculty. Graded Pass/Not Pass only. Public Affairs Capstone Experience course.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1	0	2	Fall, Spring

PHY 495 Readings in Physics

Prerequisite: permission of department head.

Independent reading; topics not offered in regular courses. Course may be repeated to a total of 4 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-4			Upon demand

PHY 499 Honors Project in Physics

Prerequisite: permission of department head.

Enrollment limited to students of distinguished capability and industry. Students must consult with the physics and astronomy staff concerning their proposed problem prior to enrollment for this course. This course may be repeated to a total of 5 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PHY 501 Physics and Astronomy By Inquiry

Prerequisite: 70 hours including PHY 101.

This course is a continuation of PHY 101. Additional topics in mechanics, optics, heat, electricity and magnetism will be covered. The course will also include an introduction to Astronomy. Concepts will be explored using the inquiry approach. Will not count towards a major or minor in physics. May be taught concurrently with PHY 602. Cannot receive credit for both PHY 501 and PHY 602.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall

PHY 509 Special Topics in Physics and Astronomy

Prerequisite: permission.

Variable content, variable credit course. Topics to be chosen from current areas of interest. May be repeated to a total of 6 hours with different topic. May be taught concurrently with PHY 609. Cannot receive credit for both PHY 609 and PHY 509.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PHY 575 Quantum Mechanics

Prerequisite: PHY 375 or CHM 507.

A mathematical development of the principles of quantum mechanics and their application to selected systems. Topics include Schrodinger's equation, operators, Heisenberg uncertainty principle, angular momentum, and applications, including the hydrogen atom. May be taught concurrently with PHY 675. Cannot receive credit for both PHY 575 and PHY 675.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PHY 591 Computational Methods and Data Analysis in Physical Sciences

Prerequisite: PHY 291 or permission of instructor.

Computational techniques related to physical sciences including techniques used for data analysis. An exploration of scientific operating systems, programs used for analysis and simulations, and methods for analyzing data and producing simulations. May be taught concurrently with PHY 692. Cannot receive credit for both PHY 591 and PHY 692.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (odd-numbered years)

PHY 602 Physics and Astronomy By Inquiry

Prerequisite: PHY 101.

This course is a continuation of PHY 101. Additional topics in mechanics, optics, heat, electricity and magnetism will be covered. The course will also include an introduction to Astronomy. Concepts will be explored using the inquiry approach. Will not count towards a major or minor in physics. May be taught concurrently with PHY 501. Cannot receive credit for both PHY 501 and PHY 602.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	1	2	Fall

PHY 609 Special Topics in Physics and Astronomy

Prerequisite: permission.

Variable content, variable credit course. Topics to be chosen from current areas of interest. May be repeated to a total of 6 hours with different topic. May be taught concurrently with PHY 509. Cannot receive credit for both PHY 609 and PHY 509.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PHY 675 Quantum Mechanics

Prerequisite: PHY 375 or CHM 607.

A mathematical development of the principles of quantum mechanics and their application to selected systems. Topics include Schrodinger's equation, operators, Heisenberg uncertainty principle, angular momentum, and applications, including the hydrogen atom. May be taught concurrently with PHY 575. Cannot receive credit for both PHY 575 and PHY 675.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall

PHY 692 Computational Methods and Data Analysis in Physical Sciences

Prerequisite: PHY 291 or permission of instructor.

Computational techniques related to physical sciences including techniques used for data analysis. An exploration of scientific operating systems, programs used for analysis and simulations, and methods for analyzing data and producing simulations. May be taught concurrently with PHY 591. Cannot receive credit for both PHY 591 and PHY 692.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	3	0	Fall (odd-numbered years)

PHY 701 Workshop on Topical Issues in Science Education

Prerequisite: permission.

Workshop to upgrade understanding of selected topics in science, and improve elementary, middle school and/or secondary science teaching. Each workshop will include performance and analysis of appropriate investigations to enhance understanding of the selected topics. Number of class hours determined by semester hours of credit. Variable content course. May be repeated to a maximum of 6 hours provided the topics are different.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-3			Upon demand

PHY 785 Physics Laboratory for Teachers

Prerequisite: permission.

Performance and analysis of secondary laboratory experiments in physics.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
3	1	4	Upon demand

PHY 790 Seminar in Physics

Prerequisite: permission.

Extensive paper on agreed topic in physics or astronomy to be read before staff seminars. May be repeated to a total of 4 hours.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
2	2	0	Upon demand

PHY 796 Science Internship

Completion of an internship project (80 hours/credit hour) at a discipline-related business, nonprofit organization, or government agency, approved and supervised by both the departmental and internship advisors. Includes a formal report in the appropriate professional format, and an oral presentation at an approved venue. Graded Pass/Not Pass only. No more than 6 hours may count toward a masters degree.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Fall, Spring, Summer

PHY 799 Research in Natural and Applied Sciences

Prerequisite: permission of department head.

Supervised research in the natural and applied sciences. May be repeated, but no more than 12 hours may be counted toward the masters degree. Cannot be applied toward the MS degree in Materials Science.

Credit hours	Lecture contact hours	Lab contact hours	Typically offered
1-6			Upon demand

Computational Science Certificate

Computational Science

This certificate provides students with a background in the application of computer code to the solution of problems of interest to those in science, mathematics, or engineering. Physical processes that are intractable to an analytical approach, can be studied and simulated using the algorithms and techniques developed in this certificate program.

Program requirements (12 hours)

1. [PHY 291\(3\)](#), [PHY 591\(3\)](#), [CSC 130\(3\)](#).
2. Three additional hours approved by certificate advisor.
3. All candidates must satisfy the [General University Certificate Requirements](#).

Major requirements (65-69 hours):

Major core (56 hours):

1. Specific General Education requirement: [ENG 321\(3\)](#).
2. [PHY 110\(2\)](#), [203\(5\)](#), [204\(5\)](#), [291\(3\)](#), [319\(3\)](#), [325\(3\)](#), [333\(3\)](#), [343\(3\)](#), [353\(3\)](#), [375\(3\)](#), [385\(2\)](#), [386\(1\)](#), [486\(1\)](#).
3. Related requirements: [MTH 261\(5\)](#), [280\(5\)](#), [302\(3\)](#), [303\(3\)](#).
4. Public Affairs Capstone Experience will be fulfilled by completion of [PHY 385\(2\)](#), [386\(1\)](#) and [486\(1\)](#).

Complete one of the following option (9-13 hours):

Astronomy and Astrophysics option (13 hours):

1. [AST 113\(3\)](#), [114\(4\)](#) or [115\(4\)](#).
2. Two courses from: [AST 311\(3\)](#), [313\(3\)](#), [315\(3\)](#), [317\(3\)](#).

Career Prep Physics option (9 hours):

1. [PHY 351\(3\)](#).
2. Either [PHY 575\(3\)](#) or [MAT 540\(3\)](#).
3. Three hours of 400 or 500 level PHY, MAT, or CHM coursework.

Materials Physics option (12 hours):

1. [MAT 540\(3\)](#), [550\(3\)](#), [580\(3\)](#).
2. [PHY 575\(3\)](#).

Teaching Prep Physics option (13 hours):

1. [AST 115\(4\)](#), [GRY 108\(3\)](#).
2. Six hours from any 300 or 400 or 500 level courses from AST, MAT or PHY coursework excluding PHY 501.

University level requirements:

1. [General Education Program and Requirements](#)
2. [General Baccalaureate Degree Requirements](#)

Minor(s)

Physics

Bachelor of Science

1. [PHY 123\(4\)](#) or [203\(5\)](#); [PHY 124\(4\)](#) or [204\(5\)](#).
2. Additional 10 hours of electives from any other physics courses above PHY 124 except PHY 203 and 204.
Courses with mathematics prerequisites no higher than required in item 1: [PHY 131\(1\)](#), [141\(1\)](#), [220\(4\)](#).

Accelerated graduate program in Materials Science

Eligible Missouri State undergraduate students may apply for admission to the Materials Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of nine hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-materials-science.htm\)](https://graduate.missouristate.edu/Catalog/prog-materials-science.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(/Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate program in Natural and Applied Science

Eligible Missouri State undergraduate students may apply for admission to the Master of Natural and Applied Science program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate degree (Mixed Credit). Refer to the [Graduate Catalog \(https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm\)](https://graduate.missouristate.edu/Catalog/prog-natural-and-applied-science.htm) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes \(/Registrar/mixedcredit.htm\)](#) for additional information and procedures for obtaining permission for Mixed Credit.

Accelerated graduate certificate in Science Content

Eligible Missouri State undergraduate students may apply for admission to the Science Content certificate program and begin taking graduate course work as they complete the work for a bachelor's degree. A maximum of 12 hours of graduate credit may be counted toward both the undergraduate and graduate certificate (Mixed Credit). Refer to the [Graduate Catalog](https://graduate.missouristate.edu/Catalog/prog-science-content.htm) (<https://graduate.missouristate.edu/Catalog/prog-science-content.htm>) for specific admission requirements.

Refer to [Undergraduate Students Taking Graduate Classes](https://www.missouristate.edu/Registrar/mixedcredit.htm) ([/Registrar/mixedcredit.htm](https://www.missouristate.edu/Registrar/mixedcredit.htm)) for additional information and procedures for obtaining permission for Mixed Credit.

Graduate degrees offered (Banner degree code in parenthesis)

- Doctor of Audiology (AuD)
- Doctor of Defense and Strategic Studies (DDSS)
- Doctor of Nursing Practice (DNP)
- Doctor of Nurse Anesthesia Practice (DNAP)
- Doctor of Physical Therapy (DPT)
- Master of Accountancy (MAcc)
- Master of Applied Second Language Acquisition (MASLA)
- Master of Art Education (MAE)
- Master of Arts (MA)
- Master of Arts in Teaching (MAT)
- Master of Arts in Teaching and Learning (MATL)
- Master of Athletic Training (MATC)
- Master of Business Administration (MBA)
- Master of Fine Arts (MFA)
- Master of Global Studies (MGS)
- Master of Health Administration (MHA)
- Master of Music (MM)
- Master of Natural and Applied Science (MNAS)
- Master of Occupation Therapy (MOT)
- Master of Professional Studies (MPS)
- Master of Public Administration (MPA)
- Master of Public Health (MPH)
- Master of Science (MS)
- Master of Science in Education (MSEd)

- Master of Science in Nursing (MSN)
- Master of Social Work (MSW)
- Specialist in Education (EdS)

Graduate programs of study

- Accountancy (MAcc)
- Agriculture (MS)
- Applied Behavior Analysis (MS)
- Applied Second Language Acquisition (MASLA)
- Art Education (MAE)
- Athletic Training (MATC, MS)
- Audiology (AuD)
- Biology (MS)
- Business Administration (MBA)
- Cell and Molecular Biology (MS)
- Chemistry (MS)
- Child Life Studies (MS)
- Communication (MA)
- Communication Sciences and Disorders (MS) *Options: Education of the Deaf and Hard of Hearing; Speech-Language Pathology*
- Computer Science (MS)
- Counseling (MS) *Options: Clinical Mental Health Counseling; School Counseling*
- Criminology and Criminal Justice (MS)
- Cybersecurity (MS)
- Defense and Strategic Studies (DDSS)
- Defense and Strategic Studies (MS) *Options: General; Weapons of Mass Destruction Studies*
- DNP-Family Nurse Practitioner: BSN to DNP (DNP)
- Dramatic Writing (MFA)
- Early Childhood and Family Development (MS)
- Early Childhood Special Education (MSEd)
- Educational Administration (MSEd) *Options: Elementary; Secondary*
- Educational Administration (EdS) *Options: Elementary Principal; Secondary Principal; Superintendent*
- Educational Technology (MSEd)
- Elementary Education (MSEd)
- English (MA)
- Geography and Geology (MS) *Options: Geography; Geology; Geospatial Science; Planning*
- Global Studies (MGS)
- Health Administration (MHA)
- Health Promotion and Wellness Management (MS)
- History (MA)
- Information Technology (MS)
- Interdisciplinary Studies (MS)
- Kinesiology (MS)
- Literacy (MSEd)
- Materials Science (MS)
- Mathematics (MS)
- Music (MM)
- Natural and Applied Science (MNAS)

- Nurse Anesthesia Practice (DNAP)
- Nursing (MSN) *Options: Family Nurse Practitioner; Nurse Educator; Population Health Leadership*
- Nursing Practice, Doctor of (DNP) *Options: Post master's DNP, BSN to DPN*
- Nutrition and Dietetics (MS)
- Occupational Therapy (MOT)
- Pharmacy (PharmD) *cooperative degree with the University of Missouri-Kansas City. Degree awarded by the University of Missouri-Kansas City.*
- Physical Therapy (DPT)
- Physician Assistant Studies (MS)
- Plant Science (MS)
- Professional Studies (MPS)
- Project Management (MS)
- Psychology (MS) *Options: Clinical; Experimental; Industrial/Organizational*
- Public Administration (MPA)
- Public Health (MPH)
- Religious Studies (MA)
- Secondary Education (MSEd) *Options: Agriculture; Biology; Chemistry; Earth Science; English; Family and Consumer Sciences; Geography; History; Mathematics; Natural Science; Physical Education; Physics; Social Science*
- Social Work (MSW)
- Special Education (MSEd) *Options: Autism Spectrum Disorders; Blindness and Low Vision; Developmental Disabilities; Orientation and Mobility; Special Education Alternative Certification Track*
- Special Education and Assessment (EdS)
- Student Affairs in Higher Education (MS)
- Teacher Leadership (EdS)
- Teaching (MAT)
- Teaching and Learning (MATL)
- Visual Studies (MFA)
- Writing (MA)

Accelerated graduate programs

The accelerated graduate programs provides a transition that enables undergraduate students to begin taking graduate course work as they complete the work for a bachelor's degree. Students must apply and be accepted to the accelerated graduate program before enrolling in any course that is to apply to both the undergraduate and graduate degrees (Mixed Credit). For more information, refer to the [Undergraduate Students Taking Graduate Classes Policy \(/Registrar/mixedcredit.htm\)](https://www.missouristate.edu/Registrar/mixedcredit.htm).
